PASSION FOR THE MISSION

YAMAGA Blanks ROD COMPANY

2025

For that one moment.

In fishing, the most important moment that affects the fishing result is timing. That moment when the tide starts moving, birds start circling and fish begin to move actively, making the angler's heart pound. In order not to fail at the moment of truth, you must be fully prepared.

Modern fishing techniques have evolved in each genre, allowing for a variety of ways to approach your target. However, the reality is that the target fish are also harder to catch these days. That's why it's most important to be ready to capitalize the split second.

The reason why Yamaga Blanks continues to focus on in-house production at our domestic factories is to continue delivering reliable partners and weapons to anglers who are dedicated for that split moment. Each fishing rod is painstakingly handcrafted by individual craftsmen. Every moment spent on the fishing rods is dedicated to those anglers in the field. Our mission is to deliver reliable gear to our anglers.

2024 was the year for Yamaga Blanks to return to its roots and begin a new challenge. While we felt a positive response, it was also a year of many changes. Anglers are also constantly evolving in response to the rapidly changing fishing conditions and the surrounding environment. No one can predict what will happen a year from now, but if we don't keep moving forward, there will be no evolution.

Yamaga Blanks will continue to introduce many new products in 2025. The Ballistic series and BlueSniper Boat series have been renewed for the first time in about 10 years. With the latest design and technology in the industry, we will be releasing a diverse lineup of rods including the new BlueCurrent-Wizy series which was designed for greater freedom and enjoyment.

The best fishing rod for anglers who seek that split second moment. Yamaga Blanks continues to take on challenges.

106MMH

1010MH

Seabass is the most familiar lure game fishing target for us. They can be targeted in rivers and estuaries in urban areas, and are great targets for anglers who can easily enjoy it on their way home from work. The Seabass game can be enjoyed in a variety of ways thanks to the evolution of tackle and the establishment of various methods. However, there is a level of difficulty one has to decipher and that is also the profound attraction of this game. For example, when the bait fish the Seabass feed on change, the pattern will change dramatically, creating the feeling that you are targeting a completely different fish. Just to mention rivers, we face different situations from upstream areas to the estuary, and the tackle needed to handle each situation must be altered.

When the field becomes the ocean, even more complex elements become intertwined, and each individual angler seeks something different. Furthermore, there are a wide variety of regional and seasonal patterns in the Seabass game. Even if you don't get any results, you can continue to go to the field and continue to make hypotheses and verify them, and you'll discover the true joy of this game.

By continuing to visit the field, you will notice minute changes, and by making adjustments, you will receive solid results. Although the Seabass game may seem easy and familiar, it also makes you realize how difficult fishing can be and fun at the same time.

Ballistick

Seabass & Surf game / 6 Lineup 

Yamaga Blanks' flagship model, the "Ballistic Series", will be renewed in 2025. This series consists of 6 models, 4 seabass models and 2 surf models, and while each model has its own unique characteristics, it also increases the versatility of the lures that can be used. As a result, we have created a unique and well-balanced lineup that enables a variety of strategies to suit any field, situation, and season.

2025 NEW Ballistick 90 ML-M

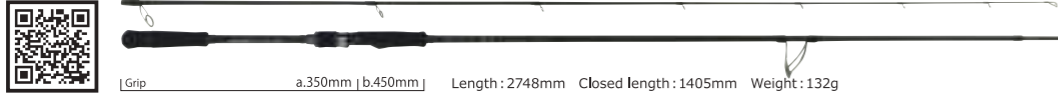

90 ML-M

Pursuing total balance and ready for different methods and situations. A classic seabass model with excellent responsiveness and followability.

The length is set to accommodate a wide range of uses, from seawalls in urban ports to wading games in rivers and tidal flats. The ML class tip provides high sensitivity and the flexibility will capitalize on the bite, while the M class belly to butt section provides both highly responsive operability and long distance casting performance. It has the best responsiveness in the series which can handle a variety of methods and situations, including delicate drift games, soft-plastic games, and plug reaction games.

● Lure: Plug·Jig Head + Worm·Metal Jig·Jig Minnow

Ballistick Series BENDING CURVES

The picture illustrates the bending curve of the Ballistick series with a static load of 1kg applied. This series is not simply categorized by power; each model has its own individuality and specialized performance. Therefore, the degree of bending of the rod clearly represents the characteristics of each model.

*These images are not illustrated on the full potential or characteristics of rods, Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

●90ML-M
The entire rod is designed to bend deeply while providing a light feeling of use. This flexibility allows the rod to absorb the powerful thrashing and dashing of the fish while preventing hook-outs once the seabass get airborne.

●710ML-MH
「As the power description "ML-MH" indicates, the characteristics of this model can clearly be seen in the bending curve. The butt section has the same stiffness as 95MH, and it will not give in to lunger class seabass. On the other hand, when the rod is loaded, the tip to belly section flexibly bends, demonstrating the ability to easily cast lightweight lures, like the 90ML-M.

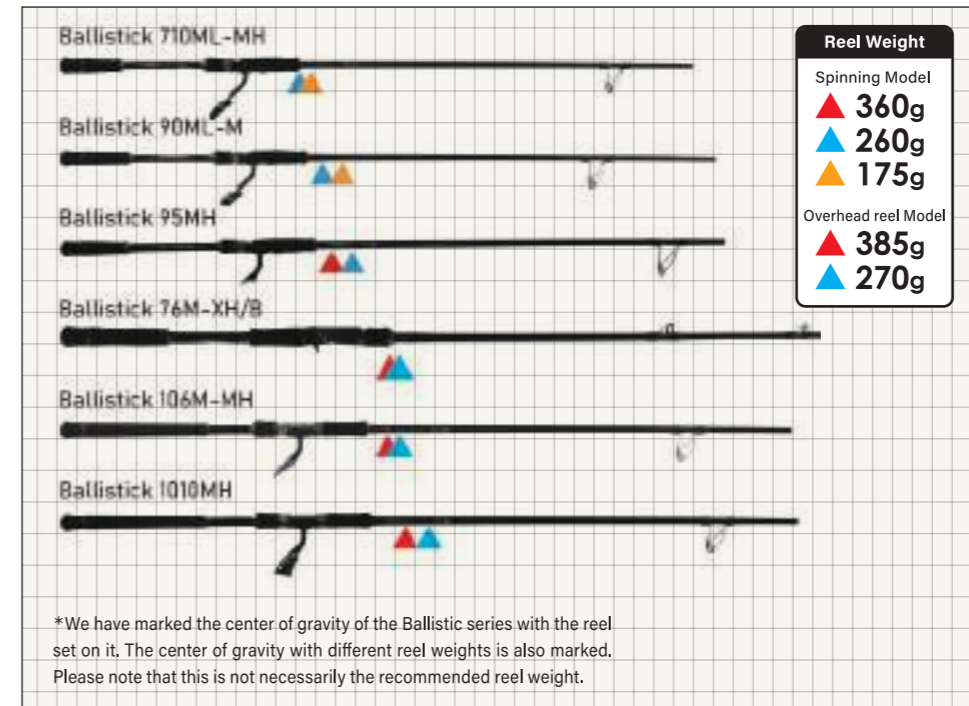

●95MH
It is not only equipped with long-distance castability that allows easy swing through with large minnows, but also exhibits fighting performance that allows anglers to stop lunger-sized fish and reel them closer even in the strongest rapids and currents.

●76M-XH/B
While it boasts a high response when casting and controlling big baits, the flexibility of the tip makes it versatile enough to handle standard-sized minnows as the main lure or as a follow bait.

●106M-MH
In addition to its ability to cast heavy lures long distances in the surf area, its versatility allows anglers to search for break-lines while utilizing finesse lightweight lures.

●1010MH
It is characterized by the stiff butt to belly section, allowing anglers to sharply cast out heavy lures. With its outstanding castability and power to control the fish in the rough seas, it is an ideal rod for anglers to not only target seabass but also black fin seabass off the rocks.

Ballistick Series REEL BALANCE

*We have marked the center of gravity of the Ballistic series with the reel set on it. The center of gravity with different reel weights is also marked. Please note that this is not necessarily the recommended reel weight.

*Sluggish weight at the tip, etc., differs depending on the individual. Please view this as a comparison of the center of gravity when setting reels of different weights.

YAMAGA BLANKS 88 CHAIN

Versatile Model / 1 Lineup

YAMAGA BLANKS

88 CHAIN

This is the creation of a new style. Let's connect the various kind of fishing fields.

This special model was designed to enable anglers to utilize various lures up to 40g to target various species. Even with the light specifications, anglers will easily be able to go head to head with smaller Blue-runners around 3kg. In addition to its lightness, the exquisite 8.8ft length will bring about great advantage to the anglers to find new targets in your local waters. You can go after Blue-runners, snappers, rock-fish, squid, black-fin seabass from the rocks, migratory species, flat-fish and seabass from the surf and monstrous seabass in the river mouths. This one rod will enable you to go after many different species in your local waters.

PRICE :
LURE : 8~40g
LINE : PE 0.8~2

- Recommended Lure: Metal jig - Minnow - Top water plug
- Recommended Lure: Metal jig - Wind type Jig head - Egi from #3.5 etc.

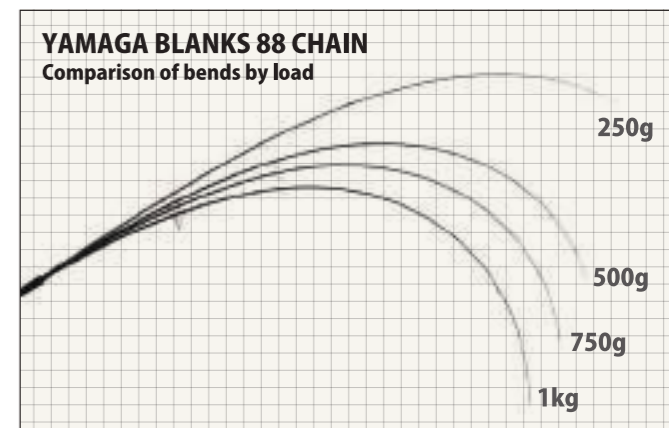

About YB88 CHAIN variable taper action

The YB88 CHAIN uses a wide range of lures and, of course, targets. To enjoy all of them without stress, the blank design has what can be described as a "variable taper action" in which the bend and power change gears depending on the load.

As a versatile model, the 2nd powered gear (the apex of the bend) plays an active role in handling various lure sizes and types. When casting a small lure or casting with a small form, it will enter the 1st powered gear and push the lure smoothly. Next, when casting a jig or plug such as heavyweight with a pendulum, bend from the second-stage powered gear and push out the lure with even stronger force.

The same applies to fights. In the case of small targets such as black porgy, the 1st powered gear is effective, and the flexibility of blanks that bend smoothly enables you to set the hook in the target's mouth surely while reducing the risk of letting it off the hook. Furthermore, in the case of a large target exceeding 3 kg, the 2nd powered gear on the butt section is activated. A huge power is activated from the butt section while bending smoothly, and it transforms into a rod that stands out for its excellent performance that allows you to control it as you wish without losing the initiative to the target. This variable taper action is the main feature of the YB88 CHAIN, and it's what sets it apart from the usual versatile models.

Comparison of bending of YB88 CHAIN with 4 levels of load in 250 g increments. The bending changes significantly from low load to higher load. As mentioned in the variable double taper design in the text, the moment the bending increases, a large power of recovery is created. The larger the bending of the static load, the greater the power of recovery.

BlueSniper Shore-Casting

Shore Casting Series / 5 Lineup **BLUESNIPER**

Blue Sniper shore casting series from Yamaga Blanks which aims to be a tool that will inspire anglers in tough fields, pursuing ease of casting and handling to the utmost. Although power tends to be emphasized in games to aim blue runner from rocky shore, the essence is "casting performance". It has the ability to keep casting all day long without any stress, has a stable distance when casting long range, and has the ability to handle a variety of lures. Outstanding basic performance lead anglers to success in rough and tough fields.

All-rounder type: Highly versatile model that can be used with jigs and plugs.

BlueSniper
**103
ML-M**

This model is a highly versatile model able to cover various situations in your local waters with its finesse characteristics.

Anglers will be able to utilize light PE1.5~2 line to conquer the tough high-pressure fields or small bait fish patterns. The flexible ML class tip will enable anglers to easily cast out small 20~40g jigs and smaller seabass hard lures for a more finesse approach while the M class butt power can allow for a more speedy power game against your targets in crowded and rugged areas using PE3. The fusing of the contradicting characteristics of torque required to overcome the thrashing blue runners and lightness for anglers to continuously maintain concentration throughout the day will assist you on your next adventure out to the rocks.

PRICE :

Minnow · Metal jig

BlueSniper
**100
M-MH**

This is a highly well-balanced model with castability, controllability and fighting performance all fused together.

MH class rods are the main strength rod used for those anglers targeting blue runners off the rocks and the 10ft standard length set for the model will allow anglers to continuously cast throughout the day stress free while lightly cast and control the lure with ease. The wide release point when casting helps anglers consistently cast long distances and the soft tip yet powerful butt section will enable anglers to utilize various plugs and control the jigs. It is the most versatile model of the series and will not only be effective as your main rod in your local waters, but also great as a spare rod for your more exotic adventures for bigger and better fish.

All-rounder extreme type: Specialized for high general performance and high response

BlueSniper
**96
H**

The new high power and highly responsive H class blank allows you to utilize a wide range of lures lightly and freely.

While possessing the power of an H class rod, the 9ft class blank has been engineered to be thin, light, and recovered speed and powerfully for anglers to be able to swing around with ease. Anglers will be pleasantly surprised with its ability to easily cast heavy weighing jigs and lightly maneuver these jigs with your rod action. It is not simply a stiff model. Whereas anglers will be able to manually control various types of hard lures responsively and the bending curve of the blank will help you efficiently lift the fish to the surface. It is the next generation of H class rods enabling anglers to create new styles of fishing.

Large minnow · Diving pencil

Type : PL (Plug)

Plug Type: A model that emphasizes smooth, well-mixed action when using a diving pencil

BlueSniper
**PL109
MH**

This is a technical model specializing in plugging that combines the precision action of a diving pencil and the power with the long cast performance.

While the 11ft length has given the rod outstanding casting distance, the well-balanced rod will allow anglers lightly control their hard lures with ease. The tip is flexible for anglers to smoothly control the diving pencils while the powerful butt section will shut out the thrashing of the fish. These combined attributes will be of great advantage to anglers in sticky situations where the large target species are reluctant to bite and require continued concentration from the angler. It is an ideal model for the hardcore anglers who want to allure the fish with surface and sub surface lures.

BlueSniper
**PL106
H**

This is a high power plugging model that uses medium to large plugs to capture large blue runner. It does not give the initiative even in a power game.

We were after a high powered model especially designed for anglers to lightly and smoothly cast our large size hard bodied lures around 100g. The original design and material used for the blank will enable anglers to cast large lures all day long with ease and consistently cast long distances. The powerful and resilient blank will bend in and once loaded, it is designed to withstand the powerful thrashing of the enormous fish. It is an ideal rod for the harshest situations off the rocks, shallow areas and your exotic trips to remote islands to target the monstrous fish.

PRICE :
LURE : **Plug 50~120g**
Jig Comfort ~100g
LINE : **Max PE 6**
DRAG : **Max 8kg/45°**

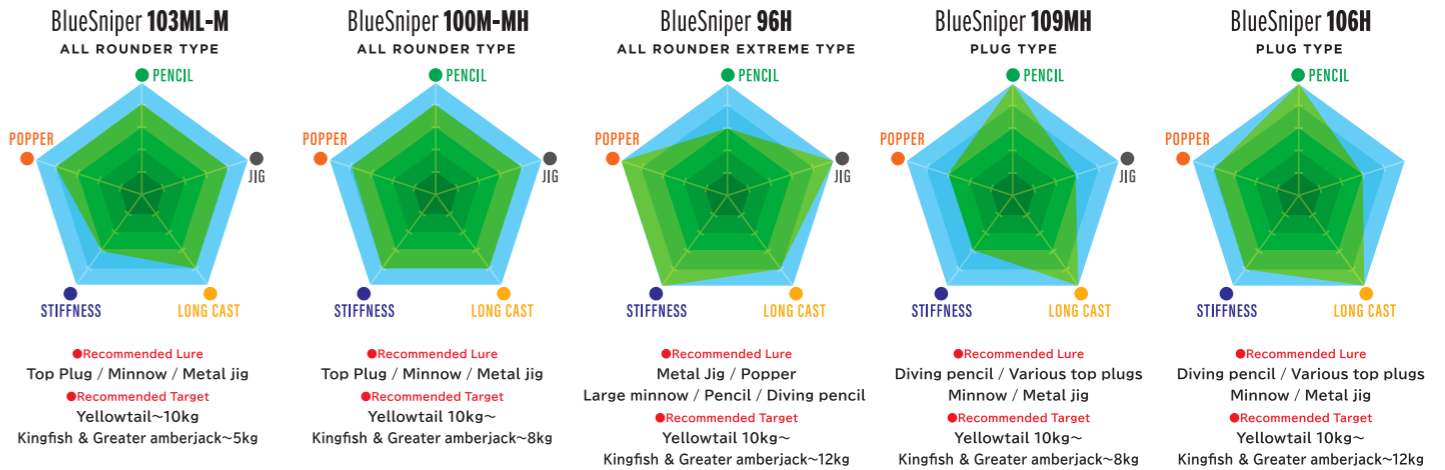

Spinning Model / 2pcs (Spigot Ferrule)
Guide: Super Ocean guide (Fuji)
Reel seat: DPS20 (Fuji) -Up lock
● Suitable reel size : S-D: 8000~14000
● Recommended Target : Yellow tail 10kg~
Kingfish & Greater amberjack ~12kg
● Recommended Lure: Diving pencil
Various top plug · Minnow · Metal jig

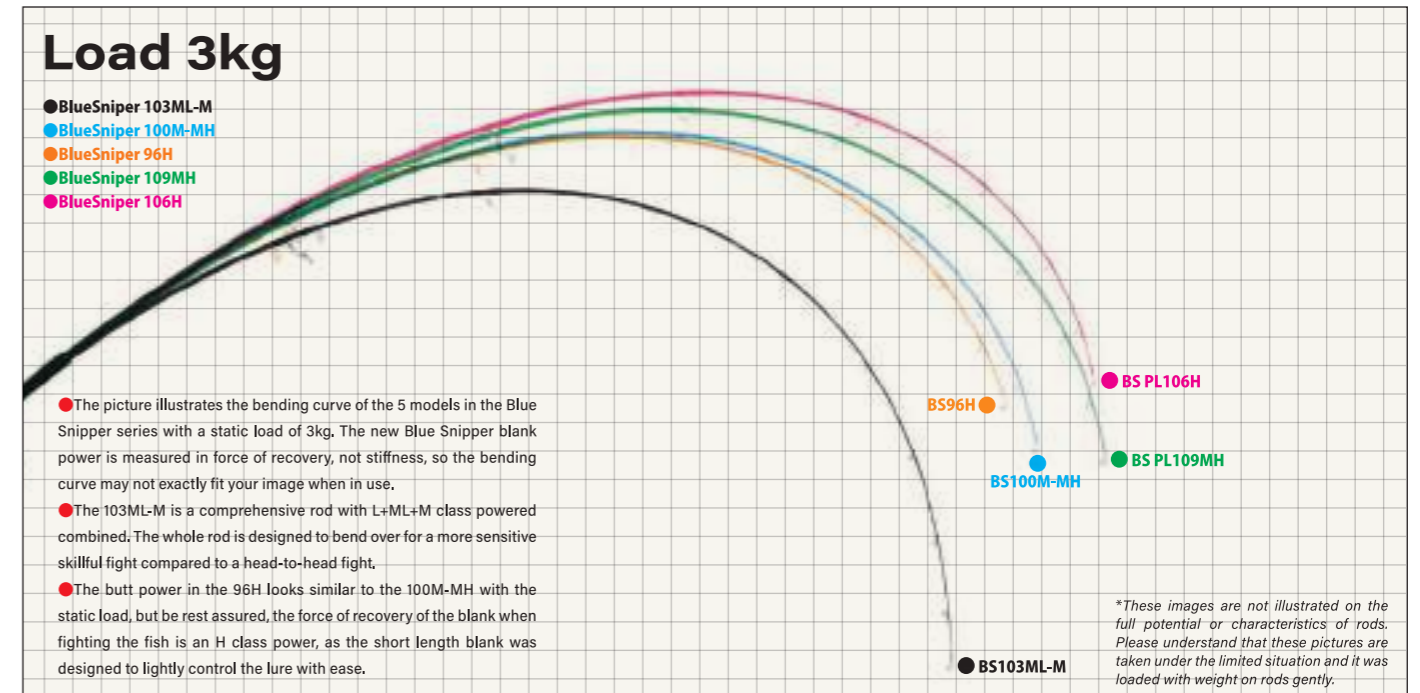

BlueSniper RADAR CHART COMPARISON

PENCIL · Movability of diving pencils with emphasis on water
JIG · Easy to manipulate quick and continuous action of metal jig
POPPER · Ease of splashing and bubbling popper type lure
STIFFNESS · Tips that bends but is sharpness with high power of recovery
LONG CAST · All models have distance cast performance, but total distance cast performance including large plugs totally

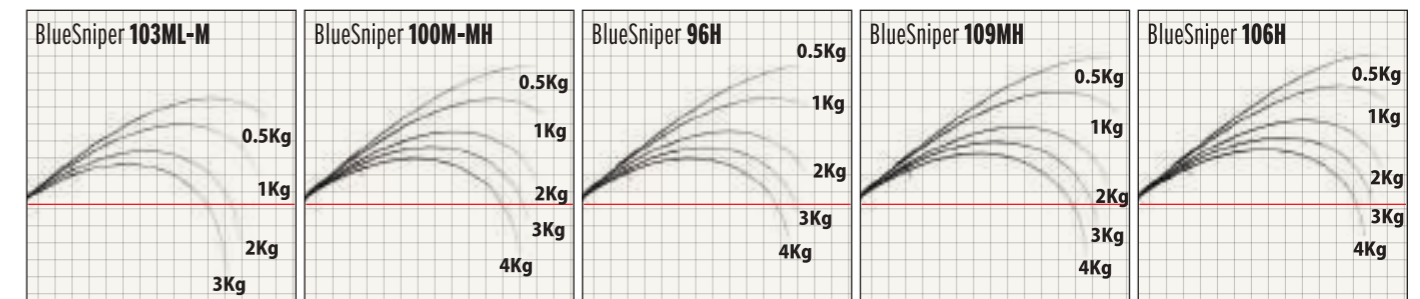

These five items do not represent all of the rods. Depending on the length, etc., the feeling of the angler used will change. Please use this as a guide.

LIGHT GAME CATEGORY

BlueCurrent Wizzy / Light Game Model / 5 Lineup

“More fun and more freestyle with Wizzy!”

The 5 models of the BlueCurrent Wizzy series were developed to bring more fun and freedom to your light game. The naming “Wizzy” comes from the word “Whizzy,” which means “to have extraordinary talent.” The multi-piece model released this year is not only highly portable, but also comparable to the two piece models.

The series lineup consists of 5 models in total: 3 models (610, 710 and 810) in the versatile series, and 2 models (72 and 72B) in the highly responsive series, all of which are 4-piece (4-piece) models with excellent portability. The three models in the Versatile series are highly versatile multi-piece models that have mild user feel where anglers can utilize simple jigs to hard bodied lures.

We have thoroughly refined the basic performance necessary for “casting, control, and fighting”.

The two multi piece models in the highly responsive series adopt a highly repulsive blank design and have been designed to emphasize sharper lure action. They specialize in attracting fish through sharp actions of jerk baits, minnows, metal jigs, and the winding technique. The bait casting model is also recommended for those who want to enjoy both shore casting and boat casting with the same tackle while traveling.

Only the “BlueCurrent” can exceed the “BlueCurrent”.

The BlueCurrent series has undergone a model change, with settings that allow anglers to enjoy “bending and catching”. From light targets to the unexpected monstrous fish, it is a rod designed to free anglers from any restrictions towards style, species or even methods. With each successive development, the BlueCurrent series have evolved into an “angler-first rod.”

The multi piece model of the BlueCurrent Wizzy series is a flagship light game model that embodies portability and functionality at a high level, and is the first of the new “BlueCurrent” series that aims to surpass the previous “BlueCurrent” and reach even higher heights.

- Lure : Jighead · Plug · Rig · Metal Jig · Egi

A long range model with combined characteristics of power, castability, finesse and high sensitivity.

This is a model to tackle long-distance areas with its delicate and high-powered characteristics. It will help anglers in all situations that require long distance casting, from ports to surf, rivers, and lakes. In particular, it ensures sufficient casting distance even in ultra far casting games using sinkers and carolina rigs. In addition, this model is suitable for targets utilizing small bodied lures in the suburban areas. The unique finesse pattern where seabass feed on small sandworms or firefly squid would be ideal with this rod.

BlueCurrent Wizzy ROD BAG DETAIL

BlueCurrent Wizzy comes with a special nylon rod bag. Available in four sizes depending on the length of the rod, it is useful for both carrying and storing. Rods can be stored in separate sections and has two pockets for storing small items needed for your fishing trips. A resin protection plate is built into the rod storage surface, and when the bag is rolled up, it provides protection similar to that of a semi-hard case. This is an original bag that can be folded in half or rolled up.

※Please note that specifications of rod bag might be changed without notice.

BlueCurrent Wizzy 2WAY STYLE BAG

When folded in half, you can store small items and carry it around with the handle.
 *Please note that if you tilt the handle side down, the rod may pop out.

By rolling up the bag, the handle will be stored on the inside and can be placed in suitcases or backpacks for your travels.

BlueCurrent Wizzy BENDING CURVES

The illustration shows the comparison of different models in the BlueCurrent Wizzy multi piece series with a static load of 250g. The versatile models 610, 710, and 810 are characterized by flexible bendy blanks. 72S and 72B are focused on the high responsiveness for lure operability equipped with a sharp blank design throughout the rod.

● Wizzy610
 The stiffness in the tip section has been reduced for easier control of jigs and micro plugs. It features seamless fighting performance typical of BlueCurrent series, allowing you to enjoy the flexibility of the blank once it is loaded with the fish.

● Wizzy710
 We have equipped the rod with sufficient stiffness from the tip to the belly section so that anglers can utilize light Carolina rigs, top water/bottom bumping for bream and light rock fish games.

● Wizzy810
 This model has been designed with stiffness for anglers to perform long casts targeting light to middle class species. The tip section has been built with flexibility to reduce miss-bites and anglers can utilize floating rigs and light sinking pencils

● Wizzy72S&72B
 These models are built up with the same blank and can be characterized by their easy handling and outstanding operability of lures for use off boats or land-based fishing. It is designed to have a stronger overall stiffness compared to the Wizzy710.
