MADE IN JAPAN
FACTORY BRAND
"SIMPLE THINGS DONE WELL"

Origins of YAMAGA Blanks.

The grass routes of Yamaga Blanks as a rod manufacturer lies in our factory.

We design, construct, assemble, package and ship all our products in-house at our own factory in Japan. This is the origin of our “craftsmanship”.

However, fishing rods are merely a piece of equipment and if the anglers are content with the product, it doesn't really matter where the rod was produced.

So, why do we have such emphasis on producing the rods in-house in our factory in Japan. It is because factories are like living organisms, continuously enhancing our skills through experience. Through countless trial and errors, we learn from our mistakes and improve our developmental skills. There are no short cuts to experience. We just need to keep at it and the accumulation of experience is the end result.

There are many ways to produce good things, but we specifically chose the method to accumulate experience. As a result, we can confidently say that our staff and factory are doing something better than yesterday and evolving on a daily basis.

It goes without saying that the evolution of the carbon (prepreg) material of the rods is a major factor. As rod manufacturers, it is important for us to introduce such materials and in order to bring forth the potential of these materials, our engineering and designing techniques in our factories play a vital role.

Rod building requires many craftsmen and the outcome of the rod is not simply determined with what type of material it is made of. Careful testing of the new material requires countless different combinations and patterns. Once the blank pattern is determined, then it is handed over to the craftsmen for assembly and production.

Our engineering and technical skills are the crown of our accumulated experience and this is what we need to continuously expand.

In 2023, we have expanded our manufacturing facility and moved most of our production line to the new factory. Our grass-routes date back to the old factory and this was where we challenged our limits and the trial and error we experienced in those days are the core of our current business.

In 2024, we will go back to our grass routes and start a new challenge. Based on Yamaga Blanks fundamental principles, we will continue to strive for excellence and create rods which give anglers more freedom.

BLUE SNIPER

Extreme Shore-Casting Strategy

Casting performance is proof of technical capabilities

103ML-M

100M-MH

96H

PL109MH

PL106H

We have honed the standard ability of the rod to capitalize on the limited chances presented to the anglers.

With the renewed “Blue Sniper” series to target blue-runners, we wish for anglers to IGNITE their inner fire.

We hope to create an attractive and capable rod which will IGNITE the inner fires of those anglers who have slowly faded away from the harsh environment and bring them back to the field. So, what do we need?

Our solution was to develop a flawless rod with the ability to easily cast and handle. The chances given to anglers are limited especially when targeting blue-runners off the rocks. Although we can narrow down when they may bite, we cannot deny the fact that the most assured way for catching a fish is to keep casting no matter what.

Furthermore, in the recent tough conditions in the environment, anglers not only require the casting distance to outcast everyone else in the field, but to also have the versatility to utilize various size lures to match the given sea conditions.

Anglers tend to seek pure power in rods designed to target blue-runners off the rocks, though it is our belief that casting ability is the most important factor when targeting these species. It goes without saying that our rods have power, but with the ability to cast stress free, it is a great advantage to the angler as s/he will be able to cast all day long without getting physically exhausted while having the ability to consistently cast long distances.

This is what we sought for, “castability” and “handling”.

It may sound stupid to think that such basic performance can be so important, but when you compare this with an Olympian sprinter, their leg strength can only be the result of daily training and practice. In order to create a blank with consistent casting distance with little effort from the angler, it is up to our engineering and experience to design such rods.

This simple and most basic performance of a rod is actually the most difficult aspect to design in rods. Yamaga Blanks has been pursuing this performance in rods for years and the results can be seen in our refined blank designs. We do not simply rely on the carbon material nor data driven numbers. We actually need to feel the difference first handedly to give the go ahead.

The new Blue Sniper models which have gone through the rigorous processes of development are one of the greatest achievements for the land-based casting models for Yamaga Blanks.

Cast further than ever before, be more flexible with your fight and bring forth the underlying power through the bending curve of the blank. This rod will allow anglers to continuously focus on what needs to be done to better prepare them for the unexpected attack of the fish.

The high level of basic performance is what will help anglers conquer the unforgiving blue-runner game.

We hope you will reignite your inner fire with these reborn Blue Sniper models by “continuously” cast throughout the day. This is what we wish for.

Type : AR (All Rounder) *All-rounder type: Highly versatile model that can be used with jigs and plugs.*

2024 NEW
BlueSniper
103
ML-M

This model is a highly versatile model able to cover various situations in your local waters with its finesse characteristics.

Anglers will be able to utilize light PE1.5~2 line to conquer the tough high-pressure fields or small bait fish patterns. The flexible ML class tip will enable anglers to easily cast out small 20~40g jigs and smaller seabass hard lures for a more finesse approach while the M class butt power can allow for a more speedy power game against your targets in crowded and rugged areas using PE3. The fusing of the contradicting characteristics of torque required to overcome the thrashing blue-runners and lightness for anglers to continuously maintain concentration throughout the day will assist you on your next adventure out to the rocks.

PRICE :
LURE : **Plug 20~50g / Jig Max 80g**
LINE : **Max PE 3**
DRAG : **Max 4.5kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Stainless frame K Guide + Ocaen guide (Fuji)
Reel seat : DPS18 (Fuji) -Up lock
● Suitable reel size : S-D: 4000~6000
● Recommended Target : Yellow tail ~10kg
Kingfish & Greater amberjack ~5kg
● Recommended Lure: Various top plug
Minnow · Metal jig

2024 NEW
BlueSniper
100
M-MH

This is a highly well-balanced model with castability, controllability and fighting performance all fused together.

MH class rods are the main strength rod used for those anglers targeting blue-runners off the rocks and the 10ft standard length set for the model will allow anglers to continuously cast throughout the day stress free while lightly cast and control the lure with ease. The wide release point when casting helps anglers consistently cast long distances and the soft tip yet powerful butt section will enable anglers to utilize various plugs and control the jigs. It is the most versatile model of the series and will not only be effective as your main rod in your local waters, but also great as a spare rod for your more exotic adventures for bigger and better fish.

PRICE :
LURE : **Plug 30~80g / Jig Max 120g**
LINE : **Max PE 4**
DRAG : **Max 6kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Stainless frame K Guide + Ocaen guide (Fuji)
Reel seat : DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 6000~8000
● Recommended Target : Yellow tail 10kg~
Kingfish & Greater amberjack ~8kg
● Recommended Lure: Various top plug
Minnow · Metal jig

Type : AR-EX (All Rounder Extreme) *All-rounder extreme type: Specialized for high general performance and high response*

2024 NEW
BlueSniper
96
H

The new high-power and highly responsive H class blank allows you to utilize a wide range of lures lightly and freely.

While possessing the power of an H class rod, the 9ft class blank has been engineered to be thin, light, and recovered speed and powerfully for anglers to be able to swing around with ease. Anglers will be pleasantly surprised with its ability to easily cast heavy weighing jigs and lightly maneuver these jigs with your rod action. It is not simply a stiff model. Whereas anglers will be able to manually control various types of hard lures responsively and the bending curve of the blank will help you efficiently lift the fish to the surface. It is the next generation of H class rods enabling anglers to create new styles of fishing.

PRICE :
LURE : **Jig Max 150g / Plug 60~120g**
LINE : **Max PE 6**
DRAG : **Max 8kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC Ocaen guide (Fuji)
Reel seat : DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 6000~14000
● Recommended Target : Yellow tail 10kg~
Kingfish & Greater amberjack ~12kg
● Recommended Lure: Metal jig
Large minnow · Diving pencil

Type : PL (Plug) *Plug Type: A model that emphasizes smooth, well-mixed action when using a diving pencil*

2024 NEW
BlueSniper
PL109
MH

This is a technical model specializing in plugging that combines the precision action of a diving pencil and the power with the long cast performance.

While the 11ft length has given the rod outstanding casting distance, the well-balanced rod will allow anglers lightly control their hard lures with ease. The tip is flexible for anglers to smoothly control the diving pencils while the powerful butt section will shut out the thrashing of the fish. These combined attributes will be of great advantage to anglers in sticky situations where the large target species are reluctant to bite and require continued concentration from the angler. It is an ideal model for the hardcore anglers who want to allure the fish with surface and sub-surface lures.

PRICE :

Kingfish & Greater amberjack ~8kg
● Recommended Lure: Diving pencil
Various top plug · Minnow · Metal jig

2024 NEW
BlueSniper
PL106
H

This is a high power plugging model that uses medium to large plugs to capture large blue runner. It does not give the initiative even in a power game.

We were after a high powered model especially designed for anglers to lightly and smoothly cast our large size hard bodied lures around 100g. The original design and material used for the blank will enable anglers to cast large lures all day long with ease and consistently cast long distances. The powerful and resilient blank will bend in and once loaded, it is designed to withstand the powerful thrashing of the enormous fish. It is an ideal rod for the harshest situations off the rocks, shallow areas and your exotic trips to remote islands to target the monstrous fish.

PRICE :
LURE : **Plug 50~120g / Jig Comfort ~100g**

Kingfish & Greater amberjack ~12kg
● Recommended Lure: Diving pencil
Various top plug · Minnow · Metal jig

BlueSniper Comparison of cast bending

● This is a cropped image of the impact moment when casting 5 Blue Sniper models with different lure weights. The cast exceeds the recommended lure specifications, but there is no problem with a few grams. There is a slight difference in the moment of bend, but you can check roughly what the bend curve looks like when you cast.

● Regarding the recommended lure specs for each rod, the jig is heavier for 3 models of all-rounder type, and the max weight of the plug is set to be light. This figure takes into account the plug with strong air resistance. As for the plug type, the jig is a comfort weight, and it is not a weight that can be cast, but a weight that makes it easy to act. The length from the tip to the lure when casting is all cast by taking the length to the front grip.

Strength determined by repulsion rather than hardness

What exactly has changed about the new BlueSniper, which has improved casting ease, and cast feel, and required long cast performance? - In a nutshell, the strength of the rod and the ease of casting are achieved not by the hardness of the blank but by the force of recovery. It is difficult to understand in the text, but for example, there is a point that all models can be used with light rather than power.

The most obvious model, 96H, is Jig Max 150g and Line Max PE6. However, using PE3~4 for 60g jig can be cast without any discomfort, and continuous jerk can be operated in the best sense with a good tempo. You will surely be surprised by the light operation that you cannot imagine using the short length H class model.

This is a feature created by the carbon material and blank design, which has a force of recovery against the load instantly, and also because it bends firmly even when using a light lure, and it can bounce off with a force of recovery.

If you take advantage of this performance and bring two units, one with the PE5~6 loaded around the reel 14000 and the other with the PE3~4 loaded around the reel 6000~8000 as a light setting, you can play two types of games with a single rod.

This is a characteristic that the previous BlueSniper did not have and one that the new series has. In addition, the lower and upper limits are indicated for all plugs used in the lure specification of the rod, but this is also the same for the lower limit when using the jig, and it is not a problem to make the line thinner according to the lure within the weight. (Of course, the drag setting should be properly adjusted to the line setting.)

In the image of the blank, the rods are assembled only by muscle force, and they have the power to be activated by bending in lightness. That is why they are synchronized with anglers, whether they are used for lights or powerful, and have the ability to respond to any situation. That is the most important characteristic of the new BlueSniper and the biggest change from the previous models.

BlueSniper RADAR CHART COMPARISON

- PENCIL** - Movability of diving pencils with emphasis on water
- JIG** - Easy to manipulate quick and continuous action of metal jig
- POPPER** - Ease of splashing and bubbling popper type lure
- STIFFNESS** - Tips that bends but is sharpness with high power of recovery
- LONG CAST** - All models have distance cast performance, but total distance cast performance including large plugs totally

These five items do not represent all of the rods. Depending on the length, etc., the feeling of the angler used will change. Please use this as a guide.

BlueSniper BENDING CURVES

BlueSniper Comparison of bends by load & models

YAMAGA BLANKS 88 CHAIN

Versatile Model / 1 Lineup

YAMAGA BLANKS CHAIN

YAMAGA BLANKS
88
CHAIN

This is the creation of a new style. Let's connect the various kind of fishing fields.

This special model was designed to enable anglers to utilize various lures up to 40g to target various species. Even with the light specifications, anglers will easily be able to go head to head with smaller Blue-runners around 3kg. In addition to its lightness, the exquisite 8.8ft length will bring about great advantage to the anglers to find new targets in your local waters. You can go after Blue-runners, snappers, rock-fish, squid, black-fin seabass from the rocks, migratory species, flat-fish and seabass from the surf and monstrous seabass in the river mouths. This one rod will enable you to go after many different species in your local waters.

PRICE :
LURE : 8~40g
LINE : PE 0.8~2

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Titanium frame K Guide+ SIC Titanium frame RV Guide (Fuji)
Reel seat : DPS17- BACK STOP Double-Lock Nut (Fuji) -Up lock
● Suitable reel size : D : LT3000S~LT5000C / S : C3000~C5000
● Recommended Target : Blue Runner (amberjack ~3kg / yellowtail ~5kg), Small sized migrant (bonito, Spanish mackerel, dolphinfish), Various rock fish (~2kg), Red sea bream, Large squid, Sea bass, Black fin seabass, Hairtail, Black sea bream
● Recommended Lure : Metal jig - Minnow - Top water plug - Jig head - "Wind" type Jig head
※ - Egi from #3.5 etc.

About YB88 CHAIN variable taper action

The YB88 CHAIN uses a wide range of lures and, of course, targets. To enjoy all of them without stress, the blank design has what can be described as a "variable taper action" in which the bend and power change gears depending on the load.

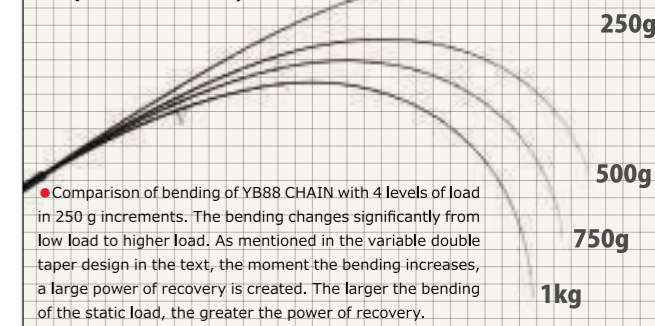

As a versatile model, the 2nd powered gear (the apex of the bend) plays an active role in handling various lure sizes and types. When casting a small lure or casting with a small form, it will enter the 1st powered gear and push the lure smoothly. Next, when casting a jig or plug such as heavyweight with a pendulum, bend from the second-stage powered gear and push out the lure with even stronger force. The same applies to fights. In the case of small targets such as black porgy, the 1st powered gear is effective, and the flexibility of blanks that bend smoothly enables you to set the hook in the target's mouth surely while reducing the risk of letting it off the hook.

Furthermore, in the case of a large target exceeding 3 kg, the 2nd powered gear on the butt section is activated. A huge power is activated from the butt section while bending smoothly, and it transforms into a rod that stands out for its excellent performance that allows you to control it as you wish without losing the initiative to the target.

This variable taper action is the main feature of the YB88 CHAIN, and it's what sets it apart from the usual versatile models.

YAMAGA BLANKS 88 CHAIN Comparison of bends by load

EARLY

ALL CASTING

EARLY ALL-CASTING series is sought after the most important aspect for the lure game, "cast farther" and "cast more accurately". Our lineup of rods are built with not only these vital values sought after in the shore casting game, but also controllability, highly responsive and powerful blank for anglers to pursue their methods and styles of fishing. In addition, the vast lineup of the EARLY series are divided into different genre depending on situations and will only have simple specifications written on the blank so we do not limit the anglers options and creativity. Feel free to choose the model that best suits your style and enjoy a one-of-a-kind fishing experience.

EARLY for Surf

Surf Casting Model / 5 Lineup

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

The EARLY for Surf are long distance casting models developed to meet the needs of surf casting. With the concept focusing on long distance casting, the light weight blank and light casting feel will allow anglers to maintain their concentration throughout the day. Although these are designed mainly for the surf game, its versatility will enable anglers to utilize these models for various games requiring long distance casting.

EARLY 99 ML for Surf

ML classes that expand the possibilities of surf games. This finesse model combines sensitive operation performance and long cast performance.

The blank is equipped with the castability rivaling a 10ft class rod and capable of transmitting vital information about the currents and bottom structures through the sensitive blank. In addition to the jig-head rigged up with soft plastics and small 9cm class minnows and sinking pencils, anglers will also be able to utilize a more finesse approach with light weigh (12g) vibrations for high pressure situations. You can cast long distances to search the vast surf or east with pinpoint accuracy to the breaks.

PRICE :
LURE : 7~35g
LINE : PE 0.8~1.5

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish · Seabass · Cherrysalmon · Small sized Blue-runner
● Lure: Plug · Jighead · Metal Jig

EARLY 103 M for Surf

A versatile long cast model that matches not only flatfish on surf but also sea bass in tidal flat and estuarine areas.

If you wish to cast and manipulate various kind of lures as such as minnow 9cm class, sinking pencil minnow 40g, jig minnow or jig head, this EARLY 103M is going to be enable you to fish comfortably thanks to that excellent casting feel. As long as you have loaded power on blanks even small amount, you can get enough distance without losing energy and concentrations. This 103M can be handled by any level and type of anglers for sure.

PRICE :
LURE : 8~42g
LINE : PE 0.8~1.5

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish · Small sized Blue-runner · Seabass · Cherrysalmon
● Lure: Plug · Jighead · Metal Jig

EARLY 109 MMH for Surf

It sharpens its performance as a long-length plugging model and conquers vast waters with ability of long casting.

109MMH have been loaded specialized ability to deliver plugs much farther than you can imagine even if its small or big plugs. Flexible and sensitive tip section will be enable you to not only cast light lure easily but also sense slightly changes of current or situations of bottom sea even in night time. You can handle plug around 45g without any stress as same as 105MH, so please take this 109MMH to aim seabass or black fin seabass from rocky or sandy beach.

PRICE :
LURE : 8~50g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish · Small sized Blue-runner · Seabass · Black-Fin Seabass · Cherrysalmon
● Lure: Plug · Jig minnow · Metal Jig

EARLY 105 MH for Surf

A long-range all-rounder with a wide range of lures and the power to keep any target under control.

This 105MH have most powerful blanks of 10ft series to deliver 50g of lure farther than ever you have reached. Especially the butt section of 105MH have been loaded huge power to launch heavy lure farther than your expectations and also to keep big target under control without losing initiative. High versatility employed to blanks for target as such as seabass, black fin seabass, or blue runner from rocky and sandy beach, rocks or piers.

PRICE :
LURE : 10~50g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish · Small sized Blue-runner · Seabass · Black-Fin Seabass · Cherrysalmon
● Lure: Plug · Jig minnow · Metal Jig · Jig head

EARLY 105 MMH/B for Surf

It lead you the new surf game with super long cast and high sensitivity that brings out the performance of overhead reel.

With long distance casting being absolute essential for the surf game, the 105MMH Overhead reel model was developed to shoot out lures in the vast surf without any stress and maximize the ability of the high performance bait casting reels out on the market today. You will be able to feel for the change in flow, current and underwater landscape through the "direct" sensitivity blank otherwise unable in spinning models.

PRICE :
LURE : 15~50g
LINE : PE 1.5~2.5

Overhead reel Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: ACS17 (Fuji) Down lock nut
● Suitable reel size: D: # 200
● Target: Flatfish · Small sized Blue-runner · Seabass · Black-Fin Seabass · Cherrysalmon
● Lure: Plug · Jig minnow · Metal Jig

EARLY for Rock

Rock Fish Model / 3 Lineup

In the pursuit to develop the Early for Rock, we asked ourselves "What is the rock-fish game?". The blanks not only have strength and lightness but also have a highly efficient ability to restore its original form. In other words, the bent blank will flex back to its straight form, peeling the fish off the bottom and other structures efficiently. The stiff yet sensitive tips are highly sensitive to any changes in sea conditions while being versatile, enabling anglers to utilize various types of rigs and styles of fishing.

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

EARLY 86 MH for Rock

High-response model for efficiently searching the Rocky area with a length focusing on handling.

The blank for this model is exceptionally well balanced for both casting and maneuvering while also possessing tremendous sensitivity. Anglers will not only be able to utilize swimming actions of jig-head rigs but also utilize Texas rigs and feel for bottom structures and material. The adequately stiff belly section will transmit your bite and rip the fish off the bottom and structures right away. This sharp blank is also suitable for use in the "wind game" targeting hair-tails and "jerking methods" productive for seabass.

PRICE :
LURE : 7~40g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT3000~4000C / S: C3000~4000
● Target: Rockfish · Seabass · Hair-tail
● Lure: Jighead · Texas rig · Minnow · Vibrations

EARLY 104 H for Rock

This is excellent in power, castability, and sensitivity. It is not only stiff but also has a flexibility and recovery force on blank.

This long length high powered model was designed for casting distance and sensitivity. The "soft" aspect of the blank can be attributed to the line settings (PE#1), while the "hard" can be felt in its ability to take the load of heavy weight rigs and max drag settings. Anglers will be able to reach those grounds where others have yet to reach. You will be able to utilize various rigs ranging from soft plastics, swim baits, metal jigs and even minnows above 14cm to go head to head with monstrous rock fish and other blue-runners that you may randomly encounter.

PRICE :
LURE : 15~60g
LINE : PE 1~3

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size
Up to PE2 D: LT4000C~6000 / S: 4000~C5000
PE3 D: 3500~4000 / S: SW4000~6000
● Target: Rockfish · BlueRunner · Black-Fin Seabass
● Lure: Jighead · Texas rig · Plugs · Metal Jig

EARLY 93 MH/B for Rock

This one focuses on the sensitivity of retrieving and torque, which are the advantages of the overhead reel, and excels at luring out delicately.

The 93MH/B has a sensitive yet flexible tip ~ belly section for anglers to hover or roll their Texas-rigs near the bottom or for a more pinpoint approach with the "bottom shaking" technique. It enables anglers for a more careful approach on the bottom to induce and capitalize on a bite from those inactive fish. Once hooked, the winding power of the overhead reel and the powerful butt section will assist you to lift the fish away from the structures.

PRICE :
LURE : 10~50g
LINE : PE 1.2~2.5 / FC 12~20lb

Overhead reel Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: ACS17 (Fuji) Down lock nut

EARLY for Seabass

Seabass Model / 2 Lineup

What we seek in a seabass rod at Yamaga Blanks is "standard characteristics" for anyone to easily use. Our designs focus on tolerant release point for everyone to be able to cast long distances with the least amount of effort while retaining the lightness for all day long casting and sensitivity to capitalize on the smallest bites. Once hooked, the blanks will bend in nicely to reduce any hook-offs generally caused by blanks that are too stiff. The EARLY for Seabass models are value for money considering the quality of the rods.

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

EARLY 93 M for Seabass

The versatile model with excellent ability to aim while searching a wide range of ports and embankments from river estuaries.

The all-rounder model is a valuable asset for situations which require you to cast long distances in rivers and piers. It is especially responsive to metal type vibration lures which have are highly resistant. The light feel when reeling in your lure will enable you to focus on your fishing while reducing the load on your wrist. Once the fish is hooked, the blank will bend in nicely and will allow you to handle and efficiently surface your catch.

EARLY for Mobile

Multi Piece Model / 3 Lineup

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

The EARLY for Mobile models are multi piece mobile pack rods which are able to separate into 3~4 pieces. These rods were developed to feel like a 2-piece rod as we refused to sacrifice the rod's performance in exchange for mobility. The rod's superior performances will not only assist the angler's fishing but the mobility has also added a new meaning to "versatility". When in your fishing grounds, we are limited in what we can use. The compact rod can easily be carried around stress free on bikes, bicycles and other public transports which you may use to access your fishing grounds in large cities.

EARLY

BlueCurrent

Rod series for multifaceted light games.

BlueCurrent TZ/NANO

Light Game Model / 8 Lineup

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

BlueCurrent TZ/NANO series are flag ship models which are filled with our knowledge and techniques of designing blanks of light game. Carbon prepreg which NANOALLOY® technology have been applied is chosen and TORZITE ring guides which are light and less friction are loaded. Once you fish with this series, you notice the lightness and sensitiveness, casting feel that you never get unwanted wobble and massive butt power hidden in butt section that will be increased when it is bent.

BlueCurrent 610 Plug Quickness TZ/NANO

This is a special plugging model with aggressiveness and sensitiveness that let you strike even a slight contact.

This plugging model was developed to enable anglers to sense the subtle changes in water pressure and currents with outstanding balance to breathe life into your lures through rod action. The tip section is designed to be stiff to give the lure variant action while the whole blank will bend in to reduce hook offs. When simply retrieving minnows and sinking pencils, the super sensitive tip section will immediately transmit the smallest of bites enabling anglers to swiftly hookup with the belly section of the blank.

BlueCurrent BENDING CURVES

BlueCurrent III

Light Game Model /13 Lineup

Anglers will be able to utilize light PE1.5~2 line to conquer the tough high-pressure fields or small bait fish patterns. The flexible ML class tip will enable anglers to easily cast out small 20~40g jigs and smaller seabass hard lures for a more finesse approach while the M class butt power can allow for a more speedy power game against your targets in crowded and rugged areas using PE3. The fusing of the contradicting characteristics of torque required to overcome the thrashing blue-runners and lightness for anglers to continuously maintain concentration throughout the day will assist you on your next adventure out to the rocks.

Series category page Details of each model are available from QR code on each model.
YAMAGA Blanks Official Web site

2024 NEW
BlueCurrent III

78

This is a special model that combines sensitiveness and sharpness for targets that require a variety of strategies.

Bream, seabass and rock-fish being its main target species, the flexible tip and resilient blank is best suited for hard lure games. Although you can use free rigs, jig-heads and soft plastic lures, it is ideal for anglers to utilize hard bodied lures for your top-water popping games targeting bream and seabass feeding on micro-baits. The flexible tip, resilient belly and powerful butt section will support anglers until the very end of the fight.

YAMAGA Blanks Official Web site

In the current subdivided squid fishing scene, there are various techniques and the skill of individual anglers have drastically improved. There is one simple reason why we have embarked on the renewal of the series. It is none other than the fact that we want anglers to have the lightest, most responsive and absolute castability of what we have to offer with the current given technology. The new Calista series have been rebuilt from the start and it is the crown of our manufacturing techniques and efforts. Its more than a "renewal" or a "new model", it's the "Origin of Calista".
As a blank manufacturer, there is no better challenge than creating this totally new Calista series for the squid fishing scene.

Calista 90 LML/S Stream

Long length model that can perform sensitive actions without losing high sensitivity performance even in the current

This is a highly sensitive and flexible long length model able to feel for the squid jig in the current. We have fused together the light tip section to a medium class strength butt section to realize its outstanding casting ability. Although the rod is a long length model, the exceptional balance will allow anglers to easily and lightly control the rod to induce the bite of the squid while the highly sensitive blank will transmit the slightest touch from the squid and feel for the current during the curve fall of the squid jig.

Calista 76 ML/TJ Technical Jerk

This is a technical model that utilized a short length of light handling and plenty of variations of jerking to lure squid.

The technical short length model was designed to enable anglers to utilize their various jerking techniques. The flexible yet short length blank will be a tactical weapon for anglers to precisely maneuver the squid jig for the final leg of the pursuit of the squid. It will be most suited for fishing around structures and drop-offs or technically controlling the lure when sight fishing. Furthermore, the responsiveness of the short length blank will also assist anglers to speedily search a vast area. This short length versatile blank will also be great for off-shore boat squid fishing.

Calista 82 ML/AR All Rounder

This all-around model expands the possibility of techniques. This is the one that reflect the new technology of new Calista.

This is the new all-rounder model of the renewed Calista series where anglers will be able to first handly experience our developmental concept. The blank is fused together with castability, controllability, sensitivity and power for anglers to bring out its true colors all year round at any given situation. The sharpness hidden beneath the user-friendly characteristics will breathe life into the squid jig controlled by the angler through long distance casting, jerking and line-control.

Calista 86 M/PF Power & Finesse

This item achieves sensitive operability that overturns common sense for power models.

Like the 82ML/AR, it is an all-rounder model suitable for year round fishing with lightness and responsiveness as its distinct qualities. The blank was back to the drawing board and rebuilt from the ground up to break all stereotypes of the standard 86M specifications for squid fishing. Even if you own a rod with similar specs to 86M, we would like you to take hold of this rod to first handly experience the highly responsive controllability of the squid jig and outstanding casting distance the blank produces.

Calista 79 MMH/AG Aggressive

A special concept model dedicated to more aggressive game both from shore and boat.

There are no specific rule books for squid fishing, and there are as many styles and game plans as there are anglers. The 79MMH/AG is a super highly responsive model for those anglers who aggressively allure the squid by technical approaches. It is designed with a medium class tip section and a medium heavy class butt section to easily and sharply maneuver the # 3.5 squid jigs. We have also reduced the stress on the anglers side by giving the rod contradicting characteristics of flexibility and power.

Calista RADAR CHART COMPARISON

Description of chart items

Long Cast Performance - Evaluation of casting ease and power within the blank.

Finesse Action - Evaluation of Slack Jerks and twitching actions that are important with sight fishing.

Aggressive Action - Evaluation of Aggressive Jerks which include general jerks, winding jerks, and combination jerks.

Stiffness of tip - Advantages of a stiffer tip include easier operation in deeper waters, waters with strong currents, and larger resistance Egi. The advantages of a softer tip include an increase in sensitivity to feel changes in the water and is less physically demanding.

Comfortability - A model with stiffness may increase the physical burden, so please refer to this item and choose it if you tend to hurt your wrist.

Calista BENDING CURVES

● Here are pictures representing the bending curve of the new Calista series with a static load of 500g. We have especially focused on the length and blank individuality of each model for the lineup of the new Calista series.
● Anglers will be able to experience the lightness of the next generation blanks in 3 different lengths (short, medium and long lengths) of the main ML class rods.

● This is a comparison of bending with a loading 100g statically, which is lighter than the 250g on the left. The 90LML/S has the most flexible tip, but in order to eliminate the unwanted wobbles on tip section which comes from its lengths, it has a blank design with high recovery force, and it will bend like this under light wight of loads. In addition, the 79MMH/AG, which has the strongest butt section, has a flexible tip so that it does not become too stiff, so even if it is a stiffest and shortest of Calista series, it will bend smoothly and be easy to handle.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

Mebius
79
M

A short length power model that improves the operating response of the Egi. Also ideal for boat eging.

Blanks of 79M have been brushed up to be taking advantage of length. You will feel the high response speed of blanks and high usability as characteristics of short length models while pursuing long casting performance. Yet it has enough power to cast and manipulate even size 4 Egi (about 25g). It has been loaded with moderate power of recovery, flexibility, and lightness on blanks. If you are required to lure a speedy or take time to lure a spooky one out, 79M will be your huge advantage for sure.

Mebius

Eging Model / 6 Lineup

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

We hope that fishing rod from YAMAGA Blanks is going to be used by much more number of anglers. That is ambition what we put into Mebius series. It is quite difficult to keep low budget while pursuing performances and quality. But we have succeeded to achieve those elements as making extensive use of our techniques of design and quality of factory. That is how we build fishing rods and once you fish with Mebius series you will definitely know as much about our policy and performance of blanks. We offer you 6 different type of character for Mebius series as such as short length, light weight model or medium heavy class to cover various situation that you are going to face. Of course you can take one as main rod, you can also take one as a substitution for specific circumstances.

Mebius
710
L

This lures the target out that can be realized only because it is light and short in length, and it captures various situations.

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. When squid is less activity than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

PRICE :
LURE : **Egi #1.8~3.5** (~21g)
LINE : **PE 0.3~0.6**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S stainless frame K guide (Fuji)
Reel seat : VSS16 (Fuji) Down lock nut
● Suitable reel size : D: LT2500 / S: 2500~C3000
● Target : Squid

Mebius
88
L

A light class that makes use of its flexibility for easy and quick action.

This is the light class model which is good for short pitch jerk and jerk making use of line slack. You can cast even light weight of Egi with a comfortable feeling thanks to the flexibility and moderate power of recovery. So this is good to be used on sight fishing technically. Yet it has enough power to keep huge squid under control, you can manipulate Egi with less power than others. Once you fish with it you will recognize that it has gotten high potential to be used in all seasons.

PRICE :
LURE : **Egi #2.5~3.5** (~21g)
LINE : **PE 0.4~0.8**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S stainless frame K guide (Fuji)
Reel seat : VSS16 (Fuji) Down lock nut
● Suitable reel size : D: LT2500~3000C / S: C3000

Mebius BENDING CURVES

●These are comparison images of Mebius series which are loaded 500g weight on tip. Mebius series have been loaded more flexibility than calista series to get more versatility and usability. We have focused on cast feeling of Mebius series. Wide range of release point and power of recovery will provide you excellent feeling and distance of cast. Comfortability of casting and toughness as eging rod are directly linked to versatility for aiming at various target. Enough versatility that to be used for horse mackerel, rockfish, black sea bream, seabass or light jigging game is hidden in those blanks.

BattleWhip TR / IM / OR

Tip Run Ika Metal OMO Rig

BattleWhip / Boat Eging
(TIP RUN · IKA METAL · OMO RIG) / 6 Lineup

"BattleWhip" series to be adjusted boat eging scene which being developed day by day. We take advantage of skill, knowledges and experiences of designing fishing rod to shape the lineup of TipRun series, IkaMetal series and also Omorig, which are adjusted to segmentalized game. All of these models have given own specialized character one by one to make angler sense slightly changes which is transmitted through blanks.

TR TIP RUN Model

3 types of BattleWhip TR series which have been given original character is lined up to cover various situations of TipRun eging scene. Anglers will enjoy to feel differences of sensitivity and speed of settle of tip section without unwanted wobble.

BattleWhip TR The high sensitivity for hooking is thoroughly pursued, and the signal is transmitted not only visually but also sensually through the hand.

Making use of advantage of high sensitivity accumulated from light game scene, blanks transmit slightly touch of squid. This characteristic of TR63 makes you to distinguish activity of squid and to stay focused even you faced touch condition. This is for the angler who does not want to lose opportunity of catching squid. You do not have to look at tip to get indication of vital information. Blanks definitely transmits signal to your hand. All you have to do is just feel it! This 63/N will make differences for sure. (Carbon Solid Tip model)

BattleWhip TR BENDING CURVES

● These are comparison image of BattleWhip TR series. The image below is comparison of 3 models and the others are comparison which are loaded 50g/100g/200g on tip section of each models.
● TR63/N have high sensitivity and ability of manipulation. You will feel moderate stiffness on blanks. Even you are fishing on tough situations, it will tell you vital information visually and transmit you slightly touch of squid sensuously.
● The longest carbon solid section is loaded and it will tell you vital information even you are fishing on wavy condition. And also, mildest model in this series.
● Although TR69/D is for deep area and rapid current, you can handle it comfortably. Of course, you can use it with heavy weight of egi to get faster speed of fall as you have imagined.

IM IKA METAL Model

Ika Metal series have been well balanced to achieve comfortable manipulate feeling and versatility that is enable you to jerking, shaking, posing, slow lifting and slow falling at your will.

BattleWhip IM It has a lightness, sensitiveness, and broad action performance and strong butt power in thin blanks.

Thanks to sensitivity and visibility of blanks are increased for achieving the excellent results. The lightness of it let you handle this stick as your extended arm, flexibility and power of recovery provide you comfortability and toughness of butt section enable you to lift unexpected monster up to surface without anxious and burden of physical. This IM69/S will cover various situation, method and size of target with fun for sure. (Carbon Solid Tip model)

PRICE :

Spinning Model / 2pcs (Put over Ferrule)
Guide : SIC-S stainless frame K guide (Fuji)
Reel seat : V5S16 (Fuji) / Down lock
● Suitable reel size : D: LT2500~5000C / S: 3000~C5000
※ Under hand cast only
● Target : Squid
● Lure : Omorig

BattleWhip IKA METAL BENDING CURVES

● This is a comparison of bending when load 130g of weight statically is applied to Battle Whip IM for Ika metal games and Battle Whip OR for Omorig. The Battle Whip IM is designed to attract squid under the boat using things such as Sutte and Obama rigs, and the solid tip also brings a great advantage as indicator. Although it bends overall, the butt remains firmly, so it is possible to make large squid float or even a hook up double with high power of recovery. Spinning model from IM series and overhead model are configured with the same blank, but the overhead model is a slightly stiffer due to different parts specifications.
● OR is a type of rod that uses a sinker to cast a rig and lure target out by pulling horizontally, so the highly force of recovery of the entire rod allows you to hook them up. In addition, OR is a model with a tubular tip that has moderate stiffness throughout the rod to make it easier to cast with under hand.

※ These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation, it was loaded with weight on rods gently.

Precaution for carbon solid tip model
As we have mentioned, TR&IM series have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

2024 NEW SERIES

Lupus

for Area Trout
(Fishing ponds)

In 2024, Yamaga Blanks release its first trout rod series for fishing ponds, "Lupus Area Trout"

Among the freshwater games, fishing ponds trout has its own world. Although the game requires more gameplay, it often fails to catch fish as expected because it only targets fish in a limited range, and high actual fishing performance is required for tackling. Especially, the size of the lure and the variation of the aiming method are diversified like no other, and one of the major techniques is how to adjust to the situation at hand.

"Lupus Area Trout" is a new rod series, Yamaga Blanks is devoting all the know-how of the salt light game rod that it has accumulated. While inheriting the brand concept of "light," "cast well," and "strong" of Yamaga Blanks, it has five models specializing in luring the target out. Feel the potential of the blank of Yamaga Blanks with the "Lupus Area Trout," in which you can fully enjoy a game of fishing ponds using different lures to conquer various situations.

Lupus for Area Trout Game

Lupus / for fishing ponds / 5 Lineup

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

The Lupus Area Trout series are designed for fishing ponds. Anglers will face various situations and conditions when fishing in these trout ponds and we have expanded our line up to 3 models specially designed for retrieval and 2 models for more active action of the rod. We have created trout fishing rods that will be able to cover various situations in various areas around the world.

<Compared to the light game fishing Blue Current series, the overall power is lower and it will bend in nicely from the tip to the belly. On the other hand, the butt section has enough power to be able to deal with larger species. Furthermore, we have increased the size of the guides to improve line emission during the seasons when the guides freeze up.>

Lupus for AREA / type : RETRIEVE Spoon and Crank

2024 NEW
Lupus for Area
61RM
TYPE
RETRIEVE / MULTIPURPOSE

Ideal for all types of retrieval with shallow running minnows and regular "stop and go" with bottom type cranking baits.

It is the most versatile model of the series, able to cast various types and weight of lures with a regular taper blank. The sensitive tip section will capture the subtle bite of the fish and moderately stiff belly section will not only help a swift hookup but also reduce miss bites. We can confidently recommend this rod for those anglers who want to use 1 rod for all types of approaches and different trout ponds as well as beginner trout fishermen.

PRICE :
LURE : **0.6~6g**
LINE : **1.5~4lb / PE 0.15~0.5**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S Stainless frame K Guide (Fuji)
Reel seat : DPS16 (Fuji) -Up lock

● Suitable reel size : D:LT1000~2000 / S:1000~C2000
● Recommended Lure : Spoon · Crank-baits

2024 NEW
Lupus for Area
511RF
TYPE
RETRIEVE / FINESSE

This is the finesse model for use with ultra thin line and super light lures (micro spoons and small crank-baits).

This is the finesse model of the 61RM for down-sizing your main lures. The rod possess a sensitive and flexible tip to belly section, capable of hooking up the subtlest bites of ultra light lures with a slow retrieval. The flexible blank will absorb the load and prevent the ultra thin line from bust offs and stretching of the super fine hooks. Although it is a finesse model, the butt section has ample power for the unexpected big trout. It is most ideal for small~middle size ponds for close range fishing for numbers and those anglers who prefer a softer rod as their main rod.

PRICE :
LURE : **~4g**
LINE : **~3lb / PE ~0.4**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S Stainless frame K Guide (Fuji)
Reel seat : DPS16 (Fuji) -Up lock

● Suitable reel size : D:LT1000~2000 / S:1000~C2000
● Recommended Lure : Micro spoon · Micro crank-baits

2024 NEW
Lupus for Area
66RS
TYPE
RETRIEVE / SHARPNESS

This is the sharpest model to swiftly hook up high drag lures like crank-baits and spoons that have been cast out long distances.

The tip section has been designed with plenty of flexibility for a more loose action of the lure during retrieval and will allow anglers to successfully hook up the slightest of bites. In contrast, the belly section is stiffer to effectively hookup those cranking baits that tend to have more drag and are more difficult to transmit the hooking towards the fish. The 6.6ft length will also allow anglers easier line mending if required and possesses the most powerful butt section in the retrieval type rods.

PRICE :
LURE : **0.8~6g**
LINE : **1.5~5lb / PE 0.15~0.5**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S Stainless frame K Guide (Fuji)
Reel seat : DPS16 (Fuji) -Up lock

● Suitable reel size : D:LT1000~2500C / S:1000~C2500
● Recommended Lure : Crank-baits
Spoon (Large size available)

Lupus for AREA / type : MOTION Vibration and Minnow

2024 NEW
Lupus for Area
62MB
TYPE
MOTION / BOTTOM BOUNCING

This is a highly responsive model ideal to maneuver your bottom type lures and metal vibrations type lures with the bottom bouncing technique.

Since the blank has been engineered to be stiffer with a bouncy tip section, anglers will be able to rhythmically utilize the "lift and fall" technique with metal vibrations. This stiffness will also allow for a swift hookup while the angler is maneuvering the lure. Furthermore, this will also help the initial action of the lure when utilizing the "stop and go" method. This model is not only great for deeper ranges, but also ideal for maneuvering top water lures.

PRICE :
LURE : **1~6g**
LINE : **2~6lb / PE 0.15~0.6**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S Stainless frame K Guide (Fuji)
Reel seat : DPS16 (Fuji) -Up lock

● Suitable reel size : D:LT1000~2500C / S:1000~C2500
● Recommended Lure : Vibration · Lures for bottom

2024 NEW
Lupus for Area
60MTR
TYPE
MOTION / TWITCH & RETRIEVE

This is a model to actively hookup through twitching and simple retrieval. A model for those anglers chasing large mountain and brown trout.

This model has been designed with stiffness required to actively twitch the rod to animate the lure in the water. Anglers can continuously twitch the rod to dramatically bring life into the lure. The sensitivity and stiffness of the blank will also help anglers successfully set hook in the hard mouth of the various species of trout. Furthermore, the "stop and go" technique with buoyant minnows will allow for a vertical approach which is highly productive for rainbow trout.

PRICE :
LURE : **1~10g**
LINE : **2.5~8lb / PE 0.2~0.6**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SiC-S Stainless frame K Guide (Fuji)
Reel seat : DPS16 (Fuji) -Up lock

● Suitable reel size : D:LT1000~2500C / S:1000~C2500
● Recommended Lure : Minnows

Lupus
for Area Trout

Recommended Lures
by 5models

Lupus 61RM

TYPE: RETRIEVE
MULTIPURPOSE

This multi purpose rod is capable of handling various types of lures with this single rod. It is most ideal for simple retrieval of 1~4g spoons and crank baits, but also able to handle micro-spoons and crank-baits with fairly strong drag. This is the most standard Area fishing model produced by Yamaga Blanks and will also allow for vertical appeal of the minnows by jerking the rod or the "stop and go" method for your bottom type lures.

Lupus 511RF

TYPE: RETRIEVE
FINESSE

This model is especially designed for use with ultra light micro spoons and micro crank-baits. With the use of ultra fine line and lures under 1g, anglers can induce a bite with a super slow retrieval. Although it is a super light sensitive rod, the underlying butt power will allow anglers to efficiently land large numbers of trout with larger 3g class spoons when the fish are on the bite. Once you take hold of this rod, we are confident that you will be able to feel the Yamaga Blanks spirit within.

Lupus 66RS

TYPE: RETRIEVE
SHARPNESS

It is also capable of handling heavier spoons (above 3g) and crank-baits lures which have more drag compared to other lures. The flexible tip section will give freedom to the variant crank-baits and will maximize the potential of their action. The sharp belly section will help reduce the heavy drag even with bigger lipped deep cranking baits. With its great castability, this model will be of great advantage in large areas which require long distance casting.

Lupus 62MB

TYPE: MOTION
BOTTOM BOUNCING

This model is ideal for bottom type lures like metal vibrations. Anglers can swiftly hookup fish while utilizing the lift and fall technique. The stiff and sensitive rod tip will allow anglers to easily control the "bottom bump" with spoons and "bottom knock" with deep cranking lures. It is also ideal for use with top water lures.

Lupus 60MTR

TYPE: MOTION
TWITCH & RETRIEVE

The rod is designed for anglers to actively twitch the rod to animate the minnows. The stiffer action of the rod is ideal for using minnows that do long side to side darting action or highly buoyant minnows which naturally rise after animating the lure by twitching. Anglers will be able to successfully transmit the action they wish through the responsive blank whether it be short shaking or large maneuvering twitching of the lures.

Monster Cherry
Main Stream

This model combines power for targeting large cherry trout, light operation performance and casting performance.

86 Monster Cherry will suit to the monster hunter who is aiming at trophy fish over 70cm. Compared to other 3 models, this 86 Monster Cherry have been loaded huge power on it. It have gotten more than enough butt power to fight against monster fish without losing sharpness to cast rhythmically, sensitivity to manipulate lure gently. We can proudly say that this would be flagship model of Lupus series. We have built this up with the knowledge and experiences that have been cultivated from fishing for big one in saltwater so that this is more than enough to be called Monster Cherry for sure.

SeaWalk Tairubber

SeaWalk Tairubber / Tairubber Model / 4 Lineup

SeaWalk Tairubber series, we have differentiated the categories for the 4 rods depending on style and conditions rather than rod power to set them apart from one another. Equipped with not only the lightness of a light game rod, but also the sensitivity and strength, these blanks will be the extension to your arm enabling anglers to go head to head with monstrous snapper exceeding 80cm in length. We hope you can experience our exquisite blanks that will shine a new light into your snapper game.

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

SeaWalk
Tairubber
70AT
TYPE: AUTOMATIC

An all-rounder Tairubber model that sharpens the blanks that you bring to the hook up smoothly.

This is a specialized model to automatically hook up snapper by simply continuing to reeling in your rig following the small nibbles which frequently occur prior to the main bite. The automatic yet smooth hooking of the fish is brought on by the flexible yet powerful blank. This model is the backbone for the series and can be recommended for use in various field conditions.

PRICE :
LURE : **60~150g** (Tai rubber)
LINE : **PE 0.6~1**

Over head Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide / Spiral guide (Fuji)
Reel Seat: PULS17 (Fuji) Down lock nut
● Suitable reel size: D:100~200 / S:100~300
● Target: Red Sea Bream
● Lure: Tairubber

SeaWalk
Tairubber
611D
TYPE: DEEP

A special model that condenses the ability to capture the deep-area game of Tairubber in a light and responsive.

Anglers will have to utilize heavy weight Tairubber jigs when fishing in 100m of water. This model is specifically designed to enable anglers to easily handle these heavy rigs. The blank was shaped to reduce the heavy load on the angler during the reeling of the heavy rig from the deep waters in intricate current conditions. We were able to create this rod with attention to the smallest detail in components for anglers to enjoy the Tairubber game in the deep waters.

PRICE :
LURE : **100~250g** (Tai rubber)
LINE : **PE 0.8~1.2**

Overhead reel Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide / Spiral guide (Fuji)
Reel Seat: PULS17 (Fuji) Down lock nut
● Suitable reel size: D:200~300 Electric reel:200 S:200~300 Electric reel:600
● Target: Red Sea Bream
● Lure: Tairubber

SeaWalk
Tairubber
72S
TYPE: SENSITIVE

Supersensitive model that focuses on sensitivity and lightness and can hook up even the smallest bite.

This is the sensitive Tairubber model packed with our expertise and knowledge from producing light game rods. It has the most flexible tip section of the series and its outstanding sensitivity will allow anglers to successfully hook up the slightest of bites. The sensitive tip will transmit the vital information of the current and the slightest nibbles from the fish through the sensitive blank and successfully lead to a hookup. This model will become your biggest asset in situations where the fish are reluctant to take a proper bite and the flow of the current is super weak.

PRICE :
LURE : **30~100g** (Tai rubber)
LINE : **PE 0.4~0.8**

Overhead reel Model / 2pcs (Center cut-Put over Ferrule)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: PMTS17 (Fuji) Down lock nut
● Suitable reel size: D:100~200 / S:100~200
● Target: Red Sea Bream
● Lure: Tairubber

SeaWalk
Tairubber
60F
TYPE: FAST

High response tai rubber model realizing aggressive game development with high power of recovery in blanks.

More specifically, the rod is built up of a carbon solid tip to feel for the minute changes in currents and bites and the highly responsive belly section allows anglers to swiftly and aggressively hookup the fish. Although it is short in length with a stiffer blank, the smooth blank taper will reduce the instability when reeling in your rig, enabling anglers to maintain their concentration. We highly recommend this model for those anglers who like to use both Tairubber rigs and snapper jigs depending on the fishing conditions.

PRICE :
LURE : **60~120g** (Tai rubber)
/ **~100g** (Jig)
LINE : **PE 0.6~1**

Overhead reel Model / 2pcs (Center cut-Put over Ferrule)

● Target: Red Sea Bream
● Lure: Tairubber - Metal jig

SeaWalk Cast Jigging

SeaWalk Cast Jigging
Cast Jigging Model / 2 Lineup

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

A new series "Seawalk Cast Jigging "Swim & Skip" is the one of the light jigging series "Seawalk" for inshore boat games. It is a series that pursues performance to efficiently explore a wide range by casting metal jigs, plugs, jig heads, etc., and two models which is different power classes, 71ML and 73M are lined up. It is a series aiming at multiple targets by capturing a wide range and all layers of waters by letting lure "swim" (just winding) and the letting lure "skip" (lift and fall, wind, etc.) on the bottom of the sea. The main concept is to enjoy a fishing from the boat simply and easily.

NEW
SeaWalk
Cast Jigging
SWIM & SKIP
71ML

This model is the core of cast jigging with its sensitive tip and belly for long-cast performance and stable winding.

With its flexible tip and belly section, it is a model that has improved the basic performance of cast jigging that suppresses blurring and flapping of jig even during high-speed reeling, realizing stable reeling comfort and smooth hooking. It is easy to cast over and under hand, and even though it is ML power class, the butt section keeps unexpectedly big fish under control. From shallow area to depths around 20m, while capturing multiple fish species with blade jigs, metal vibrations, and Inchiku, in sandy areas, 71ML work effectively to aim Flounder or Flathead with jig heads + worms by taking advantage of the high sensitivity.

PRICE :
CAST WEIGHT : **Max 40g**
/ **Under hand Cast Max 60g**
LINE : **Max PE 1.5**

Spinning Model / 2pcs (Center cut/Put over ferrule)
Guide: SiC-S Stainless frame K guide (Fuji)
Reel Seat: DPS17- BACK STOP Double Nut (Fuji) / Up lock nut
● Target: Small sized Blue-runner (bonito, Spanish mackerel, dolphinfish), various rock fish, Red sea bream, Flatfish, Seabass
● Lure: Jig - Blade Jig - Vibration plug - Jighead+Soft plastic

● Suitable reel size D: 4000~6000 (SW4000~SW6000) / S: 4000~C5000 (SW4000~SW6000)
※Precautions when using SW6000 class:When performing high-speed winding in blade jigging, increasing the reel size will reduce fatigue, so we recommend up to the SW6000 class.

NEW
SeaWalk
Cast Jigging
SWIM & SKIP
73M

This is the one that masters various kind of lures with high response operability to capture the wide range and deep waters.

73M has more moderate stiffness than 71ML, and this is a model that is to capture the wide range and deep area while using metal jigs up to 80g. It is easy to cast a heavy weight lure farther than you expected with light force even under hand, and it is good at lure with emphasis on action using not only metal jigs but also heavy weight minnows, sinking pencils and jerk baits. It is also recommended for aiming migratory fish when its feeding on the surface, rockfish aiming by wind method with heavy weight jig head + worm or lift and fall method in rocky reefs. This is the almighty model that covers a variety of styles with just 73M itself.

PRICE :
CAST WEIGHT : **Max 60g**
/ **Under hand Cast Max 80g**
LINE : **Max PE 2**

Spinning Model / 2pcs (Center cut/Put over ferrule)
Guide: SiC-S Stainless frame K guide (Fuji)

● Lure: Jig - Blade Jig - Vibration plug - Jighead+Soft plastic

● Suitable reel size D: 4000~6000 (SW4000~SW6000) / S: 4000~C5000 (SW4000~SW6000)
※Precautions when using SW6000 class:When performing high-speed winding in blade jigging, increasing the reel size will reduce fatigue, so we recommend up to the SW6000 class.

SeaWalk Light Jigging

SeaWalk Light Jigging
Light Jigging Model / 6 Lineup

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

You can aim Grunt, Horse mackerel, Blue runner, Rockfish, Sea bream or Hairtail systematically with these line up of SeaWalk series. Blanks of light Jigging series have been employed flexibility on tip, high operational performance on belly section and huge power on butt section to keep large fish under control especially when you use Tungsten-Jig. As we have explained already, you do not have to worry if bigger fish than you have expected is on. All models of light jigging series have been loaded enough power to keep huge fish under control.

SeaWalk Light Jigging 67UL

This model has the sensitivity and power to aim horse mackerel, large red sea bream and blue fish while enjoying the best of SLJ.

This is the ultra-light class of light-jigging series to aim Grunt, Horse mackerel or else on shallow water with light weight jigs (around 20g). Combination of super fine PE line and Tungsten-jig make super light jigging possible to aim school of Grunt with falling action or Horse mackerel on the very bottom of the sea. And you will be able to cast jigs up to 25g or let jig up to 40g swim naturally in the 40m depth of water without any stress so you can aim variety of target depend on depth of water systematically.

PRICE :
LURE : **Jig 15~40g / Cast Max 25g**
LINE : **PE 0.4~0.8**

Spinning Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT2000~2500 / S: 2000~C3000
● Target: Blue runner · Rockfish · Grunt · Horse mackerel
● Lure: Metal jig (Up to 80g is available if you just reeling)

SeaWalk Light Jigging 64L

A basic model that can handle a variety of methods such as SLJ to Tai-rubber and cover waters from shallow to deep.

This is the standard model for light-jigging with Tungsten-jig on inshore. If you wish to cast jig up to 35g compactly or if you wish to cast Tungsten jig or Tai rubber jig to search target widely around 30-60m depth of the sea, belly and butt section which have been loaded moderate stiffness and strength make it possible. Thanks to performance of well-balanced tip and belly section, you can manipulate jig up to 80g on 80m depth of the water and you can keep jig swimming naturally without too much kickback.

PRICE :
LURE : **Jig 30~80g / Cast Max 35g**
LINE : **PE 0.6~1**

Spinning Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT2500~4000C / S: C3000~4000
● Target: Blue runner · Rockfish · Grunt · Horse mackerel
● Lure: Metal jig (Up to 120g is available if you just reeling)

SeaWalk Light Jigging 64ML

Captured deep area and strong currents with this one. it can handle everything from swimming method to high pitch action.

This is heaviest model of spinning model in this series. It will suit to deep area such as 50m-100m depth or field that current running rapidly. You can cast jig up to 50g. At the situation of vertical and horizontal fishing, you can handle jig up to 120g without any stress. You will notice that strength of butt section of 64ML once bigger fish than you expected is on. Taking advantage of cast ability and falling speed as spinning model, this 64ML will be the huge advantage if you fish on the sea very deep or current running rapidly.

PRICE :
LURE : **Jig 60~120g / Cast Max 50g**
LINE : **PE 0.6~1.2**

Spinning Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT2500~4000C / S: C3000~4000
● Target: Blue runner · Rockfish · Hairtail · Bream
● Lure: Metal jig (High pitch jerking is available)

SeaWalk Light Jigging B66L

This is a the high versatility overhead reel model that can play not only SLJ but also Tai-rubber game and Hairtail jigging.

This 66L have employed high versatility to fish with Tungsten-Jig on 20m-50m depth of the sea. It will good to be used for Tairubber game thanks to its flexible tip section and belly section which have moderate stiffness with high sensitivity to let you notice vital information or slightly changes of current. If you wish to aim Hair tail or Sea bass on bay area and try not to let jig move too much, this 66L will make it easier than other models for sure.

PRICE :
LURE : **Jig 40~80g**
LINE : **PE 0.6~1**

Overhead reel Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: PULS17 (Fuji) Down lock nut
● Suitable reel size: D: 100~200 / S: 100~300
● Target: Blue runner · Rockfish · Hairtail · Bream · Seabass
● Lure: Metal jig · Tairubber

SeaWalk Light Jigging B66ML

High-response blanks with sensitiveness and toughness make this model suitable for various situations.

66ML have characteristic to cover wide range of depth of the sea (30m-80m) thanks to its well-balanced sensitiveness and powerfulness. Even you fish with Tungsten-jig, you will never lose response speed of jerk taking advantage of high sensitivity and manipulate ability thanks to characteristics of overhead model. It is also good to be used for Tairubber game in deep area(80m-100m) or current running rapidly.

PRICE :
LURE : **Jig 40~120g**
LINE : **PE 0.8~1.2**

Overhead reel Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel Seat: PULS17 (Fuji) Down lock nut
● Suitable reel size: D: 100~200 / S: 100~300
● Target: Blue runner · Rockfish · Hairtail · Bream · Seabass
● Lure: Metal jig · Tairubber

SeaWalk Light Jigging B65M

This is the one that can be used in waters where many chances to get contact from bluerunners, and is also ideal for deep waters.

This 65M is the most powerful model of light-jigging series which is good to be fished in high population of blue runner. Compared to other models of light-jigging series, it have been loaded a little stiffer blank than other and you can enjoy manipulating jig manually with this 65M at your will. You can handle 80g-150g of Tungsten-jig comfortably with it. If you are going to fish in 100m depth of water or rapid area with fine line, we recommend you to take this 65M.

PRICE :
LURE : **Jig 60~150g**
LINE : **PE 0.8~1.5**

Overhead reel Model / 2pcs (Grip Joint)
Guide: SiC-S Stainless frame K Guide (Fuji)

Galahad 電

Electric Reel Jigging Model / 3 Lineup

The Galahad "電" are series especially designed for jigging with electric reels. These electric reels create a unique jig action which is difficult to replicate with ordinary reels that sometimes create unnecessary pauses. The heavy load placed on the blank by the mechanical winding of the reel is absorbed by the tip and the highly resilient belly section will allow anglers to rhythmically maneuver the jig through their rod-work. All 3 models are highly resilient and will assist the anglers to maintain a dominant position when fighting unexpected large species that may bite.

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

Galahad 電 633B for Electric reel

This is the lightest model of this series which have enough power to keep blue runner around 10 kg under control.

If you are going to aim at small sized Blue Runner with PE 3, this 633 would be a perfect choice. Even though automatic reeling at constant speed, flexibility of tip and belly section will help you to jerk jig comfortably and set hook on with less failure. It will bend very much when fish is on, but you can fight with fun without any worry. You will be surprised that potential which is hidden inside blank of 633 for sure.

Galahad TRAVEX

2pcs jigging rod Model / 3 Lineup

Series category page Details of each model are available from QR code on each model. **YAMAGA Blanks Official Web site**

TRAVEX is designed to be transferred your power to metal jig directory thanks to high power of recovery hidden in new blanks. Also, it will be bent from little farther than previous models, you can give a various kind of action to your metal jig as such as one pitch jerk, high pitch jerk or combination easier than before. These models are not only ideal for your fishing trips overseas but also great for your local waters. The sharp, yet flexible blank is best suited for anglers who prefer a speedy and quick action of your jigs.

Galahad TRAVEX 593S

2PCS / SPINNING MODEL

This is a 2 piece model with a sharpness and lightness while having the strong force of recovery.

This is a versatile stick to cover various methods of jigging such as horizontally or vertically with around PE3. Thanks to the sharpness and lightness of this blank, you can enjoy manipulating your jig as you wish. If you aim for yellowtail or kingfish with metal jig up to 180g on 30~80m depth of water, the potential of 593S will be shown definitely. Although the blanks of 593S seem slim and delicate, fish will be stopped and lifted by the butt section which has been loaded with massive power.

PRICE :
LURE : **Jig Max 180g**
LINE : **Max PE 3**

Spinning Model / 2pcs (Grip-Joint)

BlueSniper Boat Casting

Boat Casting Model / 7 Lineup

The BlueSniper boat casting models are designed for all anglers to be able to easily cast and fight large species inhabiting the deep blue. BlueRunners, Kingfish and Tuna, it is vital for anglers to choose the right tackle balance which match your target size and fishing conditions. The lineup of the BlueSniper boat casting series have a vast array of models suitable from small Kayaks to even large charter boats. For all models, the common characteristics we pursued was light casting feel and the ability to easily fully load the rod with your weight.

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

BlueSniper
BOAT CASTING
81/2

This model provide you a high accurate and long distance casting with high operability for small lures.

This model will enable anglers to use lures not previously capable on its predecessor such as small sardine or 15cm size bait. The flexible tip allows usage on small lures and can still handle fish up to 10kg. Based on much wider range of lure capacity than previous series, you will be able to match the bait more than ever.

PRICE :
LURE : **15~50g**
LINE : **PE 2~3**
DRAG : **Max 4kg/45°**

Spinning Model / 2pcs (Grip-Joint)
Guide : SIC-S stainless frame K guide(Fuji)

● Suitable reel size : S-D : 4000~6000
● Target : BlueRunner up to 10kg
● Lure : Plugs

BlueSniper
BOAT CASTING
72/3

It is a model for aiming at various targets with a small boat, and it has the same power as one that to aim at a big fish.

This is medium power class model which is easy to handle. If you aim bonito or other blue runner kind off the pleasure boat or kayak, you will be satisfied with handling ability and response speed of blanks. This is for the angler who feel that 79/3 is too strong or 70/2 is too mild. We believe that flexible and sensitive tip section of 72/3 let you manipulate small pencil bait or small cup mouth diving popper as like as your extended arm.

PRICE :
LURE : **30~60g**
LINE : **PE 2~3**

● Suitable reel size : S-D : 5000~6000
● Target : BlueRunner up to 10kg
● Lure : Plugs

BlueSniper
BOAT CASTING
79/3

This is an all-rounder model with high versatility performance, a light feeling of use, and high power of recovery.

A technical rod by definition, this rod has incredible lure manipulation with a good casting feel. This has a tip section of a Pe 3 class but a Pe 4 class butt section. It has enough power to fight a blue fin tuna up to 20kg or a 10kg blue runner. During testing, we have caught a 40kg bluefin tuna. The potential of this rod is simply beyond imagination.

PRICE :
LURE : **30~70g**

● Suitable reel size : S-D : 6000~8000
● Target : BlueRunner up to 15kg
● Lure : Plugs

BlueSniper
BOAT CASTING
75/4

A technical short length model that supports a variety of casting styles both overhand and underhand.

This is the short length model with good casting performance. Anglers will able to cast lures up to 80g with less force. And we believe that it will be helpful when you are in situation that your are required to cast from a limited space such as small boat.

PRICE :
LURE : **30~100g**
LINE : **PE 3~4**
DRAG : **Max 7kg/45°**

Spinning Model / 2pcs (Grip-Joint)
Guide : SIC-S Stainless frame K+SIC Ocean Guide(Fuji)
Reel seat : DPS18 BACK STOP Double Nut(Fuji) Down lock nut
● Suitable reel size : S-D : 6000~8000
● Target : BlueRunner up to 15kg
● Lure : Plugs

BlueSniper
BOAT CASTING
82/4

This is the well-balanced standard model that combines long cast performance, lure operability, and power of recovery.

This rod has a greater range of lures from 30g to 110g. When load applied, it bends nicely enabling anglers to land the fish easily. Just like the 79/3, it also performs well as a standard rod for kingfish or yellowtail. The 82/4 has power in spite of its lightness of handling, so it is recommended for beginners and women.

PRICE :
LURE : **30~110g**
LINE : **PE 4~5**
DRAG : **Max 8kg/45°**

Spinning Model / 2pcs (Grip-Joint)
Guide : SIC-S Stainless frame K+SIC Ocean Guide(Fuji)

BlueSniper Canary & Blacky for Tuna

Boat Casting · Tuna Model / 4 Lineup

The BlueSniper boat casting series for Tuna are especially built to target Bluefin Tuna and Yellowfin Tuna. The overwhelming speed and torque of the Tuna will lead to a prolonged fight if your target takes initiative of the fight. It is absolutely imperative to continuously apply pressure on the fish by fully loading the blank with the full weight of the fish and the blank is designed to do exactly this. All models also possess outstanding castability to shoot out the lures into feeding Tuna.

Series category page Details of each model are available from QR code on each model. [YAMAGA Blanks Official Web site](#)

BlueSniper
BOAT CASTING
85/4
Canary

The model that persued operability and cast performance for capturing small bait patterns of yellowfin tuna and kingfish.

This is multiple and lighter model of Blacky series. As you can notice from "Canary" the name of 85/4, when you aim canary-colored fish as such as yellow fin tuna or kingfish, it will be the perfect partner of you. And you will be able to get enough distance to aim large fish with small lure such as less than 30g. When you do not want fish to run as it likes, powerful butt section will help you to stop the sudden run of lively fish and to pull it to surface quicker than you thought.

PRICE :
LURE : **25~100g**

● Target : TUNA up to 40kg · Huge BlueRunner
● Lure : Plugs

BlueSniper
BOAT CASTING
81/6
Blacky

The light class model for aiming tuna with high power of recovery on the butt section.

This is primarily a light tuna rod that enable to cast smaller lures which closely mimics actual baitfish. You can cast a small lure weighing 30g but it also has enough power to wrestle a tuna around 50kg. The same performance as currently blacky series, it has been designed to be bent nicely, and will correspond with the sudden run of big tuna, and to reduce the burden of anglers.

BlueSniper
BOAT CASTING
81/8
Blacky

An all-around model with excellent casting performance and fighting ability as a tuna model of the PE8 class.

This has been designed as a versatile tuna rod which can cast not only small lures matching the size of sardines but also medium lures size of Dorado or baby yellow tail. Although the belly section will be bent and enable you to hold it with 70° of angle, it will still has enough power to pull up a tuna to the surface. Of course, you can use this 81/8 for large king fish without losing initiative.

PRICE :
LURE : **45~120g**

● Target : TUNA up to 70kg · Huge BlueRunner
● Lure : Plugs

BlueSniper
BOAT CASTING
81/10
Blacky

A high power model that combines strong butt section with huge force of recovery and excellent castability of large lures.

Rated at Pe 10 class for power, this rod targets big tunas around 100kg. The blank has more power than the 81/8 to enable casting lures up to 160g. Like the Blacky series, it bends nicely when loaded to endure the violent runs of tunas. 4ways carbon material are used on the butt section to reduce twisting of the blanks and adding another advantage during fights with big tuna.

PRICE :
LURE : **50~130g**
LINE : **PE 8~10**
DRAG : **Max 17kg/45°**

Spinning Model / 2pcs (Grip-Joint)

● Suitable reel size : S-D : 14000~20000
● Target : TUNA up to 100kg · Huge BlueRunner
● Lure : Plugs

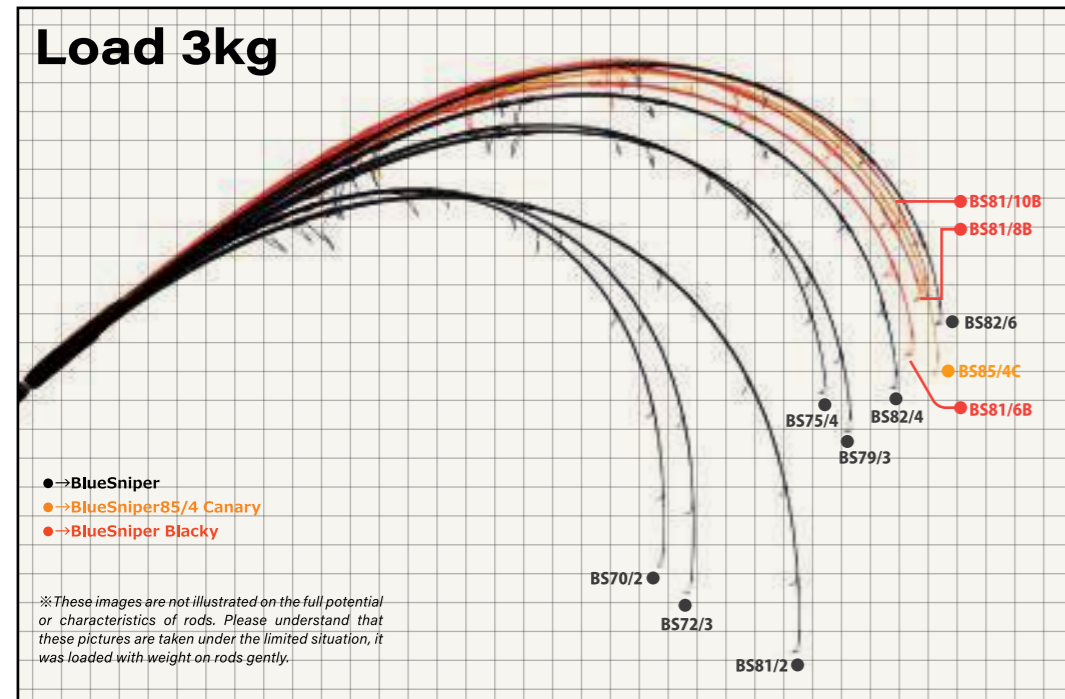

BlueSniper Blacky Swappable to Aluminium gimbal

※BRC22.0 is on the end of grip as a standard but you can select aluminum gimbal instead. If you are interested in it, please make inquiries to dealer in your region.

※Please contact to our agent in your country or nearest country.

BlueSniper Boat Casting BENDING CURVES

- These are comparison images of BlueSniper series which were loaded 3kg weight on tip.
- Bluesniper 72/3 have been designed to aim bonito, cero or yellow tail from small boat or kayak. Although 79/3 looks more powerful than 72/3, the target which can be aimed with 79/3 is bigger as such as yellowfin tuna or king fish so please note that design and concept of those two are different.
- Although Blacky series for tuna bend like rod for Pe6 even if it is Pe10 class, butt power of these are almost as same as GT rods. These have been designed to enable you to hold 70 degrees while fish is on. By doing so, potential of power which is hidden in butt section will be brought out.

※Please note that only Blacky series can be held 70 degrees angle.

Boat-Casting Model Comparison Table

Characteristic of rods for boat casting will be differed because of lure that you use, or style of your fishing. If you use diving pencil mainly, better choose rod with flexible tip or use popper mainly, better choose rod with stiff tip.

※Comparison chart shows strength and stiffness visually. But it is based on reference value from the concept of design so the feeling of stiffness and strength of these rods is depend on personal equation. And also please note that the stiffness doesn't mean the breaking strength.

- The main feature of the tuna model "BlueSniper Blacky" is the blank that can withstand the rod standing up to 70°.

This model is designed to fight against large tunas that are resistant to twisting and prone to long fights. They are not only looking for stickiness, but also focus on casting performance, and can handle long casting even when shooting naba with a large plug.

At 81/10, this model can also be used in large kingfish games in the Shallow area using large plugs.

(The BlueSniper 81/10 Blacky is used in the photo)

YAMAGA Blanks PROJECT OF FLY FISHING

The YAMAGA Blanks Fly Rod Project, which began to be released in earnest in 2023, is a new challenge that reflects the casting and fight performance design technology accumulated in the salt lure game rod.

The current lineup consists of six models of the Salt Water Series "ENNE" and two models of the Mountain Stream Trout Series "LINN."

Manufactured in our own factory in Japan, it combines durability and reliability in a high level, while the details are a wonderful combination of the knowledge and experience that craftsmen have accumulated over the years.

Strong but bends deeply and finished beautifully, the Yamaga Blanks fly rod is filled with the craftsmen's "skills", "knowledges", "pride" "experience," and their unwavering desire and passion for a better rod.

Enne

ENNE for Salt Water

YAMAGA Blanks PROJECT OF FLY FISHING

Linn

LINN for Fresh Water

YAMAGA Blanks PROJECT OF FLY FISHING

LINN for Fresh Water

LINN for Fresh water

LENGTH: 8ft 11inch GRIP: PUMPKIN JOINT: SPIGOT SECTION: 4pcs ACTION: MEDIUM-SLOW

LINE	Target	PRICE
3WT	YAMAME/IWANA/Rainbow Trout	
4WT	YAMAME/IWANA/Rainbow Trout	

LINN set to medium/slow for smooth, deep bends.

Regardless of the length of the line out from the rod, it has the suppleness that allows you to feel the weight of the line in your hand and gives you a comfortable casting feel, and the core strength to deliver the fly to the point even in a headwind. The blank has been carefully set for comfortable fishing in the mountain stream.

In an open river, you can enjoy a smooth cast feel while loading power on the line, and in a small mountain stream, you can lure a spooky big target in a complicated flow with line control from a technical cast.

The blank characteristic of "bend well and catch well" common to YAMAGA Blanks' salt lure rods is definitely included in the Fly Rod series. Even if you get on the somewhat heavy flow of the river, it will bend deeply and follow, demonstrating its potential. A butt section that is tenacious and have force of recovery to reshape original position make you land target without giving initiative.

ENNE for Salt Water

ENNE for Salt water

LENGTH: 8ft 11inch GRIP: FULL-WELL/FIGHTING BUTT JOINT: SPIGOT SECTION: 4pcs ACTION: FAST

LINE	Target	PRICE
6WT	Black sea bream/Seabass	
8WT	Seabass/Bonefish/Permit/Striped Bass	
9WT	Seabass/Dolphinefish/Bonefish/Permit	
10WT	Dolphinefish/Large Bonefish/Large Permit/Small Tarpon	
10WT XP (2024 NEW)	Tarpon/Dolphinefish	
12WT	Tarpon/GT/Sailfish	

Carbon prepreg with TORAY's NANOALLOY® technology is used for the butt section of ENNE series. Due to the characteristics of "easy to bend and get high power of recovery", it always gives good amount of pressure to the target during a fight, and its followability and strong recovery force lead to a land fish very smoothly. (*NANOALLOY® is not used for 6WT and 10WT XP)

"Durability" and "reliability" are very important and indispensable elements for expedition fishing and boat fishing. And in order to meet a memorial target, it is essential to have a reliable "partner" that is familiar with these two elements and is familiar with the hand. From relatively light targets such as sea bass and black sea bream, to large targets such as dolphinfish, sailfish, or overseas tarpon and GT. The targets that can be aimed at in saltwater fly fishing are as diverse as the world of salt lure fishing.

YAMAGA Blank's ENNE is a saltwater fly rod that is sufficiently reliable as a "tool", and takes advantage of the rare opportunity to firmly control the target and lead it to the landing.

Under Development
"ZINN"

We are currently developing a series for large trout called "ZINN". It is a medium/fast model for targeting large trout with a single handle, and it suits to Brown and rainbow trout hiding in the gin clear waters and free stone stream. Please stay tuned.

YAMAGA Blanks NEW DAWN 2024

YAMAGA Blanks FACTORY LIMITED MODEL
Innovation and Challenge

*We will venture into our next challenge
to capitalize on our greatest asset, our factory.*

As of 2024, Yamaga Blanks will set off on a new challenge. We will not only review the lineup of our limited models for our “Yamaga Blanks members”, but also develop new revolutionary models.

The motive for our challenge was due to the fact that we took a good look at our factory and the meaning of its existence. The reason we continue to insist on “made in Japan” and “in-house production” is to maintain quality control, trusting repair service & support, productive and efficient testing for the endless demand of new product. The blank and go back to the drawing board. Cut the carbon sheet, roll it up, put it into the furnace and then bend to its limit again. We didn’t have a very big lineup of rods back then, so the endless creation of a new products on a daily basis was something we looked forward to!

Our passion has not changed since, but the environment that surrounds us has. Our standard line up has grown and the number of shops who handle our products have also increased drastically. As a result, the number of end users (Anglers) who have chosen Yamaga Blanks as their weapon have also increased.

In which, have we limited ourselves to what we can achieve? Can’t we create something more interesting with the advantage of having our own factory.

We can’t succeed in the fishing industry nor create unique products by being narrow-minded. The fishing industry is not as easy as that. A unique idea can drastically change or even create a new style of fishing, and this could be said to be one of its attractions to so many.

So in 2024, we would like to create a more radical and revolutionary model for the needs of those anglers around the world in a more speedy fashion. These will not be models that the general public will accept, but rather models that stand out and sound more interesting.

It goes without saying that the standard models are our main products, so the above models will be under limited production. We would like to move forward with this new challenge definitely.

What is Yamaga Blanks? Why do we dwell on the importance of in-house, made in Japan production? We hope some of these answers will be addressed with our new project, the “NEW-DAWN”.

YAMAGA Blanks FACTORY LIMITED MODEL 5 CATEGORIES

FLAWLESS EDITION "ELITE"

This is a model with honed performance and can be considered the elite model of our Yamaga Blanks brand. It may not suit everyone's needs but compared to the standard models, it is not only a high quality model but a model for those hardcore anglers seeking a little something different.

OVERSEAS' ORIGINAL EDITION "GLOBAL"

The Global Series is not sold in Japan, overseas only. The lineup consists of models developed to much to overseas needs. We plan to continue releasing models for various countries, fields, and targets.

LIMITED COLOR & DESIGN EDITION "VIVID"

Get ready to jump on the limited color and design editions of our high quality paint-job. These will be one-off productions and will be surprise releases from our usual lineups.

ADVANCED EDITION "BETA"

With Yamaga Blanks state of the art blank manufacturing technology, this category is revolutionary and a challenge to the world and towards ourselves. Although it is called "BETA" this does not mean it is incomplete, but rather catering for the ever bias needs of the market in a category of its own.

ORIGINAL CONCEPT EDITION "PILLAR"

Although the models are distinctive, we have sought after the user-friendly characteristics often seen in Yamaga Blanks rods. The "PILLAR" refers to the series strong foundations in YB. We are scheduled to release the following two models in addition to the standard models.

BlueCurrent 86 All Range "ELITE"

2024 NEW BlueCurrent

86 All Range ELITE

With the super sharp blank which exceeds any versatile model, the new BlueCurrent All Range will be your best weapon for your light game fishing.

The new 86 All Range is a specialized model armed with super sharp casting feel and absolute controllability for the hardcore anglers who seek a more manualized sensitive game. Although it possesses the sensitivity and finesse of the light game category, we have produced the blank with exceeding resilience (characteristics of a blank to restore to its original form), while the newly designed grip will enable anglers to directly touch blank to further improve sensitivity. It is ideal for super size Mebaru, seabass feeding on micro baits and even super light shore-jigging.

BlueCurrent 100 "BETA" Tuned for SURF

2024 NEW BlueCurrent

100 BETA Tuned for SURF

This is the rod for light game that is designed with concentrated performance to get extra distance for searching targets in vast water.

With the ever increasing limitations and regulations placed upon land-based anglers, the vast surf holds endless potential as the final frontier. This BlueCurrent 100 BETA Tuned-for-SURF is a specialized light game model for casting in the vast surf. Although it is 10ft in length, we have not forgotten that it is a light game model. It is equipped with the sensitivity, lightness and finesse characteristics of a light game rod, yet able to cast long distances with jigs and "floats" and "sinker" rigs. This model will be the next standard for the light game, long distance search model in the BlueCurrent series.

Scheduled to be released in February 2024

Ballistic 106MMH "BETA"

2024 NEW Ballistic

106 MMH BETA

Cast further with higher sensitivity. This is the one equipped cutting-edge technology to deliver your lure further than you expected.

In this rod, we sought after absolute casting distance and sensitivity. The blank of the new Ballistic 106MMH "BETA" has been fine tuned through the use of newest material in the market and fine engineering to achieve outstanding casting distance and sensitivity. This is our current answer to the ever lasting issue of long casting rods and as it is a one-off creation, it does not really fit in any category of our current lineup. As it is design for use in the surf and off the rocks, it is equipped with overwhelming butt power to go head-to-head with the huge fish.

+ Butt Guide : SIC Titanium frame RV Guide (Fuji)
Reel seat : DPS18 (Fuji) Up lock nut
● Suitable reel size : D: LT4000C~5000C · SW4000 / S: 4000~C5000 · SW4000
● Target : Flatfish · Seabass · Black-Fin Seabass · Cherrysalmon
● Field : Sandy Shore · Rocks · River

Scheduled to be released in March 2024

A model that uses aggressive and strategic techniques that can be called "sharpness special".

It features the sharpest blank in the BlueCurrent series. Because it is hard all the way to the tip, it has excellent bottom sensing ability, and the lure can be operated with sharp action. Recommended for those who want to easily adjust the strength of their lures for purposeful fishing.

*BlueCurrent 74TZ and 78TZ are two models that are particularly focused on sensitivity, operability, and cast feel. The stiffness and strength of the butt are different from the NANO series. The NANO series uses the force of the blank to momentarily bend and restore itself to control the fish, while the 74TZ and 78TZ are models that retain hardness in the butt to achieve high casting accuracy and control the fish.

※Please refer to page 21 for the rod bending curves.

PRICE :
LURE : **2~18g**
LINE : **PE 0.4~1.0**

Spinning Model / 2pcs (Put over Ferrule)
Guide : TORZITE Titanium frame K Guide (Fuji)
Reel seat : VSS16 (Fuji) Down lock nut
● Suitable reel size : D: LT2500~C3000 / S: 2500~C3000
● Recommended lures and actions : Bottom lures · Jigs · Twitching and jerking of minnows
Detailed actions of pencil lures

Sharpness & Strength, a model that hones these two features and emphasizes long cast performance.

It has a moderate amount of firmness all the way to the tip, while also being able to bend smoothly under load. Even when casting, it has a high recovery force even though it bends as a whole, so the casting feel is also good. Since the blank bends smoothly up to the belly, it is also suitable for retrieving action. A rod that can be used not only from the bottom to the top range but also with slow and fast action in the current, making it easy to turn on fish.

※Please refer to page 21 for the rod bending curves.

PRICE :
LURE : **5~25g**
LINE : **PE 0.4~1.0**

Spinning Model / 2pcs (Put over Ferrule)
Guide : TORZITE Titanium frame K Guide (Fuji)
Reel seat : VSS16 (Fuji) Down lock nut
● Suitable reel size : D: D: LT2500~C3000 / S: 2500~C3000
● Recommended lures and actions : Operation in areas with flow · Followability to bite Lures that are able to action · Lures that are able to retrieve

This is a model that manipulate large lures well and has strong butt power that is not inferior to fighting against large fish.

This versatile model is specially designed for big freshwater predators like pike, hucho, catfish etc. Powerful, light and precise. During testing in the European area, we focused on the guide diameter that it could be used without stress even in extremely cold areas where the guide would be frozen. Also, it has enough power to cast big lures up to 100g, but on the other way sensitive enough to fish with small and light lures around 20g. When you require to cast long distance with big lures, especially on wide rivers targeting big hucho, with this rod it is not a problem anymore.

PRICE :
LURE : **20~100g**
LINE : **MAX PE 3**

Spinning Model / 2pcs (Put over Ferrule)
Guide : SIC-S Stainless frame K Guide (Fuji)
Reel seat : DPS18 (Fuji) Up lock nut
● Suitable reel size : D: D:3000~4000 / S: 4000~5000
● Target : Pike, Hucho, Catfish
● Lure : Big jig heads, Minnows, Plug

This is a 4 piece model that changes common sense as a pack rod that can aim at any target without compromise.

This is a 4 piece light game model for travelling anglers around the world. You will be able to experience first handedly Yamaga Blanks state of the art designs in this pack-rod which possesses a strong butt section yet allowing the whole rod to smoothly bend. Although the rod may feel stiff, the flexibility of the blank creates a beautiful bending curve and is suitable for not only salt-water species but also trout and even large mouth bass in fresh-water environments.

PRICE :
LURE : **~12g**
LINE : **PE 0.3~0.8**

Spinning Model / 4pcs (Spigot Ferrule)

Special rod case included

This is a model that both children and adults can simply enjoy "fishing" and that has enough toughness for a bit of reckless use with its durable design.

This is the BlueCurrent series kids model. We have enhanced the strength of the blank and it is absolutely value for money. We can strongly recommend this rod for fishing enthusiasts and kids who are not bound to one type of fishing style but those who can enjoy not only the lure game but also utilize bait game.

The next release is scheduled for August 2024, COMING SOON

Some of the limited models that have been selling will continue to be produced. Details of sales will be announced on our website, social media, and dealers.

2024 YAMAGA Blanks ORIGINAL ITEMS

GEARS

2024 NEW PRODUCTS

2024 NEW YB Protection Roll Bag Price:

YB PROTECTION ROLL BAG

YB Protection Roll Bag is Yamaga Blanks' original packing gear that allows you to transport multiple rods safely and smartly without damaging them. You can carry the rods compactly and safely when you go on an expedition by ferry, fishing on the shore or offshore. Intended for use on rocky shores, it is made of neoprene fabric with excellent durability and water resistance, so it can be used as a rug while taking a break or as a tool holder.

SPEC
 ●Packing quantity: 1~5 ●Storage dimensions: 1150~1800mm
 ●Size: 1840x540mm ●Weight: approx. 710g ●Material: Neoprene, Velcro, D ring

Assuming that you are packing up to an 11ft model, you can protect the tip by folding it around the first seam for an 11ft model and the second seam for a 10ft model.

You can hold the rod with Velcro.

The pocket that stores the grip of rod has different widths, so you can use it depending on the thickness of the rod you are storing.

The storage pocket has a drainage hole, so it dries easily even after washing. So please wash it after you fished and keep it clean.

You can wear it on your shoulder by attaching the YB shoulder belt (sold separately) to the two D-rings.

You can secure it in place on windy days by tying strings such as paracord to the grommets on the four corners or by driving pegs.

When storing the Protection Roll Bag at home, it can be folded compactly by securing the long belt to the inner Velcro, and can be easily carried in the bag which comes with it.

It can also be used as a rug when preparing or taking a break.

REGULAR PRODUCTS

YB Shoulder Belt Price:

The YB shoulder belt is an item that makes it easier to carry the rod while fishing. It is possible to pack 2 to 3 middle class rods such as eging and sea bass together using the elastic neoprene belt. By carrying the bundled rods on your back, you can free your hands and move around the field more easily.

●Rod installation image
 ※Tip cover sold separately

Belt total length: 670mm~1130mm
 Pad part total length: 200mm
 2 D-rings on the pad
 One D-ring for belt connection
 Belt total length: 320mm

SPEC
 ●Belt total length: 670mm~1130mm Pad part total length: 200mm
 ●Rod belt(x2): Belt total length: 320mm

Packing ●Shore Casting Rod x4 ●Seabass Rod x5 ●Eging Rod x5

YB Zoom Shaft Price:

It is a telescopic type landing shaft that originated YAMAGA Blanks. Although it is compact in size, moderate stiffness and strength, and can be used widely from light games to sea bass.

SPEC
 ●Telescopic type / 8pcs ●Weight: 310g ●Deployment length: 2900mm ●Closed size: 455mm

Target Horse mackerel, Rockfish, Black sea bream
 Sea bass, BlueRunner (up to 5 kg), Squid, Blackfin sea bass, etc...

By providing an air hole, you can swing it out smoothly with one hand.

Due to its simple structure, it can be easily disassembled by removing the top and end cap parts. Maintenance such as washing after fishing is easy.

YB Zoom Shaft can be repaired. Please ask to retailers for more details.

YB Landing Handle Price:

It is a carbon handle ideal as for the landing net of seabass wading games. Also, if you set a gaff, you can use it as a hand gaff in situations such as rocky shore and boats. The main shaft part, grip, joint part metal fittings, all design, processing and assembly are done in our own factory in Kumamoto, JAPAN.

SPEC
 ●Body: Made of carbon Surface: Rubber processing
 ●Screw standard: W 1/2 ●Length: 275mm ●Weight: 144g

YB Landing Handle Stay Price:

The YB Landing Handle Stay can be attached to the YB Landing Handle (sold separately) to improve portability during wading. (This product does not come with a net handle) By using stainless steel "SUS316L", which has excellent rust and corrosion resistance and is also used in the aerospace field, it has a shape that supports smooth landing even in hard use.

SPEC
 ●Material: Stainless(SUS316L) ●Size: W20mmxH44mmxD165mm ●Weight: 58g
 *Although it can be equipped on other companies' products, there are some products that do not fit.
 *Not compatible with draw-out type shafts.

YB TipCover Size S/M Price:

This is Neoprene Tip-Cover. Neoprene tip cover for protecting and fixing delicate rod tips.

●Length: S-360mm / M-450mm ●Material: Neoprene & Piece of Velcro

*Product photos may differ from the actual color tone.

Rod Belt Series

The standard rod belt is available in 3 sizes, and the PG rod belt, which has anti-slip rubber sewn on to improve frictional resistance, is available in 2 sizes. The PG rod belt has an amazing frictional resistance and can remove fixation on ferule that cannot be removed with bare hands.

●Color: Black ●Material: Neoprene & Piece of Velcro

AFTER
SERVICE
GUIDE**

Precautions for use and repair

Precautions for use

- Do not cast with a tangled line or line trouble in the reel. This may cause the rod to break. Furthermore, if you miss or forget to put the line through a guide, this may result in damage or breakage of your rod.
- If you continue to reel in your rig (lure, popper, lig etc) after it has reached the top guide, this will cause the rod to break.
- If you force the Joint section of the rod when joining together, this will cause cracking or splitting of the joints.
- If you use the rod while the joint section is still loose, this may cause breakage.
- If the Joint section is stuck together, use a rubber sheet for added grip while twisting away from each other.
- Beware of power cables, overhead power lines, or phone lines. The material (carbon) will easily pass through electricity causing serious injury or death.
- If you hear or see lightning approaching while in use, pack the rod away or stay away from the rod. Lightning may strike causing serious injury or death.

About the contents on this catalog

- Specifications might be changed without previous notice.
- Some of images on this catalog are proto type so it might be different from actual products.
- Images on this catalog might be different from actual products depending on the condition of printing.

Maintenance and storage

- Wash the rod with running water to rid of any filth and salt. Then wipe off any excess water. If you store your rod without wiping off excess water, this may cause blisters on the blank. Storage in well ventilated areas with no high temperature.
- Please do not leave the rod in your vehicle for long durations in summer. This will cause blisters and warping of the blank.

Contents in this catalog

- Include accurate specifications of rods, written in accordance with the regulations set by the Japanese National Fishing Rod Fair Trade Conference.
- Specifications listed on this catalog may be altered without notice.
- The colors presented in the pictures may differ from the actual color. Furthermore, some products are prototype rods in the developmental stage and may differ when it reaches the final product.

Repair and support

- Please take products which is required repairing to sales outlet. At that moment, please send a whole rod (not only the section of the breakage)
- Please be aware that any rod that was personally modified will not be covered by warranty (even if it is under warranty) Any repair that we have judged as changed/tampered with the specification or made to order is unacceptable.
