

Galahad

Galahad / For jigging

Our jigging rod series “Galahad” which cover all of situation that you are going to face thanks to potentials of carbon blanks of this models.

You can jerk jig with less power than before and it will bend nicely to reduce burden of angler when fish is on. Which means that anglers will never lose their initiative while fighting with even larger target than you thought.

We have standard jigging models, slow-pitch jigging model, 2pcs model for expedition and special tuned rod for electrical powered reel (EPR) to suit varying situation of jigging scene. When it bent more, more power is going to be loaded to blank. This is what we think how the rod for jigging supposed to be.

2017 New model Galahad 電 for Electrically Powered Reel

3 Line Up

Since 2015, we have receive a lot of compliment from anglers who are aiming yellow tail in Japan Sea or king fish around Kyusyu Island with Galahad 62/4 for Electrically Powered Reel(EPR). And year 2017, 633 as light type and 586 as power type will be joining the category of Galahad for EPR. Flexibility of tip section and toughness of but section as known as significant characteristic of Galahad EPR enable angler fish anywhere you have selected. Once you have tried Galahad for EPR, we believe that you will never be disappointed for sure.

2017 New Galahad 633B電(for Electrically Powered Reel)

If you are going to aim at small sized Blue Runner with PE 3, this 633 would be a perfect choice. Even though automatic reeling at constant speed, flexibility of tip and berry section will help you to Jerk jig comfortably and set hook on with less failure. It will bend very much when fish is on, but you can fight with fun without any worry. You will be surprised that potential which is hidden inside blank of 633 for sure.

2017 New Galahad 586B電(for Electrically Powered Reel)

If you are going to aim king fish or yellow tail over 10kg we recommend you to choose this monster hunter. You can give action to jig around 300g in 100m depth of the sea effectively, even though you fish at field where tidal current running rapidly. It is going to help you to jerk heavy jig without any burden or stress and to fight with big fish with huge advantage thanks to its flexibility, toughness, and versatility. Fulcrum point is going to move to butt section when you fight smoothly and you will not lose sensitiveness to sense the movement of fish in the water even while reeling. It is not just stiff rod, you can use it feel like your arm for sure.

Galahad 624B電(for Electrically Powered Reel)

This is standard jigging rod for EPR to aim bluerunner around 5kg. You can be reeling with any speed thanks to nice and flexible tip section, then you can give the action to jig at your own will. If you hooked bluerunner more than 10kg, you do not have to worry about anything! It will enable you keep it under control without being anxious. We believe that may be allowed to call almighty jigging rod for EPR and we want anglers all over the world to fish with it.

*Suitable electrical powered reel

We suggest suitable EPR on this catalog according to capacity of line, power and balance of weight between reel and rod. Of course, you can use reel other than that we suggested on this catalog, it depend on your target which you aim on the depth of water where you fish at. So please check the maximal value of lure weight, line weight and Drag weight as a guide for selecting the best reel for yourself. You can also fish with standard type of overhead reel.

Galahad 6 Line Up

Galahad series are now more sensitive and more powerful with greater strength. The blanks have been redesigned to sense the subtle changes in current. The butt section is also redesigned to accommodate more loading power

The blanks have become lighter, thinner and easier to work when jerking jigs. This is in contrast to the old days where the angler has work the jigs furiously. The short slim blank of the Galahad is ever ready to hook up a big one and will withstand more than expected.

Galahad 622S (Spinning Model)

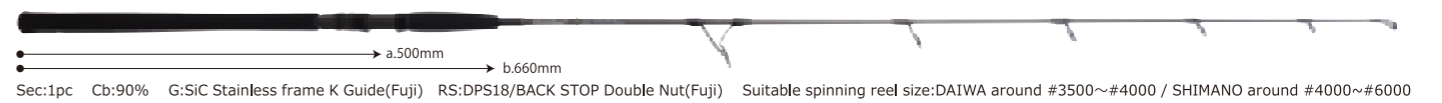

This flexible but tough blank can handle jigs up to 90gm. It is ideal for small yellow tail or king fish around 1kg – 2kg. It can also handle the occasional fish around 3kg – 4kg. We believe that it is going to be excited jigging game with it.

Galahad 613S (Spinning Model)

This is the all-round model to target yellow tail or king fish around 3kg – 8kg along the shore line. The sensitive blank can sense changes in current and handles jigs well using various methods. The tip to belly section bends nicely and distributes the load to fight a big one.

Sizes of rod a. Length from reel foot to end of grip. (From trigger to end of grip in the case of overhead model) b. Whole length of grip. (It will be 10mm longer when down lock on front was closed in the case of overhead model)

Galahad Basic

Galahad Basic Series 5 Line Up

Our Galahad series are one-piece rod designed for high sensitivity combined with strength. This series suits both beginners and experts with its slim profile and medium elasticity. The design of the rods are between 5.8 ft to 6.3ft in length. This covers the entire range of motion and with its light weight, it is easy to use the whole day long. Fighting a fish is made easier with good control over head shakes and runs.

Galahad 62/4 (Spinning Model)

This model has been designed for not only one pitch jerking, but also for slow jerk combination or else. Especially, it has gotten the ability to make fish bite, and when you feel the weight of jigs on the belly section, with natural movement of jigs, which 62/4 could provides. Although you might be surprized new light it is, it has got butt power that you can feel the safety when you fight with kingfish or yellowtail of up to 5kg.

Galahad 61/6 (Spinning Model)

This is the powerful version of 62/4. Compared to 62/4, 61/6 has been added to strengthen the tip and belly section to improve the operational feelings of the heavy jigs. The butt section has been enhanced to keep kingfish or yellowtail under 10kg and be controllable. This is the regular taper for every anglers with high versatility, which means it's not only for coastal jigging games, but also good for expedition games.

Galahad 59/7 (Spinning Model)

Compared to 61/6, the blank from the belly to butt section has been enhanced. This has been designed for kingfish and yellowtail of over 10kg at the field, where the current running faster on the deep area. This has been designed to be bent to catch the bigger fish. It will be bent nicely and reduced burden of anglers when anglers are on a big fight.

Galahad 52/10 (Spinning Model)

This deep jigging model was created to target large kingfish or dogtooth tuna. Using jigs of 300gm and fishing at depths over 150m, the tip has moderate flex to counter water resistance on jigs and will sustain the hook up of a big fish.

Galahad 52/10 (Overhead Model)

This is the overhead model which is basically the same blank as spinning model. It will enable anglers sense the current changes in land form and the bottom of the sea easily, and possibly Manipulate jigs at your own will. It's the same as spinning model, with flexible tip and butt section of it will save energy of the anglers.

Galahad Slow

Galahad Slow pitch Series 5 Line Up

A rod that is stiff or soft is of no use if it's unable to perform to its design. Slow pitch rods require a certain 'taut' and flexibility in order to work the jig and makes it drop as intended. For these, the Galahad series have been carefully designed with our cutting edge technology so as to prevent loss of momentum and rhythm when working on the jigs.

Galahad 63/1 Slow (Overhead Model)

This rod was created to fish your local waters in depths of 30m – 60m. The design has great balance between flexibility and stiffness. Anglers will be able to maintain the much needed rhythm regardless of which technique being used. The rod works well with 80gm jigs.

Galahad 63/2 Slow (Overhead Model)

The ideal jig weight to use is around 120gm with depths ranging between 50m – 80m. The section from the tip to the belly will assist in maintaining a steady tempo, bringing 'life' to the jigs. This may be considered the center model for anglers who prefer to fish in a shallow water.

Galahad 63/3 Slow (Overhead Model)

This model will perform best when deep areas have opposing currents which require heavier jigs. An ideal jig weight is around 160gm while a lighter jig can still be used should the angler choose to work it more aggressively. We are confident you will enjoy using this rod and it will become part of your body for sure!

Galahad 62/3 Slow (Overhead Model)

To improve the initial response of your action, we have shortened this rod compared to the rest of the 63 models. The characteristics of the blank makes it easy for even a novice to master the slow pitch jigging technique.

Galahad 62/4 Slow (Overhead Model)

This is another slow pitch rod for anglers who fish with heavy jigs over 200m depth and yet still have the brute strength to lift a monstrous fish up to surface.

Galahad 62/4 (Spinning-Model)

Lt: **1890mm** Wt: **188g** Jig: **~180g** Line: **~Pe3** DragMax: **5kg** Price:

Galahad 61/6 (Spinning-Model)

Galahad 62/3 Slow (Overhead-Model)

Lt: **1910mm** Wt: **148g** Jig: **ComfortWeight 200g** Line: **~Pe2** DragMax: **2.5kg** Price:

Galahad 62/4 Slow (Overhead-Model)

Lt: **1910mm** Wt: **151g** Jig: **ComfortWeight 250g** Line: **~Pe2.5** DragMax: **3kg** Price:

※ComfortWeight is stood for the weight of jigs that you will be able to jerk comfortably. It has not meant to be a value of maximum. It is possible to jerk jigs that around 50g heavier than weight which is on specification in slow pitch.

Galahad TRAVEX

Galahad TRAVEX Series(Grip-Joint)・4 Line Up

We created this grip-joint rod to handle powerful and sharp jerks in strong currents. The blank of the Galahad Travex is stiffer compared to the one piece Galahad. With this added stiffness, you will be able to respond faster to the twitch of the jigs. Both slow pitch to high pitch jerking are suitable. The Travex series are butt joint and thus makes travelling easier especially on international flights. This is one rod you can count on for your overseas trip.

※We have adopted a tapered grip to improved reliability. Please ensure the joints are properly.

Galahad 59/4 TRAVEX (Spinning Model)

It handles jigs up to 150gm with 60gm being the ideal weight. This light jigging rod works well for depths of 20m-100m targeting fish up to 3kg. Although, the blank will bend once the fish is on, there is sufficient power concealed in the blank.

Galahad 59/6 TRAVEX (Spinning Model)

This is a medium class rod for depths around 100m targeting fish around 10kg. We recommend this rod for those who prefer a light balanced rod, to enjoy a challenge with the fish. The contradictory features of the rods light feeling and unbelievable butt power is also a great attraction.

Galahad 59/8 TRAVEX (Spinning Model)

For yellowtails above 10kg, this rod handles jigs of 200gm-270gm in depths of 70m-150m. It has a stiffer butt section compared to the one piece Galahad. The softer tip improves jig control. The butt section is similar to the 5210. We have finished it as a technical rod which you will be able to enjoy the variable actions of jigs like slide, short pitch or else.

Galahad 58/10 TRAVEX (Spinning Model)

This rod is the most powerful in the whole of our Yamaga Blanks jigging series. Yellow tails lurking below depths of 200m are no match for it. We conducted test at New Zealand, the haven for king fish and successfully landed a 30+kg without stressing the angler and once again proving the high reliability of our rods. This rod performs so well that you will quickly forget its butt jointed.

Galahad 59/4 TRAVEX

Jigging Model Bending Curve Load 3kg

Galahad / Galahad Basic / Galahad TRAVEX

- Galahad (Rod in black)
- Galahad Basic (Rod in red)
- Galahad for Electric Powered Reel (Rod in green)
- Galahad TRAVEX (Rod in blue)

COMMENT

These are comparison images of Galahad series which are loaded 3kg weight on line through guides. We have mentioned each color to individuate each series as such as below. Black for Galahad, green for EPR series, orange for Galahad basic and blue for TRAVEX. 3 models of Galahad EPR have been designed to be more powerful than other models as you can see on this chart. Taking advantage of butt joint, TRAVEX series have gotten more power on butt section than other series.

Although all of these are hold at reel foot, you might feel the differences between spinning rod and overhead model when you actually fish with each of them.

※There is no image of Galahad52/10 overhead model on this chart because that blank is same as spinning model of 52/10.

Galahad Slow (Load1kg)

COMMENT

Although Galahad Slow jigging series have been designed to be skinny, it have been loaded toughness and strength on blank itself. So you will be able to give jig various action as such as slow pitch jerk to lure selective fish. If you jerk in slow pitch mainly, we recommend you to take 63/1, 63/2 or 63/3. Otherwise 62/3 and 62/4 will be recommended to search bottom of the sea with inchiku or else.

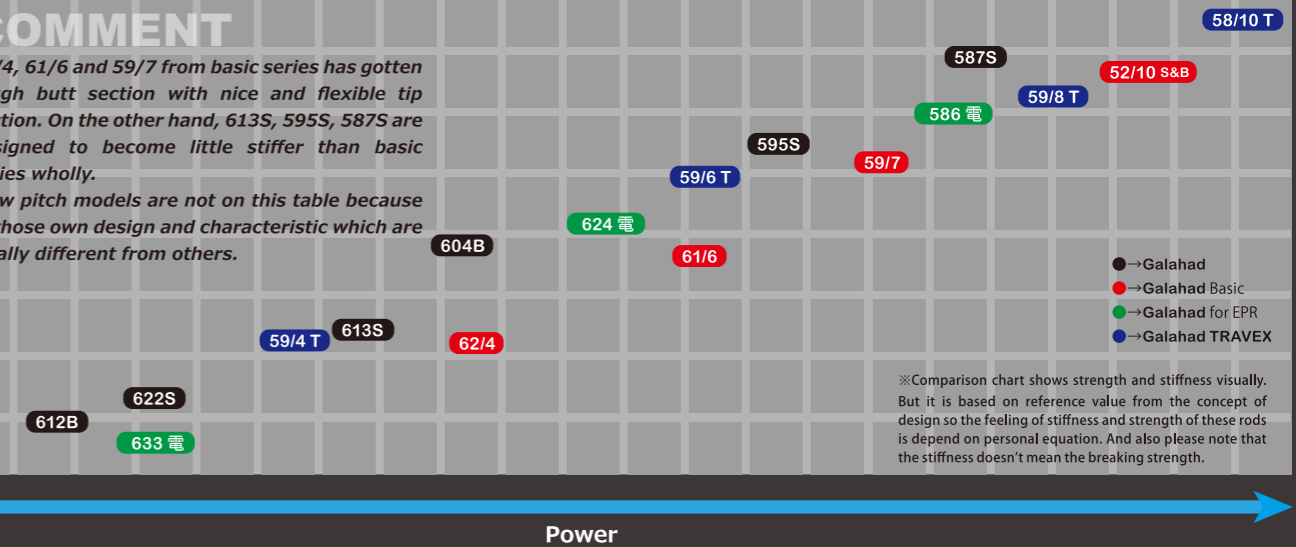

Jigging Model Comparison Table

COMMENT

62/4, 61/6 and 59/7 from basic series has gotten tough butt section with nice and flexible tip section. On the other hand, 613S, 595S, 587S are designed to become little stiffer than basic series wholly.

Slow pitch models are not on this table because of those own design and characteristic which are totally different from others.

Stiffness

Light Jigging

Taijigging & Tairubber & Sabel

SeaWalk

SeaWalk / For Light Jigging

SeaWalk Light jigging rod series are designed specially to be fished with extra fine line as such as around PE1. We have now Tai jigging and Tai rubber model to aim red sea bream or light jigging rod to aim Hair Tail as lineup of SeaWalk series. You can give the natural movement to jig and set hook on without any failure thanks to the blank which have potential of torque and power to lift monster fish up to surface smoothly. We can proudly say that these are what YAMAGA Blanks supposed to be.

SeaWalk Taijigging

SeaWalk Taijigging / 4 Line Up

SeaWalk Taijigging models are designed to give the natural movement to jig enable anglers to set hook selectively and spooky red sea bream and with less failure. 75L which is good to be used with fine line when fish is low active and 63M which have gotten huge power on blank for deep water or fast current are added to series of Taijigging to cover various situation and target.

2017 New SeaWalk Taijigging SWTJ-75L NANO

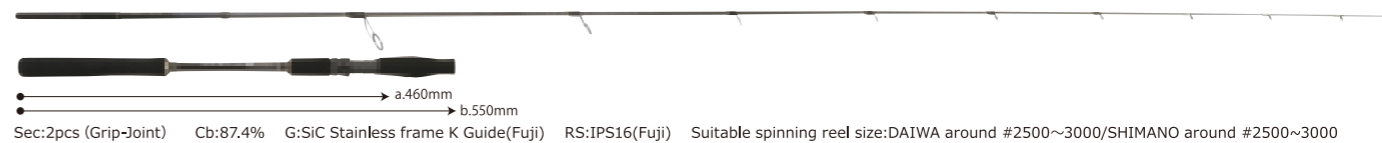

If you are struggling with selective monster, or when you fish at shallow area less than 50m depth, this light jigging model will be your perfect buddy for sure. Blanks of this fine rod that is consisting of Nano alloy technology of TORAY also allows you to use fine line and light jig and you will be able to keep monster snapper under control without being pulled line out from spool. Although around 40g jigs and PE 0.6~0.8 will be recommended, you can choose finer line such as PE0.4(8lb fluorocarbon leader) to aim monster snapper which might be there.

2017 New SeaWalk Taijigging SWTJ-63M

When you want to catch giant snapper, you will be required to fish at area that are deep and fast current usually. This is for you to pull big snapper out from deep and capture the tough situation like that. This shortest rod in this series enables you to use 150g maximum without losing manipulation performance. Nice & sensitive tip section will set hook on the mouth of snapper, tough and powerful belly and butt section will keep monster snapper under control and pull it up to surface quickly. It is absolutely perfect rod for anglers who wish to have a one on one battle with giant snapper. (Able to aim Trevally, Blue runner or Rock fish up to 5kg)

SeaWalk Tairubber

SeaWalk Tairubber / 5 Line Up

You can sense the current of the sea or fish moving around your lure as if you are really touching it by your own hands. Thanks to that factor, you can keep concentrate on and you will be able to set hook on surely. When it is bent and bent, more power will be loaded to fine blank of Tai rubber series.

SeaWalk Tairubber SWT-65UL

The softest tip of the series belongs to this model, yet the belly to butt section holds decent power against any snapper. Both vertical or drift jigging can be used. When faced with rough seas this 6ft 5in length rod won't get in your way.

SeaWalk Tairubber SWT-61L

This basic model is equipped with a highly sensitive blank and a soft tip that will not spook the fish during a bite. The responsive action of the butt ensures proper hook-up on the tough part of the snapper's mouth.

SeaWalk Tairubber SWT-60ML

Unlike other super stiff rods in the market, the butt section of this rod will follow through the unexpected thrashing of the fish thus reducing bust off and hook failure. Anglers can confidently battle a snapper over 80cm.

SeaWalk Tairubber SWT-68L

This is the utility model to cover waters from coastal to open sea. You will be able to set the hook on easily without putting any stress on fish because of its tip section which have been loaded exquisite flexibility. Belly and butt section have been designed to be tenacious so that it will cover not only small one in shallow area but also trophy fish in deep area. Tip to belly section will be bent nicely so that it have been achieved wide range of capacity of lure weight.

SeaWalk Tairubber SWT-68ML

This have been loaded more power on section from belly to butt than 68L while taking over sensitive tip section of 68L. Anglers will be able to sense the small contact of fish or slightly changes of current even when you fish on the water where rapid current or tough and deep area where have to be used lure more than 100g because of its ability of high response on the blank. It have been loaded huge power on butt section to lift fish with less power than ever even if it is big fish such as 80cm or bigger.

※68L and 68ML can be equipped Electrically powerd reels.

SeaWalk Sabeling

SeaWalk Sabeling / 4 Line Up

The actions of this rod is quite important for jigging game of Hair tail. You should not move jig very much, otherwise the line will be broken. SeaWalk Sabeling series have been designed to make jig not to move too much and also have been loaded enough power on belly and butt sections, enough sensitiveness and flexibility on tip section to shift power towards it smoothly. It is well balanced as one piece rod to manipulate lure at your own will, strike sharply and fight against large Hair tail with this whole blank. We hope that you will sense all of these remarkable characteristic of specialized jigging rod for Hair tail.

SeaWalk Sabeling SWS-63UL

Line breakage can occur if the jig moves too much when jigging for Hair-tail. The blank with much of flexibility was designed to reduce excess movement of the jig and reduce the loss of fish due to the unique movement of the Hair-tail.

SeaWalk Sabeling SWS-63L

The moderate stiffness allow anglers to control their jigs more deliberately from no motion to an aggressive stance. This is the most basic model for light tackle micro jigging.

SeaWalk Sabeling SWS-63ML

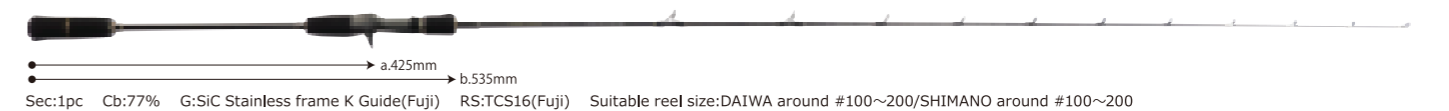

The outstanding sensitivity of this rod can sense a strike during the drop and ideal for situations where fish is active and responds well to jigs. The nature of this rod enables anglers to adapt quickly to ever changing conditions.

SeaWalk Sabeling SWS-63M

This model is for deeper waters targeting big Hair-tails. It won't even budge against those dragon size hair-tails. 150gm jigs are ideal. It is an integration of "inducing a bite, hooking up and landing".

SeaWalk Sabeling 63L

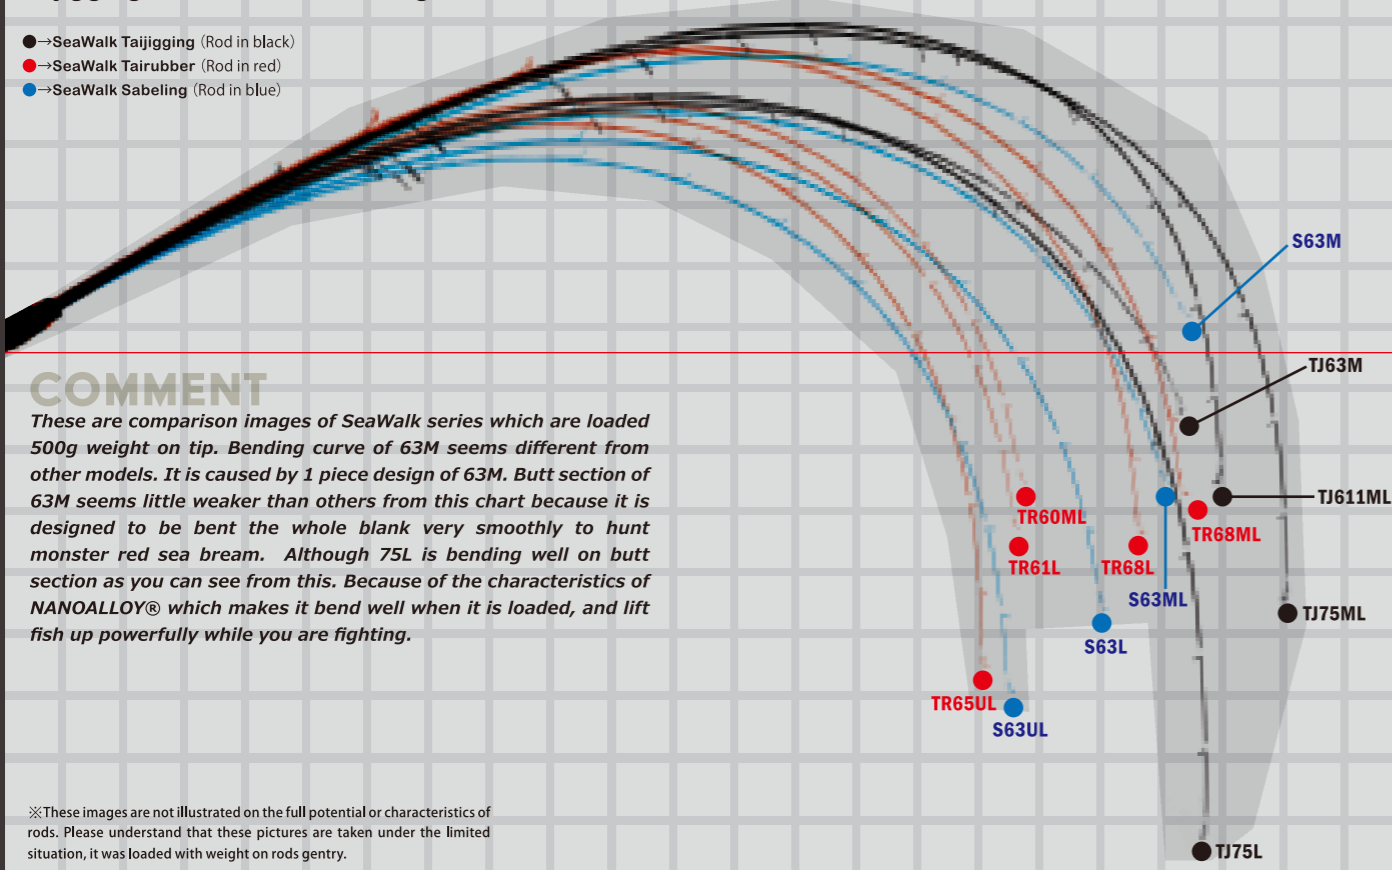

SeaWalk Taijigging 63M (Proto)

SeaWalk Bending Curve Load 500g

Taijigging / Tairubber / Sabeling

- SeaWalk Taijigging (Rod in black)
- SeaWalk Tairubber (Rod in red)
- SeaWalk Sabeling (Rod in blue)

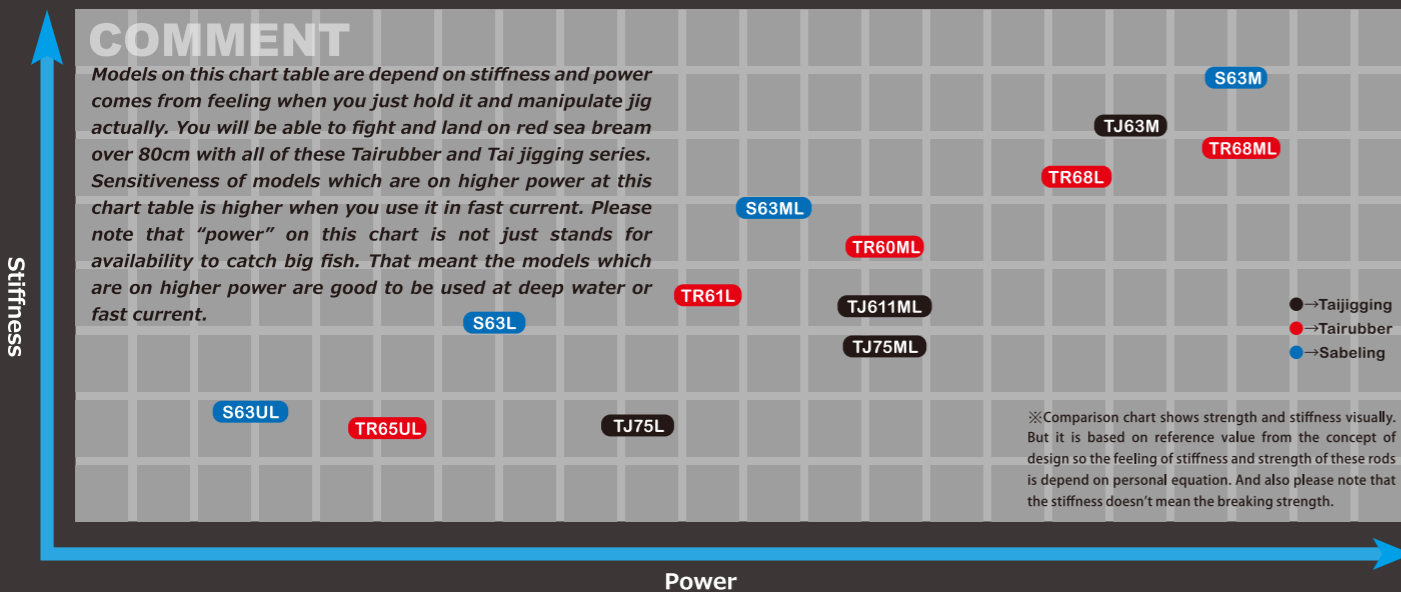

COMMENT

These are comparison images of SeaWalk series which are loaded 500g weight on tip. Bending curve of 63M seems different from other models. It is caused by 1 piece design of 63M. Butt section of 63M seems little weaker than others from this chart because it is designed to be bent the whole blank very smoothly to hunt monster red sea bream. Although 75L is bending well on butt section as you can see from this. Because of the characteristics of NANOALLOY® which makes it bend well when it is loaded, and lift fish up powerfully while you are fighting.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gentry.

SeaWalk Comparison Table

COMMENT

Models on this chart table are depend on stiffness and power comes from feeling when you just hold it and manipulate jig actually. You will be able to fight and land on red sea bream over 80cm with all of these Tairubber and Tai jigging series. Sensitiveness of models which are on higher power at this chart table is higher when you use it in fast current. Please note that "power" on this chart is not just stands for availability to catch big fish. That meant the models which are on higher power are good to be used at deep water or fast current.

※Comparison chart shows strength and stiffness visually. But it is based on reference value from the concept of design so the feeling of stiffness and strength of these rods is depend on personal equation. And also please note that the stiffness doesn't mean the breaking strength.

for Seekers Trout, Expedition and more

Lupus

Trout Rod Series Lupus / 7 Line Up / Trout

51, 61 and 71 which cover almost every situation on mountain stream in Japan are going to support anglers thanks to that potential which is inside of blanks. We have designed these to become super basic trout rod which are also going to suit to styles of trout fishing of recent years as such as using heavy sinking minnow or PE line. Will be able to cast long distance, nice and light and tough enough... We have loaded everything we have which is required for trout rod to let anglers get every single chance to catch beautiful trout. This is how we have designed Lupus for mountain stream.

Lupus 51

This is short length trout rod to perform at its full potential on the mountain stream as known as small and varied. We have been loaded high ability of cast and manipulation of lure to fish on headwaters of mountain stream where the tough for anglers. You will be able to cast comfortably and once you have hooked fish up no matter how big it is, you will be fascinated with power and beautiful bending curve. It will be also recommended if you fish on the river where restricted area such as narrow and bushy in summer time.

Lupus 61

This is the basic length model to cover various situation on the river. One of the remarkable characteristic of Lupus 61 is wide range of use of lures to search selective trout in various ways. You will be able to cast lightly without any stress while being loaded enough power on butt section to keep large trout under control. We believe that you will never leave it behind when you go to fish because of potential within blanks.

Lupus 71

This is the one for wide and deep river. This is well balanced middle length trout rod which is good to be used at not only just wide area but also pool or back water of dam. You will keep large trout under control with its powerful butt section and you will be able to hook small trout up smoothly with its sensitive and flexible tip section. Of course it have been loaded versatility to manipulate not only minnow but also spoon.

We have tried to reflect the technology, knowledge and experiences which are cultivated from salt lure game into the Cherry salmon game of Japan. Cherry salmon which have come back to the river won't take a bite for lures easily, so the angler who is aiming it will have to cast quite many times in a day. We have loaded to Lupus series high operability, sensitivity and enough butt power to keep the fight against trophy fish under control.

Lupus 77

This is light class rod for Cherry Salmon. This will be matched to fish on main stream not only Cherry Salmon but also to large Yamame or Rainbow trout larger than 60cm, even good for land locked cherry salmon. This have been loaded more flexibility than other model so there will be less chance of hooking off. We believe that this is excellent light class rod to sense small bite and full of potential of this rod will be taken out when tough situation that angler have to concentrate on contact from fish which might be able to get only once a day.

Lupus 81

81 is good to be used with every kinds of minnows or sinking pencil and remarkable characteristic of it is sensitive tip section with superb sharpness which is enable anglers to manipulate lure at their own will and set hook on easily even lure is in the rapid current. These have been loaded high versatility which is enable angler to use plugs or spoons for Cherry Salmon with amazing cast feeling.

Lupus 87

Lupus 87 have been gotten almost same strength as 81 on blanks and it have been finished as standard as rod for Cherry Salmon. Considering its length, we recommend you to take this 87 when you fish on large river. We want you to pick 81 or 87 depends how you fish or how big the river you fish on. Lupus 87 will support anglers with excellent cast feeling and will keep trophy fish under control with huge power that have been loaded on butt section.

Lupus Sakura 86M MonsterCherry

86 Monster Cherry will suit to the monster hunter who is aiming at trophy fish over 70cm. Compared to other 3 models, this 86 Monster Cherry have been loaded huge power on it. It have gotten more than enough butt power to fight against monster fish without losing sharpness to cast rhythmically, sensitivity to manipulate lure delicately. We can proudly say that this would be flagship model of Lupus series. We have built this up with the knowledge and experiences that have been cultivated from fishing for big one in saltwater so that this is more than enough to be called Monster Cherry for sure.

Estuarine

Estuarine / 6 Line up (Spinning & Over head) / For Predator Hunting

Estuarine series has been designed to be adjusted for various field in overseas. Drive into the back country, walk through the bushes and drift the boat under the overhung trees. Then monsters that are beyond your imaginations will be waiting for you, out there.

We have loaded massive power to these blanks for anglers who are aiming at monsters, hiding on the untouched field. The targets are not only for freshwater fish, such as huge cat fish, barramundi and giant snakehead but also saltwater fish such as medium sized trevally from boat. Please take Estuarine series with you as your expedition partner.

All of these 6 models are available to be chosen Spinning model or Overhead model. It is not only good for predator hunting but also suit to aim rock fish or seabass from boat. We recommend you to take one of these when you should not lose initiative.

Estuarine Raptor 60M & 63MH

This unique 2 pcs rod has a high strength lifting power plus a sensitive tip that allows you to even cast smaller lures and work them properly. Many tests were done in rivers casting, light troll for Barramundi or even casting by reef edge for small trevally and has proven to take all sorts of punishment.

Estuarine Glazer 58MH & 60X

Many tests has been done on these rods to prove that rod could not only hook fish but get your fish quickly out of snags or heavy cover and without losing your fish. Both models have sensitive tip, high strength and strong lifting power, thus anglers are able to target species that lurk in heavy covers and giving you assurance to stop them from busting you off.

Estuarine Xtremo 60 & 65

For those who seek out those beast lurking among heavy covers or structures, you need a rod with strong back bone that can subdue them out of their covers and able to work or troll deep diving minnows. Many tests has been done to prove the rod capability to take any abuse & in short distance fight between predator & angler even with high drag setting!

Triceptor

Triceptor/ For Expedition(3pcs Packing rod)

Triceptor 68M

The power and controllability of the rod has broken the standards of 3 pieces rods, giving you greater choices for your overseas travels. The launching of the long awaited 3 piece pack rod produced by Yamaga Blanks. The developmental concept for the pack-rod was for a reliable rod in the toughest of field conditions, equipped with a strong butt power which is highly operable. Furthermore, the sharp casting feel and the great balance will reduce the strain on the angler from casting all day. You can use take it as a sub-tackle for your light big game in the exotic destinations or as your main weapon in the wetlands which require continuous shifting of locations. We are confident that it will become one of your great allies.

Triceptor 68M (Spinning & Over head Model)

Baronknight

Snake Head

BaronKnight/ 2 Line Up/ Snake Head

The field for snakehead where is covered by weed on surface is getting limited recent year. Because of this fact, snakehead have been putting lots of pressures on and becoming so spooky, so that snakehead won't take lure aggressively very much. For that reason, we have designed Baronknight series to pursue accuracy of cast and high operability to adjust the sensitive snakehead game this recent year.

Baronknight SH 72

First of all, you will be surprised on the lightness, and it was once you cast lure with it, you will sense the potential of cast ability, for sure. We tried to reflect on the technology, knowledge and experiences, which cultivated from salt lure game, into the snakehead game. Baronknight72 has been finished to be loaded with Accuracy of casting, delicate action with tip section, and butt section with a massive power to achieve the finest result.

Baronknight SH 78

SH78 have been extended to the length of SH72, while the progressing ability of long cast, keeps flexibility on the blank to pursue usability of lure. This is one of the best rod to cast long distance, and making use of the powerful butt section and lure spooky snakehead with delicate action, with sensitive tip section at long range. Although SH78 have been loaded with more powerful buttsection, than SH72 to enable you to pull out big ones that's up to 80cm from the water, on the whole rod, SH78 is a little softer than SH72.

BaronKnight SH72

TAKO KING

TAKOKING / 1Line Up / For Octopuss Game

TAKO KING 79

Previous TAKOKING have been turned into 79 and been loaded more power to pull the monster octopus out at wharf. This have been loaded with enough power to pull octopus over 1kg out aggressively and strength on tip section to manipulate lure heavier than 75g at your own will. This is not just stiff stick of course, but this is the rod which enable anglers to cast lure weight 75g comfortably. This will be good for searching octopus with falling lure vertically on wharf of port at night or explore widely with long casting at field where scree on the bottom.

TAKO KING 79

Lt: 2370mm (CL:1830mm) Wt: 295g Lure: Max 50 (190g) Line: Max Pe10 Price:

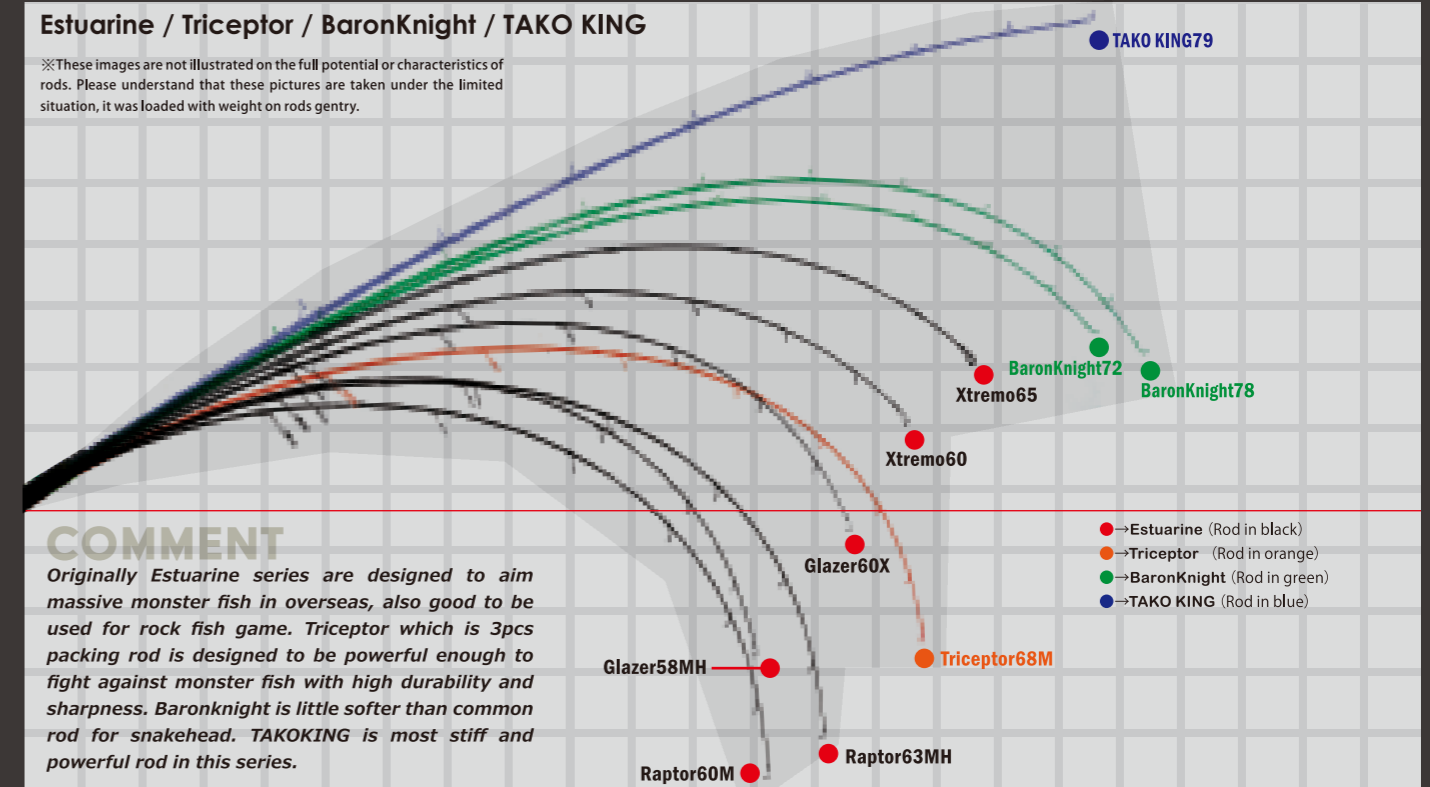

Sec:2pcs (Grip-Joint) Cb:95.4% G:SIC Ocean Guide(Fuji) RS:T-DPS20(Fuji) Suitable reel size:DAIWA around #10~30 / Abu Garcia around #6500 / SHIMANO around # 300-400

Extra Rod Bending Curve Load 1kg

Estuarine / Triceptor / BaronKnight / TAKO KING

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gentry.

COMMENT

Originally Estuarine series are designed to aim massive monster fish in overseas, also good to be used for rock fish game. Triceptor which is 3pcs packing rod is designed to be powerful enough to fight against monster fish with high durability and sharpness. Baronknight is little softer than common rod for snakehead. TAKOKING is most stiff and powerful rod in this series.

2017 New model Members

YAMAGA Blanks Limited Edition

※We will announce when the release schedule is fixed.

BlueCurrent 70TZ NANO Trippers /4pcs

Sec:4pcs (Spigot Ferrule) G:TZ Titanium frame K Guide(Fuji)

Lure: ~12g Line: 0.3~0.8 Price:

4pcs model of BlueCurrent is coming finally!! Although it is going to be perfect rod when you are on traveling, of course you can take it to your main field as a daily use rod. We have loaded enough sensitiveness and sharpness as one of BlueCurrent so we recommend you to use it not only for light salt game but also for trout in the small stream. The closed length of it is 560mm to put in the suits case. We believe that you cannot help taking it whenever and wherever you go out. Enjoy fishing with it as you like.

BlueCurrent 60 Jr.

Sec:2pcs (Put over Ferrule) G:Alconite Stainless frame K Guide(Fuji)

Lure: ~7g Line: 0.3~0.8 Price:

Although it is designed for kids over 5 years old, of course it has gotten durability, strength and toughness as spin off of BlueCurrent series. We have achieved versatility to use many kinds of lures with high cost performance. It is well balanced to be used by kids and adult also. We believe it is going to be one you will always take to fish no matter lure or bait.

※The limited rod is a model under development. Specs-Prices etc are subject to change.

Precautions for use

- Do not cast with tangled line or line trouble in the reel. This may cause the rod to break. Furthermore, if you miss or forget to put the line through a guide, this may result in damage or breakage of your rod.
- If you continue to reel in your rig (lure, popper, jig etc) after it has reached the top guide, this will cause the rod to break.
- If you force the joint section of the rod when joining together, this will cause cracking or splitting of the joints.
- If you use the rod while the joint section is still loose, this may cause breakage.
- If the joint section is stuck together, use a rubber sheet for added grip while twisting away from each other.
- Beware of power cables, overhead power lines or phone lines. The material (carbon) will easily pass through electricity causing serious injury or death.
- If you hear or see lightning approaching while in use, pack the rod away or stay away from the rod. Lightning may strike causing serious injury or death.

Maintenance and storage

- Wash rod with running water to rid of any filth and salt. Then wipe off any excess water.
- If you store your rod without wiping off excess water, this may cause blisters on the blank. Storage in well ventilated are as with no high temperature.
- Please do not leave the rod in your vehicle for long durations in summer. This will cause blisters and warping of the blank.

Contents in this catalog

- Include accurate specifications of rods, written in accordance with the regulations set by the Japanese National Fishing Rod Fair Trade Conference.
- Prices and specifications listed on this catalog may be altered without notice.
- The colors presented in the pictures may differ from the actual color. Furthermore, some products are prototype rods in the developmental stage and may differ when it reaches the final product.

Requesting repairs

- Please be aware that personally modified rods will not be covered by warranty (even if it is within the warranty period).
- If you are requesting for repair, please send in the whole rod (not just the section of the breakage).

Repairing and After service

- Please take or send products which is required repairing to sales outlet. At that moment, please send a whole rod (not only the section of the breakage)
- Please be aware that any rod that was personally modified will not be covered by warranty (even if it is under warranty)
- Any repairing that we have judged as changed/tampered the specification or made to order is unacceptable.
