English Version

## “Equipment” deserved to be called “Fishing Rod”

The fishing rod might not be always required when you just wish to catch fish.

But anglers know that fishing rods make “catching fish” more interesting and more strategic.

If you just pursue the results, there are so many choices of method. We believe that we have to understand the behavior of each kind of fish if you wish to catch fish in action as “Angling” and fishing rods will be put more meanings on “catching fish” especially when you aim at particular type of fish that you really wish to catch.

We also think that fishing rods enable us to sense what is happening in the ocean, and give the life to lures or hook rigs.

If you could use fishing rods like that way, you will not forget the day that you fish with your fishing rod unless you could not get superior results.

YAMAGA Blanks reckon that fishing rods are integral equipment which is recognized as an extended arm of anglers to keep memorable days and unforgettable experiences in your mind.

The potential of fishing rods will not be pulled out if it never be fished over and over.

Equipment which has enough quality of performance must be the bridge between anglers and nature... That is what we think how the fishing rod is supposed to be.

In 2018, YAMAGA Blanks will commemorate 10th anniversary of establishment.

We have been started assembling fishing rods as subcontractors, then have been started manufacturing as YAMAGA Blanks....

Our policy and faith have never been changed ever since then.

“Build the best equipment for anglers”

We have been pursuing quality of our own factory to improve the quality of products while improving techniques and skills of craftsmen last 10 years.

And we will never ever stop pursuing potentiality to build progressive fishing rods for anglers who never ever stop exploring to find “the best equipment”

# 2018 New Model

## Mebius

6 Models / For Egging

## Equipment for egging

Already 8 years have been passed since first generation of “Various” series had been released and in 2018, new equipment for egging “Mebius” series is launched.

We have pursued to provide superior performance such as lightness, toughness or sharpness at a lower cost for Mebius series as well as we did while developing Various and Calista.

We have produced Mebius series to let anglers feel our policy and pride as a blank manufacturer.

We also have been pursued that how much can we sharpen the blanks up while keeping “Mebius” low budget. Many anglers are aiming at squid here in Japan for quite long period of time.

We reckon that they are fascinated with mixture of simplicity and complexity.

We believe that fishing rod supposed to be supporting role to Anglers. And that is why anglers become keener to go out for fishing. We have desired to build superior fishing rod for squid to enable anglers to feel in union with nature. And we have reached the one of the best answer in the shape of this “Mebius series”. This is for dedicated anglers who is putting their backs into it.

Mebius

2018 New model  
**Mebius** Eging Model

NEW Mebius **710L**

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. Although it is unsuitable for letting your Egi move fast or using Egi which receives strong resistance of water because of that flexibility which is designed intendedly, when squid is less activity than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

NEW Mebius **88L**

This is the light class model which is good for short pitch jerk and jerk making use of line slack. You can cast even light weight of Egi with comfortable feeling thanks to flexibility and moderate repulsive force. So this is good to be used on sight fishing technically. Yet it have enough power to keep huge squid under control, you can manipulate Egi with less power than others. Once you fish with it you will recognize that it have gotten high potential to be used in all season. 88L have been designed to cast, manipulate Egi and hooking up with super fine PE line without any stress. This is the one for angler who is pursuing result more than anybody else.

NEW Mebius **85ML**

85ML is well balanced to let anglers feel comfortable when they fish and succeeded to reduce burden of anglers maximally. It have been designed to be more flexible than 86M and finished to become technical rod which is enable anglers to manipulate various weight of Egi at your will. You will be able to take advantage of versatility of 85ML as such as luring out delicately on sight fishing, jerk making use of line slack and short pitch jerking. Yet this is not specialized model for monster hunting, we recommend 85ML for any level of anglers as an all-rounder to cover any seasons and various situation.

2018, YAMAGA Blanks releases new eging series. We have put our accumulated techniques and knowledges into “Mebius” series.

We think that there are lots of meanings we release new eging rod series on our 10th anniversary of foundation.

We have a hunger to build eging rod with high performance, superior durability and low budget while taking advantage of our skills and technology.

We hope that fishing rod from YAMAGA Blanks is going to be used by much more anglers. That is ambition what we put into Mebius series.

It is quite difficult to keep low budget while pursuing performances and quality.

But we have succeeded to achieve those elements as making extensive use of our techniques of design and quality of factory.

That is how we build fishing rods and once you fish with Mebius series you will definitely know as much about our policy and performance of blanks. We offer you 6 different type of character for Mebius series as such as short length, light weight model or medium heavy class to cover various situation that you are going to face.

Of course you can take one as main rod, you can also take one as a substitution for specific circumstances.

We put our full of passion, spirit, knowledges and techniques of YAMAGA Blanks as a rod manufacturing bland into this Mebius series.

NEW Mebius **79M**

Blanks of 79M have been brushed up to be taking advantage of length. You will feel high response speed of blanks and high usability as characteristics of short length model while pursuing long casting performance. Yet it have enough power to cast and manipulate even size 4 Egi (about 25g). It have been loaded moderate repulsive force, flexibility and lightness on blanks. If you are required lure speedy when the water is worm, taking time to lure spooky one out, or aim good one from the boat, this 79M will be your huge advantage for sure.

NEW Mebius **86M**

It is standard model of Mebius series. Although it is medium class rod, it have gotten sensitive, flexible tip and belly section to be adjusted modern eging scene technically. It have been designed to be well balanced to cast and manipulate Egi with less input by angler reducing burden of angler's wrist. This 86M is the most versatile model of this series. You can cast long distance and manipulate at your will even size 4 Egi (about 25g) without any anxious.

NEW Mebius **83MH**

Although this is the medium heavy model which have been loaded massive power on butt section, blanks of 83MH have lightness and flexibility. It is good for size 3.5~4 of Egi mainly, you can of course use heavy type of size 4.5 of Egi. This 83MH have been designed to be loaded enough power to set hook on huge squid even heavier than 2kg and lightness and flexibility of blanks will reduce unwanted kickback when you jerk. This MH model is for keen angler who wish to hunt monster size and strongly hope to stay focused on fishing even you are waiting for migration of squid.

## Calista Eging Model

Blanks of Calista have been redesigned totally with NANOALLOY® technology from TORAY to achieve potential of response as egging rod of new generation.

The ability of distance cast have been increased thanks to TORZITE ring titanium guide (SIC titanium guide on top guide only) from FUJI. Blanks made of NANOALLOY® will be followed in a moment when it is loaded and will be returned instantly thanks to high repulsion force. Because of these character angler will be able to jerk EGI sharply with less power than ever and make monster squid float quickly without any breakage of legs of squid when you fight. Blanks with moderate stiffness and suppleness will reduce burden of anglers and enable you to lure squid more delicately.....

### Calista 86L TZ NANO

This is the light class rod which is good for jerking make use of line slack. This is suit to the game that lure squid delicately and sense slightes touch of squid with fine PE line. We have expressed 86L as “light class rod” which means it will be enable you to manipulate lure with less power than other models and it have been loaded enough butt power to keep squid over 2kg under control. This is the best egging rod for angler who would like to fish with super fine PE line.

### Calista 82ML TZ NANO

This is almighty egging rod that suit to not only from breakwater or rocks but also egging game on boat. This have been finished as a sensitive rod with high repulsive force to be enable anglers to jerk lure make use of line slack or jerk aggressively. Angler will be able to manipulate lure delicately when you sight fishing make use of this length. And it have been gotten ability of distance cast thanks to Torzite ring guide and blanks with NANOALLOY® carbon material from TORAY.

### Calista 89ML TZ NANO

This is the well balanced model that is enable anglers to jerk various ways from vanishing wave block, rocks or high scaffolding breakwater. It have been gotten high versatility to lure squid by various way of jerking and you will be able to cast long distance with it without any stress. This will be played an active part in spring season and also fall season as well for sure. And another characteristic of it is high sensitivity to sense even structure of bottom of the sea and softness of seaweed. This is the super sensitive model which is not only to sense contact of squid but also to explore underwater world as you are searching by hands.

### Calista 710M TZ NANO

This is the Calista with high response in a short length blank which is good for the anglers who would like to jerk Egi more sharply and more aggressively than others. If you would like to give Egi effective action with less power than ever, we recommend you to choose this 710M which will give your wrist less burden thanks to blanks with NANOALLOY® from TORAY. When you wish to let Egi move from right to left or up and down at your will, Calista710 which have been gotten tip section with sensitiveness and moderate firmness combined to butt section with toughness will make you satisfy for sure. Although it is short length, you will be able to cast as long distance as Calista 86M TZ Nano and it will cover various way of fishing as such as blind or sight. Of course you can use it for squid fishing from boat as well.

### NEW Calista 82M TZ NANO

It have been loaded high cast ability and manipulation capability to blanks themselves so that enable you to make variety of rod action as such as jerking quickly in short pitch, jerking which take advantage of line slack or else. Although it have massive power to set hook on and land monster squid, tip section have outstanding high sensitiveness to sense tiny contact of monster squid. Highly remarkable point is that lightness you can feel when you actually cast and making action with it. That characteristic will reduce physical burden of anglers considerably. We would like to say that this 82M have gotten lightness feel of manipulating like a 710M, then loaded more power as same as 86M.You will be able to fish for all season at variety of field as such as rocks, piers or surf with it. This all-rounder model must be suited to super keen squid hunter.

### Calista 86M TZ NANO

This is the standard model which is great for hard darting action. You will notice high repulsive force and high response feeling on blanks themselves once you fish with it. But you will be able to jerk heavy lure very lightly with less burden on wrist of angler thanks to Nano alloy carbon material which have gotten high resiliency on blank. It will be bent from tip section to belly section when squid is hooked without any breakage of legs of it.

### Calista 90M TZ NANO

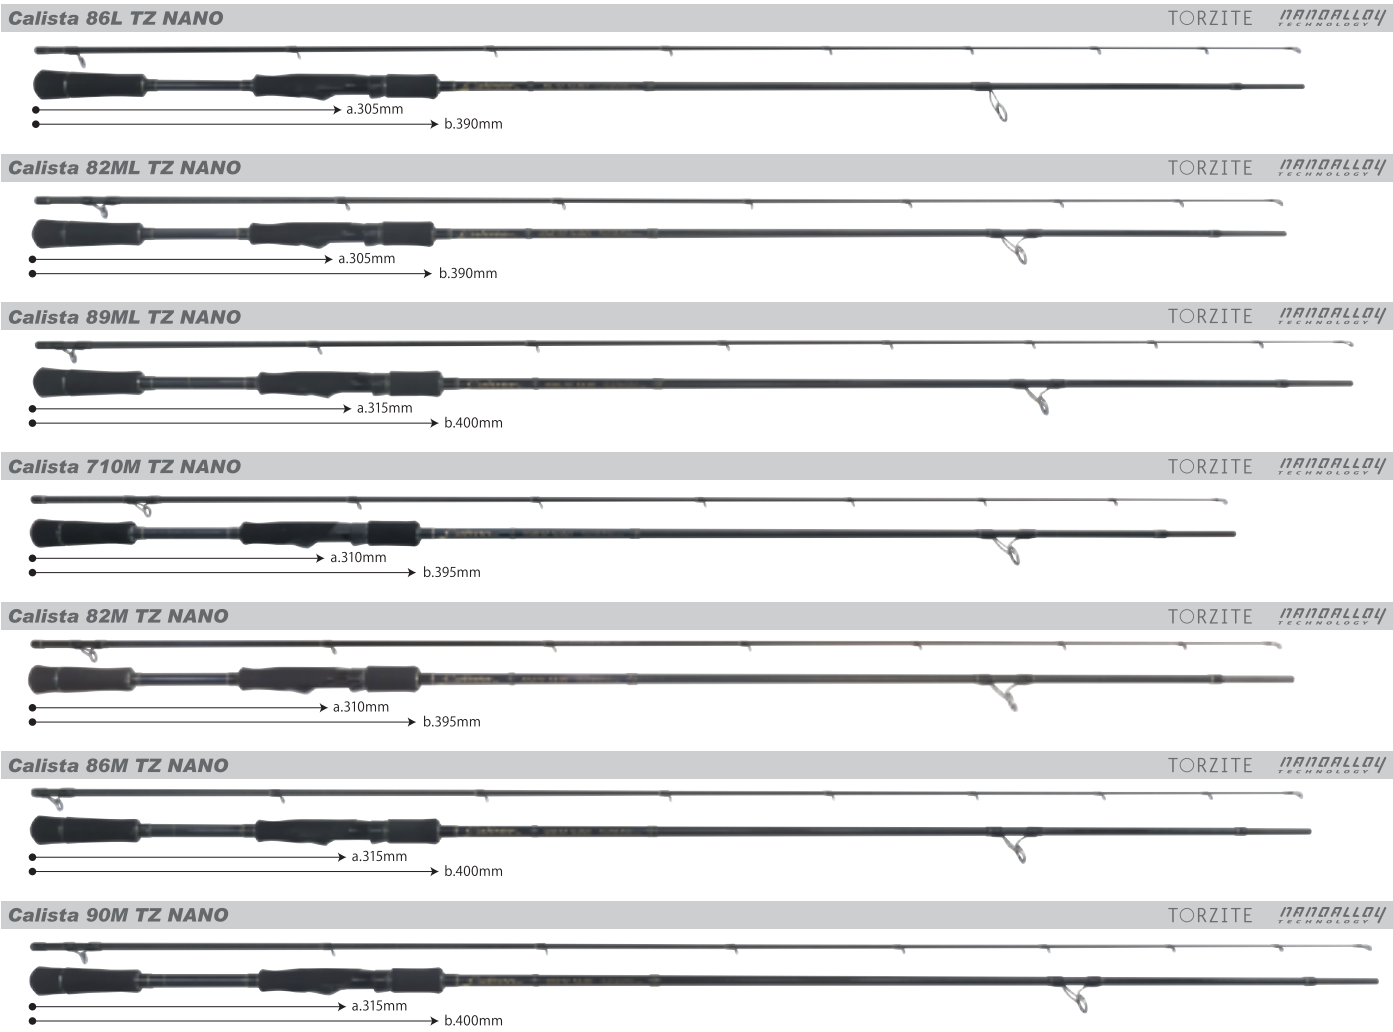

This is perfect rod to make lure fall for a long time because of its length. We have adjusted this rod to become not too stiff to jerk hard without any burden of angler's wrist. This is the excellent model to let lure fall for a long time in shallow area easily as we mentioned and you will be able to strike surely with it even when line moved slightly because of sensitive contact from spooky squid. Of course it will cover various situation such as field where you are going to need length of rod itself and enable anglers jerk lures by various ways.

82M have been tuned 86M become lighter on jerking. Although it have massive power to set hook on and land monster squid, it have enough sensitivity and flexibility to manipulate egi technically. There are three kind of M class rod. 710M is the lightest model in M class that suit to squid around 2kg,86M is the core of M class to aim squid over 3kg,82M have characteristic as just in between as 710M and 86M. Stiffness is increasing from 710M→ 82M → 86M.

Calista series have been designed to be loaded two contradictory characteristics. Its bend smoothly when load applied, yet its repulsive force is extremely strong to let anglers manipulate egi effectively with less power than ever.NANOALLOY®-loaded rod bend depending on the load applied and will be reshaped itself to its original shape without unwanted wobble. Blanks of Calista series transmits slightest of movement and vital information well. You might be better to wind the excess line out of top guide up little more than usual when you cast to pull out the full of potential of NANOALLOY® technology.

# Various Eging Model

What we have thought is how can we make Various lighter and how can we improve the whole balance while remaining usability and sensitivity. Once you hold it, we believe that you will be surprised how light it is and you will hardly get tired even keep jerking the whole day. We have aimed to fuse the potential of blanks that is easy to handle and enable you to fish aggressively all day long in high level. “Various”is the answer of yamaga blanks for egging scene which is evolving day by day.

## Various 88L

This is the light model with high controllability which enables you to dart egi with repulsive force of tip. This suits not only for huge squid, but also for small ones sighting fish in fall. The cast ability that enable light egi to cast long distance is also one of the characteristics.

## Various 83ML

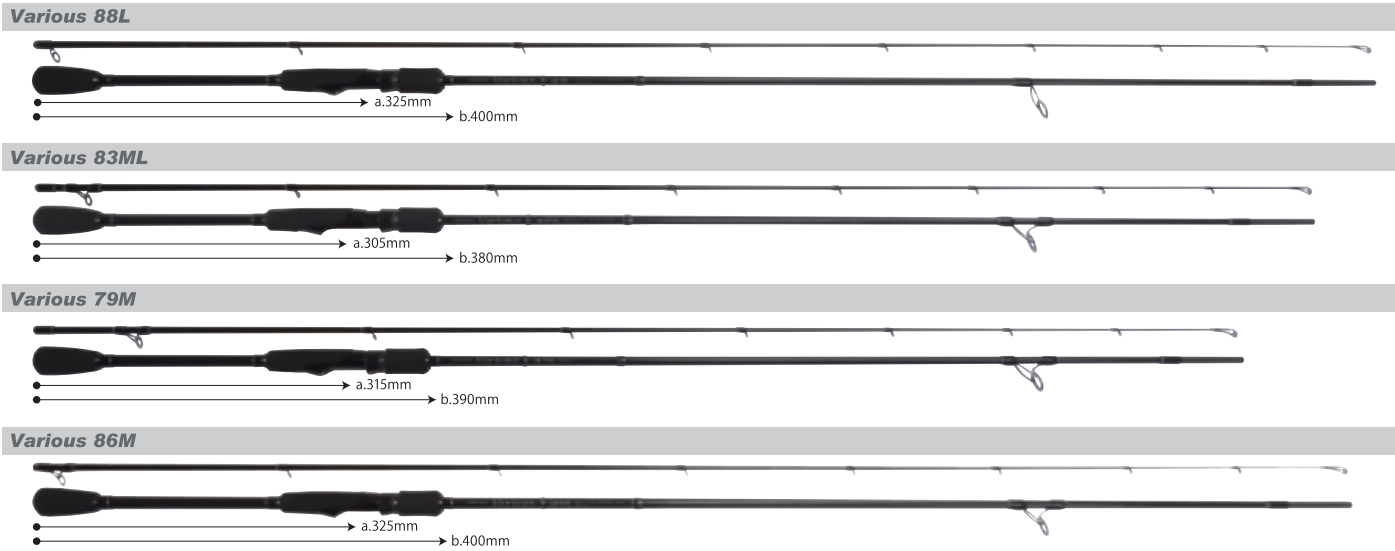

This is the medium light class model which enables you to move egi diverse way. Using wrist to twitch, jerking with line slack or hard darting action, you will be able to control the egi various ways without any discomfort. This is the one that is tuned blanks to pursuit balance thoroughly.

## Various 79M

The noteworthy ability of 79M is overwhelming when casting for a distance. The casting distance which 79M produces won't make anglers feels that it is 7'9ft length. You will be able to dart egi bouncy at any field like deep area or where super strong currents. This is the short length in the tried-and-true style of eging rods!

## Various 86M

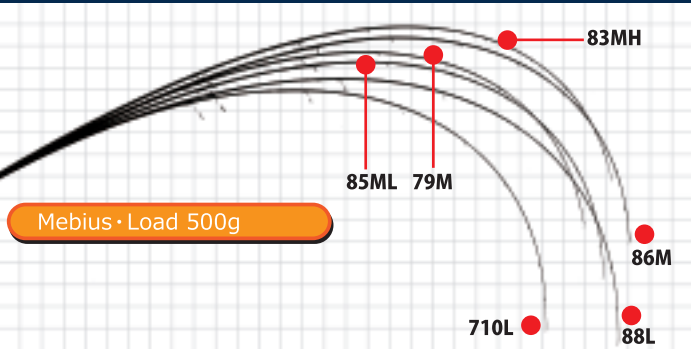

This is the standard model of Various series. 86M has been equipped not only with sensitive tip, but also tough butt section. That is why we call this various basic. Also it has been designed to be much lighter, with more sensitive tips. In result of that, it has been a well balanced achieved.

Mebius / Bending Curve / Load 500g

Calista / Bending Curve / Load 500g

Various / Bending Curve / Load 500g

These are comparison images of Mebius, Calista and Various series which are loaded 500g weight on tip.Mebius series have been loaded more flexibility than other series to get more versatility and usability.Compared to Various series, Mebius series have been designed to become softer. Although calista series are also very flexible, lightness and repulsive force are much stronger than mebius series. Those 7models even 4 of M class got ability to bend even with small amount of input and reshape itself with strong repulsive force. If you aim squid over 3kg mainly, 82M,86M or 90M will be recommended.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

## Equipment for light game

Light game on salt water have a various definition.

You may use ultra-fine line and small lure to catch selective horse mackerel or aim large target with tackle for light game delicately. Which means that method and strategy of light game is unlimited as long as expand your imaginations to catch the unconquerable target. So many different kind of fish that you can imagine to catch with the rod for light game is going to be the target of BlueCurrent.

That is how we set concept of BlueCurrent as fishing rod for light game. The one of the advantages of using fine line is to reduce the risk of spooking fish of course.

But it's not quite that simple. We think that biggest advantage is that you have more choices of tactics. Using finer line gives you advantage as such as reducing resistance of current of water and let your lure fall into the water at purposeful speed you have set.Which means that you will be able to control your tactics at will. We have loaded enough repulsive force and lifting power on every blanks of BlueCurrent series to let anglers aim various kind of target without any anxiety factors. Superior sensitivity which have been built in blanks transmits slightest of movement, vital information, situations of bottom of the sea and changes of current. You should not be stereotypical. BlueCurrent is built for freedom of angling.

## BlueCurrent TZ Light Game Model

TORZITE Ring Titanium Frame Guide Series

“BlueCurrent TZ” series which have been set as flagship models of BlueCurrent series are filled with accumulated knowledges and technologies of experienced craftsmen of YAMAGA Blanks. What we have pursued for BlueCurrent series are sensitiveness, lightness, operability and toughness of blanks. We have reached to an answer how BlueCurrent supposed to be by combination of TORZITE ring guide and well-trimmed blanks. Yet main targets of BlueCurrent TZ series are horse mackerel and rock fish, you will be able to aim black sea bream or even seabass with 12 different kind of selection. Although you will feel sharpness when you cast and manipulate, we believe that you can enjoy smooth bending curve when you are on fighting. We proudly present you our master piece of fishing rod for light salt water game.

### BlueCurrent 53 TZ

This is first one piece model from BlueCurrent series. It have been achieved ultimate feeling of cast thanks to its short length, one piece blank and Titanium K guide with Torzite ring from FUJI. But it is not just soft rod. It have been loaded moderate stiffness and high sensitivity on blank to sense the small bite of tiny horse mackerel and enable you to manipulate tiny jig head at your own will.

Target: Horse Mackerel / Lure: Jig head / Field: Port

### BlueCurrent 58 TZ Jighead Special

BlueCurrent 58TZ is technical short length model which have been designed to be enable anglers to strike aggressively or let hooks on fish mouth almost automatically with high operate ability of lures. Although, this is specialized model for jig head, so you can twitch and jerk jig head at will of course, you can cast tiny plug up to 3g and give it action delicately as you wish to. It have gotten wide range of release point thanks to flexibility of blanks even though it has employed sharpness and lightness and it will bend nicely to pull fish up to surface with extra muscle hidden inside of it.

Target: Horse Mackerel・Rockfish / Lure: Jig head・Plug / Field: Port

### BlueCurrent 62 TZ NANO Jighead Special

As same as 58TZ, BlueCurrent 62TZ Nano have gotten sharpness within blanks themselves and once fish is on, its bend nice and smoothly from tip to butt section. Thanks to Nanoalloy technology from TORAY, you can keep fish under control at your own will and you cast lure with minimum motion so you do not have to worry about rough condition if you choose it. We have sharpened this 62TZ up to manipulate both jig head and plug delicately with high sensitivity. Manipulate lure, sense the small bite, strike, and fight under your initiative... You will be able to enjoy the all of elements of light game with it for sure.

Target: Horse Mackerel・Rockfish / Lure: Jig head・Plug / Field: Port

### BlueCurrent 65 TZ Jighead Special

This model has been designed specially to enable anglers to earn the distance and improve the manipulation performance under using the jig head. You will be able to cast 1g jig head line drive. Since the guide has become much lighter as it used to, TZ model has been loaded with more sensitive tip section. On the result of that, we have achieved a greater level of casting feelings and manipulation.

Target: Horse Mackerel・Rockfish / Lure: Jig head / Field: Port

### BlueCurrent 610 TZ Jighead Special

This is the only model that almost has equal casting feelings as JH65/TZ. It has been designed to cover heavy weight jig heads and earn the distance. Bring this rod to field where you are required to cast from the height or cast long distance. Also it has been loaded with tough butt power.

Target: Horse Mackerel・Rockfish / Lure: Jig head / Field: Port

### BlueCurrent 72 TZ

Due to the adoption of TZ ring guide for BlueCurrent 72, which is the basic model for light game, we have redesigned blanks to make tip section more sensitive. You will be able to handle various items that are from jig head and sinker rigs with it. Because of this high sensitivity, high controllability, you will be able to fish delicately at your own will.

Target: Horse Mackerel・Rockfish / Lure: Jig head・Sinker・Plug / Field: Port・Rocks

### BlueCurrent 76 TZ

It will cover various situations with various kind of lures as such as jig head, sinker, or plug. Although it have been loaded sensitive and flexible tip section to manipulate jig head, power of butt section is enough to stop running of good sized horse mackerel and rock fish. It is also well balanced for using top water plugs.

Target: Horse Mackerel・Rockfish・Black Sea Bream  
Lure: Jig head・Sinker・Plug/ Field: Port・Rocks・Estuary

### BlueCurrent 83 TZ LongCast

This is mainly designed to enable anglers to cast 1g jig head for longer distance and you might forget that it is 8.3ft long because of the sharpness which you can feel when you cast. Of course you will be able to manipulate rigs or plugs delicately. Because of the loading Torzite guide ring, the frictions between guide ring and line has been reduced, so when you cast you will enjoy a long distance game without any stress.

Target: Horse Mackerel・Rockfish・Black Sea Bream  
Lure: Jig head・Sinker・Plug/ Field: Port・Rocks・Estuary

### BlueCurrent 91 TZ LongCast

If you want to conquer the fishing field such as expansive surf, estuary, or port, we recommend you to take this long length and distance model with you. We believe that you are going to feel incredible sensitiveness on tip section when you search for distant spot thanks to lightness and sharpness of blanks. Please take 91TZ with you if you search fish which is feeding at the spot where nobody can reach.

Target: Horse Mackerel・Rockfish・Black Sea Bream  
Lure: Sinker・Small Sized Metal jigs・Sinking pencil / Field: Port・Estuary・Surf

### BlueCurrent 72 TZ NANO Jig-Special

This is the special tuned model which enable anglers manipulate various weight of jigs from micro sized to 15g weight because of moderate strain of tip section. We have chosen NANOALLOY®technology. Its innovative to a material from TORAY LTD to achieve a high performance of manipulation and sensitiveness. Although you might sense the strain of blanks, it will work as tenacity to land fish smoothly.

Target: Horse Mackerel・Rockfish・etc./ Lure: Metal jig/ Field: Port・Rocks・Surf

### BlueCurrent 77 TZ NANO Stream-Special

This rod which has been built with NANOALLOY®technology from TORAY LTD is for special situation. It achieved high sensitivity and usability of various lures without losing repulsive force of rod even in the rapid current. The potentials of this rod will be shown mostly at the field where the experts likes.

Target: Horse Mackerel・Rockfish・etc./ Lure: Plug・Jig head・Sinker/ Field: Port・Rocks・Rivers

### BlueCurrent 85 TZ NANO All-Range

If you want to do everything in light game category, we think that BlueCurrent 85/TZ will make your dream come true. Every range of water will be covered with light line by BlueCurrent 85/TZ which have been gotten sensitiveness and toughness. Blanks with NANOALLOY® technology will support you to sense tiny contact from fish and to pull fish up to surface of the sea smoothly. You will never lose initiative even if you hook big one up accidentally. You will be able to aim Rock Fish, Black Sea Bream, Seabass (aim from top water to deep water), Horse Mackerel or even squid.

# BlueCurrent Light Game Model

## SiC Ring Stainless Frame Guide Series

We have been pursuing that how we keep “BlueCurrent” low budget while achieving high performance of casting, handling, durability and sensitiveness as a high quality fishing equipment for light target of salt water. We present you total 10 type of well selected including 3 over head models to fulfill the imagination of each anglers that where, how and what are you going to aim at thanks to versatility hidden in blanks of “BlueCurrent”

Even though all of these models have sensitive and flexible tip section to reduce the chance of losing fish, the strong repulsive power on butt section will allow anglers to apply good amount of pressure on fish and land it smoothly. BlueCurrent series have been composed of techniques of designing and accumulated experiences as Japanese manufactured rod maker without any compromises to support anglers who fish with it.

## BlueCurrent 510

We have tried to load to 510 most delicate tip section ever as tubular blank and more power will be loaded to butt section when it is bent while keeping sharpness as short rod. You will be able to cast and manipulate tiny jig head such as less than 0.5g without any stress and also it have been gotten enough power on butt section to keep large one under control as a well-balanced rod for jig head fishing.

Target: Horse Mackerel / Lure: Jig head / Field: Port

## BlueCurrent 68II

Compared to the previous model, the casting of lighter jig heads have been improved with a sharper casting feel. The sensitivity of blanks has also been improved for anglers to even sense the slightest changes in the bites, resulting in a swift and smooth hooking. This will become your basic model as an all rounder Aji game rod.

Target: Horse Mackerel/ Lure: Jig head / Field: Port

## BlueCurrent 74II

The tip is flexible enough to even capture the bites of the smallest of fish, yet having an overall sharp feeling to it. With its outstanding casting ability and the wide range of the release point, it is great for all levels of anglers. We have managed to create a very versatile rod for not only targeting the Aji, but also for the Mebaru (rock fish) game.

Target: Horse Mackerel・Rockfish/ Lure: Jig head・Sinker・Plug/ Field: Port・Rocks

## BlueCurrent 80II

This is a long length rod ideal for the rock fish game or Aji game off the rocks or areas that require long distance casting. You will be shocked to feel the lightness of this 8ft rod and how sharp the casting feel is. The quality and performance of the blank is astounding when considering this price range. The high sensitivity in the long distance range and the flexible yet strong butt will effectively bring in your fish. We offer a new dimension for your light game.

Target: Horse Mackerel・Rockfish/ Lure: Jig head・Sinker・Plug / Field: Port・Rocks

## BlueCurrent 72/C II

This is a versatile salt water game rod able to tackle the Aji and Rock fish game using sinkers and top-water to bottom fishing for bream. It is a strongish medium class rod with the sensitivity to feel the terrain of the seabed while having the operability to easily control the top-water plugs.

Target: Horse Mackerel・Rockfish・Black Sea Bream・Small sized Seabass  
Lure: Sinker・Plug・Small Sized Metal jigs/ Field: Port・Rocks・Rivers

## BlueCurrent 78/M II

We present the ultimate power rod for those monster hunters out there targeting 30cm over Aji and Mebaru. It is an unorthodox light rod with the conflicting characteristics of fineness and power. You will not only be able to control the power of this rod, but also enjoy the traits of the light game. Similar to the 72C, the balance of the rod is also ideal for the top-water Black sea bream fishing.

Target: Horse Mackerel・Rockfish・Black Sea Bream・Small sized Seabass  
Lure: Sinker・Plug・Small Sized Metal jigs / Field: Port・Rocks・Rivers

## BlueCurrent 82F NANO

When you face the situation that you need to cast float rig a distance, we recommend you to choose this BlueCurrent 82F Nano. You can cast even heavy float rig comfortably and keep large horse Mackerel or Rock fish under control at your own will thanks to massive power of butt section with NANOALLOY® technology from TORAY. On the other hand, tip section with ultimate sensitiveness make you sense even micro bite of spooky fish. Of course you can cast and manipulate sinker, plug or metal jig without any stress.

Target: Horse Mackerel・Rockfish  
Lure: Float Rig・Sinker・Plug・Small Sized Metal jigs / Field: Port・Rockes

## BlueCurrent 63 (Overhead reel Model)

If you use jig head weight around 1~2g mainly or even 0.5g, we recommend you to choose this 63 overhead model. You will be able to sense tiny contact of fish when jig head is falling and you can manipulate jig head for wind game around 2~3g at your own will then set hook on aggressively because of blanks that well balanced and well designed. Although it is overhead model, you will cast long distance as well as you do with spinning reel thanks to combination of this blanks and latest overhead reels.

Target: Horse Mackerel・Rockfish / Lure: Jig head / Field: Port

## BlueCurrent 71 (Overhead reel Model)

This is long length and multipurpose model of 63 overhead for anglers to manipulate not only jig head but also plug or micro jig. It is of course suit for Horse mackerel (Aji), also you will be able to keep rockfish or black sea bream under control and land it smoothly thanks to that enough butt power. These 63,71 are also works well for game off the boat.

Target: Horse Mackerel・Rockfish/ Lure: Jig head・Plug/ Field: Port・Rockes

## BlueCurrent 78 NANO (Overhead reel Model)

If you are required to cast a long distance, we recommend you to pick this. This versatile overhead model enable you to manipulate sinker, plugs and jigs then you can aim not only horse mackerel and rockfish but also black sea bream and seabass because of that accuracy of cast and amazing power of butt section.

Target: Horse Mackerel・Rockfish・Black Sea Bream・etc.  
Lure: Sinker・Plug・Small Sized Metal jigs / Field: Port・Rockes

## BlueCurrent Comparison Table

This is characteristics comparison of BlueCurrent series. We have put an importance on sensitiveness and toughness as a favor of natural bending curve. Stiffness which is on this table have been caused by feeling when you actually fish and speed of pulling fish up to surface. On the other hand, we have considered that power on this table have been caused by the biggest size of fish according to limit of strength of line.

## Equipment for rocky shore

The game aiming at blue runner from rocky shore is expanded and deepen these days accompanied by evolution of top water plugs. You have to face variety of situations and field if you wish to get excellent result.

Also variety of fish as such as yellowtail, kingfish or amberjack that grew so much bigger than you think are going to be your target on rocky shore.

Sometimes even experienced anglers will be beaten by those huge fish even if you prepared well in advance.

You are never be guaranteed to land the fish you are aiming at. Especially aiming at bluerunner from rocky shore. You have to keep your concentrations and tensions when you face bluerunner on rocky shore otherwise you will miss the opportunity which may be the first and the last.

For that reason, you definitely will be satisfied when you have got awesome results.

We have designed BlueSniper shore casting series to be built in well balanced casting feel as well as ability of maintaining pressure that you will be able to apply on fish.

How can we support anglers who have to fish on limited space? That is what we always think as a fundamental proposition when we develop fishing rod for rocky shore casting.

## BlueSniper Shore-Casting Model

# BlueSniper

BlueSniper shore casting series have been loaded sharpness, Lightness and high usability while taking advantage of NANOALLOY® technology from TORAY. ML class which is suited to light weight of minnows or sinking pencil, H class to manipulate up to 200mm of diving pencil and jigs over 100g. The potentials which are hidden in blanks of these 6 models will enable you to cover various situations and field without losing initiative of anglers. Remarkable characteristics of these series are flexibility and sensitiveness of tip section to make lures swim more like real fish, and toughness of butt section to pull heavy fish up to surface while applying the good amount of pressure on fish. Which means that we have pursued basic performance as shore casting rod. Win some, lose some...it is depend on judgement you have made at crucial phase. This BlueSniper shore casting series has been designed as a rod which will support you to make a right decision to land memorial fish.

### BlueSniper 96ML

This is medium light shore jigging rod to aim small sized of yellowtail, amberjack and cero. This would be suited jigs around 40g, minnow around 10cm~14cm from break water or surf. You can handle it like a seabass rod but huge butt power is hidden in blank itself to keep even mid-sized Blue Runner under control. You can manipulate not only metal jig or minnow but also sinking pencil bait or vibration to have an advantage on situations that you are faced out there.

Target : Small sized Blue-runner・Flatfish / Lure : Plug・Metal jig  
Field : Piers・Rocks・Surf

### BlueSniper 100M

This is the mid power model which have been loaded toughness and lightness to aim blue runner around 3kg from pier or surf. You can take advantage of its length to aim fish that feeding in the distance with high accuracy. If you are going to fish at field where current flows rapidly and fish have caught tide, you can still keep it under control with this 100M. Even you are in a severe situation you will be able to have an advantage on fighting with monster fish.

Target : BlueRunner / Lure : Plug・Metal jig / Field : Piers・Rocks

### BlueSniper 97MMH

BlueSniper 97MMH which is well tuned with flexible tip and powerful butt. It enable you to manipulate jig and plug at your will without failure thanks to its nice and flexible tip section. Especially when you use jig, it will reduce physical burden of angler thanks to its length. Yet 97MMH works well for Blue Runner around 3~5kg, you can fight against to even over 5kg without anxious because of its tough and tenacity butt section.

Target : BlueRunner / Lure : Metal jig・Plug / Field : Piers・Rocks

### BlueSniper 100MH

This is the standard of New BlueSniper to aim Blue Runner around 4~5kg. If you fish with jig around 80~100g, plug around 60g we recommend you to choose this 100MH. Flexible tip section which have ability to manipulate lure sensitively and aggressively. Breathtaking butt power enable you to pull the monster fish up from bottom of the sea. This have been well balanced as all round model to cast and manipulate jig or plug at high level.

Target : BlueRunner / Lure : Metal jig・Plug / Field : Piers・Rocks

### BlueSniper 106H PlugSpecial

This is the specialized model to manipulate plugs without any failure. You can cast even big diving pencil bait sized around 200mm, and also you can manipulate jigs up to 130g without any stress. Even when you try to aim Blue Runner that over 10kg from rough field as such as rocky shore or else, this 106H PS is going to be a huge advantage thanks to sensitiveness and lifting power which is attributable to NANOALLOY® technology from TORAY.

Target : BlueRunner / Lure : Plug・Metal jig / Field : Rocks

### BlueSniper 910H

This is the model which is tuned power and length perfectly to manipulate jig as you wish while reducing burden of anglers. You can cast heavy jig around 150g easily and when you fish at field where you are required skill and technique as such as deep, rough and current runs rapidly, you will be able to land even yellow fin tuna from shore thanks to that potential hidden inside of blanks. This is the one for angler who fish with jig mainly or looking for specialized model for metal jigs.

Target : BlueRunner / Lure : Metal jig・Plug / Field : Rocks
