

# BLUE REEF

BLUE REEF / Boat GT Series / 4 Line up  
Target / GT·Kingfish·Yellowfin Tuna

GT game... Although GT bite lure aggressively and fight extremely hard, you will be required to manipulate lure as carefully and delicately as possible if you want to get result.

Of course, rod for GT is required versatility to be adjusted various lures which has been segmetalized to catch selective fish. We have tested these 3 models at tough fields such as southern islands of Japan over and over to shape our ideal of GT rod. Lightness to cast all day long, usability to respond anglers will, toughness and torque to keep initiative...reconcile these conflicting elements. We dedicate these series to anglers who are pursuing and aiming GT seriously.

## BLUE REEF 711/8 StickBait

Lure: Max 160g Line: Max PE 8 Drag Max: 13kg/45°  
2pcs Length: 2470mm Weight: 395g Price:

This is the model which is good at manipulating diving pencil sensitively as "Stick Bait" suggests. It have been loaded flexibility on tip section to manipulate diving pencil without popping it out of surface not only at short stroke action but also long stroke action... Keep fish under control at your own will with butt section which have been loaded enough toughness. We believe that you will choose this 711/8 whenever you go to fish because of that characteristic as such as well-balanced blank, excellent feeling of cast, and high operability. This will be recommended for not only GT but also for huge kingfish or yellowfin tuna.

Trget : GT · Large kingfish · Yellowfin Tuna/ Lure : Stick Bait

## BLUE REEF 80/8 Dual

Lure: Max 160g Line: Max PE 8 Drag Max: 13kg/45°  
2pcs Length: 2495mm Weight: 373g Price:

This has been designed to be little lighter than 711/10Dual to enable anglers to use light line to cast long distance and to manipulate lure more delicately. You will be noticed some characteristics when you used pencil bait especially and once you hooked huge GT up, you must feel massive power from butt section for sure. You will be surprised that ability of cast and force of restitution which is hidden in blank of 80/8Dual thanks to technology of NANOALLOY® from TORAY. Which means that burden of anglers should be reduced scentially.

Trget : GT · Yellowfin Tuna · Large kingfish/ Lure : Stick Bait · Popper with small cup face

## BLUE REEF 711/10 Dual

Lure: Max 200g Line: Max PE 10 Drag Max: 15kg/45°  
2pcs Length: 2470mm Weight: 400g Price:

This is high power model of 711/8. Even though this is for diving pencil mainly, It has been designed to be little more stiffer than 711/8 so it will cover various action such as casting large lure heavier than 100g for long distance or manipulating popper with small face cup. Belly section of it will absorb the weight of fish to reduce physical burden of anglers and angler will be able to lift huge fish while loading angler's weight thanks to that tough butt section. This will be recommended to anglers who requires that one for both diving pencil and small face cup popper.

Trget : GT · Yellowfin Tuna/ Lure : Stick Bait · Popper with small cup face

## BLUE REEF 710/10 Chugger

Lure: Max 220g Line: Max PE 10 Drag Max: 15kg/45°  
2pcs Length: 2415mm Weight: 390g Price:

Most powerful model in BlueReef series. Design of this blank enable anglers to manipulate from large diving pencil to popper with large cup face. Because of toughness and stiffness loaded on this blank, anglers have to load their weight on the rod while fighting. But if you could do that properly, it will be your reliable arm for sure. Even you are manipulating lure in long distance, you will be able to handle it at your own will as directly as if it is nearby. Tend to be monotonous rhythm when you aim GT, 710/10 will enable you to manipulate lure in various way of action.

Trget : GT · Yellowfin Tuna/ Lure : Stick Bait · Popper with small cup face

## BlueSniper & BLUE REEF

Load 3kg

BlueSniper & BLUE REEF / Bending Curve / Load 3kg

These are comparison images of BlueSniper series and BlueReef series which were loaded 3kg weight on tip. BlueSniper 85/4 Canary have been designed to aim yellow fin tuna and large king fish. It has high ability of casting and manipulating lure and once fish is on, you will be able to stop and hold these big target. 80/8 which is new for BlueReef series enable you to manipulate various lures and cast a distance without any stress. Of course enough power is loaded to butt section as GT rod.

Blacky series are not on this table because quite hard to see the characteristics of Blacky series from angle of other rods. Although tip section of Blacky series will bend as same as 85/4, butt power of these are almost as same as BlueReef series. These have been designed to enable you to hold 70 degrees while fish is on. By doing so, potential of power which is hidden in butt section will be brought out.

※Please note that only Blacky series can be held 70 degrees angle.

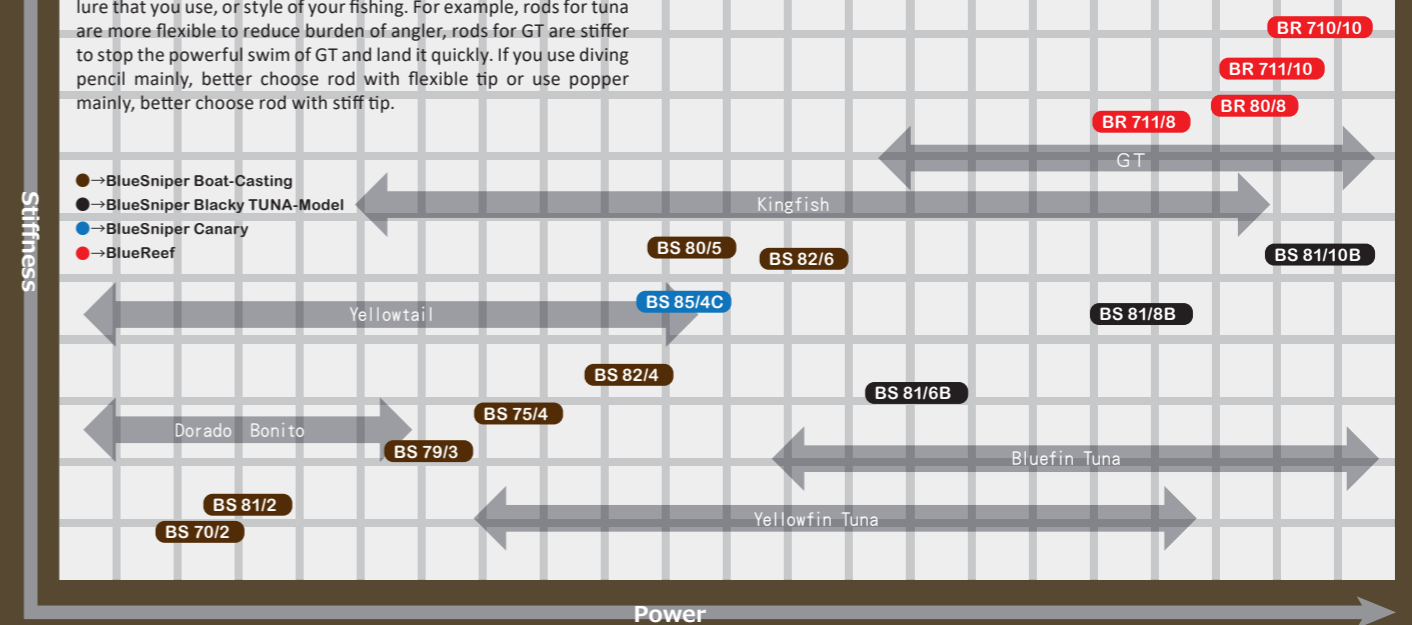

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

### Boat-Casting Model Comparison Table

Characteristic of rods for boat casting will be differed because of lure that you use, or style of your fishing. For example, rods for tuna are more flexible to reduce burden of angler, rods for GT are stiffer to stop the powerful swim of GT and land it quickly. If you use diving pencil mainly, better choose rod with flexible tip or use popper mainly, better choose rod with stiff tip.

※Comparison chart shows strength and stiffness visually. But it is based on reference value from the concept of design so the feeling of stiffness and strength of these rods is depend on personal equation. And also please note that the stiffness doesn't mean the breaking strength.

This series have more versatility than BlueCurrent TZ series. 76 Stream which was added in 2018 have been designed specifically for manipulating plug to aim Rockfish, black sea bream or seabass. 82F have been designed to cast float rig a long distance and also loaded enough power to keep seabass under control. Regarding overhead models, 63 and 71 are for light target, then 78 is good to be used for black sea bream, rockfish or seabass.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

## BlueCurrent Comparison Table

This is characteristics comparison of BlueCurrent series. We have put an importance on sensitiveness and toughness as a favor of natural bending curve. Stiffness which is on this table have been caused by feeling when you actually fish and speed of pulling fish up to surface. On the other hand, we have considered that power on this table have been caused by the biggest size of fish according to limit of strength of line.

※Comparison chart shows strength and stiffness visually. But it is based on reference value from the concept of design so the feeling of stiffness and strength of these rods is depend on personal equation. And also please note that the stiffness doesn't mean the breaking strength.
