

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

These are comparison images of BlueSniper shore casting series which are loaded 3kg weight on tip. 97MMH have been loaded same power as 100MH on but section and more flexible tip section. Although 97MMH bend more than 100MH when applied 2kg load, you can see that almost same power employed on both of butt section when applied 3kg load. 100M have been designed to be slower action than others so whole blanks of 100M will be bent well even when small amount of load applied. Almost same power have been loaded on butt section of 910H and 106H. 910H is suit to metal jig and if you use plugs mainly, 106H is recommended. 910H have been loaded more repulsive force than 106H to manipulate heavy weight of metal jig comfortably and land fish smoothly. On the other hand, 106H bend more than 910H if same amount of load applied. Which means that it is easier to apply pressure on fish. There are images that loaded 1,2, and 3 kg on tip to be compared. Dotted line in red is common mark of each graph.

Although huge power is loaded on butt section, 96ML is suit to small sized blue runner. 3kg of yellowtail is going to be under controlled and you will be able to fight even 5kg if you fish from piers. The image is brassy trevally of Tokara Island.

106H is most powerful model of this series to enable anglers aim heavier than 10kg of blue runner. It is designed to be bent very well to make use of characteristics of NANOALLOY® technology even only small amount of load applied.

Equipment for seabass

We believe that most of lure anglers might have experienced seabass game because easy to get fishing spot here in Japan and more chance to get trophy fish. Seabass might be anywhere but of course they have purpose to sit there. Although it is almost depend on bait fish, it is not that simple. Even if there are so many bait fish, you might not get any result. Occasionally you are required to try "something unusual" to overcome difficult situations. Then anglers goes to fish day after day to find that "something unusual". If you catch one as you have planned through that factors, your skills, techniques and knowledges will be accumulated for the next step. Basically it can be said same for flat fish on surf or black fin seabass on rocky shore. if you wish to know behavior of fish we think that you should go to the field continuously. YAMAGA Blanks think that the rod for seabass should be enable anglers to cast over and over without any uncomfortable feelings. Lightness, cast ability and toughness. These three factors for which YAMAGA Blanks have been pursuing is to build excellent equipment. We bet you knew already that you have to cast lures so many times in one trip. We have focused on achieving how comfortable feel you can get from casting lures or how wide the range of release point when you cast as well as adjusting power or action of rod. This is what we are pursuing for seabass rod.

Ballistick

SeaBass Model

Ballistick series are flagship models for Seabass game from YAMAGA Blanks to adjust the various situation and we have succeeded to achieve all factors that are required to make it excellent seabass rod without any compromise.

NANOALLOY® from TORAY have been loaded to blank itself (except overhead models 73ML and 710XH) to get high cast ability and high sensitiveness to keep fish under control. Thanks to blanks that have got high convergence speed, you can cast long distance and you will hardly fail to hook fish up at first bite.

7 Spinning models as a standard, 6 overhead models which have been loaded accuracy of casting and high operability of lure then 4 models for Black-fin seabass that have gotten massive power and sharpness.

Once you have started fishing with our Ballistick series, you will definitely notice that high versatility to aim many kind of target as such as seabass, flat fish kind, black sea bream or even blue runner.

We have pursued to make Ballistick series as an excellent tool. We believe that you will sense the potential of Ballistick once you fish with it for sure.

Ballistick 86L TZ NANO

This is the light class rod which is enable you to manipulate lures from small sized minnow such as 7cm to vibration weight 15g. 86L is ideal for situations when the baitfish is very tiny at not only port but also rivers or estuary. Although 86L is light class seabass rod, you will be able to keep huge one under control thanks to blanks with NANOALLOY® technology.

Target : Seabass · Black Sea Bream
Lure : Small Sized Minnow ~9cm · Vibrations · Small Sized Metal jigs etc
Field : Middle~Lower of rivers · Port

Ballistick 73ML TZ NANO

Ability of accuracy which have been hidden inside of blanks of 73ML is outstanding. If you have to cast small sized lure to pin spot with fine line, it will bring you satisfactory result for sure. We have designed to make it 2pcs to achieve high portability. It has been loaded enough power to catch large seabass, so it will suit to aim Black Sea Bream with lure for top water that is required sharpness to set hook on.

Target : Seabass · Black Sea Bream / Lure : Plug · Jig head rig
Field : Small sized rivers · Port

Ballistick 92ML TZ NANO

If you are required to twitch or jerk minnow delicately, we recommend you to choose this 92ML which have been loaded sensitive tip section. Also it was designed to be well balanced and high responded model with sensitiveness. You will be able to take this for seabass fishing does not matter day game or night game to lure the big one with this strength and sensitiveness.

Target : Seabass / Lure : Plug / Field : Estuary · Port

Ballistick 86M TZ NANO

This is the medium class rod which have been loaded versatility to use lure from minnow sized 9~14cm to heavy vibration without any stress when you are wading. If you do not want to lose initiative when you have hooked huge seabass up while you are wading in the river, it will work for you because of powerful butt section with NANOALLOY® technology.

Target : Seabass / Lure : Minnow 9~14cm · Vibrations · Sinking pencil
Field : Rivers · Mudflats

Ballistick 94M TZ NANO

This is the multi-purpose seabass rod to cover various situation with minnow, sinking pencil or vibration lures. You will be able to sense changes of current or tiny contact of seabass thanks to sharpness and sensitiveness of blank itself. Of course it has been gotten enough power to land fish at your own will. You don't have to be afraid to aim huge seabass at field there is lots of structures under water thanks to potential of power that is hidden inside of blanks. We believe that 94M have been well balanced to be called "basic one" because of sensitiveness, handleability and toughness of blanks.

Target : Seabass · Flatfish / Lure : Plug · Vibrations
Field : Rivers(lower to mouth) · Port · Surf · Mudflats

Ballistick 96MMH TZ NANO

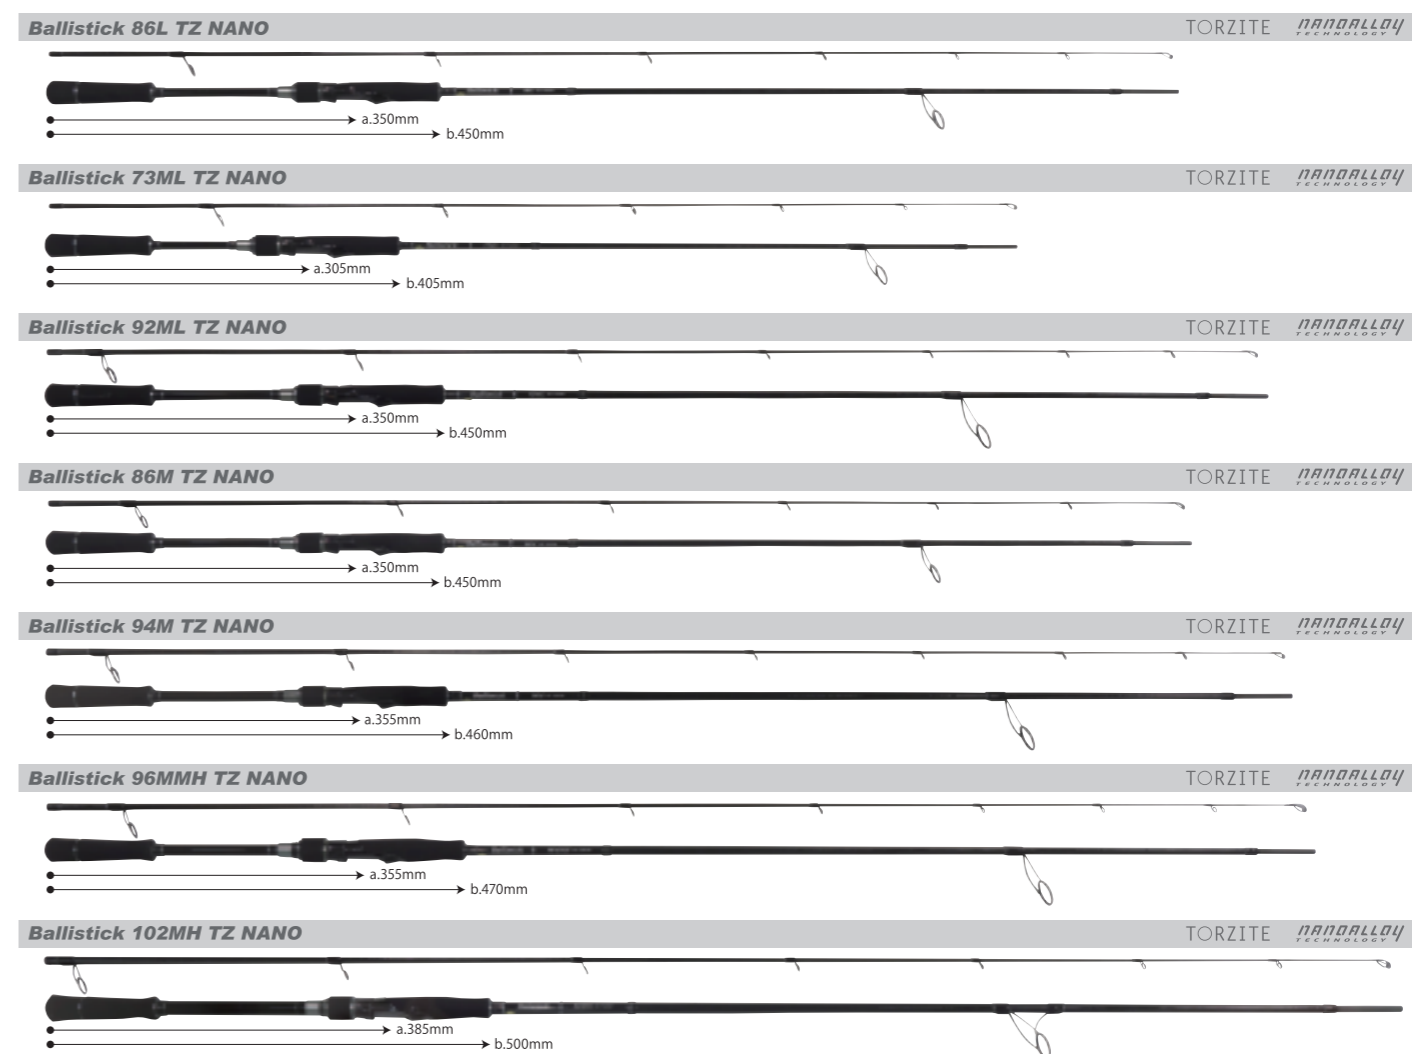

If you wish to cast heavy lure as such as minnow size around 14cm, metal jig, sinking pencil or heavy vibration further, we recommend you to choose 96MMH. We promise that you will be able to cast heavy lure a great distance on surf or rocks even in headwind. 96MMH will help you to maintain your concentration because you will hardly get tired thanks to lightness and handleability of it.

Target : Seabass · Flatfish / Lure : Plug · Vibrations · Metal jig
Field : Surf · Rocks · Estuary

Ballistick 102MH TZ NANO

When you aim huge seabass on surf or rocks, 102MH will be your reliable partner for sure. It is powerful enough to aim huge Seabass over a meter or even Black-Fin Seabass and small sized Blue-Runner on rocks. We recommend you to take 102MH if you are going to aim large flatfish on surf thanks to potential of power, sharpness, and ability of casting.

Target : Seabass · Big sized Flatfish / Lure : Plug · Vibrations · Metal jig
Field : Surf · Rocks · Estuary of large river

Ballistick HIRA Black-fin Seabass Model

NEW Ballistick HIRA 107M TZ NANO

This technical rod let you land huge fish very smoothly without losing initiative and you will be able to get less chance of hook off thanks to flexibility of blanks themselves. You will be able to set hook on even contact of fish was quite small and manipulate lure irregularly to lure spooky fish. When you are on fighting, it will be bent nicely and easy to keep tension of line. Flexibility of blanks employed NANOALLOY® technology will apply good pressure to fish continuously. You can keep fish under control at your will. More flexibility than MH class is loaded to blank of tip to belly section without losing sharpness when you cast. It has been adjusted to use light line, cast and manipulate lure comfortably. If you are going to try variety of tactics and method to lure monster fish, this 107M must be a huge advantage for you.

Target : Black fin seabass / Lure : Plug · Vibrations · Metal jig / Field : Rocks

Ballistick HIRA 107MH TZ NANO

This is one of the perfect rod for Black-Fin Seabass to cover various situation and field to aim it. You will be able to cast and manipulate, not only minnow Black-Fin Seabass but also any kind of lures as such as small sized sinking pencil, vibration or jig head even in headwind. Although this is the MH class rod, it has loaded enough power to fight and keep large sized Black-Fin Seabass under control.

Target : Black fin seabass / Lure : Plug · Vibrations · Metal jig / Field : Rocks

Ballistick HIRA 11MH TZ NANO

Although this 11MH have been designed for Black-Fin Seabass, it is tough enough to keep Blue Runner up to 5kg under control. Of course, you will be able to manipulate plug delicately and once you hooked even huge one at tough field, you will never lose initiative for sure. If you are an angler who fish in tough situations and wish to land fish smoothly without any stress, we recommend you to take 11MH which will be huge advantage for you.

Target : Black fin seabass · BlueRunner
Lure : Plug · Vibrations · Metal jig / Field : Rocks

Ballistick HIRA 11H TZ NANO

This is the mighty rod for Black-Fin Seabass. Although it is powerful enough to catch Black-Fin Seabass over 10kg, you will sense how light and sharp it is when you actually fish. You don't have to worry about hooking Blue Runner up suddenly when you are trying to aim Black Fin Seabass because of ultimate power hidden in blanks of 11 H. But it is not just tough rod. Once you hold it and cast, manipulate heavy lure in headwind, we believe that you will notice that it has been loaded sharpness and sensitiveness on blanks to make expert or even beginner anglers satisfy.

Target : Black fin seabass · BlueRunner
Lure : Plug · Vibrations · Metal jig / Field : Rocks · Isolated island

Ballistick SeaBass Model Overhead reel Model

Ballistick 73ML WILD-CARD (Overhead reel Model)

We have designed 73ML to become medium light action to enable anglers to manipulate light weight lures for seabass game from boat. It will be a reliable tool for not only seabass game from boat but also for the game that is required high accuracy performance to cast at small sized river or port area or various method of Black sea bream fishing.

Target : Seabass · Black Sea Bream / Lure : Plug · Rigs · Metal jig
Field : Boat · Rivers · Port

Ballistick 810ML RC NANO (Overhead reel Model)

This is special tuned model to pursue accuracy of cast when you fish at upper or mid of the river. Moderate Modulus of these blanks will help anglers to cast lure with minimum motion and deliver it to underneath of over hung at your own will with higher accuracy. You can cast a distance easily thanks to characteristic of blanks with NANOALLOY®. It is well designed to let anglers manipulate lure in a current river without any stress, and well balanced power which is accumulated inside of the blank will help anglers to pull the big one out from even rapid current. This must be the perfect rod for keen angler who knows where the monster seabass sitting assuredly. We believe that it is going to be a huge advantage for the angler who fish on the river mainly to catch the memorial fish for sure.

Target : Seabass / Lure : Plug
Field : Rivers (Especially the flow velocity field in the upper - middle region)

Ballistick 85M NANO (Overhead reel Model)

This is the basic model for seabass game on rivers and port. You will be able to manipulate vibrations or sinking pencil which effects the lures when it is falling in the water at your own will and also accuracy cast around structures with this 85M. And it has been loaded with sharpness feelings when you manipulate lure and incredible power on butt section thanks to NANOALLOY® technology from TORAY.

Target : Seabass / Lure : Plug · Metal jig / Field : Rivers · Port

Ballistick 93M NANO (Overhead reel Model)

This is the long distance shooter which will cover seabass game with plugs at river mouth or port and also light jigging game from surf. Blanks of 93M have been designed to let anglers manipulate and cast many kind of lures such as vibration, sinking pencil, metal jig, and large sized minnow without any stress.

Target : Seabass · Flatfish / Lure : Plug · Metal jig / Field : Estuary · Surf · Mudflats · Rocks

Ballistick 103MH NANO (Overhead reel Model)

This is over head model with massive power to fish from rocky shore. We have loaded enough power, cast ability and sensitiveness to blanks of these to aim black fin seabass in tough situation. For example you are required to cast against head wind, on the fight at rocky beach or else. You will be surprised that accuracy cast, quickness to make first action, power of lifting and dexterity performance of this 103H/NANO is as a versatile overhead tackle. Of course, this is recommended to anglers who are aiming at giant flat fish from surf while using jig, vibration or plastic worm effectively. Although it has gotten so incredible power on blanks, you can develop some strategy of the game sensitively and delicately as same as spinning tackle while fishing with heavier line.

Target : Seabass (Including black-fin seabass) · Small sized Blue-runner
Lure : Plug · Metal jig / Field : Rocks · Surf

Ballistick 710XH BIG-BAIT (Overhead reel Model)

This is the special model to cast and manipulate Big Bait lures included lures for large mouth bass. You will be able to cast and manipulate Big Bait at your own will with this 710XH. We recommend this 710XH for anglers who are going to aim at seabass which is staying in rapid current or pin spot around structures as well as looking for large sized bait fish such as shad or sweet fish that is going down stream to spawn.

Target : Seabass / Lure : Plug (Big bait) / Field : Rivers · Port

EARLY Plus SeaBass Model

EARLY Plus for Seabass game which have been highly regarded since it have been released because of that cost performance as fishing rod that is proudly made in japan without any compromises. Every single Blank which is produced by YAMAGA Blanks is designed to pursue the lightness, the ability of casting and toughness as a reliable tool for fishing. The characteristic of EARLY Plus is blanks which has been loaded sharpness and tenacious butt section with toughness. Once large seabass is on, rod will be bent and power of lifting will increase when it is bent more and more.

EARLY Plus 710XF

This is the Extra finesse rod which has been loaded not only with high accuracy performance to cast pin point at the port where the Mooring lines, boats are being jumbled together, but also with tough butt section to pull out the sea bass aggressively. You will be able to fight against young sea bass, of course even medium sized sea bass with this rod. It has been also got versatility to enable you to use it for Black sea bream fishing on the surface or wind fishing of hair tail.
Target : Seabass · Black Sea Bream · Hair-tail etc
Lure : Minnow 7~9cm · Small Sized Vibrations · Small plug · Wind lures
Field : Port · Estuary

EARLY Plus 89L

This is one of the best for sensitive game on the field like shallow areas of rivers or wading game in mudflats. We have designed these blanks to twitch or jerk the minnow around 9cm or vibrations around 15g easily.
Target : Seabass / Lure : Minnow around 9cm · Medium Sized Vibration · Small jigs
Field : Port · Estuary

EARLY Plus 88ML

This 88ML is versatile model which is the core of this series. Early+ 88ML has been designed to manipulate minnow around 12cm mainly, or various lures like vibrations, sinking pencil etc... This comfortable length is good to be fished at mudflats or wading fishing in the river mouth.
Target : Seabass / Lure : Minnow around 12cm · Vibrations · Sinking pencil
Field : Mudflat · Estuary

EARLY Plus 95ML

Early+ 95ML is the best model to explore the huge area like mudflats, river mouth or surf. To search the pin spot of changes of landscape or explore the sea current widely, this is the perfect rod for search game in an open area. Although this is ML class rod, it has been loaded with enough power on the butt section to make large size class sea bass under control, which means, it is strong enough to fight a big fish from rocks or surf.
Target : Seabass · Flatfish / Lure : Minnow around 12cm · Vibrations · Sinking pencil
Field : · Mudflat · Estuary · Surf · Rocks

EARLY Plus 92XML

Early+ 92XML have blanks which has been combined with sensitiveness and high resilience tip with persistence and tough butt section. This has been loaded more power than 95ML in order to aim the large size sea bass at the field where the current is running rapidly like large river, river mouth or straits. The large sea bass and many other big ones has been caught with this 92XML. This could be called a ranker hunter.
Target : Seabass / Lure : Minnow 12cm · Vibrations · Sinking pencil
Field : Straits · Rocks · Estuary · Rivers · Surf

EARLY Plus 710XF

EARLY Plus 81M

This has been tuned as special model not only for Seabass but also for Hair-tail from shore. We have designed this well balanced model to keep jig head under control and jerking with a steady rhythm. Tip and belly section which have gotten flexibility and high sensitivity will help you to manipulate minnow around 12~14 cm when you aim at trophy size of Seabass.
Target : Seabass · Hair-tail / Lure : Lures for wind fishing · Minnows around 12cm
Field : Port · Estuary

EARLY Plus 86M

This is the one that enable angler to manipulate vibration without any stress and to feel good response when you are jerking minnow hard. We have designed this model to manipulate lures which you can sense the feeling of resistance of water when you retrieve it without any stress. Of course it have been loaded high sensitivity to sense the feeling of small contact while you are manipulating lure. You will be able to notice that you will have less problem when it is hooked up itself, lands fish smoothly with it even when you are wading. We propose this model to seabass fisher who is searching big fish in all of range of the waters.
Target : Seabass · Flatfish · Hair-tail / Field : Port · Rivers
Lure : All kind of Vibrations · All kind of Minnow

EARLY Plus 96M

This has been designed to be fished on surf or mouth of large river and it have been loaded enough power and speed on blanks to cast heavy lures such as metal vibration or heavy jig head in against wind. We think that you will be able to feel it has not only enough toughness on butt section to keep fish under control even in backwash. And you will be able to do light jigging from shore using metal jig which is up to 35g with it.
Target : Flatfish · Seabass · Small sized Blue-Runner
Field : Surf · Rocks · Port · Estuary
Lure : All kind of Vibrations · All kind of Minnow · Heavy Jig Head · Metal Jig

EARLY Plus 100M

Early+ 100M is the best to be used at the field where long distance casting is required like rocks, dikes, surf or large rivers. Although it has gotten enough power on the blanks to cast minnow over 14cm or like heavy vibration, it has also got high level of sensitivity.
Target : Seabass · Flatfish
Lure : Minnow around 12~14cm · Vibrations · Sinking pencil · Metal Jig
Field : Rocks · Estuary · Surf · Dikes etc

EARLY Plus 102MH

This is a long length rod for not only large sized sea bass but also for black fin sea bass or small sized blue runner. 102MH has been designed for the game where you may require to cast large plugs long distance or light shore jigging game that you can manipulate jigs around 50g rhythmically. This is the powerful model with tough butt section which will enable anglers to stop the large sizes on the last-ditch effort.
Target : Seabass · Black Fin Seabass · Blue-Runner (around 1~3kg)
Lure : Minnow over 14cm · Plugs for Blue-Runner · Metal Jig
Field : Rocks · Surf · Dikes etc

EARLY Plus 98H

Early+ 98H will be able to cover the situations where you use big bait, metal jig or large lures like top plug for bluerunner. This is the most powerful model of Early+ series that enables anglers to pull out large sized sea bass from wave dissipating block, to fight against Blue runner around 5kg. Although it has gotten the power like once you fish with it you will feel the lightness and sharpness of it. Also it suits anglers who aim at catching salmon or red eye.
Target : Seabass · Blue-Runner (Up to 5kg)
Lure : Big Bait · Plugs for Blue-Runner · Metal Jig / Field : Rocks · Surf · Dikes etc

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

These are comparison images of EARLY Plus series which are loaded 500g weight on tip. EARLY Plus series are designed to use minnow mainly except 81M, 86M and 96M which are designed to be slightly stiffer than others to manipulate vibrations or heavy jig head. 88ML and 86M are set as a basic of rod for seabass game. Yet 81M is bent more than 88ML and 86M, it is little stiffer than those 2 models to move heavy jig head with less action of rod. 96M, 100M and 102MH are good to be use on surf. 96M suit to vibrations, 100M is better for plugs, and 102MH is recommended for anglers who use metal jig mainly.

Ballistick HIRA • Load 1kg

Ballistick HIRA / Bending Curve / Load 1kg

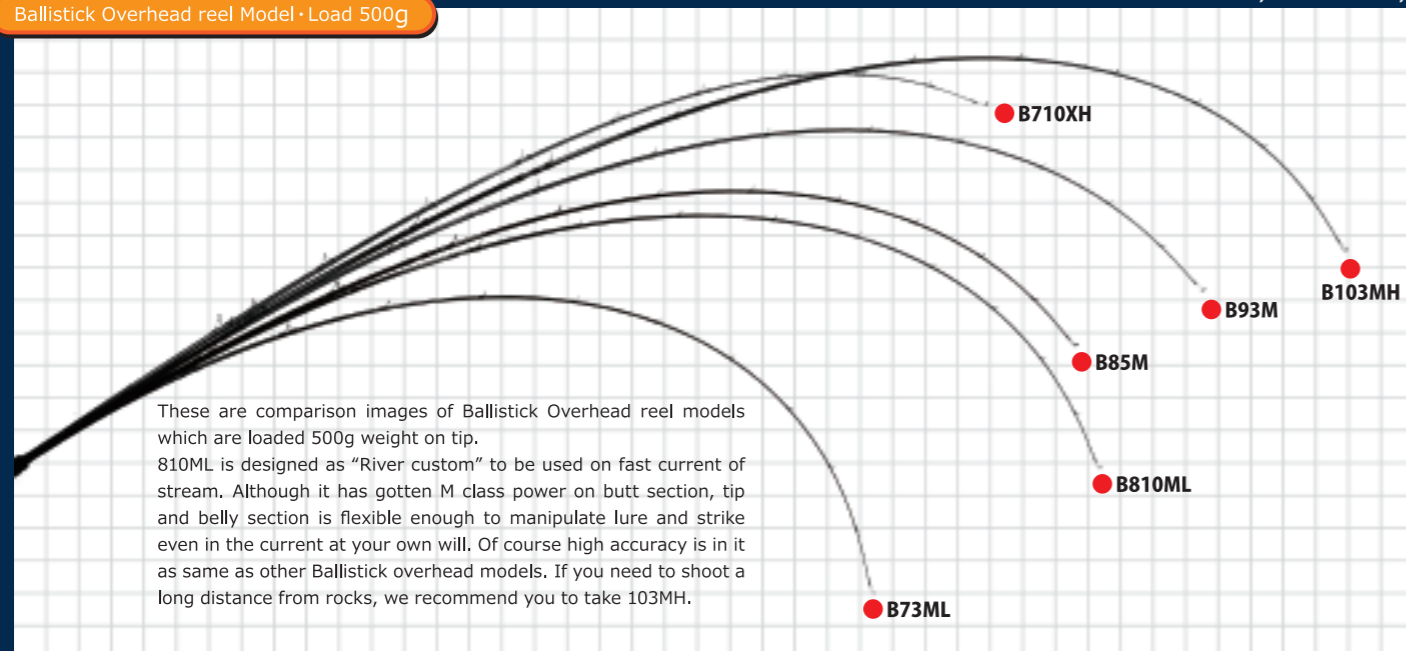

- Ballistick HIRA (Rod in black)
- Ballistick 102MH (Rod in blue)
- Ballistick 103MH Overhead reel model (Rod in green)
- EARLY Plus 102MH& 98H (Rod in orange)

These are comparison images of Ballistick series which are loaded 1kg weight on tip. Ballistick 102MH, 103MH overhead reel model, EARLY Plus 102MH and 98H which are employed as same power as Ballistick HIRA series are on this comparison table. 107M is designed to become little more flexible than other Ballistick HIRA series to enable anglers to manipulate various kind of lures delicately. Butt power is strong enough to keep trophy fish under control. As you can see from this chart Ballistick HIRA series has gotten more power on butt section compared to Ballistick seabass models.

Ballistick Overhead reel Model • Load 500g

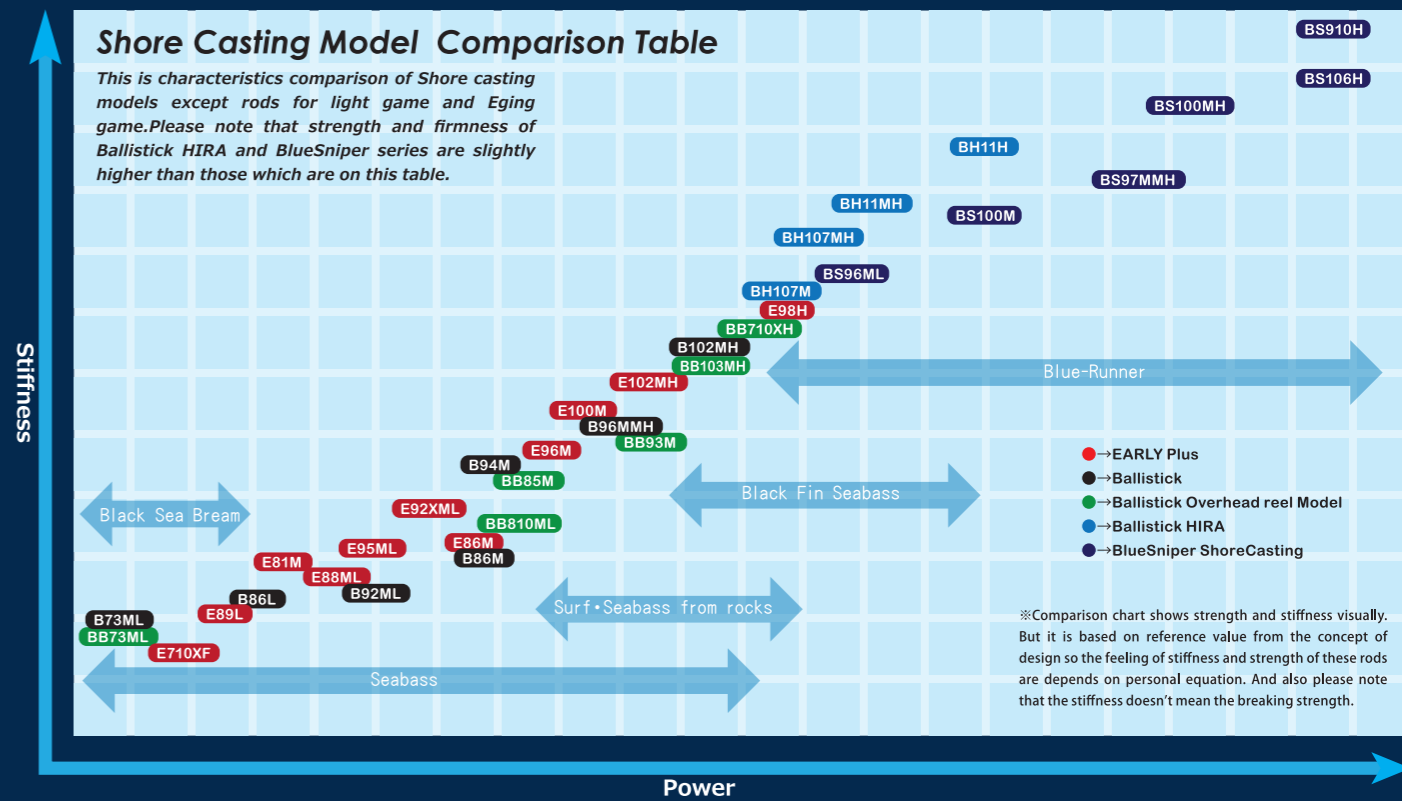

Ballistick Overhead reel Model / Bending Curve / Load 500g

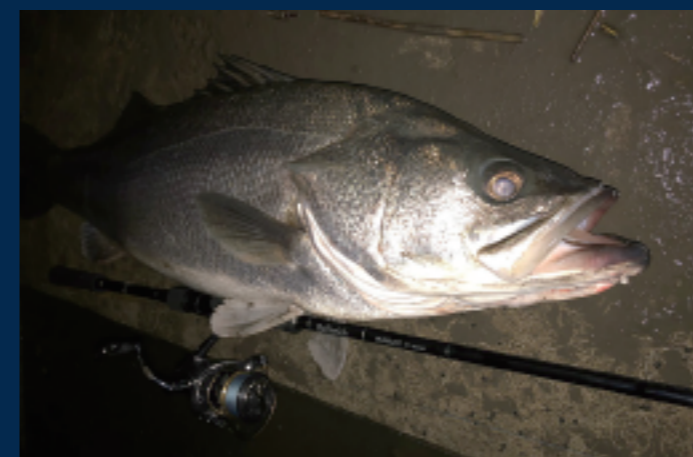

These are comparison images of Ballistick Overhead reel models which are loaded 500g weight on tip. 810ML is designed as "River custom" to be used on fast current of stream. Although it has gotten M class power on butt section, tip and belly section is flexible enough to manipulate lure and strike even in the current at your own will. Of course high accuracy is in it as same as other Ballistick overhead models. If you need to shoot a long distance from rocks, we recommend you to take 103MH.

Shore Casting Model Comparison Table

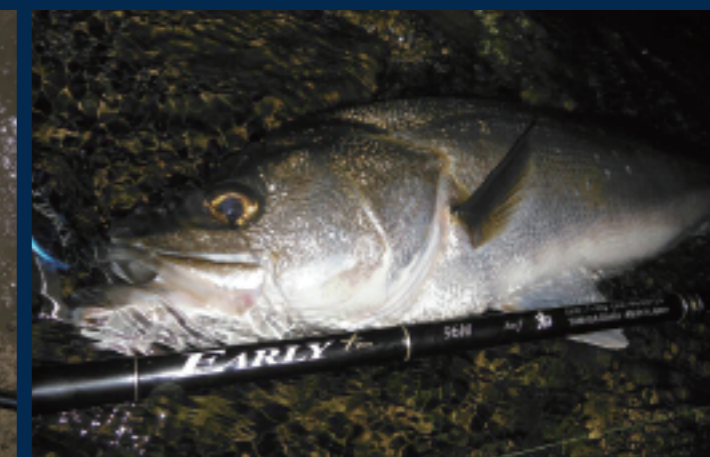

This is characteristics comparison of Shore casting models except rods for light game and Eging game. Please note that strength and firmness of Ballistick HIRA and BlueSniper series are slightly higher than those which are on this table.

※Comparison chart shows strength and stiffness visually. But it is based on reference value from the concept of design so the feeling of stiffness and strength of these rods are depends on personal equation. And also please note that the stiffness doesn't mean the breaking strength.

94M and 96MM are basic models of Ballistick TZ NANO series for seabass game. Those have gotten enough power to fight with seabass and cast sinking pencil or vibrations without any stress. Remarkable characteristics of these are sensitivity of tip section especially when you use heavier vibrations or sinking pencil.

Compared to Ballistick series, EARLY Plus series are little more flexible. 81M, 86M and 96M are designed to cast and manipulate solid lure with less stress. These 3 models are good to use vibrations, metal jigs and heavy weight of jig head. EARLY Plus bend well to apply enough pressure on fish continuously and let you land fish smoothly.

Equipment for freshwater-game

Building your own style and method will sustain your interest and concentration which are quite important factors of lure fishing on fresh water.

Anglers sometimes fascinated with letting fish take your lure on surface, exploring the untouched fields. Processes of approaching fish is very important to fulfill the satisfaction as Angler. Snakehead is typical target of freshwater.

One of the best attractions of snakehead game is that you can lure it out on the surface of water. Many anglers are fascinated by characteristics of snakehead game which can be seen every movement and moment of strike of snakehead.

There are precious and excited factors as such as exploring fields nobody knows yet and equip yourself with favorite tackle to build your own method and tactics to aim snakehead. Also it will be able to say the same thing about catfish hunting.

It has become standard game here in Japan because anglers can spot catfish anywhere else without any prior information. In rainy season, there are quite a few anglers will be excited when it is getting dark to think about fishing after work.

One of the reason why catfish game attract anglers is that you can aim it in the dark.

Even in the pitch-black darkness, you can hear and feel the vital information of catfish.

You know that there is one in your range but you will be realized it is more difficult and complicated than you thought to land one. We believe that you will be addicted to aim catfish in the darkness after through like that experiences and you are already preparing for tomorrow evening as your routine of fishing life.

2018 New model **BaronKnight** CatFish Model

Aiming Catfish...it is getting popular these days. It is very easy to approach the field of catfish here in Japan but once you have tried to catch them, most of anglers will feel that you are required experiences and knowledges to hook up as you have planned. Blanks of these two Baronknight which are made of carbon prepreg have been loaded accumulated knowledges to develop rods for salt water and experiences of fighting with various kind of target. Thanks to the characteristics of blanks made of carbon, Baronknight 66 and 71 have achieved nice and sharp casting feel and high accuracy without losing flexibility and sensitivity on tip section to increase the chance of hooking up. High response of these blanks enable anglers to start manipulating lure as soon as touched water even in the dark or on low light situations and you can lure the target out and hook them up as you have planned. Moderate strain on the belly section will help you to set hook on surely and massive power on the butt section guaranty you to keep huge catfish under control. We have loaded everything we have as such as obsessiveness with blanks made of carbon, accumulated know-how from big game fishing on salt water and basic philosophy for fishing rod of YAMAGA Blanks on Baronknight CF series.

NEW BaronKnight CF66

This is the standard of Baronknight catfish series enable you to cover various field as such as narrow creek, tiny stream or even large river. Tip section which is loaded flexibility and sensitivity provide you to high handling ability and accuracy of casting then enable anglers to delivery with underhand into underneath of the shade. This remarkable characteristic is going to be huge advantage of anglers to lure spooky target out efficiently and effectively. Massive power on butt section and appropriate length of handle gives angler a sense of reassurance while fighting. Taking advantage of characteristic and length of blanks which are made of carbon, any level of anglers will be able to handle this well balanced model "Baronknight 66" easily.

NEW BaronKnight CF71

This is well balanced mid length model for the situation that you are required to cast long distance, fish in mid-lower part of river or creek with high bank. You can control the course of retrieve and enjoy the game at most of field as you have planned. Yet you can feel sharpness on casting and lightness on handling, when you land even big one you will be impressed the massive power of butt section for sure. You can cast even light weight of lure without any stress thanks to its tip section which have been loaded flexibility. This is the one that you can aim at other side of the bank with long distance cast or aim pin spot with delivering your lure technically.

BaronKnight SH

SnakeHead Model

The field for snakehead where is covered by weed on surface is getting limited recent year here in Japan. Because of this fact, snakehead have been put lots of pressures on and becoming so spooky, so snakehead won't take lure aggressively very much. For that reason, we have designed Baronknight series to pursue accuracy of cast and high operability to adjust the sensitive snakehead game on recent year.

BaronKnight SH72

First of all, you will be surprised on the lightness, and it was once you cast lure with it, you will sense the potential of cast ability for sure. We tried to reflect on the technology, knowledge and experiences which cultivated from salt lure game into the snakehead game. Baronknight72 has been finished to be loaded with accuracy of casting, delicate action with tip section, and butt section with a massive power to achieve the finest result.

BaronKnight SH78

SH78 have been extended to the length of SH72, while the progressing ability of long cast, keeps flexibility on the blank to pursue usability of lure. This is one of the best rod to cast long distance making use of the powerful butt section and lure spooky snakehead with delicate action with sensitive tip section at long range. Although SH78 have been loaded with more powerful butt section, than SH72 to enable you to pull out big ones that's up to 80cm from the water. On the whole rod, SH78 is a little softer than SH72.

Estuarine Predator Hunting Model

Estuarine series has been designed to be adjusted for various field in overseas. Drive into the back country, walk through the bushes and drift the boat under the overhung trees. Then monsters that are beyond your imaginations will be waiting for you out there.

We have loaded massive power to these blanks for anglers who are aiming at monsters hiding on the untouched field. The targets are not only for freshwater fish such as huge cat fish, barramundi and giant snakehead but also saltwater fish such as medium sized trevally from boat. Please take Estuarine series with you as your expedition partner.

All of these 6 models are available to be chosen Spinning model or Overhead reel model. It is not only good for predator hunting but also suit to aim rock fish or seabass from boat. We recommend you to take one of these when you should not lose initiative.

Estuarine Raptor 60M & 63MH

This unique 2 pcs rod has a high strength lifting power plus a sensitive tip that allows you to even cast smaller lures and work them properly. Many tests were done in rivers casting, light troll for Barramundi or even casting by reef edge for small trevally and has proven to take all sorts of punishment.

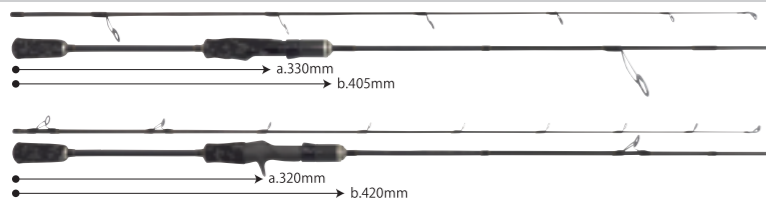

Estuarine Glazer 58MH & 60X

Many tests has been done on these rods to prove that rod could not only hook fish but get your fish quickly out of snags or heavy cover and without losing your fish. Both models have sensitive tip, high strength and strong lifting power, thus anglers are able to target species that lurk in heavy covers and giving you assurance to stop them from busting you off.

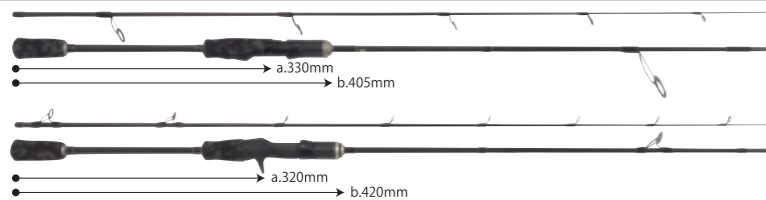

Estuarine Xtremo 60 & 65

For those who seek out those beast lurking among heavy covers or structures, you need a rod with strong back bone that can subdue them out of their covers and able to work or troll deep diving minnows. Many tests has been done to prove the rod capability to take any abuse & in short distance fight between predator & angler even with high drag setting!

TAKO KING 79

Octopus Game Model

Previous TAKOKING have been turned into 79 and been loaded more power to pull the monster octopus out at wharf. This have been loaded enough power to pull octopus over 1kg out aggressively and strength on tip section to manipulate lure heavier than 75g at your own will. This is not just stiff stick of course, but this is the rod which enable anglers to cast lure weight 75g comfortably. This will be good for searching octopus with falling lure vertically on wharf of port at night or explore widely with long casting at field where scree on the bottom.

Lupus Trout Model

Lupus series have been designed to aim Trout as such as beautiful trout on small mountain streams, big yamame on mid part of rivers and powerful cherry salmon on main stream. Shooting from limited space on headwater, delivering your lure to hiding spot by the rock, and casting continuously all day long on main stream... Angler need to care about "casting" on each different situations.

So we have focused to develop the ability and accuracy of casting while making use of our accumulated knowledge and techniques through manufacturing heavier rod for the brine to fulfil the requirements of trout hunters. Of course enough power is loaded on butt section to keep trophy fish under control. We present you 7 kind of sticks for Lupus series to cover various field and fish.

Lupus 51 / 61 / 71 Mountain Stream Model

51,61, and 71 which will cover most of situation of trout fishing scene have been designed to be handled easily by any level of anglers while achieving excellent casting feel and decreasing the chance of hook out. 51 is good to be use on headwater where you are required accuracy cast with light weight of plugs or even heavy weight of sinking minnow.61 will provide longer casting distance and enough repulsive force to angler who fish on the mid part of rivers often.

If you fish on large river where you are required long distance casting and wish to keep trophy fish under control even in rapid current, we recommend you to choose 71 which have inheritance model of 51 and 61 in the point of performance.

Lupus 77 / 81 / 87 / 86M Main Stream Model

Remarkable characteristic of these 4 models are sharpness and lightness which are hidden in powerful blanks to enable anglers to cast continuously all day long.

It will be huge advantage when you fish on heavy and rapid water to aim trophy rainbow trout or large cherry salmon and keep them under control at your will.

77 is light class model for cherry salmon, it will be suited for large yamame or rainbow trout as well.81 have remarkable performance of versatility to be used for cherry salmon on mid part of river with various kind of minnow or sinking pencil. 87 and 86M are strong model for cherry salmon which are well balanced with its length and power. Especially 86M have massive power on butt section to aim monster sized cherry salmon over 70cm. Please choose one depend on where and how you are going to fish.

For Off-Shore Game

BlueSniper 80/5

80/5 has been designed as versatile model to make action of lure importance. When there is tough situation, it handles diving pencil or poppers up to 100gm. The stiffer belly section makes it an effective rod against king fish or trevally.

Target: Migratory fish less than 20kg · Blue-runner · Trevally · TUNA / Lure: Plug

BlueSniper 82/6

The most powerful model of the Blue Sniper series. It can handle a huge king fish and small GT. We have redesigned the whole rod to handle a greater lifting power but at the same time improving control of lures such as diving pencils. This is the one which enable anglers to lure fish technically, and also to keep fish under control and land speedy when they fight.

Target: Migratory fish less than 25kg · Blue-runner · Small sized GT · TUNA / Lure: Plug

BlueSniper 85/4 Canary

This is multiple and lighter model of Blacky series. As you can notice from "Canary" the name of 85/4, when you aim canary-colored fish such as yellow fin tuna or king fish, it will be the perfect partner of you. Although we could cast around 100m distance on proto test (PE4 / 70g of lure) we have also achieved enough distance to aim large fish with small lure such as less than 30g. Even if you are in limited space such as casting from small boat, you will be able to cast lure into a spot of feeding fish at a distance with high accuracy. When you do not want fish to run as it likes, powerful butt section will help you to stop the sudden run of lively fish and to pull it to surface quicker than you thought. It has full of versatility with our techniques of design, without any compromises.

Target: TUNA up to 40kg · Blue-runner / Lure: Plug

BlueSniper 81/6 Blacky

This is primarily a light tuna rod that enable to cast smaller lures which closely mimics actual baitfish. You can cast a small lure weighing 30gm but it also has enough power to wrestle a tuna around 50kg. The same performance as currently blacky series, it has been designed to be bent nicely, and will correspond with the sudden run of big tuna, and to reduce the burden of anglers.

Target: TUNA up to 50kg · Blue-runner / Lure: Plug

BlueSniper 81/8 Blacky

This has been designed as a versatile tuna rod which can cast not only small lures matching the size of sardines but also medium lures size of Dorado or baby yellow tail. Although the belly section will be bent and enable you to hold it with 70° of angle, it will still has enough power to pull up a tuna to the surface.

Target: TUNA up to 70kg / Lure: Plug

BlueSniper 81/10 Blacky

Rated at #10 for power, this rod targets big tunas around 100kg. The blank has more power than the 81/8 to enable casting lures up to 160gm. Like the Blacky series, it bends nicely when loaded to endure the violent runs of tunas. 4ways carbon material are used on the butt section to reduce twisting of the blanks and adding another advantage during fights with big tuna.

Target: TUNA up to 100kg / Lure: Plug

BlueSniper 81/10 Blacky

BlueSniper Boat-Casting Model

In recent years, anglers who pursue big target from boat make tough and technical demand to adjust condition and situation of the sea.

For example, increasing population of anglers who are aiming large sized yellowfin tuna or kingfish, increasing the demands of distance of casting, delicacy of handling while remaining strength and durability on the one casting rod.

Although it was not easy to design the rod that will be able to keep these different characteristics on one rod without any compromise, we have formed it with knowledges and techniques that has been accumulated over a long period of time.

We present you these 11 choices of BlueSniper Boat Casting model for each target as such as bonito, kingfish and tuna to be enable all level of anglers to handle. We believe that you will be able to feel the faith that we are pursuing to build fishing rod when you hooked up huge one with BlueSniper for sure.

BlueSniper 81/2

This model will enable anglers to use lures not previously capable on its predecessor such as small sardine or 15cm size bait. The flexible tip allows usage on small lures and can still handle fish up to 10kg. Based on much wider range of lure capacity than previous series, you will be able to match the bait more than ever.

Target: Bonito · Migratory fish less than 10kg · Blue-runner / Lure: Plug

BlueSniper 70/2

This is the short length model with high maneuverability. This is the one that will do great job, whereby the situations that needs you to cast from limited space such as small boat. The flexible tip enable anglers to cast lures around 15g in rhythmically and landing fish smoothly because of its length.

Target: Bonito · Migratory fish less than 10kg · Blue-runner / Lure: Plug

BlueSniper 79/3

A technical rod by definition, this rod has incredible lure manipulation with a good casting feel. This has a tip section of a class 3 power but a class 4 power butt section. This combination has been very popular since inception in 2014. It has enough power to fight a blue fin tuna up to 20kg or a 10kg blue runner. During testing, we have caught a 40kg blue fin tuna. The potential of this rod is simply beyond imagination.

Target: Migratory fish less than 15kg · Blue-runner · Trevally · TUNA / Lure: Plug

BlueSniper 75/4

This is the short length model with good casting performance. Anglers will able to cast lures up to 80g with less force. And we believe that it will be helpful when you are in situation that your are required to cast from a limited space such as small boat.

Target: Migratory fish less than 15kg · Blue-runner · Trevally · TUNA / Lure: Plug (Popper up to 70g)

BlueSniper 82/4

This rod has a greater range of lures from 30gm to 110gm. When load applied, it bends nicely enabling anglers to land the fish easily. Just like the 79/3, it also performs well as a standard rod for king fish or yellowtail.

Target: Migratory fish less than 20kg · Blue-runner · Trevally · TUNA / Lure: Plug

Equipment for boat-casting

Boat casting game is grouped into 3 category. You are going to aim blue runner such as tuna or kingfish and Giant Trevally in southern sea from a boat.

You might pick top water plugs often and you will have to concentrate on how naturally you let lure move on the surface. The reason why hunter come up to the surface is to drive bait fish into just below the surface. Of course that is also quite risky for the hunter though.

Surface of water is hazardous area for all kind of fish because birds trying to hunt them down, and also angler cast top water lures over and over to hook them. For that reason, fish that chase lure and come up to surface must have cautiousness.

You will spook them as soon as you manipulate lure unnaturally for sure. Of course fish does not take unwanted risk. On the game of boat casting, you will be definitely required to manipulate lure properly, cast accuracy and distance to catch cautious fish.

You might think that "this cast could be the last chance of the day", "fish might already recognize my lure before that touched surface of water"

Many anglers who have been fascinated by like that kind of elements will keep casting to aim blue runner from a boat. Improve your skill then take another chance. That is why once you have tried boat casting game, you will never ever be able to quit.
