YAMAGA TSURIGU Co., LTD. / SINCE 1990
YAMAGA Blanks / SINCE 2007
Made in Japan

A rod which creates a flash of inspiration.

Fishing as a hobby can be categorized as a whole whereby, we catch fish with a rod, line and hook. However, in reality, various styles, species and equipment exist throughout the world.

If you are to further pursue a single species, one would need to select specific equipment and techniques, but when you take into account the human element of style and preference, there are no clear answers to what is the best equipment. That is why we are so captivated by fishing and why we pursue our targets as a lifelong hobby.

The means to get information has improved in the modern age and it has become tremendously easier to search for styles and methods to catch fish. Although, this overwhelming information may help you broaden your fishing, it may also limit your imagination and originality.

It is vital for anglers to have this “flash of inspiration” in the field, especially for the lure fishing game, and too much information may confuse and lead you into uncertainty. We get a lot of feedback from anglers around the world here at Yamaga Blanks and are astonished by the high level of creativity and originality. This is proof that anglers have the ability to observe the natural environment they are fishing in and are not tied down by stereotypes.

It may not be possible to include all aspects of anglers’ experiences and ideas into our rod design, but we believe that it is possible to create rods which do not interfere with your creativity.

What we desire in our rods is “user-friendly equipment”. Strong, light and easy to cast are simple values in a rod which will allow anglers to hone their senses in the field and focus on the task ahead.

Each rod has a specific concept and is capable of responding to the anglers creativity. We hope our rods will help anglers pursue their goals and feel like it is part of you. There is nothing more pleasing to us than anglers using our rods and to experience that “flash of inspiration” in the field.

2021 NEW SERIES

EARLY
ALL CASTING

- "for Surf"
- "for Rock"
- "for Seabass"
- "for Boat"
- "for Mobile"

As of 2021, the lineup of Yamaga Blanks shore casting rods, "EARLY" series have been restructured and reborn with a large number of new models. The Seabass models of "EARLY PLUS" will be categorized as "ALL CASTING" models and these new models will have superb castabilities as did the previous models since the founding of Yamaga Blanks. We have sought after the most important aspect for the lure game, "cast farther" and "cast more accurately". Our lineup of rods are built with not only these vital values sought after in the shore casting game, but also controllability, highly responsive and powerful blank for anglers to pursue their methods and styles of fishing. In addition, the vast lineup of the new EARLY series are divided into different genre depending on situations and will only have simple specifications written on the blank so we do not limit the anglers options and creativity.

There are 5 models in the "for-surf" series, 3 models "for-Rock" and 2 models "for-Seabass". Furthermore, we are currently developing the "for-Mobile" which is a multi piece travel rod as well as the "for-Boat" aimed for the boat casting game. The new EARLY models possess the ability to deliver the lure, allow anglers to maneuver the rod to induce the bite and transmit the smallest signals of water pressure and bites through the sensitive blank.

EARLY ALL

EARLY for Surf /5 Line up

Surf Casting

The EARLY for Surf are long distance casting models developed to meet the needs of surfcasting. With the concept focusing on long distance casting, the light weight blank and light casting feel will allow anglers to maintain their concentration throughout the day.

For the 2021 season, we have added 2 new models to the vast lineup. The 105MMH/B which is equipped with a highly responsive feel even at a long range and the 99ML which is ideal for anglers who prefer a more fineness style.

With great casting ability and highly sensitive characteristics, the EARLY for Surf models are not only ideal for the flat fish game targeting Flounders and Flatheads with minnows, metal jigs and soft plastics, but also great to target seabass and Blackfin Seabass off the rocks, small blue-runners, monstrous Jew fish and the northern sea Trout.

Although these are designed mainly for the surf game, its versatility will enable anglers to utilize these models for various games requiring long distance casting. The blanks have been built up with a sharp casting feel, the power to stop the thrashing fish and highly sensitive to meet the needs of the ever-changing surf casting game. We hope you can experience our creation in the vast field.

EARLY 99ML for Surf

2021 NEW 99ML for Surf

ROD SPEC Lure: 7-35g Line: PE 0.8-1.5

- Length: 2980mm(CL:1525mm) Weight: 155g

EARLY
for Rock

EARLY for Rock /3 Line up

Rock Fish Game

In the pursuit to develop the Early for Rock, we asked ourselves "What is the rock-fish game?". The blanks not only have strength and lightness but also have a highly efficient ability to restore its original form. In other words, the bent blank will flex back to its straight form, peeling the fish off the bottom and other structures efficiently.

The stiff yet delicate tips are highly sensitive to any changes in sea conditions while being versatile, enabling anglers to utilize various types of rigs and style of fishing.

The rock fish game is changing and evolving every day and the various different species of rock fish inhabiting different parts of Japan and the seas around the world all have unique characteristics. You cannot simply expect to catch these rock fish flat from the bottom. There are various tackle settings, different methods and rigs anglers endlessly try. This is probably the reason why so many anglers are captivated by these species.

We are proud to present the 3 models with outstanding casting abilities, lure controllability and power to match you target rock fish.

EARLY 86MH for Rock

2021 NEW 86MH for Rock

ROD SPEC Lure: 7-40g Line: PE 1-2

- Length: 2590mm(CL:1325mm) Weight: 123g
- Guide: SiC-S stainless frame K guide (Fuji)
- Section: 2pcs (Put over Ferrule) Reel seat: VSS16(Fuji)
- Suitable reel size D:LT3000~4000C / S:C3000~4000

More details

The blank for this model is exceptionally well balanced for both casting and maneuvering while also possessing tremendous sensitivity. Anglers will not only be able to utilize swimming actions of jig-head rigs but also utilize Texas rigs and feel for bottom structures and material. The adequately stiff belly section will transmit your bite and rip the fish off the bottom and structures right away. This sharp blank is also suitable for use in the "wind game" targeting hair-tails and "jerking methods" productive for seabass.

Price:

Field: Piers • Rocks

2021 NEW 104H for Rock

ROD SPEC Lure: 15-60g Line: PE 1-3

- Length: 3160mm(CL:1615mm) Weight: 205g
- Guide: SiC-S stainless frame K guide (Fuji)
- Section: 2pcs (Put over Ferrule) Reel seat: DPS18(Fuji)
- Suitable reel size -Up to PE2 D: LT4000C~6000 / S: 4000~C5000 -PE3 D: 3500~4000 / S: SW4000~6000

More details

This long length high powered model was designed for casting distance and sensitivity. The "soft" aspect of the blank can be attributed to the line settings (PE#), while the "hard" can be felt in its ability to take the load of heavy weight rigs and max drag settings. Anglers will be able to reach those grounds where others have yet to reach. You will be able to utilize various rigs ranging from soft plastics, swim baits, metal jigs and even minnows above 14cm to go head to head with monstrous rock fish and other blue-runners that you may randomly encounter.

EARLY 97MMH for Seabass

EARLY
for Seabass

EARLY for Seabass /2 Line up

Seabass Game

What we seek in a seabass rod at Yamaga Blanks is "standard characteristics" for anyone to easily use. Our designs focus on tolerant release point for everyone to be able to cast long distances with the least amount of effort while retaining the lightness for all day long casting and sensitivity to capitalize on the smallest bites. Once hooked, the blanks will bend in nicely to reduce any hook-offs generally caused by blanks that are too stiff.

The EARLY for Seabass models are value for money considering the quality of the rods.

The length and settings of the models are designed for long distance casting which are suited for wading in the shallow waters, fishing off rocks, boulders, piers and break water.

EARLY 97MMH for Seabass

2021 NEW 93M for Seabass

ROD SPEC Lure: 7-35g Line: PE 0.8-1.5

- Length: 2819mm(CL:1445mm) Weight: 147g

More details

You will be able to trace your lures in the strong thick currents of large scale rivers and straits as well as hardcore locations off rocks and boulders. It possesses a sensitive tip able to transmit the smallest of details in the current and utilize minnows and sinking pencils as small as 9cm. Having said that, anglers will still be able to cast big bait lures up to 15cm for situations where your targets are feeding on larger baits and stop the thrashing of lunger size pre spawning seabass with the strong butt power.

Price:

Field: Sounds • Current • Rivers • Rocks

On Developing Model

Release date undecided

We also have up and coming developments for the new EARLY series. The release date and specifications are yet to be finalized but we are diligently testing and working on these rods so please stand by. The 2 models "for-Boat" will be ideal for small boats and kayaks and the 3 models "for-Mobile" are multi piece pack rods suitable for traveling. The developmental concepts do not overlap with other categories and possess original characteristics. For instance, we have not simply made the "for-Surf", "for-Rock" and "for-Seabass" into multi piece rods in the "for-Mobile", but have given it its own characteristics. We will be updating the progress of the development through our HP and movies. We hope you can experience the new EARLY series first handedly.

EARLY for Boat / 2 Line up

Versatile boat Game

The EARLY for Boat was developed to enjoy the light casting game off-shore targeting bream, seabass, small Blue-runners, flat-fish and even rock fish. The sharp regular tapered rod is extremely responsive and has a sharp casting feel with the developmental concept of "every fish tells a story". It is a versatile rod able to handle the ever changing sea conditions by allowing anglers to pinpoint cast to structures, drop into holes and cast in the open sea. Anglers will be able to utilize a wide variety of lures vital for the off-shore game and accurately cast and trace the course you desire. You can say that this EARLY for Boat was created as an offensive technical model for anglers to feel satisfied when hooking a fish according to plan.

68M for Boat

Lure: 7-32g Line: PE 0.8-1.5

- Length: 2550mm(CL:1060mm) Weight:
- Guide: SiC-S stainless frame K guide(Fuji)
- Section: 2pcs (Put over) Reel Seat: VSS16 (Fuji)
- Suitable reel size: D: LT2500~3000 / S: 2500~3000

More details

This is an all-rounder model ideal for light boat casting game targeting Bream, Seabass and Spanish-Mackerels and other small blue-runners. With the sharp regular tapered blank settings, anglers will be able to cast to pinpoint accurate holes and structures while still being able to cast long distances in the open area. The rod responds well to various lures including minnow, shads, sinking pencils and dog walking of topwater lures. Once your target is hooked, the rods seamless bend is like a one-piece rod, reducing any chances of a hook off while being able to easily surface the fish.

Field: Coast · Port

610MH/B for Boat

Lure: 10-50g Line: PE 1.2-2.5

- Length: 2100mm(CL: 1080mm) Weight:
- Guide: SiC-S stainless frame K guide(Fuji)
- Section: 2pcs (Put over) Reel Seat: ACS17 (Fuji)

More details

The rod is ideal to target rock-fish from boats. With the stiffness and sensitivity, anglers will be able to feel for bottom structures to effectively maneuver your rigs and induce the bite. The rod possesses high resilience and will efficiently rip the fish off the bottom structures to eliminate any bust offs. It is also a versatile rod able to handle various rigs including metal type jigs, vibration lures, deep-diving minnows, 40~50g joint type lures and even subsurface 150mm class minnows for seabass.

Field: Coast · Reef

EARLY for Mobile / 3 Line up

Multi Piece Mobile Series

The EARLY for Mobile models are multi piece mobile pack rods which are able to separate into 3-4 pieces. These rods were developed to feel like a 2-piece rod as we refused to sacrifice the rods performance in exchange for mobility. The rods superior performances will not only assist the anglers fishing but the mobility has also added a new meaning to "versatility". When in your fishing grounds, we are limited in what we can use. The 3 models in the EARLY for Mobile series are built up with concepts that other EARLY series do not have. The compact rod can easily be carried around stress free on bikes, bicycles and other public transports which you may use to access your fishing grounds in large cities. Furthermore, if you are a frequent flier, you can tuck away your rod in your suitcase on your business trips overseas. Once in use, you will notice the outstanding casting feel, controllability and the seamless bending curve of the blank rarely seen in multi-piece rods. The lineup of multi piece rods with exceptional performance will surely open up new fishing grounds for anglers around the world.

84ML / 4pcs for Mobile

Lure: 5-24g Line: PE 0.6-1.2

- Length: 2545mm (CL:660mm) Weight:
- Guide: SiC-S stainless frame K guide(Fuji)
- Section: 4pcs (Put over · Grip Joint) Reel Seat: VSS16 (Fuji)
- Suitable reel size: Undecided

It is a versatile rod able to enjoy various light ~ middle class lure fishing targeting Seabass and Brems with the use of top-water lures to soft plastics. The flexible tip will enable anglers to easily handle the subtle movements of small sinking pencils, minnows, jig-head rigs in addition to controlling top-water lures. We hope you can enjoy the light game on your trips away or even around local river mouths accessible by bikes or trains.

76MMH / 3pcs for Mobile

Lure: 8-42g Line: PE 1-2

- Length: 2310mm (CL: 810mm) Weight:
- Guide: SiC-S stainless frame K guide(Fuji)
- Section: 2pcs (Put over · Grip Joint) Reel Seat: VSS16 (Fuji)
- Suitable reel size: Undecided

The rod is able to be loaded with heavy lures and can go head-to-head against the unexpected big one. This rod will be your next best friend on your domestic or international trips, land-based or even off-shore. You can enjoy going after seabass in the open water, light casting for Blue-runners or even cast around reef edges in more tropical countries. We are confident that anglers with sights on large predators around the world will enjoy using this versatile rod with a sensitive yet powerful butt section.

96MH / 4pcs for Mobile

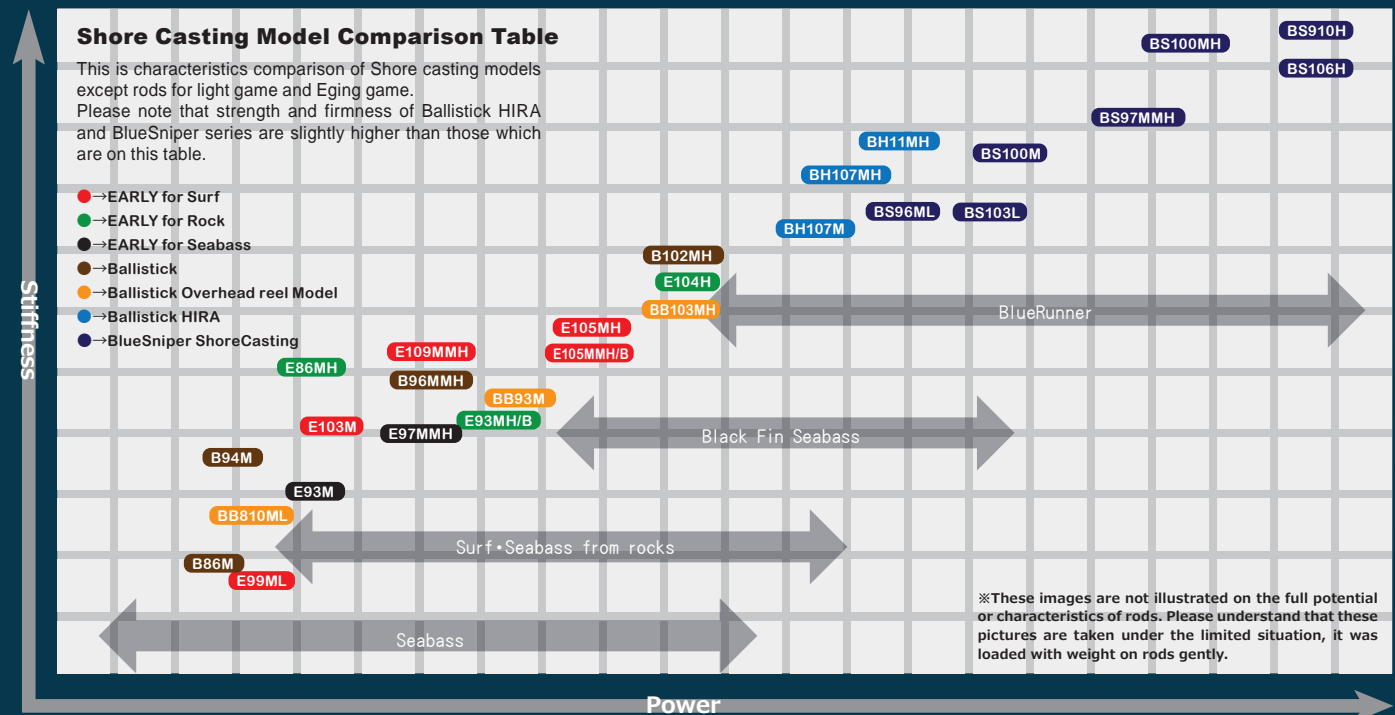

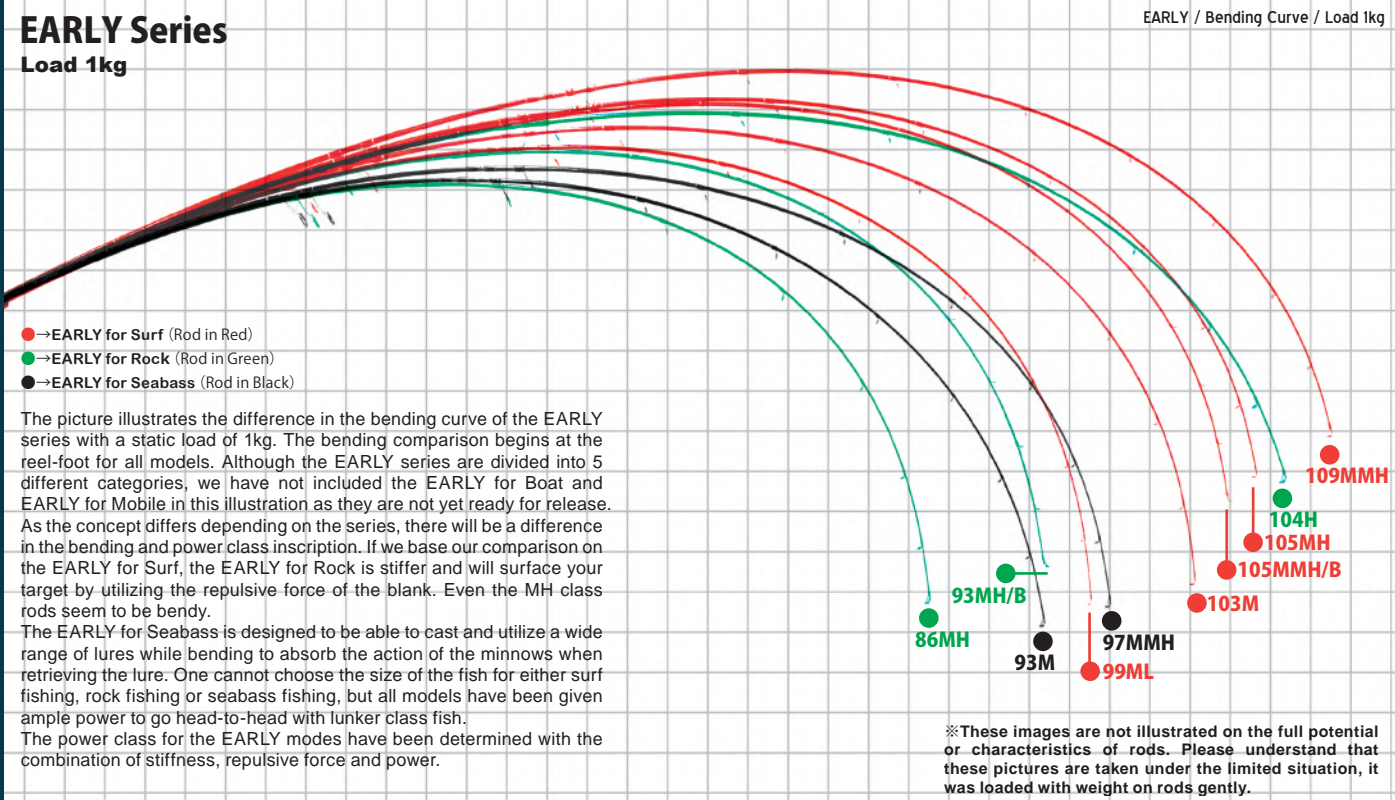

Lure: 8-42g Line: PE 1-2

- Length: 2920mm (CL: 770mm) Weight:
- Guide: SiC-S stainless frame K guide(Fuji)
- Section: 4pcs (Put over · Grip Joint) Reel Seat: VSS16 (Fuji)
- Suitable reel size: Undecided

The blank is designed with a sharp feeling and the controllability is outstanding. You will be able to utilize large 14cm + minnows, heavy vibration type lures and blade type lures to search a vast area. You can also target small Blue-runners and flat fish in the surf by utilizing light jigs and soft plastics. We focused on its castability, seamless bending curve and outstanding power during the developmental stages for those traveling anglers who have a vast array of targets around the world.

*The models listed on this page are currently under development, and detailed specifications and designs are subject to change.

Ballistic

Road 1kg

These are comparison images of Ballistic series which are loaded 1kg weight on tip. 86M, 810ML-RC Overhead reel, 94M, 96MMH and 93M Overhead reel are for seabass mainly to cover rivers, mudflats or port. 102MH, 103MH Overhead reel are for seabass and flatfish from rocky shore and sandy beach. HIRA107M, HIRA107MH and HIRA11MH are for black fin seabass from rocky shore. Ballistic series have moderate stiffness and sharpness to achieve accuracy and ability of distance cast. Although the taper of this series is regular, you can cast with less power than before and can get more accuracy thanks to high repulsive force attributed to NANOALLOY® Technology. Designing of 3 models of overhead series is totally difference. You can get fast initial rate with quick motion easily. 93M is set as basic model, 103MH is for rocky shore and sandy beach and 810ML cover various kind of current such as upper to lower part of rivers. That is why 810ML is named "River Custom".

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

BlueSniper

/ 7 Line up

BS-Shore Movies

Shore Plugging & Jigging

BlueSniper shore casting series have been loaded sharpness, Lightness and high usability while taking advantage of NANOALLOY® technology from TORAY. ML class which is suited to light weight of minnows or sinking pencil, H class to manipulate up to 200mm of diving pencil and jigs over 100g. The potentials which are hidden in blanks of these 7 models include 103L which is loaded sensitivity and power added for line up as a Light class concept to manipulate lures for seabass will enable you to cover various situations and field without losing initiative of anglers. Remarkable characteristics of these series are flexibility and sensitiveness of tip section to make lures swim more like real fish, and toughness of butt section to pull heavy fish up to surface while applying the good amount of pressure on fish.

Which means that we have pursued basic performance as shore casting rod. Win some, lose some...it is depend on judgement you have made at crucial phase. This BlueSniper shore casting series has been designed as a rod which will support you to make a right decision to land memorial fish.

103L PlugSpecial Light Class Concept

Price:

Lure: Jig ~40g/Plug 15~40g
Line: Max PE 2 Drag Max: 4kg/45°

More details

This is "Light class concept" model for capturing the situation that Blue runner feeding small bait. You can cast tiny diving pencil comfortably without unwanted wobble and manipulate it as you wished to easily. It bends well and nicely to reduce loading of line even if you fish with fine PE line while accumulating power to keep even 10kg of yellow tail under control from rocky shore. Although "L" on the 103 as Light class concept, more power on butt section is loaded than 96ML.

96ML NANO Concept

Price:

Lure: Jig ~60g/Plug ~40g
Line: Max PE 2 Drag Max: 3kg/45°

More details

This is medium light shore jigging rod to aim small sized of yellowtail, amberjack and cero. This would be suited jigs around 40g, minnow around 10cm~14cm from break water or surf. You can handle it like a seabass rod but huge butt power is hidden in blank itself to keep even mid-sized Blue Runner under control. You can manipulate not only metal jig or minnow but also sinking pencil bait or vibration to have an advantage on situations that you are faced out there.

100M NANO Concept

Price:

Lure: Jig ~80g/Plug ~50g
Line: Max PE 3 Drag Max: 4.5kg/45°

More details

This is the mid power model which have been loaded toughness and lightness to aim blue runner around 3kg from pier or surf. You can take advantage of its length to aim fish that feeding in the distance with high accuracy. If you are going to fish at field where current flows rapidly and fish have caught tide, you can still keep it under control with this 100M. Even you are in a severe situation you will be able to have an advantage on fighting with monster fish.

97MMH NANO Concept

Price:

Lure: Jig ~100g/Plug ~60g
Line: Max PE 4 Drag Max: 6kg/45°

More details

BlueSniper 97MMH which is well tuned with flexible tip and powerful butt. It enable you to manipulate jig and plug at your will without failure thanks to its nice and flexible tip section. Especially when you use jig, it will reduce physical burden of angler thanks to its length. Yet 97MMH works well for Blue Runner around 3~5kg, you can fight against to even over 5kg without anxious because of its tough and tenacity butt section.

100MH NANO Concept

Price:

Lure: Jig ~120g/Plug ~80g
Line: Max PE 4 Drag Max: 6kg/45°

More details

This is the standard of New BlueSniper to aim Blue Runner around 4~5kg. If you fish with jig around 80~100g, plug around 60g we recommend you to choose this 100MH. Flexible tip section which have ability to manipulate lure sensitively and aggressively. Breathtaking butt power enable you to pull the monster fish up from bottom of the sea. This have been well balanced as all round model to cast and manipulate jig or plug at high level.

106H PlugSpecial NANO Concept

Price:

Lure: Jig ~130g/Plug ~100g
Line: Max PE 5 Drag Max: 8kg/45°

More details

This is the specialized model to manipulate plugs without any failure. You can cast even big diving pencil bait sized around 200mm, and also you can manipulate jigs up to 130g without any stress. Even when you try to aim Blue Runner that over 10kg from rough field as such as rocky shore or else, this 106H PS is going to be a huge advantage thanks to sensitiveness and lifting power which is attributable to NANOALLOY® technology from TORAY.

910H NANO Concept

Price:

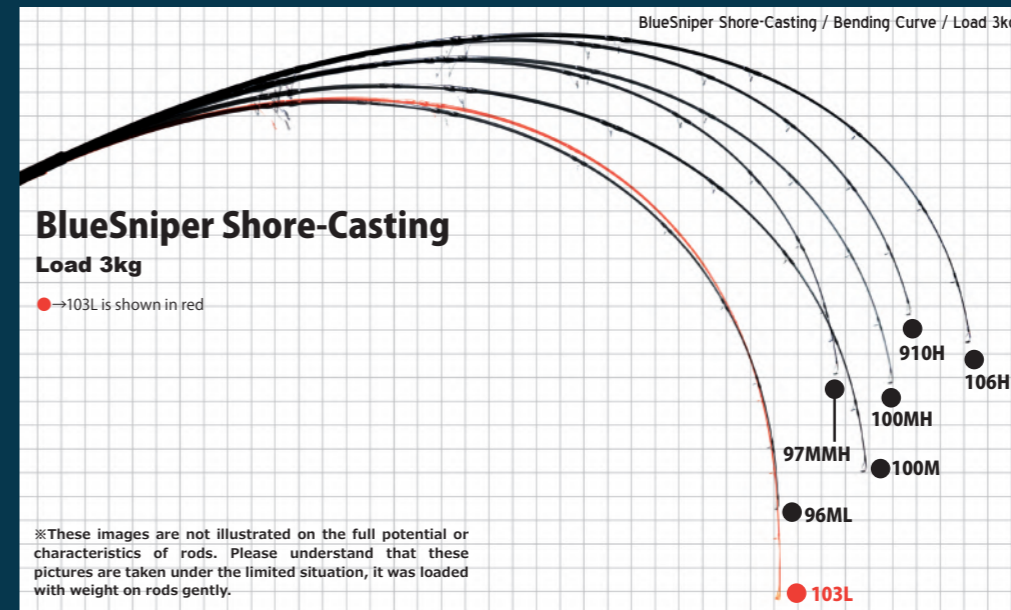

Lure: Jig ~150g/Plug ~120g
Line: Max PE 5 Drag Max: 8kg/45°

More details

This is the model which is tuned power and length perfectly to manipulate jig as you wish while reducing burden of anglers. You can cast heavy jig around 150g easily and when you fish at field where you are required skill and technique as such as deep, rough and current runs rapidly, you will be able to land even yellow fin tuna from shore thanks to that potential hidden inside of blanks. This is the one for angler who fish with jig mainly or looking for specialized model for metal jigs.

These are comparison images of BlueSniper shore casting series which are loaded 3kg weight on tip. Tip to belly section of BS103L have been designed to be very flexible for casting and manipulating small and light plug. It has little more power than 96ML on butt section and good to be used for aiming blue runner with small lure. 97MMH have been loaded same power as 100MH on butt section and more flexible tip section. Although 97MMH bend more than 100MH when applied 2kg load, you can see that almost same power employed on both of butt section when applied 3kg load. 100M have been designed to be slower action than others so whole blanks of 100M will be bent well even when small amount of load applied. Almost same power have been loaded on butt section of 910H and 106H. 910H is suit to metal jig and if you use plugs mainly, 106H is recommended. 910H have been loaded more repulsive force than 106H to manipulate heavy weight of metal jig comfortably and land fish smoothly. Load weight more and more, butt section of 106HPS bend more and huge power will be accumulated. Which means that it is easier to apply pressure on fish and physical burden of angler will be reduced with 106HPS.
