MADE IN JAPAN
FACTORY BRAND
"SIMPLE THINGS DONE WELL"

Origins of YAMAGA Blanks.

The grass routes of Yamaga Blanks as a rod manufacturer lies in our factory.

We design, construct, assemble, package and ship all our products in-house at our own factory in Japan. This is the origin of our “craftsmanship”.

However, fishing rods are merely a piece of equipment and if the anglers are content with the product, it doesn't really matter where the rod was produced.

So, why do we have such emphasis on producing the rods in-house in our factory in Japan. It is because factories are like living organisms, continuously enhancing our skills through experience. Through countless trial and errors, we learn from our mistakes and improve our developmental skills. There are no short cuts to experience. We just need to keep at it and the accumulation of experience is the end result.

There are many ways to produce good things, but we specifically chose the method to accumulate experience. As a result, we can confidently say that our staff and factory are doing something better than yesterday and evolving on a daily basis.

It goes without saying that the evolution of the carbon (prepreg) material of the rods is a major factor. As rod manufacturers, it is important for us to introduce such materials and in order to bring forth the potential of these materials, our engineering and designing techniques in our factories play a vital role.

Rod building requires many craftsmen and the outcome of the rod is not simply determined with what type of material it is made of. Careful testing of the new material requires countless different combinations and patterns. Once the blank pattern is determined, then it is handed over to the craftsmen for assembly and production.

Our engineering and technical skills are the crown of our accumulated experience and this is what we need to continuously expand.

In 2023, we have expanded our manufacturing facility and moved most of our production line to the new factory. Our grass-routes date back to the old factory and this was where we challenged our limits and the trial and error we experienced in those days are the core of our current business.

In 2024, we will go back to our grass routes and start a new challenge. Based on Yamaga Blanks fundamental principles, we will continue to strive for excellence and create rods which give anglers more freedom.

BLUE SNIPER

Extreme Shore-Casting Strategy

Casting performance is proof of technical capabilities

103ML-M

100M-MH

96H

PL109MH

PL106H

We have honed the standard ability of the rod to capitalize on the limited chances presented to the anglers.

With the renewed “Blue Sniper” series to target blue-runners, we wish for anglers to IGNITE their inner fire.

We hope to create an attractive and capable rod which will IGNITE the inner fires of those anglers who have slowly faded away from the harsh environment and bring them back to the field. So, what do we need?

Our solution was to develop a flawless rod with the ability to easily cast and handle. The chances given to anglers are limited especially when targeting blue-runners off the rocks. Although we can narrow down when they may bite, we cannot deny the fact that the most assured way for catching a fish is to keep casting no matter what.

Furthermore, in the recent tough conditions in the environment, anglers not only require the casting distance to outcast everyone else in the field, but to also have the versatility to utilize various size lures to match the given sea conditions.

Anglers tend to seek pure power in rods designed to target blue-runners off the rocks, though it is our belief that casting ability is the most important factor when targeting these species. It goes without saying that our rods have power, but with the ability to cast stress free, it is a great advantage to the angler as s/he will be able to cast all day long without getting physically exhausted while having the ability to consistently cast long distances.

This is what we sought for, “castability” and “handling”.

It may sound stupid to think that such basic performance can be so important, but when you compare this with an Olympian sprinter, their leg strength can only be the result of daily training and practice. In order to create a blank with consistent casting distance with little effort from the angler, it is up to our engineering and experience to design such rods.

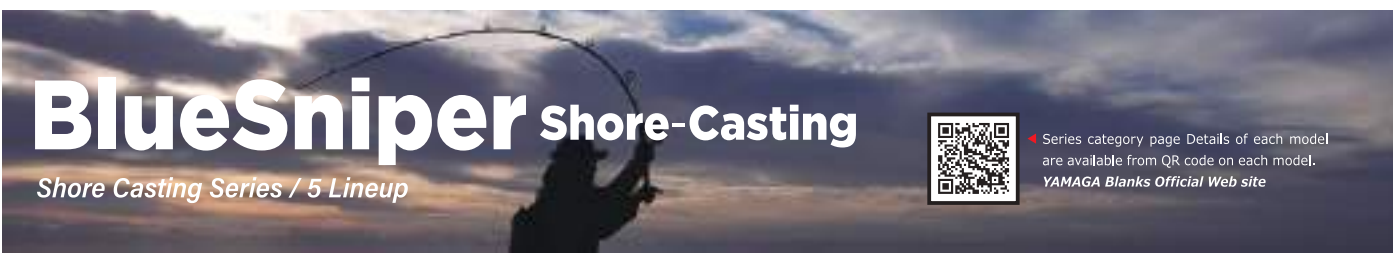

This simple and most basic performance of a rod is actually the most difficult aspect to design in rods. Yamaga Blanks has been pursuing this performance in rods for years and the results can be seen in our refined blank designs. We do not simply rely on the carbon material nor data driven numbers. We actually need to feel the difference first handedly to give the go ahead.

The new Blue Sniper models which have gone through the rigorous processes of development are one of the greatest achievements for the land-based casting models for Yamaga Blanks.

Cast further than ever before, be more flexible with your fight and bring forth the underlying power through the bending curve of the blank. This rod will allow anglers to continuously focus on what needs to be done to better prepare them for the unexpected attack of the fish.

The high level of basic performance is what will help anglers conquer the unforgiving blue-runner game.

We hope you will reignite your inner fire with these reborn Blue Sniper models by “continuously” cast throughout the day. This is what we wish for.

Type : AR (All Rounder) All-rounder type: Highly versatile model that can be used with jigs and plugs.

2024 NEW BlueSniper 103 ML-M

This model is a highly versatile model able to cover various situations in your local waters with its finesse characteristics.

Anglers will be able to utilize light PE1.5~2 line to conquer the tough high-pressure fields or small bait fish patterns. The flexible ML class tip will enable anglers to easily cast out small 20~40g jigs and smaller seabass hard lures for a more finesse approach while the M class butt power can allow for a more speedy power game against your targets in crowded and rugged areas using PE3. The fusing of the contradicting characteristics of torque required to overcome the thrashing blue-runners and lightness for anglers to continuously maintain concentration throughout the day will assist you on your next adventure out to the rocks.

PRICE :
LURE : **Plug 20~50g / Jig Max 80g**
LINE : **Max PE 3**
DRAG : **Max 4.5kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Stainless frame K Guide + Ocaen guide (Fuji)
Reel seat : DPS1B (Fuji) -Up lock
● Suitable reel size : S-D: 4000~6000
● Recommended Target : Yellow tail ~10kg
Kingfish & Greater amberjack ~5kg
● Recommended Lure: Various top plug Minnow · Metal jig

2024 NEW BlueSniper 100 M-MH

This is a highly well-balanced model with castability, controllability and fighting performance all fused together.

MH class rods are the main strength rod used for those anglers targeting blue-runners off the rocks and the 10ft standard length set for the model will allow anglers to continuously cast throughout the day stress free while lightly cast and control the lure with ease. The wide release point when casting helps anglers consistently cast long distances and the soft tip yet powerful butt section will enable anglers to utilize various plugs and control the jigs. It is the most versatile model of the series and will not only be effective as your main rod in your local waters, but also great as a spare rod for your more exotic adventures for bigger and better fish.

PRICE :
LURE : **Plug 30~80g / Jig Max 120g**
LINE : **Max PE 4**
DRAG : **Max 6kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Stainless frame K Guide + Ocaen guide (Fuji)
Reel seat : DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 6000~8000
● Recommended Target : Yellow tail 10kg~ Kingfish & Greater amberjack ~8kg
● Recommended Lure: Various top plug Minnow · Metal jig

Type : AR-EX (All Rounder Extreme) All-rounder extreme type: Specialized for high general performance and high response

2024 NEW BlueSniper 96 H

The new high-power and highly responsive H class blank allows you to utilize a wide range of lures lightly and freely.

While possessing the power of an H class rod, the 9ft class blank has been engineered to be thin, light, and recovered speed and powerfully for anglers to be able to swing around with ease. Anglers will be pleasantly surprised with its ability to easily cast heavy weighing jigs and lightly maneuver these jigs with your rod action. It is not simply a stiff model. Whereas anglers will be able to manually control various types of hard lures responsively and the bending curve of the blank will help you efficiently lift the fish to the surface. It is the next generation of H class rods enabling anglers to create new styles of fishing.

PRICE :
LURE : **Jig Max 150g / Plug 60~120g**
LINE : **Max PE 6**
DRAG : **Max 8kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC Ocaen guide (Fuji)
Reel seat : DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 6000~14000
● Recommended Target : Yellow tail 10kg~ Kingfish & Greater amberjack ~12kg
● Recommended Lure: Metal jig Large minnow · Diving pencil

Type : PL (Plug) Plug Type: A model that emphasizes smooth, well-mixed action when using a diving pencil

2024 NEW BlueSniper PL109 MH

This is a technical model specializing in plugging that combines the precision action of a diving pencil and the power with the long cast performance.

While the 11ft length has given the rod outstanding casting distance, the well-balanced rod will allow anglers lightly control their hard lures with ease. The tip is flexible for anglers to smoothly control the diving pencils while the powerful butt section will shut out the thrashing of the fish. These combined attributes will be of great advantage to anglers in sticky situations where the large target species are reluctant to bite and require continued concentration from the angler. It is an ideal model for the hardcore anglers who want to allure the fish with surface and sub-surface lures.

PRICE :
LURE : **Plug 30~80g / Jig Comfort ~80g**
LINE : **Max PE 4**
DRAG : **Max 6kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)
Guide : SIC-S Stainless frame K Guide + Ocaen guide (Fuji)
Reel seat : DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 8000~10000
● Recommended Target : Yellow tail 10kg~ Kingfish & Greater amberjack ~8kg
● Recommended Lure: Diving pencil Various top plug · Minnow · Metal jig

2024 NEW BlueSniper PL106 H

This is a high power plugging model that uses medium to large plugs to capture large blue runner. It does not give the initiative even in a power game.

We were after a high powered model especially designed for anglers to lightly and smoothly cast our large size hard bodied lures around 100g. The original design and material used for the blank will enable anglers to cast large lures all day long with ease and consistently cast long distances. The powerful and resilient blank will bend in and once loaded, it is designed to withstand the powerful thrashing of the enormous fish. It is an ideal rod for the harshest situations off the rocks, shallow areas and your exotic trips to remote islands to target the monstrous fish.

PRICE :
LURE : **Plug 50~120g / Jig Comfort ~100g**
LINE : **Max PE 6**
DRAG : **Max 8kg/45°**

Spinning Model / 2pcs (Spigot Ferrule)

BlueSniper Comparison of cast bending

● This is a cropped image of the impact moment when casting 5 Blue Sniper models with different lure weights. The cast exceeds the recommended lure specifications, but there is no problem with a few grams. There is a slight difference in the moment of bend, but you can check roughly what the bend curve looks like when you cast.

● Regarding the recommended lure specs for each rod, the jig is heavier for 3 models of all-rounder type, and the max weight of the plug is set to be light. This figure takes into account the plug with strong air resistance. As for the plug type, the jig is a comfort weight, and it is not a weight that can be cast, but a weight that makes it easy to act. The length from the tip to the lure when casting is all cast by taking the length to the front grip.

Strength determined by repulsion rather than hardness

What exactly has changed about the new BlueSniper, which has improved casting ease, and cast feel, and required long cast performance? - In a nutshell, the strength of the rod and the ease of casting are achieved not by the hardness of the blank but by the force of recovery. It is difficult to understand in the text, but for example, there is a point that all models can be used with light rather than power.

The most obvious model, 96H, is Jig Max 150g and Line Max PE6. However, using PE3~4 for 60g jig can be cast without any discomfort, and continuous jerk can be operated in the best sense with a good tempo. You will surely be surprised by the light operation that you cannot imagine using the short length H class model.

This is a feature created by the carbon material and blank design, which has a force of recovery against the load instantly, and also because it bends firmly even when using a light lure, and it can bounce off with a force of recovery.

If you take advantage of this performance and bring two units, one with the PE5~6 loaded around the reel 14000 and the other with the PE3~4 loaded around the reel 6000~8000 as a light setting, you can play two types of games with a single rod.

This is a characteristic that the previous BlueSniper did not have and one that the new series has. In addition, the lower and upper limits are indicated for all plugs used in the lure specification of the rod, but this is also the same for the lower limit when using the jig, and it is not a problem to make the line thinner according to the lure within the weight. (Of course, the drag setting should be properly adjusted to the line setting.)

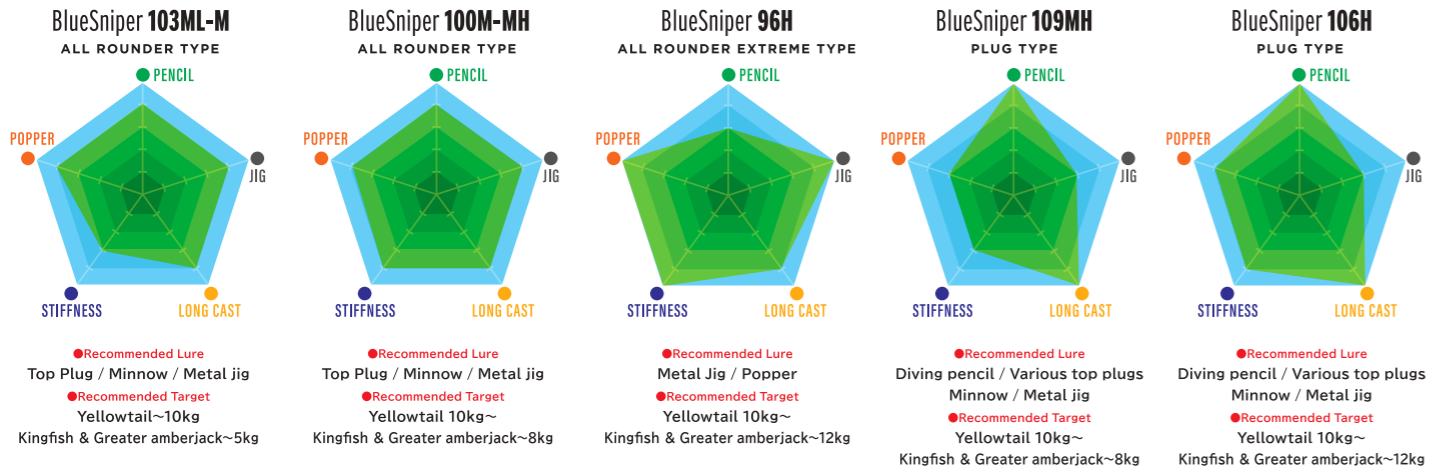

In the image of the blank, the rods are assembled only by muscle force, and they have the power to be activated by bending in lightness. That is why they are synchronized with anglers, whether they are used for lights or powerful, and have the ability to respond to any situation. That is the most important characteristic of the new BlueSniper and the biggest change from the previous models.

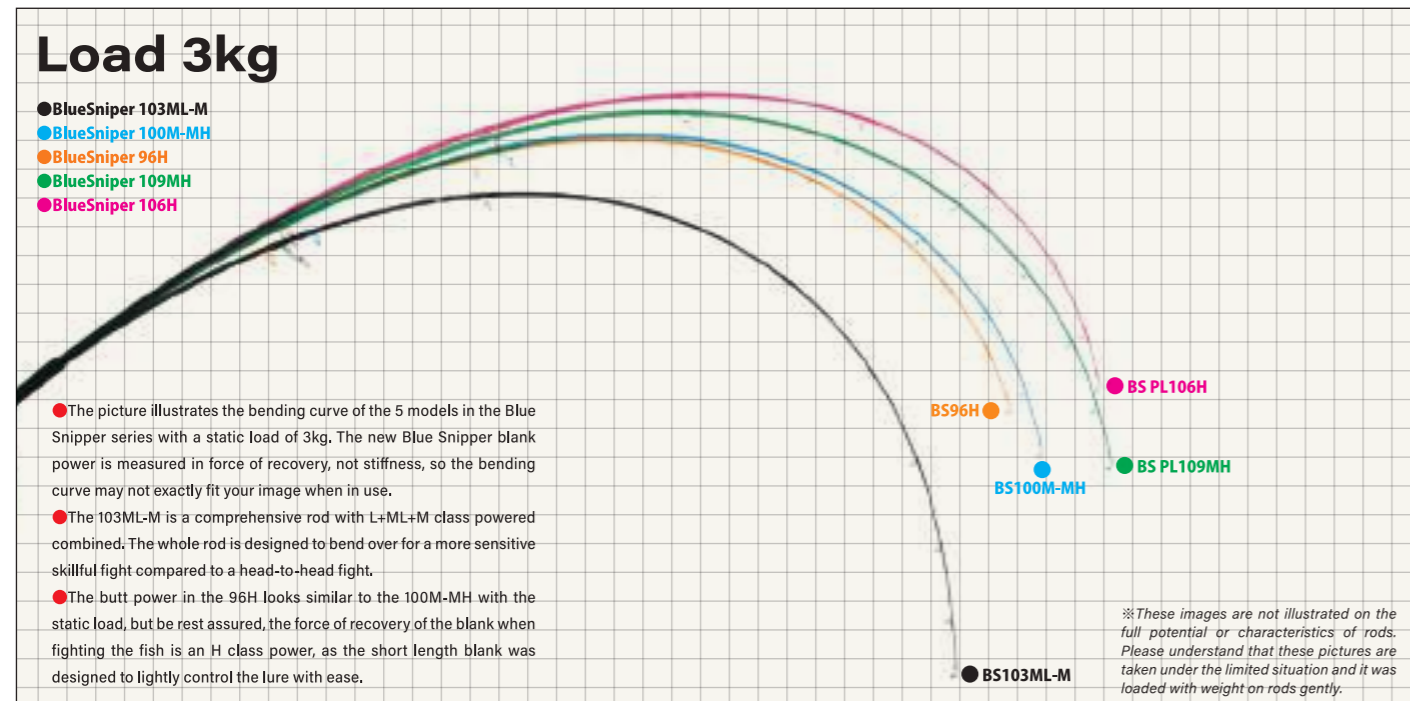

BlueSniper RADAR CHART COMPARISON

- PENCIL** - Movability of diving pencils with emphasis on water
- JIG** - Easy to manipulate quick and continuous action of metal jig
- POPPER** - Ease of splashing and bubbling popper type lure
- STIFFNESS** - Tips that bends but is sharpness with high power of recovery
- LONG CAST** - All models have distance cast performance, but total distance cast performance including large plugs totally

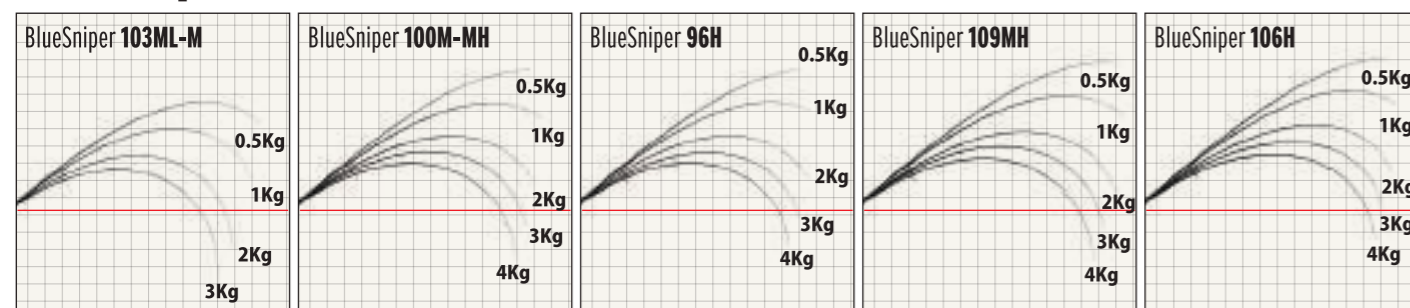

These five items do not represent all of the rods. Depending on the length, etc., the feeling of the angler used will change. Please use this as a guide.

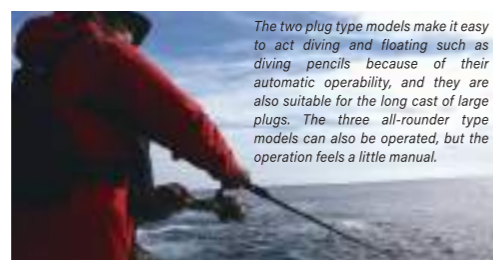

BlueSniper BENDING CURVES

BlueSniper Comparison of bends by load & models

The three all-rounder type are good at jig action, but if you moderate the weight, you can use the plug type well.

The two plug type models make it easy to act diving and floating such as diving pencils because of their automatic operability, and they are also suitable for the long cast of large plugs. The three all-rounder type models can also be operated, but the operation feels a little manual.

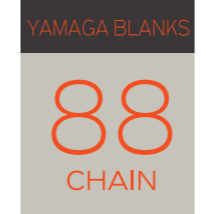

YAMAGA BLANKS 88 CHAIN

Versatile Model / 1 Lineup

YAMAGA BLANKS CHAIN

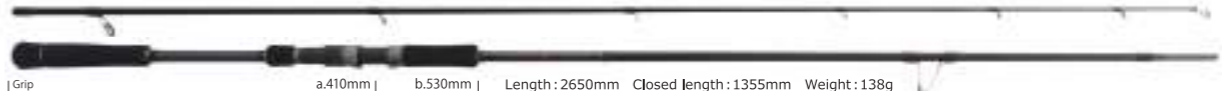

This is the creation of a new style. Let's connect the various kind of fishing fields.

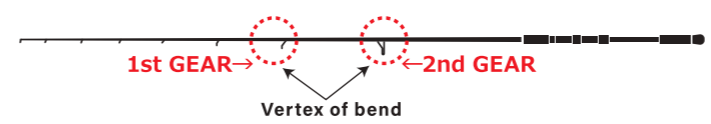

This special model was designed to enable anglers to utilize various lures up to 40g to target various species. Even with the light specifications, anglers will easily be able to go head to head with smaller Blue-runners around 3kg. In addition to its lightness, the exquisite 8.8ft length will bring about great advantage to the anglers to find new targets in your local waters. You can go after Blue-runners, snappers, rock-fish, squid, black-fin seabass from the rocks, migratory species, flat-fish and seabass from the surf and monstrous seabass in the river mouths. This one rod will enable you to go after many different species in your local waters.

PRICE :
LURE : 8~40g
LINE : PE 0.8~2

- Spinning Model / 2pcs (Spigot Ferrule)
- Guide : SIC-S Titanium frame K Guide+SIC Titanium frame RV Guide (Fuji)
- Reel seat : DPST17-BACK STOP Double-Lock Nut (Fuji) -Up lock
- Suitable reel size : D: LT3000S~LT5000C / S: C3000~C5000
- Recommended Target : Blue Runner (amberjack ~3kg / yellowtail ~5kg), Small sized migrant (bonito, Spanish mackerel, dolphinfish), Various rock fish (~2kg), Red sea bream, Large squid, Sea bass, Black fin seabass, Hairtail, Black sea bream
- Recommended Lure : Metal jig / Minnow / Top water plug / Jig head / "Wind" type Jig head
- ※ -Egi from #3.5 etc.

About YB88 CHAIN variable taper action

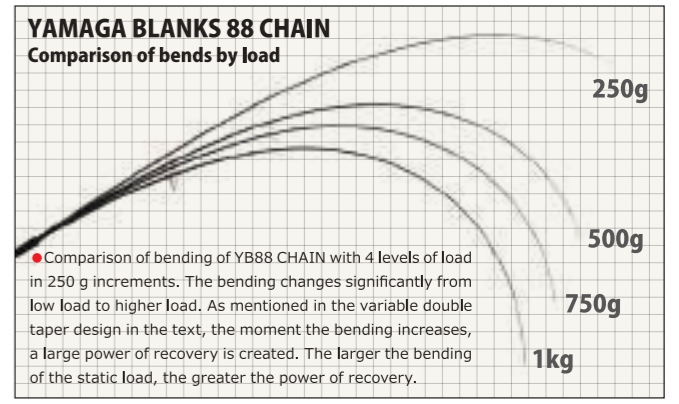

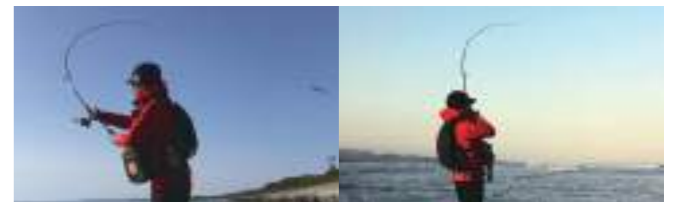

The YB88 CHAIN uses a wide range of lures and, of course, targets. To enjoy all of them without stress, the blank design has what can be described as a "variable taper action" in which the bend and power change gears depending on the load.

As a versatile model, the 2nd powered gear (the apex of the bend) plays an active role in handling various lure sizes and types. When casting a small lure or casting with a small form, it will enter the 1st powered gear and push the lure smoothly. Next, when casting a jig or plug such as heavyweight with a pendulum, bend from the second-stage powered gear and push out the lure with even stronger force. The same applies to fights. In the case of small targets such as black porgy, the 1st powered gear is effective, and the flexibility of blanks that bend smoothly enables you to set the hook in the target's mouth surely while reducing the risk of letting it off the hook.

Furthermore, in the case of a large target exceeding 3 kg, the 2nd powered gear on the butt section is activated. A huge power is activated from the butt section while bending smoothly, and it transforms into a rod that stands out for its excellent performance that allows you to control it as you wish without losing the initiative to the target.

This variable taper action is the main feature of the YB88 CHAIN, and it's what sets it apart from the usual versatile models.

EARLY ALL CASTING

EARLY ALL-CASTING series is sought after the most important aspect for the lure game, "cast farther" and "cast more accurately". Our lineup of rods are built with not only these vital values sought after in the shore casting game, but also controllability, highly responsive and powerful blank for anglers to pursue their methods and styles of fishing. In addition, the vast lineup of the EARLY series are divided into different genre depending on situations and will only have simple specifications written on the blank so we do not limit the anglers options and creativity. Feel free to choose the model that best suits your style and enjoy a one-of-a-kind fishing experience.

EARLY for Surf

Surf Casting Model / 5 Lineup

Series category page Details of each model are available from QR code on each model.
[YAMAGA Blanks Official Web site](#)

The EARLY for Surf are long distance casting models developed to meet the needs of surf casting. With the concept focusing on long distance casting, the light weight blank and light casting feel will allow anglers to maintain their concentration throughout the day. Although these are designed mainly for the surf game, its versatility will enable anglers to utilize these models for various games requiring long distance casting.

EARLY 99 ML for Surf ML classes that expand the possibilities of surf games. This finesse model combines sensitive operation performance and long cast performance.

The blank is equipped with the castability rivaling a 10ft class rod and capable of transmitting vital information about the currents and bottom structures through the sensitive blank. In addition to the jig-head rigged up with soft plastics and small 9cm class minnows and sinking pencils, anglers will also be able to utilize a more finesse approach with light weigh (12g) vibrations for high pressure situations. You can cast long distances to search the vast surf or cast with pinpoint accuracy to the breaks.

PRICE :
LURE : 7~35g
LINE : PE 0.8~1.5

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish·Seabass·Cherrysalmon·Small sized Blue-runner
● Lure: Plug·Jighead·Metal Jig

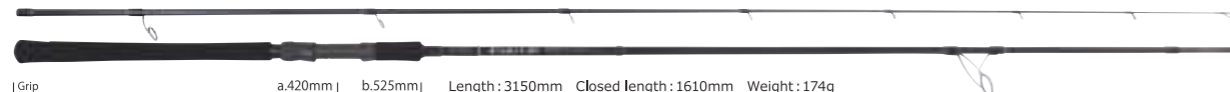

EARLY 103 M for Surf A versatile long cast model that matches not only flatfish on surf but also sea bass in tidal flat and estuarine areas.

If you wish to cast and manipulate various kind of lures as such as minnow 9cm class, sinking pencil minnow 40g, jig minnow or jig head, this EARLY 103M is going to be enable you to not only cast light lure easily but also sense slightly changes of current or situations of bottom sea even in night time. You can handle plug around 45g without any stress as same as 105MH, so please take this 103MMH to aim seabass or black fin seabass from rocky or sandy beach.

PRICE :
LURE : 8~42g
LINE : PE 0.8~1.5

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish·Small sized Blue-runner·Seabass·Cherrysalmon
● Lure: Plug·Jighead·Metal Jig

EARLY 109 MMH for Surf It sharpens its performance as a long-length plugging model and conquers vast waters with ability of long casting.

109MMH have been loaded specialized ability to deliver plugs much farther than you can imagine even if its small or big plugs. Flexible and sensitive tip section will be enable you to not only cast light lure easily but also sense slightly changes of current or situations of bottom sea even in night time. You can handle plug around 45g without any stress as same as 105MH, so please take this 109MMH to aim seabass or black fin seabass from rocky or sandy beach.

PRICE :
LURE : 8~50g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish·Small sized Blue-runner·Seabass·Black-Fin Seabass·Cherrysalmon
● Lure: Plug·Jig minnow·Metal Jig

EARLY 105 MH for Surf A long-range all-rounder with a wide range of lures and the power to keep any target under control.

This 105MH have most powerful blanks of 10ft series to deliver 50g of lure farther than ever you have reached. Especially the butt section of 105MH have been loaded huge power to launch heavy lure farther than your expectations and also to keep big target under control without losing initiative. High versatility employed to blanks for target as such as seabass, black fin seabass, or blue runner from rocky and sandy beach, rocks or piers.

PRICE :
LURE : 10~50g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: DPS18 (Fuji) Up lock nut
● Suitable reel size: D: LT4000C~5000C / S: 4000~C5000
● Target: Flatfish·Small sized Blue-runner·Seabass·Black-Fin Seabass·Cherrysalmon
● Lure: Plug·Jig minnow·Metal Jig·Jig head

EARLY 105 MMH/B for Surf It lead you the new surf game with super long cast and high sensitivity that brings out the performance of overhead reel.

With long distance casting being absolute essential for the surf game, the 105MMH Overhead reel model was developed to shoot out lures in the vast surf without any stress and maximize the ability of the high performance bait casting reels out on the market today. You will be able to feel for the change in flow, current and underwater landscape through the "direct" sensitivity blank otherwise unable in spinning models.

PRICE :
LURE : 15~50g
LINE : PE 1.5~2.5

Overhead reel Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: ACS17 (Fuji) Down lock nut
● Suitable reel size: D / S : # 200
● Target: Flatfish·Small sized Blue-runner·Seabass·Black-Fin Seabass·Cherrysalmon
● Lure: Plug·Jig minnow·Metal Jig

EARLY for Rock

Rock Fish Model / 3 Lineup

Series category page Details of each model are available from QR code on each model.
[YAMAGA Blanks Official Web site](#)

In the pursuit to develop the Early for Rock, we asked ourselves "What is the rock-fish game?". The blanks not only have strength and lightness but also have a highly efficient ability to restore its original form. In other words, the bent blank will flex back to its straight form, peeling the fish off the bottom and other structures efficiently. The stiff yet sensitive tips are highly sensitive to any changes in sea conditions while being versatile, enabling anglers to utilize various types of rigs and styles of fishing.

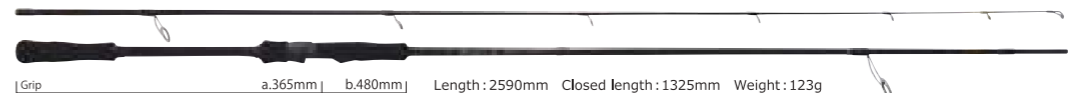

EARLY 86 MH for Rock High-response model for efficiently searching the Rocky area with a length focusing on handling.

The blank for this model is exceptionally well balanced for both casting and maneuvering while also possessing tremendous sensitivity. Anglers will not only be able to utilize swimming actions of jig-head rigs but also utilize Texas rigs and feel for bottom structures and material. The adequately stiff belly section will transmit your bite and rip the fish off the bottom and structures right away. This sharp blank is also suitable for use in the "wind game" targeting hair-tails and "jerking methods" productive for seabass.

PRICE :
LURE : 7~40g
LINE : PE 1~2

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S stainless frame K guide (Fuji)
Reel seat: VSS16 (Fuji) Up lock nut
● Suitable reel size: D: LT3000~4000C / S: C3000~4000
● Target: Rockfish·Seabass·Hair-tail
● Lure: Jighead·Texas rig·Minnow·Vibrations

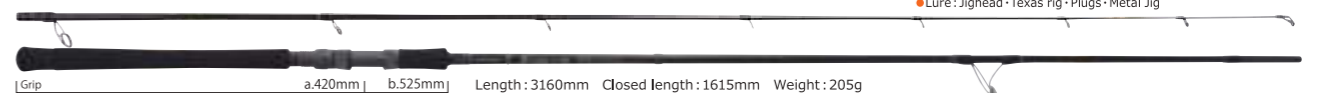

EARLY 104 H for Rock This is excellent in power, castability, and sensitivity. It is not only stiff but also has a flexibility and recovery force on blank.

This long length high powered model was designed for casting distance and sensitivity. The "soft" aspect of the blank can be attributed to the line settings (PE#1), while the "hard" can be felt in its ability to take the load of heavy weight rigs and max drag settings. Anglers will be able to reach those grounds where others have yet to reach. You will be able to utilize various rigs ranging from soft plastics, swim baits, metal jigs and even minnows above 14cm to go head to head with monstrous rock fish and other blue-runners that you may randomly encounter.

PRICE :
LURE : 15~60g

● Lure: Jighead·Texas rig·Plugs·Metal Jig

EARLY 93 MH/B for Rock This one focuses on the sensitivity of retrieving and torque, which are the advantages of the overhead reel, and excels at luring out delicately.

The 93MH/B has a sensitive yet flexible tip ~ belly section for anglers to hover or roll their Texas-rigs near the bottom or for a more pinpoint approach with the "bottom shaking" technique. It enables anglers for a more careful approach on the bottom to induce and capitalize on a bite from those inactive fish. Once hooked, the winding power of the overhead reel and the powerful butt section will assist you to lift the fish away from the structures.

EARLY for Seabass

Seabass Model / 2 Lineup

Series category page Details of each model are available from QR code on each model.
[YAMAGA Blanks Official Web site](#)

What we seek in a seabass rod at Yamaga Blanks is "standard characteristics" for anyone to easily use. Our designs focus on tolerant release point for everyone to be able to cast long distances with the least amount of effort while retaining the lightness for all day long casting and sensitivity to capitalize on the smallest bites. Once hooked, the blanks will bend in nicely to reduce any hook-offs generally caused by blanks that are too stiff. The EARLY for Seabass models are value for money considering the quality of the rods.

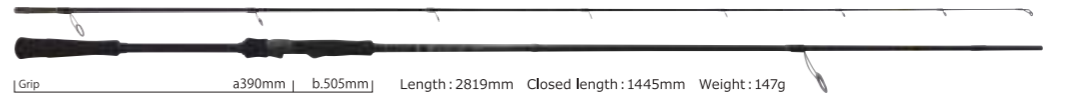

EARLY 93 M for Seabass The versatile model with excellent ability to aim while searching a wide range of ports and embankments from river estuaries.

The all-rounder model is a valuable asset for situations which require you to cast long distances in rivers and piers. It is especially responsive to metal type vibration lures which have are highly resistant. The light feel when reeling in your lure will enable you to focus on your fishing while reducing the load on your wrist. Once the fish is hooked, the blank will bend in nicely and will allow you to handle and efficiently surface your catch.

Multi Piece Model / 3 Lineup

Series category page Details of each model are available from QR code on each model.
YAMAGA Blanks Official Web site

The EARLY for Mobile models are multi piece mobile pack rods which are able to separate into 3-4 pieces. These rods were developed to feel like a 2-piece rod as we refused to sacrifice the rod's performance in exchange for mobility. The rod's superior performances will not only assist the angler's fishing but the mobility has also added a new meaning to "versatility". When in your fishing grounds, we are limited in what we can use. The compact rod can easily be carried around stress free on bikes, bicycles and other public transports which you may use to access your fishing grounds in large cities.
