

**Load 1 kg**

These are comparison images of EARLY series which are loaded 1kg weight on tip. EARLY for surf 103M,109MMH,105MH have been designed to cover various situation of fishing on sandy beach. 109MMH is more like fast action and 105MH is more like regular action. Although both models have almost same power on butt section, if you fish with minnow mainly please choose 109MMH, jig head or metal jig mainly, please take 105MH.

EARLY Plus series are designed to use minnow mainly except 81M, 86M and 96M which are designed to be slightly stiffer than others to manipulate vibrations or heavy jig head. 88ML and 86M are set as a basic of rod for seabass game. Yet 81M is bent more than 88ML and 86M, it is little stiffer than those 2 models to move heavy jig head with less action of rod. 96M, 100M and 102MH are good to be use on surf. 96M suit to vibrations, 100M is better for plugs, and 102MH is recommended for anglers who use metal jig mainly.

**Load 500g**

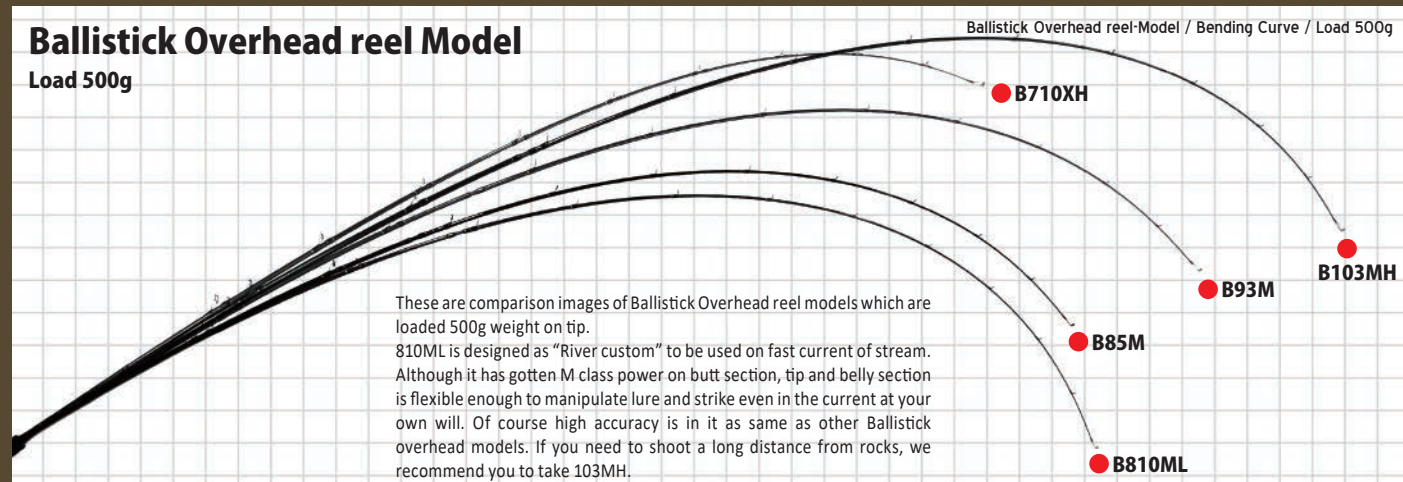

These are comparison images of Ballistick series which are loaded 500g weight on tip. (Angle of rod ~Approx.37°) All blanks of Ballistick series has been loaded carbon material called NANOALLOY® technology from TORAY. Bending curve when you cast and hooked will be deferent from these images because of characteristic of blanks which are made of NANOALLOY® technology from TORAY. Although you might feel that rod is bending well when you fight, also does not seems like it from the outside occasionally. Blanks made of NANOALLOY® will be followed in a moment when it is loaded and will be returned instantly thanks to high repulsion force. You will be able to pull fish up to surface easily if you could make use of this characteristic.

**Load 500g**

These are comparison images of Ballistick Overhead reel models which are loaded 500g weight on tip.

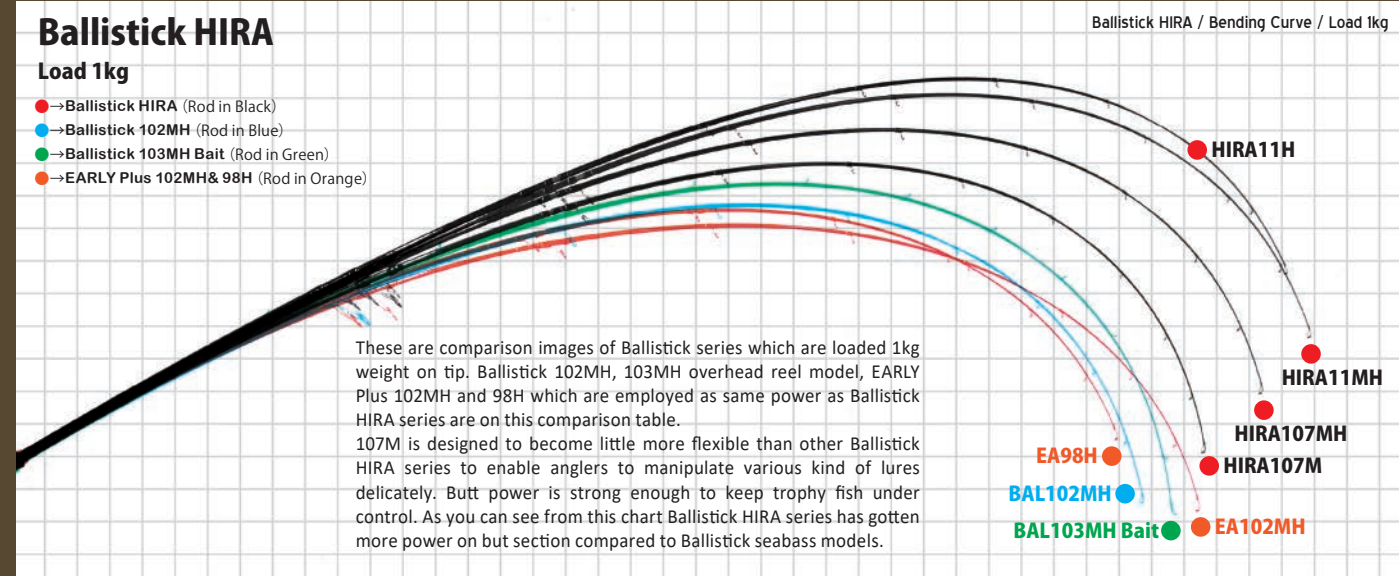

810ML is designed as "River custom" to be used on fast current of stream. Although it has gotten M class power on butt section, tip and belly section is flexible enough to manipulate lure and strike even in the current at your own will. Of course high accuracy is in it as same as other Ballistick overhead models. If you need to shoot a long distance from rocks, we recommend you to take 103MH.

**Load 1kg**

These are comparison images of Ballistick series which are loaded 1kg weight on tip. Ballistick 102MH, 103MH overhead reel model, EARLY Plus 102MH and 98H which are employed as same power as Ballistick HIRA series are on this comparison table.

107M is designed to become little more flexible than other Ballistick HIRA series to enable anglers to manipulate various kind of lures delicately. Butt power is strong enough to keep trophy fish under control. As you can see from this chart Ballistick HIRA series has gotten more power on but section compared to Ballistick seabass models.

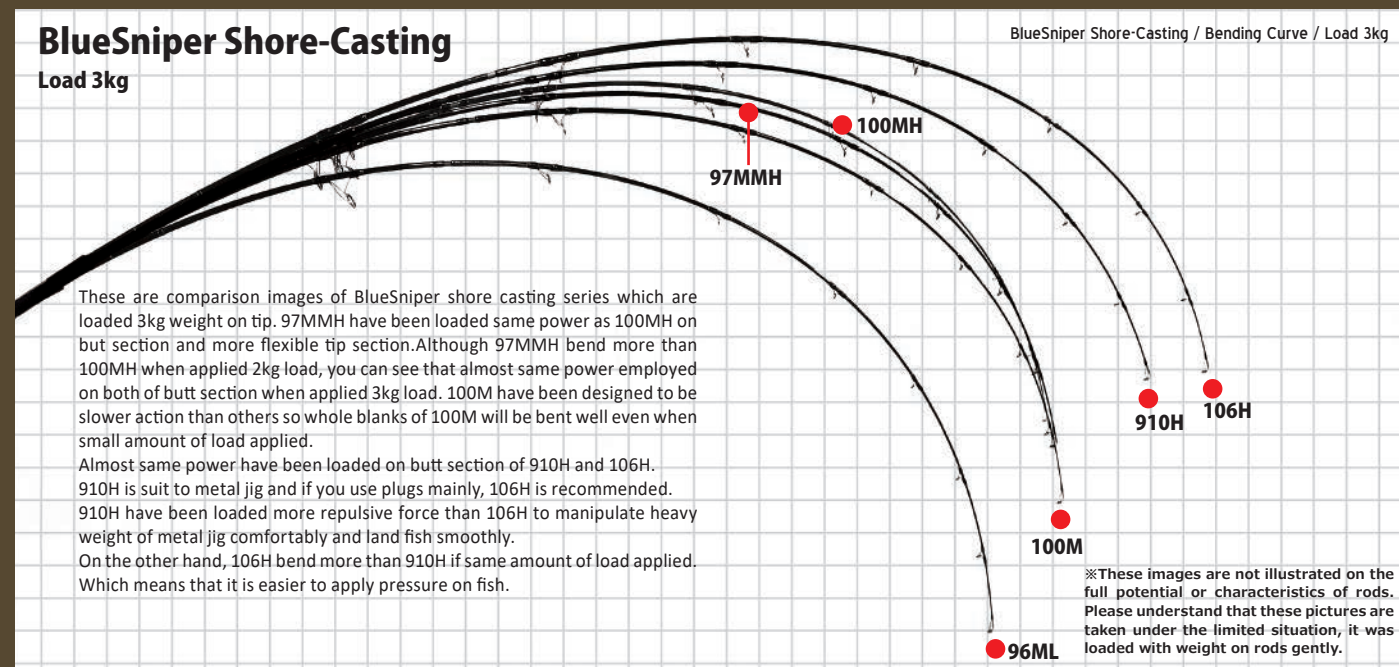

**Load 3kg**

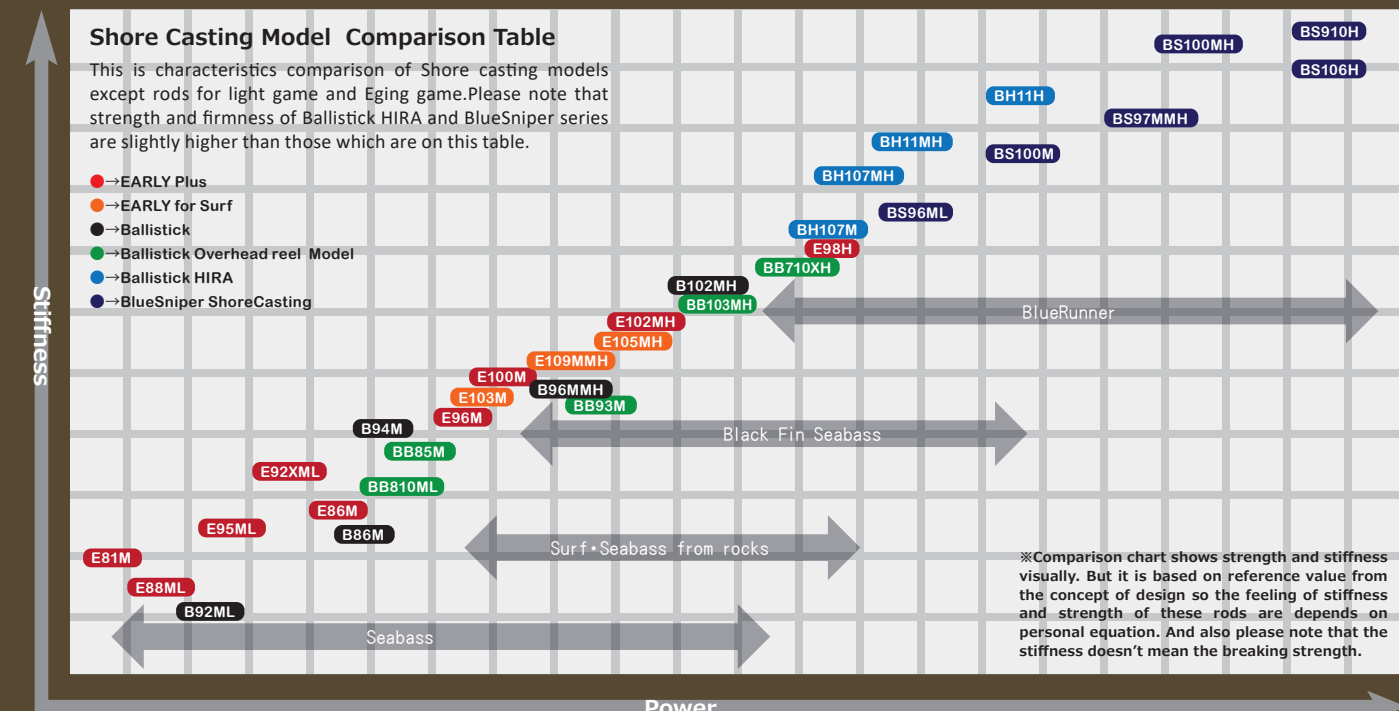

These are comparison images of BlueSniper shore casting series which are loaded 3kg weight on tip. 97MMH have been loaded same power as 100MH on butt section and more flexible tip section. Although 97MMH bend more than 100MH when applied 2kg load, you can see that almost same power employed on both of butt section when applied 3kg load. 100M have been designed to be slower action than others so whole blanks of 100M will be bent well even when small amount of load applied.

Almost same power have been loaded on butt section of 910H and 106H. 910H is suit to metal jig and if you use plugs mainly, 106H is recommended. 910H have been loaded more repulsive force than 106H to manipulate heavy weight of metal jig comfortably and land fish smoothly.

On the other hand, 106H bend more than 910H if same amount of load applied. Which means that it is easier to apply pressure on fish.

This is characteristics comparison of Shore casting models except rods for light game and Eging game. Please note that strength and firmness of Ballistick HIRA and BlueSniper series are slightly higher than those which are on this table.

# Calista

Calista / Eging Series/ 7 Line up  
Target / Squid

We have succeeded to utilize NANOALLOY® technology from TORAY totally as egging rod of new generation.

The ability of distance cast have been increased thanks to TORZITE ring titanium guide (SIC titanium guide on top guide only) from FUJI. Blanks made of NANOALLOY® will be followed in a moment when it is loaded and will be returned instantly thanks to high repulsive force.

Because of these character angler will be able to jerk EGI sharply with less power than ever and make monster squid float quickly without any breakage of legs of squid when you fight. Blanks with moderate stiffness and suppleness will reduce burden of anglers and enable you to lure squid more delicately.

## Calista 86L/TZ NANO

Lure: Egi 2.5~3.5 Line: PE 0.4~0.8  
2pcs Length: 2582mm Weight: 93g Price:

This is the light class rod which is good for jerking make use of line slack. This is suit to the game that lure squid delicately and sense slightes touch of squid with fine PE line. We have expressed 86L as “light class rod” which means it will be enable you to manipulate lure with less power than other models and it have been loaded enough butt power to keep squid over 2kg under control. This is the best egging rod for angler who would like to fish with super fine PE line.

## Calista 82ML/TZ NANO

Lure: Egi 2.5~3.5 Line: PE 0.5~1  
2pcs Length: 2500mm Weight: 95g Price:

This is almighty egging rod that suit to not only from breakwater or rocks but also egging game on boat. This have been finished as a sensitive rod with high repulsive force to be enable anglers to jerk lure making use of line slack or jerk aggressively. Angler will be able to manipulate lure delicately when you sight fishing make use of this length. And it have been gotten ability of distance cast thanks to Torzite ring guide and blanks with NANOALLOY® carbon material from TORAY.

## Calista 89ML/TZ NANO

Lure: Egi 2.5~3.5 Line: PE 0.5~1  
2pcs Length: 2672mm Weight: 100g Price:

This is the well balanced model that is enable anglers to jerk various ways from vanishing wave block, rocks or high scaffolding breakwater. It have been gotten high versatility to lure squid by various way of jerking and you will be able to cast long distance with it without any stress. This will be played an active part in spring season and also fall season as well for sure. And another characteristic of it is high sensitivity to sense even structure of bottom of the sea and softness of seaweed. This is the super sensitive model which is not only to sense contact of squid but also to explore underwater world as you are searching by hands.

## Calista 710M/TZ NANO

Lure: Egi 2.5~4 Line: PE 0.6~1  
2pcs Length: 2395mm Weight: 100g Price:

This is the Calista with high response in a short length blank which is good for the anglers who would like to jerk Egi more sharply and more aggressively than others. If you would like to give Egi effective action with less power than ever, we recommend you to choose this 710M which will give your wrist less burden thanks to blanks with NANOALLOY® from TORAY. When you wish to let Egi move from right to left or up and down at your will, Calista710 which have been gotten tip section with sensitiveness and moderate firmness combined to butt section with toughness will make you satisfy for sure. Although it is short length, you will be able to cast as long distance as Calista 86M TZ Nano and it will cover various way of fishing as such as blind or sight. Of course you can use it for squid fishing from boat as well.

## Calista 82M/TZ NANO

Lure: Egi 2.5~4 Line: PE 0.6~1  
2pcs Length: 2485mm Weight: 98g Price:

It have been loaded high cast ability and manipulation capability to blanks themselves so that enable you to make variety of rod action as such as jerking quickly in short pitch, jerking which take advantage of line slack or else. Although it have massive power to set hook on and land monster squid, tip section have outstanding high sensitiveness to sense tiny contact of monster squid. Highly remarkable point is that lightness you can feel when you actually cast and making action with it. That characteristic will reduce physical burden of anglers considerably. We would like to say that this 82M have gotten lightness feel of manipulating like a 710M, then loaded butt power as same as 86M. You will be able to fish for all season at variety of field as such as rocks, piers or surf with it. This all-rounder model must be suited to super keen squid hunter.

Mebius

Mebius / Eging Model / 6 Line up  
Target / Squid

We hope that fishing rod from YAMAGA Blanks is going to be used by much more number of anglers. That is ambition what we put into Mebius series. It is quite difficult to keep low budget while pursuing performances and quality. But we have succeeded to achieve those elements as making extensive use of our techniques of design and quality of factory. That is how we build fishing rods and once you fish with Mebius series you will definitely know as much about our policy and performance of blanks.

We offer you 6 different type of character for Mebius series as such as short length, light weight model or medium heavy class to cover various situation that you are going to face.

Of course you can take one as main rod, you can also take one as a substitution for specific circumstances.

We put our full of passion, spirit, knowledges and techniques of YAMAGA Blanks as a rod manufacturing bland into this Mebius series.

### Mebius 710L

Lure: Egi 1.8~3.5 (~21g) Line: PE 0.3~0.6  
2pcs Length: 2390mm Weight: 84g Price:

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. Although it is unsuitable for letting your Egi move fast or using Egi which receives strong resistance of water because of that flexibility which is designed intendedly, when squid is less activity than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

### Mebius 88L

Lure: Egi 2.5~3.5 (~21g) Line: PE 0.4~0.8  
2pcs Length: 2645mm Weight: 93g Price:

This is the light class model which is good for short pitch jerk and jerk making use of line slack. You can cast even light weight of Egi with comfortable feeling thanks to flexibility and moderate repulsive force. So this is good to be used on sight fishing technically. Yet it have enough power to keep huge squid under control, you can manipulate Egi with less power than others. Once you fish with it you will recognize that it have gotten high potential to be used in all season. 88L have been designed to cast, manipulate Egi and hooking up with super fine PE line without any stress. This is the one for angler who is pursuing result more than anybody else.

### Mebius 85ML

Lure: Egi 2.5~3.5 (~24g) Line: PE 0.5~0.8  
2pcs Length: 2555mm Weight: 93g Price:

85ML is well balanced to let anglers feel comfortable when they fish and succeeded to reduce burden of anglers maximally. It have been designed to be more flexible than 86M and finished to become technical rod which is enable anglers to manipulate various weight of Egi at your will. You will be able to take advantage of versatility of 85ML as such as luring out delicately on sight fishing, jerk making use of line slack and short pitch jerking. Yet this is not specialized model for monster hunting, we recommend 85ML for any level of anglers as an all-rounder to cover any seasons and various situation.

### Mebius 79M

Lure: Egi 2.5~4 (~28g) Line: PE 0.5~1  
2pcs Length: 2365mm Weight: 89g Price:

Blanks of 79M have been brushed up to be taking advantage of length. You will feel high response speed of blanks and high usability as characteristics of short length model while pursuing long casting performance. Yet it have enough power to cast and manipulate even size 4 Egi (about 25g), It have been loaded moderate repulsive force, flexibility and lightness on blanks. If you are required lure speedy when the water is worm, taking time to lure spooky one out, or aim good one from the boat, this 79M will be your huge advantage for sure.

### Mebius 86M

Lure: Egi 2.5~4 (~30g) Line: PE 0.5~1  
2pcs Length: 2595mm Weight: 98g Price:

It is standard model of Mebius series. Although it is medium class rod, it have gotten sensitive, flexible tip and belly section to be adjusted modern eging scene technically. It have been designed to be well balanced to cast and manipulate Egi with less input by angler reducing burden of angler's wrist. This 86M is the most versatile model of this series. You can cast long distance and manipulate at your will even size 4 Egi (about 30g) without any anxious.

### Mebius 83MH

Lure: Egi 3~4.5 (~35g) Line: PE 0.6~1.2  
2pcs Length: 2515mm Weight: 98g Price:

Although this is the medium heavy model which have been loaded massive power on butt section, blanks of 83MH have lightness and flexibility. It is good for size 3.5~4 of Egi mainly, you can of course use heavy type of size 4.5 of Egi. This 83MH have been designed to be loaded enough power to set hook on huge squid even heavier than 2kg and lightness and flexibility of blanks will reduce unwanted kickback when you jerk. This MH model is for keen angler who wish to hunt monster size and strongly hope to stay focused on fishing even you are waiting for migration of squid.

## Calista TZ NANO

Load 500g→

Although Calista series have been loaded flexibility and lightness. Also, repulsive force that has been loaded on blanks is much stronger than Mebius series.

Even though 4 type of M class in this series, those are classified by situations of eging scene and size of squid. All of them bend well even a small amount of input and reshape itself speedy and powerfully. If you aim squid over 3kg mainly, 82M, 86M or 90M are recommended.

Other power class will cover small size of squid Up to 2kg.

Calista TZ NANO / Bending Curve / Load 500g

## Mebius

Load 500g→

These are comparison images of Mebius series which are loaded 500g weight on tip.

Mebius series have been loaded more flexibility than calista series to get more versatility and usability. We have focused on cast feeling of Mebius series. Wide range of release point and repulsive force will provide you excellent feeling and distance of cast. Comfortability of casting and toughness as eging rod are directly linked to versatility for aiming at various target.

Enough versatility that to be used for horse mackerel, rockfish, black sea bream, seabass or light jigging game is hidden in those blanks.

Mebius / Bending Curve / Load 500g

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

BaronKnight CF66 CatFish Model

Lure: ~28g Line: PE 3~6 / NY ~20lb

2pcs Length: 1986mm Weight: 148g Price:

This is the standard of Baronknight catfish series enable you to cover various field as such as narrow creek, tiny stream or even large river. This remarkable characteristic is going to be huge advantage of anglers to lure spooky target out efficiently and effectively. Massive power on butt section and appropriate length of handle gives angler a sense of reassurance while fighting. Taking advantage of characteristic and length of blanks which are made of carbon, any level of anglers will be able to handle this well balanced model “Baronknight CF66” easily.

BaronKnight CF71 CatFish Model

Lure: ~35g Line: PE 3~6 / NY ~25lb

2pcs Length: 2165mm Weight: 160g Price:

This is well balanced mid length model for the situation that you are required to cast long distance, fish in mid~lower part of river or creek with high bank. You can control the course of retrieve and enjoy the game at most of field as you have planned. Yet you can feel sharpness on casting and lightness on handling, when you land even big one you will be impressed the massive power of butt section for sure. You can cast even light weight of lure without any stress thanks to its tip section which have been loaded flexibility.This is the one that you can aim at other side of the bank with long distance cast or aim pin spot with delivering your lure technically.

BaronKnight SH72 SnakeHead Model

Lure: Max 28g Line: Max PE 6 Drag Max: 6kg/45°

2pcs Length: 2220mm Weight: 203g Price:

First of all, you will be surprised on the lightness, and it was once you cast lure with it, you will sense the potential of cast ability for sure. We tried to reflect on the technology, knowledge and experiences which cultivated from salt lure game into the snakehead game. Baronknight72 has been finished to be loaded with accuracy of casting, delicate action with tip section, and butt section with a massive power to achieve the finest result.

BaronKnight SH78 / SnakeHead Model

Lure: Max 32g Line: Max PE 8 Drag Max: 7kg/45°

2pcs Length: 2340mm Weight: 211g Price:

SH78 have been extended to the length of SH72, while the progressing ability of long cast, keeps flexibility on the blank to pursue usability of lure. This is one of the best rod to cast long distance making use of the powerful butt section and lure spooky snakehead with delicate action with sensitive tip section at long range. Although SH78 have been loaded with more powerful butt section, than SH72 to enable you to pull out big ones that's up to 80cm from the water. On the whole rod, SH78 is a little softer than SH72.

# Estuarine

Estuarine/ Predator Hunting Model / 6 Line up  
Target / Toman・Barramundi・Huge Catfish・Trevally etc

Estuarine series has been designed to be adjusted for various field in overseas. Drive into the back country, walk through the bushes and drift the boat under the overhung trees. Then monsters that are beyond your imaginations will be waiting for you out there. We have loaded massive power to these blanks for anglers who are aiming at monsters hiding on the untouched field. The targets are not only for freshwater fish such as huge cat fish, barramundi and giant snakehead but also saltwater fish such as medium sized trevally from boat. **YAMAGA Blanks**  
FLY Rod Series

## ENNE For SaltWater

YAMAGA Blanks have been proven ourselves in the very competitive market of deep jigging to aim large blue runner, plug casting for Tuna or GT utilizing strengthened blanks with massive repulsive force and ultralight spinning for horse mackerel which is required sensitiveness and lightness to get the fish of lifetime by transmitting slightest of movement and vital information. Lightness to keep casting and manipulating comfortably, toughness to fight without worry, and deliver your lure farther than you have wished to. We have pursued these three elements to build fine fishing rod since we have started off. Then we had decided to produce saltwater fly rods utilizing our techniques and knowledges that we have accumulated for a long time period. With YAMAGA saltwater fly rod series “ENNE”, you can cast short to mid distance with accuracy and comfort thanks to the delicate tip section utilizing modulus-optimized tip sections utilizing conventional graphite prepregs. And when you need long distance, the butt section built with NANOALLOY® technology bend deep and smooth storing huge power, then on the final delivery they shoot line out with authority and accuracy. When fish is on, the blanks bend smoothly like seamless and butt sections which have strong repulsive force will allow anglers to continuously apply good amount of pressure on fish, leading to short, efficient and fish-friendly fight. Anglers’ responsibility is to keep bending it at the optimum angle and wind in the slack.

Saltwater fly fishing which require a lot of strength considerations, durability, accuracy and speed under truly abusive situations is next our field of challenge and we have confidence as a rod manufacturer to support salt water fly fisherman in all around the world with “ENNE”.

### ENNE Type-C01 8’11” #8

Target / Seabass · Bonefish · Permit · Striped bass

### ENNE Type-D01 8’11” #9

Target / Seabass · Dolphinefish · Bonefish · Permit

## New BlueCurrent 57JH TZ/NANO PROFESSOR

Length: 1715mm Closed Length: 875mm Weight: 58g Carbon: 99.8%  
2pcs/Spigot ferrule Lure: Jighead ~5g Line: PE ~0.4/NY・FC1~3lb  
Price:

The new BlueCurrent Professor series are specialized models which have been refined to achieve super smooth bend curve remaining sharpness with re-tuned blanks and spigot ferrule. If the distance in between you and fish is very close and you are required to become sneaky to approach spooky one, this 57JH which is shortest and finest stick of this series will be your perfect choice. Super light and fine blanks will enable you to cast and manipulate tiny jig head at your will. And butt power will not let you afraid of large fish hooked up accidentally.

• TZ Titanium frame K guide(Fuji) • NANOALLOY® technology is employed

## New BlueCurrent 66JH TZ/NANO PROFESSOR

Length: 1990mm Closed Length: 1020mm Weight: 63g Carbon: 99.8%  
2pcs/Spigot ferrule Lure: Jighead 0.2~6g Line: PE~0.4/NY・FC1~3lb  
Price:

Compared to previous 66TZ/Nano, sensitivity, sharpness and flexibility of new 66JH have been refined. If you are going to aim target at Mid-range with light jig head, this 66JH will help you to deliver your rig delicately and approach selective fish technically. Once you fish with it, you will notice the differences between this 66JH and previous one.

• TZ Titanium frame K guide(Fuji) • NANOALLOY® technology is employed

## New BlueCurrent 70 Plug TZ/NANO PROFESSOR

Length: 2140mm Closed Length: 1090mm Weight: 67g Carbon: 99.8%  
2pcs/Spigot ferrule Lure: Plug Max7.8g(ComfortWeight 1.6~4.5g) Line: PE 0.2~0.4  
Price:

If you are super keen with plugging game, this 70Plug is specialized for it! Especially if you are aiming at light game target such as mackerel or Rockfish, there is nothing but this 70Plug. You can give action such as light twitch or jerk to plug from 1.6g to 4.5g very comfortably and flexible tip will not let you lose small bite of selective fish. Some times you will be faced situations that fish is feeding on surface little farther than you thought you can choose plug up to 7.8g and shoot it like a ballet and just retrieve it. You can get finest result that you have ever achieved.

• TZ Titanium frame K guide(Fuji) • NANOALLOY® technology is employed

## New BlueCurrent 73 All-Range TZ/NANO PROFESSOR

Length: 2225mm Closed Length: 1135mm Weight: 73g Carbon: 99.8%  
2pcs/Spigot ferrule Lure: 0.5~12g Line: PE 0.2~0.6  
Price:

This 73All Range is shorter length version of 85TZ/Nano All Range. The versatility and specialty have been fused on blanks of 73All Range. So if you with to manipulate various kind of lure such as jig head, plug, metal jig or even Egi, this All range will be your best partner. You will sense that potential of 73All range way beyond your imagination once you fish with it.

• TZ Titanium frame K guide(Fuji) • NANOALLOY® technology is employed

## BlueCurrent 70TZ Trippers

Length: 2145mm Closed Length: 560mm Weight: 72g Carbon: 99.8%  
4pcs/Spigot ferrule Lure: ~12g Line: PE 0.3~0.8  
Price:

This is 4pcs model of BlueCurrent. Although it is going to be perfect rod when you are on traveling, of course you can take it to your main field as a daily use rod. We have loaded enough sensitiveness and sharpness as one of BlueCurrent so we recommend you to use it not only for light salt game but also for trout in the small stream. The closed length of it is 560mm to put in the suits case. We believe that you cannot help taking it whenever and wherever you go out. Enjoy fishing with it as you like.

• TZ Titanium frame K guide(Fuji)

## BlueCurrent ShallowSniper 610/TZ

Length: 2120mm Closed Length: 1095mm Weight: 73g Carbon: 99.8%  
2pcs/Put over ferrule Lure: 5~16g Line: PE 0.6~1  
Price:

We have selected high resilience fibers of carbon to achieve sensitiveness and speed of response. This is special tuned model to aim seabass and black sea bream. You will be surprised that how clear signal and strong vibration which are transmitted through this blanks. • TZ Titanium frame K guide(Fuji)

## BlueCurrent 60 Junior

Length: 1830mm Closed Length: 940mm Weight: 62g Carbon: 92.5%  
2pcs/Put over ferrule Lure: ~7g Line: PE 0.3~0.8  
Price:

Although it is designed for kids over 5 years old, of course it has gotten durability, strength and toughness as spin off of BlueCurrent series. We have achieved versatility to use many kinds of lures with high cost performance. It is well balanced to be used by kids and adult also. We believe it is going to be one you will always take to fish no matter lure or bait. • Alconite Stainless frame K Guide(Fuji)

## Support

### Precautions for use

- Do not cast with tangled line or line trouble in the reel. This may cause the rod to break. Furthermore, if you miss or forget to put the line through a guide, this may result in damage or breakage of your rod.
- If you continue to reel in your rig (lure, popper, jig etc) after it has reached the top guide, this will cause the rod to break.
- If you force the joint section of the rod when joining together, this will cause cracking or splitting of the joints.
- If you use the rod while the joint section is still loose, this may cause breakage.
- If the joint section is stuck together, use a rubber sheet for added grip while twisting away from each other.
- Beware of power cables, overhead power lines or phone lines. The material (carbon) will easily pass through electricity causing serious injury or death.
- If you hear or see lightning approaching while in use, pack the rod away or stay away from the rod. Lightning may strike causing serious injury or death.

### Maintenance and storage

- Wash rod with running water to rid of any filth and salt. Then wipe off any excess water.
- If you store your rod without wiping off excess water, this may cause blisters on the blank. Storage in well ventilated are as with no high temperature.
- Please do not leave the rod in your vehicle for long durations in summer. This will cause blisters and warping of the blank.

### About contents on this catalog

- Price and specifications might be changed without previous notice.
  - Some of images on this catalog are proto type so it might be different from actual products.
  - Images on this catalog might be different from actual products depend on condition of printing.
  - There are some images of single lock nut even though it is mentioned as double lock nut on specifications.
- Products that have been shipped after December 2017 have been modified to double lock nut type.

### Contents in this catalog

- Include accurate specifications of rods, written in accordance with the regulations set by the Japanese National Fishing Rod Fair Trade Conference.
  - Prices and specifications listed on this catalog may be altered without notice.
  - The colors presented in the pictures may differ from the actual color.
- Furthermore, some products are prototype rods in the developmental stage and may differ when it reaches the final product.

### Requesting repairs

- Please take or send products which personally modified rods will not be covered by warranty (even if it is within the warranty period).
- If you are requesting for repair, please send in the whole rod (not just the section of the breakage).

### Repairing and After service

- Please take or send products which is required repairing to sales outlet. At that moment, please send a whole rod (not only the section of the breakage)
- Please be aware that any rod that was personally modified will not be covered by warranty (even if it is under warranty)
- Any repairing that we have judged as changed/tampered the specification or made to order is unacceptable.
