YAMAGA & BLANKS

YAMAGA Blanks ROD COMPANY

 15years and beyond

In 2023, Yamaga Blanks will celebrate the 15th anniversary since the establishment of the brand. However, the parent company of "Yamaga Tsurigu Co." which is our in-house factory, was established in 1990, giving us more than 30 years of fishing rod manufacturing experience.

We started off assembling fishing rods as a whole and through our experience and techniques, we embarked on the challenge to establish our own brand in 2008. We started off with a one piece seabass rod model "Early", followed by the jigging rod lineup of the "Galahad" series, land-based seabass rods, squidding rods and land-based blue runner rods.

In 2010, the release of the "BlueCurrent" series for the light game became one of the iconic models for Yamaga Blanks with the underlying strength stealthily hidden in the finesse blank. The lineup in the BlueCurrent series developed from here.

One of the most important factors when releasing a new model in the lineup is "great casting", "strength" and "lightness". These factors will vary depending on the carbon material of the blank.

Prepreg is a valuable industrial material not only used to manufacture carbon blanks for fishing rods, but also airplanes. Although the use of these high-tech materials are important, however, we believe that the most important factors when producing fishing rods are manufacturing techniques and our long history of designing.

There can't be any compromises when designing and developing carbon blanks for fishing rods. It is our pride and joy to tirelessly strive for greater heights when producing blanks at our in-house factory.

The unstable global market is no stranger to the fishing industry. However, the number of anglers around the world are increasing day by day. We, at Yamaga Blanks, support those anglers who seek freedom, love their local waters and who are not strung down by limitations.

Fishing is simply a hobby where an individual angler is facing Mother Nature on a personal basis. Fishing grounds, anglers' style, thoughts and body sizes all differ from one another. If there are 1000 different individuals, technically speaking, there can also be 1000 different ways and styles of fishing.

The celebration of our 15th year anniversary has given us the opportunity to look back upon our past and look forward to the future. We will continue to strive for greater rod manufacturing while maintaining the freedom of anglers to pursue their own fishing styles.

Yamaga Blanks will continue to produce simple blanks with great "castability", "strength" and "lightness". These characteristics of our rods will only come to life once connected with the angler's unique style.

To create such gear full of life is our future and our goal for Yamaga Blanks.

*We continue to evolve.*

## 2023 NEW ARRIVAL

The culmination of 15 years of products

# YAMAGA B LANKS

# CHAIN

### This is the creation of a new style. Let's connect the different fishing grounds.

We are approaching the 15th year anniversary of Yamaga Blanks and for the first time, releasing this special "one of a kind" rod. This model is built up through the compilation of our techniques over the years. It is a "chain" connecting our past experience with our future goals.

Our developmental concept was to create a "high-performance spare-rod capable of connecting different fields". This project was triggered when we were targeting blue-runners off the rocks. Utilizing strong PE4-8 line, powerful rods, large reels and heavy lures to target blue-runners off the rocks, we needed a break from casting with the heavy setup. We wanted to go after smaller by-catches for a little break. With the vast variety of subspecies - including rock-fish, squid and black fin seabass - it meant that we would need to take that many different types of rods. This was the beginning of the journey to create the ultimate "spare-rod" able to go after various sub-targets.

There were many twists and turns during the testing of the rod to achieve the high-spec characteristics required for such a concept. Initially created as a "spare rod" for rocky land-based fishing, through rigorous testing and pursuit for greatness, it soon became a rod capable of connecting different fields (break-water, river mouths, ports and the vast surf). Basically, a rod you want to take everywhere.

We are proud to release to the anglers around the world this unique rod developed through the state of the art design and technology of Yamaga Blanks, capable of handling the high drag of the newest reels on the market and high-spec PE lines to go after various species.

This rod is a "lone wolf" and does not belong to any of the existing series.

It is the materialization of our concept. Connecting our past to the future and linking different fields together. With these hopes and dreams, we have named it "Yamaga Blanks 88 Chain".

While pursuing your main target with your main rod, the YB 88 Chain will allow anglers to further enjoy the day in the field. We hope you can enjoy our pride and joy in this product.

Rod Detail Page

### YAMAGA Blanks **88 CHAIN**

**LURE** 8~40g **LINE** PE 0.8~2 **Price**

This special model was designed to enable anglers to utilize various lures up to 40g to target various species. Even with the light specifications, anglers will easily be able to go head to head with smaller Blue-runners around 3kg. In addition to its lightness, the exquisite 8.8ft length will bring about great advantage to the anglers to find new targets in your local waters. You can go after Blue-runners, snappers, rock-fish, squid, black-fin seabass from the rocks, migratory species, flat-fish and seabass from the surf and monstrous seabass in the river mouths. This one rod will enable you to go after many different species in your local waters. The outstanding casting distance the YB88CHAIN creates and the ultimate balance between lightness and power will open up new doors for your future fishing.

#### Rod Detail

Length : 2650mm (CL: 1355mm) Weight : 138g Section : 2pcs(Spigot Ferrule)

Guide : SIC-S Titanium frame K Guide+SIC Titanium frame RV Guide (Fuji)

Reel seat : DPS17 • BACK STOP Double-Lock Nut (Fuji)

Grip : Length 530mm • About 410mm from reel foot to end of grip when reel is equipped

Suitable reel size : D : LT3000S~LT5000C / S : C3000~C5000

#### Recommended Field

Rocks • Sandy Shore • Estuary • Port

#### Recommended Target

Calista

2023 Reconstruction

New Calista / Eging Model / 5 Lineup

Calista series category page  
Details of each model are available from QR code on each model.  
YAMAGA Blanks Official Web site

Since the release of the first model of the Calista in 2013 and through its history of updates, the lightness and easy handling of the Calista series have been loved by many anglers around the world. As of 2023, our whole lineup will be updated. In the current subdivided squid fishing scene, there are various techniques and the skill of individual anglers have drastically improved. There is one simple reason why we have embarked on the renewal of the series. It is none other than the fact that we want anglers to have the lightest, most responsive and absolute castability of what we have to offer with the current given technology.

For the new "Calista", it goes without saying that we have utilized the latest carbon material, but we have also challenged the limits of blank structural designs. All models will be equipped with a high level of standard performance for every angler to be able to express their techniques to the fullest. While maintaining the original concept of "easy and long distance casting", each individual model has been honed to express the values of the new blank.

The new Calista series have been rebuilt from the start and it is the crown of our manufacturing techniques and efforts. Its more than a "renewal" or a "new model", it's the "Origin of Calista".

As a blank manufacturer, there is no better challenge than creating this totally new Calista series for the squid fishing scene.

# Stream

## Calista 90LML/S

Calista 90LML /S (Stream)

**Price**

**EGI #2.5~3.5** **LINE PE 0.4~0.8**

**Rod Detail**

Length : 2744mm (CL: 1404mm) Weight (Prototype) : 96g

Section : 2pcs (Spigot Ferrule)

Guide : TORZITE Titanium frame K Guide+Butt Guide: SiC Titanium frame RV Guide(Fuji) Reel seat : VSS16

Suitable reel size : D : LT2500 / S : 2500

Grip a.315mm | b.400mm | Spinning Model

This is the search model with heightened ability to allure the squid through its highly sensitive blank to feel for the slightest touch of the squid during the fall.

This is a highly sensitive and flexible long length model able to feel for the squid jig in the current. We have fused together the light tip section to a medium class strength butt section to realize its outstanding casting ability. Although the rod is a long length model, the exceptional balance will allow anglers to easily and lightly control the rod to induce the bite of the squid while the highly sensitive blank will transmit the slightest touch from the squid and feel for the current during the curve fall of the squid jig. The long length will also come to an advantage not only when fishing in strong wind conditions or fishing from high footing to control the line, but also utilizing the slack-jerking technique. Although you will be able to lightly maneuver the squid jig, make no mistake, it is not a rod for small squids, but for anglers to go after the spooked monstrous squid lurking in the dark.

[Rod Detail Page](#)

# Technical Jerk

## Calista 76ML/TJ

Calista 76ML /TJ (Technical Jerk)

**Price**

**EGI #2.5~3.5** **LINE PE 0.4~1.0**

**Rod Detail**

Length : 2293mm (CL: 1175mm) Weight (Prototype) : 87g

Section : 2pcs (Spigot Ferrule)

Guide : TORZITE Titanium frame K Guide+Butt Guide: SiC Titanium frame RV Guide(Fuji) Reel seat : VSS16

Suitable reel size : D : LT2500 / S : 2500

Grip a.290mm | b.375mm | Spinning Model

This is a technical model to make use of all the different variations of jerking to allure the squid.

The technical short length model was designed to enable anglers to utilize their various jerking techniques. The flexible yet short length blank will be a tactical weapon for anglers to precisely maneuver the squid jig for the final leg of the pursuit of the squid. It will be most suited for fishing around structures and drop-offs or technically controlling the lure when sight fishing. This rod will bring about great advantage to anglers who seek to master the precise action required to allure the squid in close and far distance. Furthermore, the responsiveness of the short length blank will also assist anglers to speedily search a vast area. This short length versatile blank will also be great for off-shore boat squid fishing.

# All Rounder

## Calista 82ML/AR

Calista 82ML /AR (All Rounder)

**Price**

**EGI #2.5~3.5** **LINE PE 0.4~1.0**

**Rod Detail**

Length : 2496mm (CL: 1282mm) Weight (Prototype) : 92g

Section : 2pcs (Spigot Ferrule)

Guide : TORZITE Titanium frame K Guide+Butt Guide: SiC Titanium frame RV Guide(Fuji) Reel seat : VSS16

Suitable reel size : D : LT2500 / S : 2500

Grip a.305mm | b.390mm | Spinning Model

You can experience the next generation lightness of the new Calista in this all-rounder model to widen your squid fishing.

This is the new all-rounder model of the renewed Calista series where anglers will be able to first handedly experience our developmental concept. The blank is fused together with castability, controllability, sensitivity and power for anglers to bring out its true colors all year round at any given situation. With the blank designed to allow anglers to maintain their concentration by reducing the stress, this versatile rod will become your secret weapon even in the ever changing squid fishing scene where techniques and skills of anglers are improving on a daily basis. The sharpness hidden beneath the user-friendly characteristics will breathe life into the squid jig controlled by the angler through long distance casting, jerking and line-control. This is the representative model of the new Calista series we have released with pride and joy.

[Rod Detail Page](#)

\*the weight of the above models are weight of the prototype models. These may change slightly for the final product. This information will be updated on our website.

# Power & Finesse

## Calista 86M/PF

Calista 86M /PF (Power & Finesse)

**Price**

**EGI #2.5~4.0** **LINE PE 0.4~1.0**

**Rod Detail**

Length : 2573mm (CL: 1320mm) Weight (Prototype) : 99g

Section : 2pcs (Spigot Ferrule)

Guide : TORZITE Titanium frame K Guide+Butt Guide: SiC Titanium frame RV Guide(Fuji) Reel seat : VSS16

Suitable reel size : D : LT2500 / S : 2500

The rod was developed with castability, responsiveness and lightness incomprehensible for a power model.

Like the 82ML/AR, it is an all-rounder model suitable for year round fishing with lightness and responsiveness as its distinct qualities. The blank was back to the drawing board and rebuilt from the ground up to break all stereotypes of the standard 86M specifications for squid fishing. Although it is a powerful model in the new Calista series, we have not forgotten the critical values of sensitivity and lightness. Even if you own a rod with similar specs to 86M, we would like you to take hold of this rod to first handedly experience the highly responsive controllability of the squid jig and outstanding casting distance the blank produces. This model is dedicated to those highly technical anglers who want to launch their squid jigs great distances and able to utilize both stillness and movement.

[Rod Detail Page](#)

# Aggressive

## Calista 79MMH/AG

Calista 79MMH /AG (Aggressive)

**Price**

**EGI #3.0~4.5** **LINE PE 0.6~1.0**

**Rod Detail**

Length : 2380mm (CL: 1226mm) Weight (Prototype) : 99g

Section : 2pcs (Spigot Ferrule)

Guide : TORZITE Titanium frame K Guide+Butt Guide: SiC Titanium frame RV Guide(Fuji) Reel seat : VSS16

Suitable reel size : D : LT2500 / S : 2500

This specialized model has a more unique concept for a more aggressive approach.

There are no specific rule books for squid fishing, and there are as many styles and game plans as there are anglers. The 79MMH/AG is a super highly responsive model for those anglers who aggressively allure the squid by technical approaches. It is designed with a medium class tip section and a medium heavy class butt section to easily and sharply maneuver the # 3.5 squid jigs. We have also reduced the stress on the anglers side by giving the rod contradicting characteristics of flexibility and power. Anglers will also be able to further appeal to squid that are in the deep area with the sharp action of heavier squid jigs.

[Rod Detail Page](#)

\*the weight of the above models are weight of the prototype models. These may change slightly for the final product. This information will be updated on our website.

### New Calista Design Detail

The blank color for the new Calista series are black, but depending on the angle of the light, it will appear to look dark blue around the grip and butt section of the blank.

We have utilized SiC ring titanium RV guide for the butt guide and Torzite ring titanium frame K guides for all the other guides to improve line excretion and extra casting distance.

The front grip is shaped for easy gripping and maneuverability of the rod. Furthermore, the front grip is designed shorter for anglers to be able to directly touch the blank for more sensitivity.

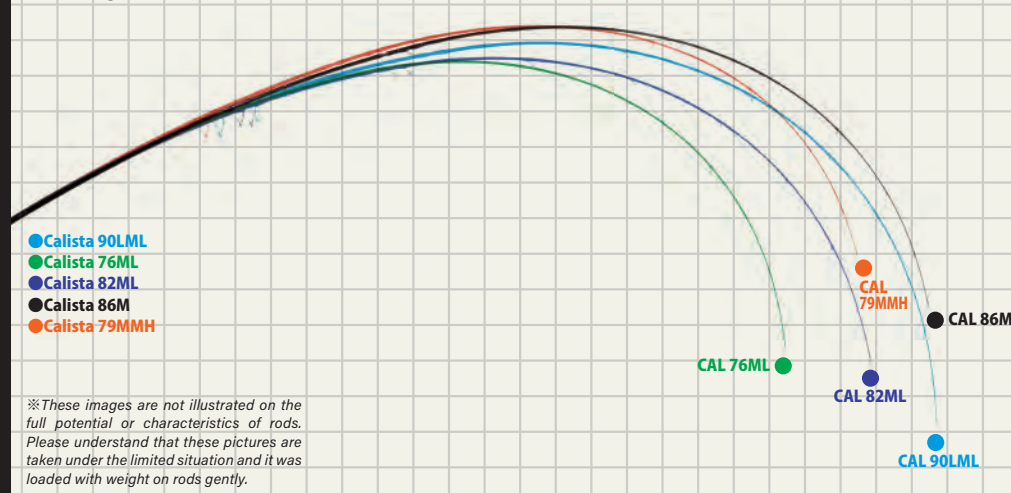

The reel seat is an unlocking system with a separate style rear grip. The CCR mark on the rear grip stands for "Calista, Castability and Responsiveness" which is the concept for the new Calista series.

### Calista 2023 New Model

Load 500g

\*the bending curve comparison is photographed with the line set through the guides with the reel attached.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

- Here are pictures representing the bending curve of the new Calista series with a static load of 500g. We have especially focused on the length and blank individuality of each model for the lineup of the new Calista series.
- The concept for the Calista series is the importance of "castability and responsiveness", while possessing the ability to lightly control the squid jig with ease. For the reconstruction of the series, we have refined these qualities.
- Anglers will be able to experience the lightness of the next generation blanks in 3 different lengths (short, medium and long lengths) of the main ML class rods.
- The classic 86M has succeeded the power of the previous model yet totally redesigning the blank to further reduce the stress on the angler.
- The new 79MMH in the MH class is equipped with outstanding butt power while having a flexible M class tip section, making anglers feel like s/he is controlling a light M class rod.

EGING CATEGORY

# Mebius

Eging Model / 6 Lineup

◀ Mebius series category page  
Details of each model are available from QR code on each model.  
YAMAGA Blanks Official Web site

We hope that fishing rod from YAMAGA Blanks is going to be used by much more number of anglers. That is ambition what we put into Mebius series. It is quite difficult to keep low budget while pursuing performances and quality.

But we have succeeded to achieve those elements as making extensive use of our techniques of design and quality of factory. That is how we build fishing rods and once you fish with Mebius series you will definitely know as much about our policy and performance of blanks.

We offer you 6 different type of character for Mebius series as such as short length, light weight model or medium heavy class to cover various situation that you are going to face. Of course you can take one as main rod, you can also take one as a substitution for specific circumstances.

High versatility is hidden inside of blanks with high sensitivity and durability to be enable you to handle variety of lure in weight range on specifications.

The potential of versatility loaded on this series will let you aim not only squid but also variety of fish. We put our full of passion, spirit, knowledges and techniques of YAMAGA Blanks as a rod manufacturing bland into this Mebius series.

Mebius 85ML

## Mebius 710L

**LURE** Egi #1.8~3.5 (~21g) Price  
**LINE** PE 0.3~0.6

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. When squid is less activity than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

(Grip) a.290mm | b.365mm | Spinning Model

Rod Detail Page

## Mebius 88L

**LURE** Egi #2.5~3.5 (~21g) Price  
**LINE** PE 0.4~0.8

This is the light class model which is good for short pitch jerk and jerk making use of line slack. You can cast even light weight of Egi with comfortable feeling thanks to flexibility and moderate repulsive force. So this is good to be used on sight fishing technically. Yet it have enough power to keep huge squid under control, you can manipulate Egi with less power than others. Once you fish with it you will recognize that it have gotten high potential to be used in all season.

(Grip) a.310mm | b.385mm | Spinning Model

Rod Detail Page

## Mebius 85ML

**LURE** Egi #2.5~3.5 (~24g) Price  
**LINE** PE 0.5~0.8

It have been designed to be more flexible than 86M and finished to become technical rod which is enable anglers to manipulate various weight of Egi at your will. You will be able to take advantage of versatility of 85ML as such as luring out delicately on sight fishing, jerk making use of line slack and short pitch jerking. We recommend 85ML for any level of anglers as an all-rounder

(Grip) a.310mm | b.385mm | Spinning Model

Rod Detail Page

Mebius 86M

Mebius 710L

## Mebius 79M

**LURE** Egi #2.5~4 (~28g) Price  
**LINE** PE 0.5~1

Blanks of 79M have been brushed up to be taking advantage of length. You will feel high response speed of blanks and high usability as characteristics of short length model while pursuing long casting performance. Yet it have enough power to cast and manipulate even size 4 Egi (about 25g). It have been loaded moderate repulsive force, flexibility and lightness on blanks. If you are required lure speedy or taking time to lure spooky one out, 79M will be your huge advantage for sure.

(Grip) a.300mm | b.375mm | Spinning Model

Rod Detail Page

## Mebius 86M

**LURE** Egi #2.5~4 (~30g) Price  
**LINE** PE 0.5~1

It is standard model of Mebius series. Although it is medium class rod, it have gotten sensitive, flexible tip and belly section to be adjusted modern eging scene technically. It have been designed to be well balanced to cast and manipulate Egi with less input by angler reducing burden of angler's wrist. This 86M is the most versatile model of this series. You can cast long distance and manipulate at your will even size 4 Egi (about 30g) without any anxious.

(Grip) a.320mm | b.395mm | Spinning Model

Rod Detail Page

## Mebius 83MH

**LURE** Egi #3~4.5 (~35g) Price  
**LINE** PE 0.6~1.2

Although this is the medium heavy model which have been loaded massive power on butt section, blanks of 83MH have lightness and flexibility. It is good for size 3.5~4 of Egi mainly, you can of course use heavy type of size 4.5 of Egi. This 83MH have been designed to be loaded enough power to set hook on huge squid even heavier than 2kg and lightness and flexibility of blanks will reduce unwanted kickback when you jerk.

(Grip) a.320mm | b.395mm | Spinning Model

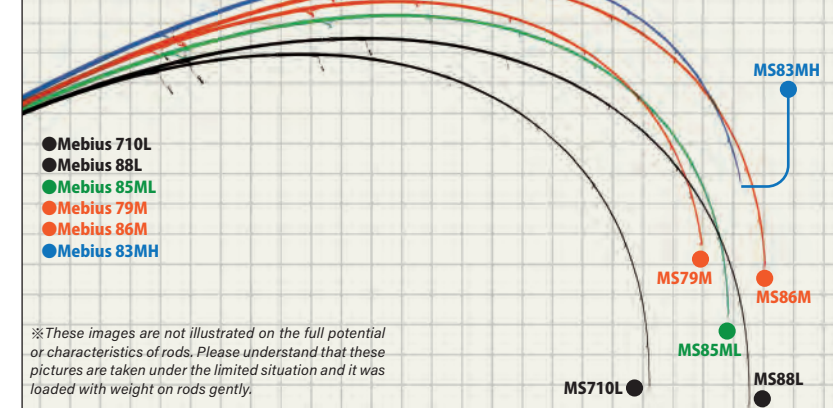

Rod Detail Page

Mebius Series Model Data

Item	Reel	Length	Closed length	Weight	Suitable reel size	Target	Egi	Sub concept game
710L	Spinning	2390mm	1225mm	84g	D: LT2500 / S: 2500~C3000	Squid	#1.8-3.5 (-21g)	Plugging game for Rock fish & Bream
88L	Spinning	2645mm	1350mm	93g	D: LT2500-3000C / S: C3000	Squid	#2.5-3.5 (-21g)	Bottom Wind ※ & Plugging game(6~9cm) ※ Twitch the rod tip up to flick the jig head
85ML	Spinning	2555mm	1305mm	93g	D: LT2500-3000C / S: C3000	Squid	#2.5-3.5 (-24g)	Sea bass game in the Port & Estuary
79M	Spinning	2365mm	1210mm	89g	D: LT2500-3000C / S: C3000	Squid	#2.5-4 (-28g)	Migratory fish with a metal jig up to 1 oz.
86M	Spinning	2595mm	1325mm	98g	D: LT2500-3000C / S: C3000	Squid	#2.5-4 (-30g)	Rock fish, Migratory fish, Sea bass game, etc.
83MH	Spinning	2515mm	1285mm	98g	D: LT3000C / S: C3000	Squid	#3-4.5 (-35g)	Rock fish game & Shore jigging with heavier than 1 oz

※Regarding the sub-concept game, it is only the game can be a recommended. The models have enough durability and toughness to be used for game but eging of course.

## Mebius Load 500g

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

These are comparison images of Mebius series which are loaded 500g weight on tip. Mebius series have been loaded more flexibility than calista series to get more versatility and usability. We have focused on cast feeling of Mebius series. Wide range of release point and repulsive force will provide you excellent feeling and distance of cast. Comfortability of casting and toughness as eging rod are directly linked to versatility for aiming at various target. Enough versatility that to be used for horse mackerel, rockfish, black sea bream, seabass or light jigging game is hidden in those blanks.
