PASSION FOR THE MISSION

YAMAGA Blanks ROD COMPANY

2025

For that one moment.

In fishing, the most important moment that affects the fishing result is timing. That moment when the tide starts moving, birds start circling and fish begin to move actively, making the angler's heart pound. In order not to fail at the moment of truth, you must be fully prepared.

Modern fishing techniques have evolved in each genre, allowing for a variety of ways to approach your target. However, the reality is that the target fish are also harder to catch these days. That's why it's most important to be ready to capitalize the split second.

The reason why Yamaga Blanks continues to focus on in-house production at our domestic factories is to continue delivering reliable partners and weapons to anglers who are dedicated for that split moment. Each fishing rod is painstakingly handcrafted by individual craftsmen. Every moment spent on the fishing rods is dedicated to those anglers in the field. Our mission is to deliver reliable gear to our anglers.

2024 was the year for Yamaga Blanks to return to its roots and begin a new challenge. While we felt a positive response, it was also a year of many changes. Anglers are also constantly evolving in response to the rapidly changing fishing conditions and the surrounding environment. No one can predict what will happen a year from now, but if we don't keep moving forward, there will be no evolution.

Yamaga Blanks will continue to introduce many new products in 2025. The Ballistic series and BlueSniper Boat series have been renewed for the first time in about 10 years. With the latest design and technology in the industry, we will be releasing a diverse lineup of rods including the new BlueCurrent-Wizy series which was designed for greater freedom and enjoyment.

The best fishing rod for anglers who seek that split second moment. Yamaga Blanks continues to take on challenges.

Seabass is the most familiar lure game fishing target for us. They can be targeted in rivers and estuaries in urban areas, and are great targets for anglers who can easily enjoy it on their way home from work. The Seabass game can be enjoyed in a variety of ways thanks to the evolution of tackle and the establishment of various methods. However, there is a level of difficulty one has to decipher and that is also the profound attraction of this game. For example, when the bait fish the Seabass feed on change, the pattern will change dramatically, creating the feeling that you are targeting a completely different fish. Just to mention rivers, we face different situations from upstream areas to the estuary, and the tackle needed to handle each situation must be altered. When the field becomes the ocean, even more complex elements become intertwined, and each individual angler seeks something different. Furthermore, there are a wide variety of regional and seasonal patterns in the Seabass game. Even if you don't get any results, you can continue to go to the field and continue to make hypotheses and verify them, and you'll discover the true joy of this game. By continuing to visit the field, you will notice minute changes, and by making adjustments, you will receive solid results. Although the Seabass game may seem easy and familiar, it also makes you realize how difficult fishing can be and fun at the same time.

Ballistick

Seabass & Surf game / 6 Lineup 

Yamaga Blanks' flagship model, the "Ballistic Series", will be renewed in 2025. This series consists of 6 models, 4 seabass models and 2 surf models, and while each model has its own unique characteristics, it also increases the versatility of the lures that can be used. As a result, we have created a unique and well-balanced lineup that enables a variety of strategies to suit any field, situation, and season.

2025 NEW Ballistick 90 ML-M

Pursuing total balance and ready for different methods and situations. A classic seabass model with excellent responsiveness and followability.

The length is set to accommodate a wide range of uses, from seawalls in urban ports to wading games in rivers and tidal flats. The ML class tip provides high sensitivity and the flexibility will capitalize on the bite, while the M class belly to butt section provides both highly responsive operability and long distance casting performance. It has the best responsiveness in the series which can handle a variety of methods and situations, including delicate drift games, soft-plastic games, and plug reaction games.

2025 NEW Ballistick 76/B M-XH

A new generation bait casting model that can handle 12cm class lures to big-bait lures.

M+XH is a special concept power class model which is capable of handling a variety of lures and line specifications. When using PE4 to 5 with big baits, the blank absorbs the heavy load, and its strong restoring force allows for highly accurate casting and long distance casting. When loading it up with PE2-3, anglers will be able to utilize standard size lures as follow baits to induce that difficult bite. This new style of bait-casting model has been developed to make sure you catch what you hook-up!

2025 NEW Ballistick 1010 MH

Super long distance model specialized for super long distance casting.

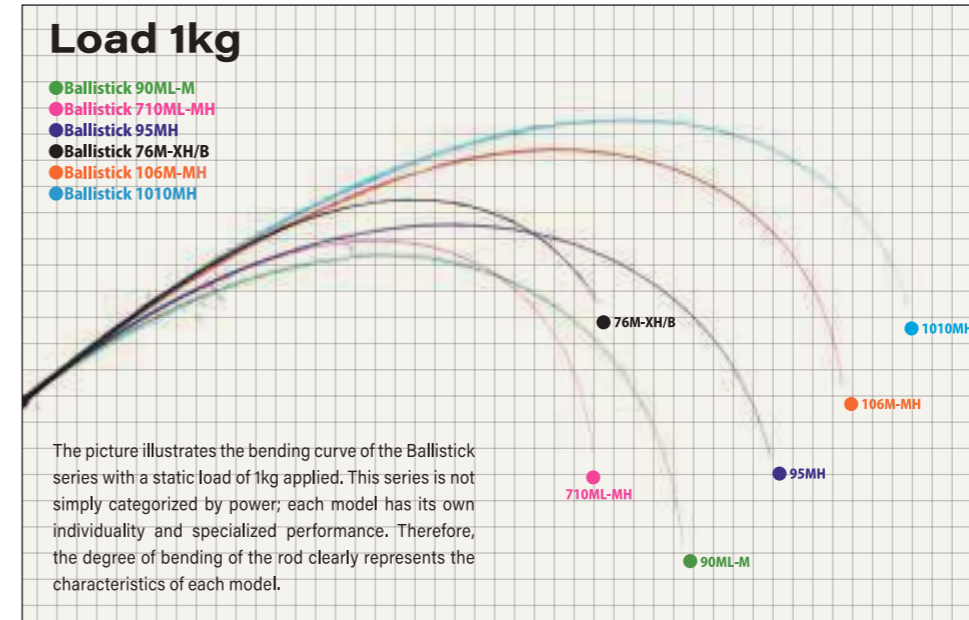

This is a blank designed for pure casting distance in the vast surf which at times can be tough, to say the least, but also harsh on the anglers' body due to the long duration of fishing. Although it is a long rod, anglers will be able to swiftly cast out heavy weight jigs and jig-minnows for seabass, flatfish and even the powerful blue-runners in the vast surf with strong head-winds. This is the long awaited highly powerful super long casting model for the hardcore surf-fishing enthusiast.

Ballistick Series BENDING CURVES

*These images are not illustrated on the full potential or characteristics of rods, Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

●90ML-M
The entire rod is designed to bend deeply while providing a light feeling of use. This flexibility allows the rod to absorb the powerful thrashing and dashing of the fish while preventing hook-outs once the seabass get airborne.

●710ML-MH
[As the power description "ML-MH" indicates, the characteristics of this model can clearly be seen in the bending curve. The butt section has the same stiffness as 95MH, and it will not give in to lunger class seabass. On the other hand, when the rod is loaded, the tip to belly section flexibly bends, demonstrating the ability to easily cast lightweight lures, like the 90ML-M.

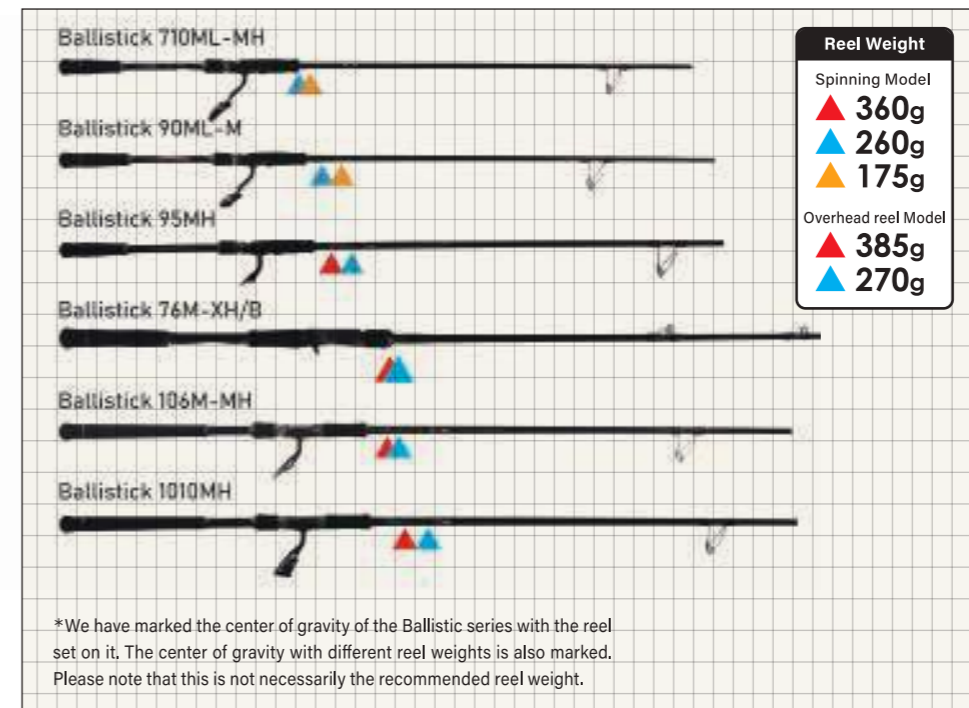

●95MH
It is not only equipped with long-distance castability that allows easy swing through with large minnows, but also exhibits fighting performance that allows anglers to stop lunger-sized fish and reel them closer even in the strongest rapids and currents.

●76M-XH/B
While it boasts a high response when casting and controlling big baits, the flexibility of the tip makes it versatile enough to handle standard-sized minnows as the main lure or as a follow bait.

●106M-MH
In addition to its ability to cast heavy lures long distances in the surf area, its versatility allows anglers to search for break-lines while utilizing finesse lightweight lures.

●1010MH
It is characterized by the stiff butt to belly section, allowing anglers to sharply cast out heavy lures. With its outstanding castability and power to control the fish in the rough seas, it is an ideal rod for anglers to not only target seabass but also black fin seabass off the rocks.

Ballistick Series REEL BALANCE

*Sluggish weight at the tip, etc., differs depending on the individual. Please view this as a comparison of the center of gravity when setting reels of different weights.

●710ML-MH
This model, which is characterized by outstanding operability, is balanced to have the load closer to the anglers' body so that you can easily control the rod. This has greatly improved the operability of the lure. Since the weight of the rod feels drastically lighter, this will reduce the load on the angler when working the rod hard.

●1010MH
The disadvantage of long length rods are their sluggish weight at the tip. This can be a serious disadvantage for the anglers in situations that require physical endurance, such as long fishing trips or running around different locations. The 1010MH is a model that anglers can swing so lightly that it's hard to believe it's 10ft10in long, while making it easy to cast super long distances. As a result of careful attention to rod balance, the weight balance has been set close to the hand even when a relatively lightweight reel is set. This is the secret to the light weight feel of the rod and the reason why we call the 1010MH the next generation of surf rods!

●90ML-M / 95MH / 106M-MH
These three models are compatible with a wide range of reel weights and are well-balanced and highly versatile. You can use them comfortably, from simple reeling of the lure or anglers who want to animate their lures with plenty of rod work.

●76M-XH/B
Due to specific characteristics of bait-casting models, they tend to have the weight balance closer towards the anglers. However, as this model is designed to handle large lures, we paid close attention to its balance.

2025 NEW MODEL
EARLY
for Boat
510ML

EARLY for Boat

Boat Casting Model / 3 Lineup **EARLY** for Boat

EARLY for Boat series is to enjoy the game of Black porgy, Seabass, Small blue runner, Flat fish, and Rock fish on inshore. The 2025 new product "510ML" is a model with excellent operability and maneuverability to aim Spanish mackerel, Seabass or Black porgy. Although it is an aggressive model that intentionally makes them bite the minnow by jerking it, it bends deeply after hooking, so you can enjoy the fight fully even if it is small size.

EARLY for Rock

Rock Fish Model / 3 Lineup **EARLY** for Rock

In the pursuit to develop the Early for Rock, we asked ourselves "What is the Rockfish game?". The blanks not only have strength and lightness but also have a highly efficient ability to restore its original form. In other words, the bent blank will flex back to its straight form, peeling the fish off the bottom and other structures efficiently. The stiff yet sensitive tips are highly sensitive to any changes in sea conditions while being versatile, enabling anglers to utilize various types of rigs and styles of fishing.

For more details of category
YB Official Web site

The EARLY for Mobile models are multi piece mobile pack rods which are able to separate into 3-4 pieces. These rods were developed to feel like a 2-piece rod as we refused to sacrifice the rod's performance in exchange for mobility. The rod's superior performances will not only assist the angler's fishing but the mobility has also added a new meaning to "versatility". When in your fishing grounds, we are limited in what we can use. The compact rod can easily be carried around stress free on bikes, bicycles and other public transports which you may use to access your fishing grounds in large cities.

For more details of category
YB Official Web site

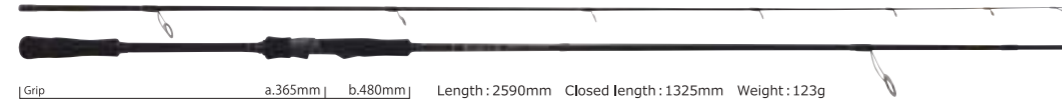

EARLY 86 MH for Rock

High-response model for efficiently searching the Rocky area with a length focusing on handling.

The blank for this model is exceptionally well balanced for both casting and maneuvering while also possessing tremendous sensitivity. Anglers will not only be able to utilize swimming actions of jig-head rigs but also utilize Texas rigs and feel for bottom structures and material. The adequately stiff belly section will transmit your bite and rip the fish off the bottom and structures right away. This sharp blank is also suitable for use in the "wind game" targeting hair-tails and "jerking methods" productive for seabass.

PRICE :
LURE : 7~40g
LINE : PE 1~2

● Target: Rockfish - Seabass - Hairtail
● Lure: Jighead - Texas rig - Minnow - Vibrations

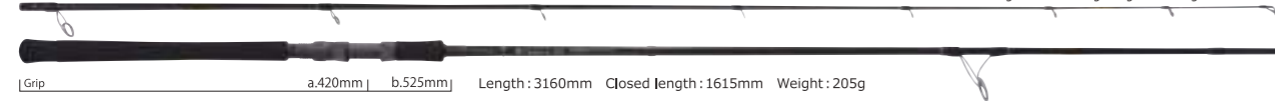

EARLY 104 H for Rock

This is excellent in power, castability, and sensitivity. it is not only stiff but also has a flexibility and recovery force on blank.

This long length high powered model was designed for casting distance and sensitivity. The "soft" aspect of the blank can be attributed to the line settings (PE#1), while the "hard" can be felt in its ability to take the load of heavy weight rigs and max drag settings. Anglers will be able to reach those grounds where others have yet to reach. You will be able to utilize various rigs ranging from soft plastics, swim baits, metal jigs and even minnows above 14cm to go head to head with monstrous rock fish and other blue-runners that you may randomly encounter.

PRICE :
LURE : 15~60g

EARLY for Seabass

Seabass Model / 2 Lineup **EARLY** for Seabass

What we seek in a seabass rod at Yamaga Blanks is "standard characteristics" for anyone to easily use. Our designs focus on tolerant release point for everyone to be able to cast long distances with the least amount of effort while retaining the lightness for all day long casting and sensitivity to capitalize on the smallest bites. Once hooked, the blanks will bend in nicely to reduce any hook-offs generally caused by blanks that are too stiff. The EARLY for Seabass models are value for money considering the quality of the rods.

For more details of category
YB Official Web site

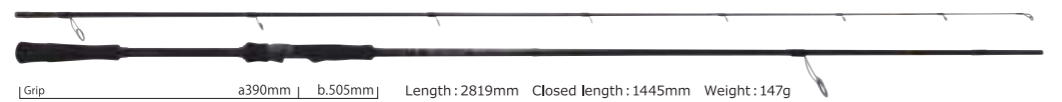

EARLY 93 M for Seabass

The versatile model with excellent ability to aim while searching a wide range of ports and embankments from river estuaries.

The all-rounder model is a valuable asset for situations which require you to cast long distances in rivers and piers. It is especially responsive to metal type vibration lures which have are highly resistant. The light feel when reeling in your lure will enable you to focus on your fishing while reducing the load on your wrist. Once the fish is hooked, the blank will bend in nicely and will allow you to handle and efficiently landing.

PRICE :
LURE : 7~35g

 Recommended Lure : Metal jig + Minnow + Top water plug + Jig head + "Wind" type Jig head + Egi from #3.5 etc.

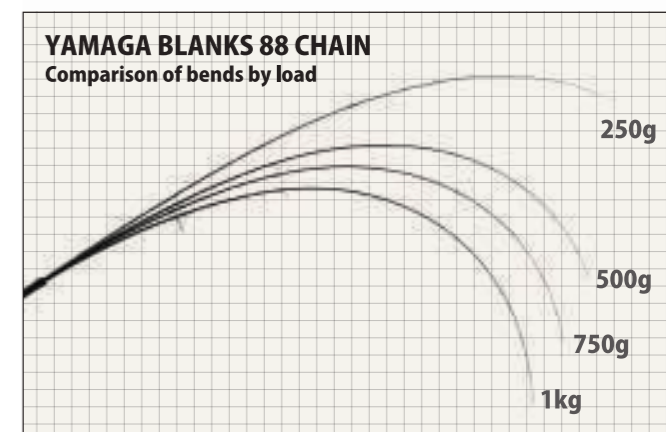

About YB88 CHAIN variable taper action

The YB88 CHAIN uses a wide range of lures and, of course, targets. To enjoy all of them without stress, the blank design has what can be described as a "variable taper action" in which the bend and power change gears depending on the load.

As a versatile model, the 2nd powered gear (the apex of the bend) plays an active role in handling various lure sizes and types. When casting a small lure or casting with a small form, it will enter the 1st powered gear and push the lure smoothly. Next, when casting a jig or plug such as heavyweight with a pendulum, bend from the second-stage powered gear and push out the lure with even stronger force.

The same applies to fights. In the case of small targets such as black porgy, the 1st powered gear is effective, and the flexibility of blanks that bend smoothly enables you to set the hook in the target's mouth surely while reducing the risk of letting it off the hook. Furthermore, in the case of a large target exceeding 3 kg, the 2nd powered gear on the butt section is activated. A huge power is activated from the butt section while bending smoothly, and it transforms into a rod that stands out for its excellent performance that allows you to control it as you wish without losing the initiative to the target. This variable taper action is the main feature of the YB88 CHAIN, and it's what sets it apart from the usual versatile models.

Comparison of bending of YB88 CHAIN with 4 levels of load in 250 g increments. The bending changes significantly from low load to higher load. As mentioned in the variable double taper design in the text, the moment the bending increases, a large power of recovery is created. The larger the bending of the static load, the greater the power of recovery.

BlueSniper Shore-Casting

Shore Casting Series / 5 Lineup **BLUESNIPER**

Blue Sniper shore casting series from Yamaga Blanks which aims to be a tool that will inspire anglers in tough fields, pursuing ease of casting and handling to the utmost. Although power tends to be emphasized in games to aim blue runner from rocky shore, the essence is "casting performance". It has the ability to keep casting all day long without any stress, has a stable distance when casting long range, and has the ability to handle a variety of lures. Outstanding basic performance lead anglers to success in rough and tough fields.

All-rounder type: Highly versatile model that can be used with jigs and plugs.

BlueSniper
**103
ML-M**

This model is a highly versatile model able to cover various situations in your local waters with its finesse characteristics.

Anglers will be able to utilize light PE1.5~2 line to conquer the tough high-pressure fields or small bait fish patterns. The flexible ML class tip will enable anglers to easily cast out small 20~40g jigs and smaller seabass hard lures for a more finesse approach while the M class butt power can allow for a more speedy power game against your targets in crowded and rugged areas using PE3. The fusing of the contradicting characteristics of torque required to overcome the thrashing blue runners and lightness for anglers to continuously maintain concentration throughout the day will assist you on your next adventure out to the rocks.

PRICE :

Minnow · Metal jig

BlueSniper
**100
M-MH**

This is a highly well-balanced model with castability, controllability and fighting performance all fused together.

MH class rods are the main strength rod used for those anglers targeting blue runners off the rocks and the 10ft standard length set for the model will allow anglers to continuously cast throughout the day stress free while lightly cast and control the lure with ease. The wide release point when casting helps anglers consistently cast long distances and the soft tip yet powerful butt section will enable anglers to utilize various plugs and control the jigs. It is the most versatile model of the series and will not only be effective as your main rod in your local waters, but also great as a spare rod for your more exotic adventures for bigger and better fish.

All-rounder extreme type: Specialized for high general performance and high response

BlueSniper
**96
H**

The new high power and highly responsive H class blank allows you to utilize a wide range of lures lightly and freely.

While possessing the power of an H class rod, the 9ft class blank has been engineered to be thin, light, and recovered speed and powerfully for anglers to be able to swing around with ease. Anglers will be pleasantly surprised with its ability to easily cast heavy weighing jigs and lightly maneuver these jigs with your rod action. It is not simply a stiff model. Whereas anglers will be able to manually control various types of hard lures responsively and the bending curve of the blank will help you efficiently lift the fish to the surface. It is the next generation of H class rods enabling anglers to create new styles of fishing.

Large minnow · Diving pencil

Type : PL (Plug)

Plug Type: A model that emphasizes smooth, well-mixed action when using a diving pencil

BlueSniper
**PL109
MH**

This is a technical model specializing in plugging that combines the precision action of a diving pencil and the power with the long cast performance.

While the 11ft length has given the rod outstanding casting distance, the well-balanced rod will allow anglers to lightly control their hard lures with ease. The tip is flexible for anglers to smoothly control the diving pencils while the powerful butt section will shut out the thrashing of the fish. These combined attributes will be of great advantage to anglers in sticky situations where the large target species are reluctant to bite and require continued concentration from the angler. It is an ideal model for the hardcore anglers who want to allure the fish with surface and sub surface lures.

BlueSniper
**PL106
H**

This is a high power plugging model that uses medium to large plugs to capture large blue runner. It does not give the initiative even in a power game.

We were after a high powered model especially designed for anglers to lightly and smoothly cast our large size hard bodied lures around 100g. The original design and material used for the blank will enable anglers to cast large lures all day long with ease and consistently cast long distances. The powerful and resilient blank will bend in and once loaded, it is designed to withstand the powerful thrashing of the enormous fish. It is an ideal rod for the harshest situations off the rocks, shallow areas and your exotic trips to remote islands to target the monstrous fish.

PRICE :
LURE : **Plug 50~120g**
Jig Comfort ~100g
LINE : **Max PE 6**
DRAG : **Max 8kg/45°**

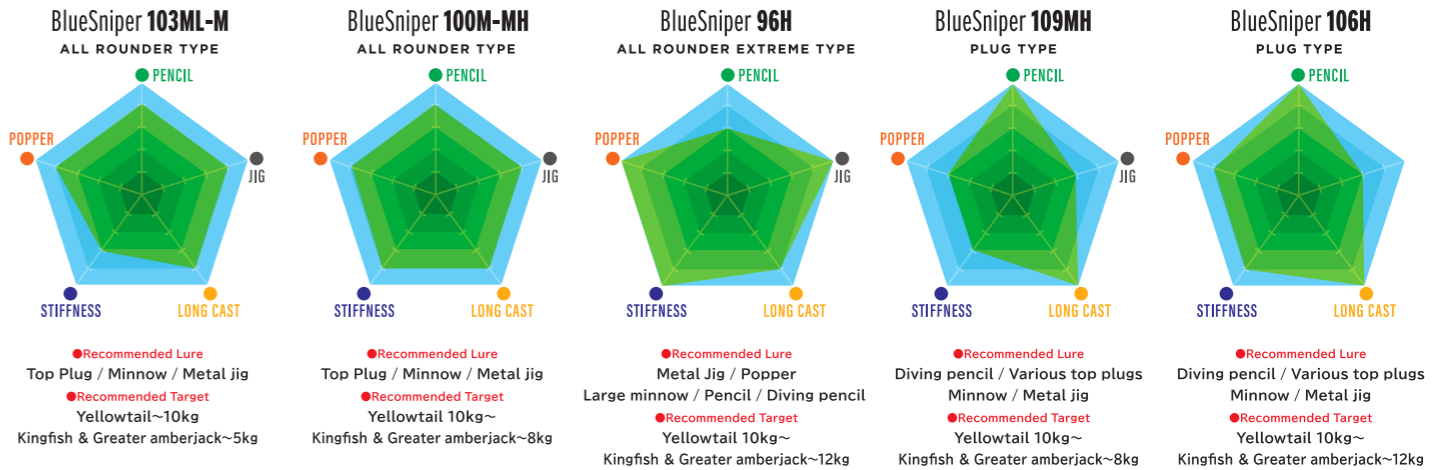

Spinning Model / 2pcs (Spigot Ferrule)
Guide: Super Ocean guide (Fuji)
Reel seat: DPS20 (Fuji) -Up lock
● Suitable reel size: S-D: 8000~14000
● Recommended Target : Yellow tail 10kg~
Kingfish & Greater amberjack ~12kg
● Recommended Lure: Diving pencil
Various top plug · Minnow · Metal jig

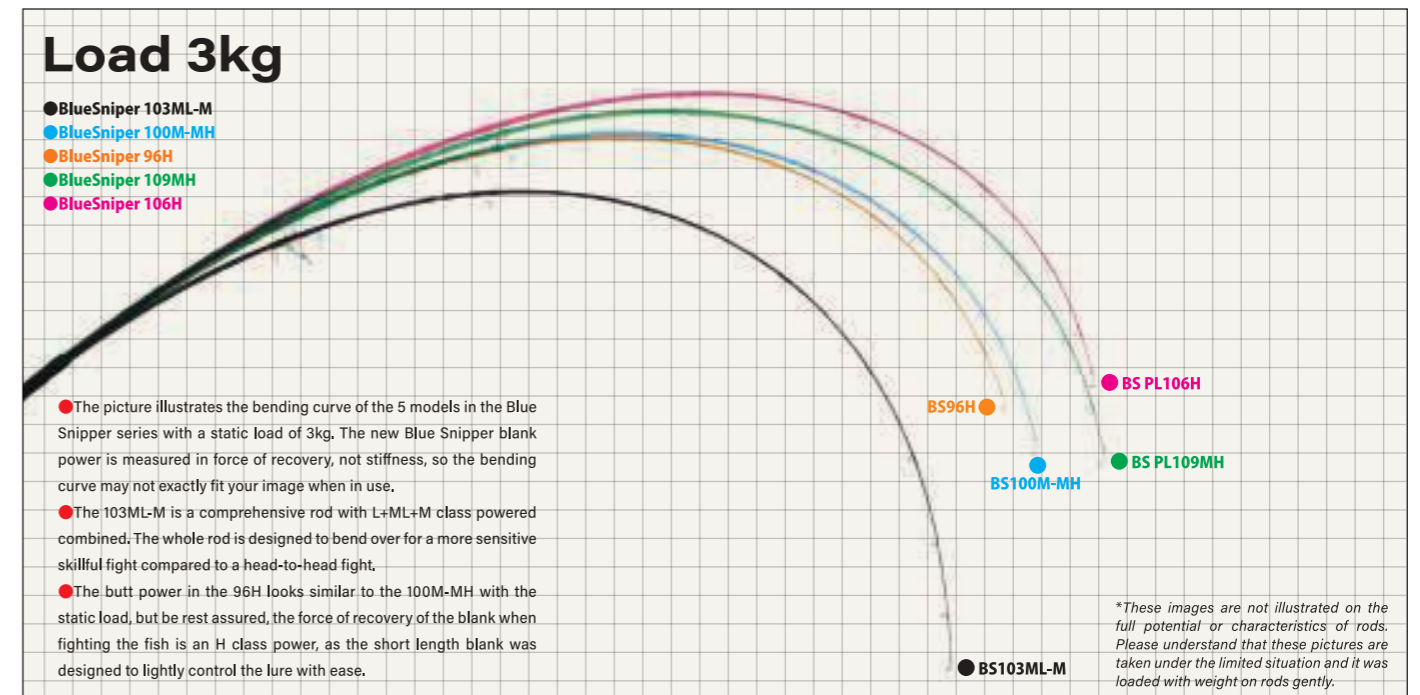

BlueSniper RADAR CHART COMPARISON

PENCIL · Movability of diving pencils with emphasis on water
JIG · Easy to manipulate quick and continuous action of metal jig
POPPER · Ease of splashing and bubbling popper type lure
STIFFNESS · Tips that bends but is sharpness with high power of recovery
LONG CAST · All models have distance cast performance, but total distance cast performance including large plugs totally

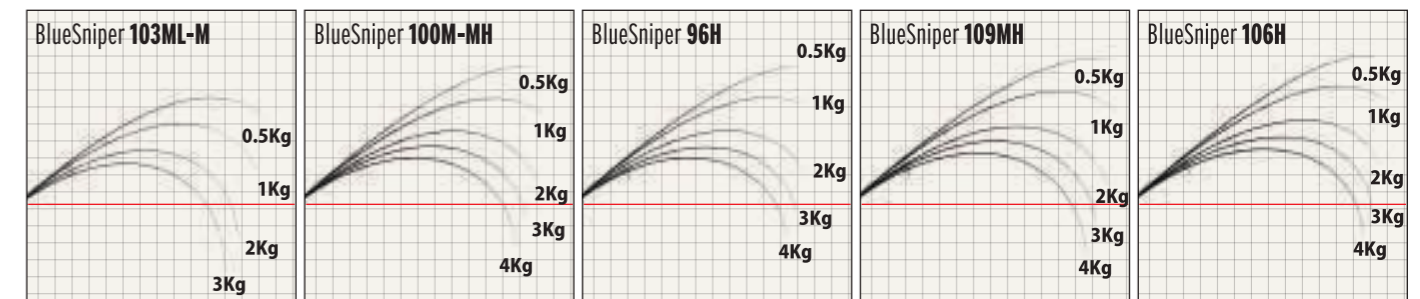

These five items do not represent all of the rods. Depending on the length, etc., the feeling of the angler used will change. Please use this as a guide.

LIGHT GAME CATEGORY

BlueCurrent Wizzy / Light Game Model / 5 Lineup

“More fun and more freestyle with Wizzy!”

The 5 models of the BlueCurrent Wizzy series were developed to bring more fun and freedom to your light game. The naming “Wizzy” comes from the word “Whizzy,” which means “to have extraordinary talent.” The multi-piece model released this year is not only highly portable, but also comparable to the two piece models.

The series lineup consists of 5 models in total: 3 models (610, 710 and 810) in the versatile series, and 2 models (72 and 72B) in the highly responsive series, all of which are 4-piece (4-piece) models with excellent portability. The three models in the Versatile series are highly versatile multi-piece models that have mild user feel where anglers can utilize simple jigs to hard bodied lures.

We have thoroughly refined the basic performance necessary for “casting, control, and fighting”.

The two multi piece models in the highly responsive series adopt a highly repulsive blank design and have been designed to emphasize sharper lure action. They specialize in attracting fish through sharp actions of jerk baits, minnows, metal jigs, and the winding technique. The bait casting model is also recommended for those who want to enjoy both shore casting and boat casting with the same tackle while traveling.

Only the “BlueCurrent” can exceed the “BlueCurrent”.

The BlueCurrent series has undergone a model change, with settings that allow anglers to enjoy “bending and catching”. From light targets to the unexpected monstrous fish, it is a rod designed to free anglers from any restrictions towards style, species or even methods. With each successive development, the BlueCurrent series have evolved into an “angler-first rod.”

The multi piece model of the BlueCurrent Wizzy series is a flagship light game model that embodies portability and functionality at a high level, and is the first of the new “BlueCurrent” series that aims to surpass the previous “BlueCurrent” and reach even higher heights.

BlueCurrent Wizzy ROD BAG DETAIL

BlueCurrent Wizzy comes with a special nylon rod bag. Available in four sizes depending on the length of the rod, it is useful for both carrying and storing. Rods can be stored in separate sections and has two pockets for storing small items needed for your fishing trips. A resin protection plate is built into the rod storage surface, and when the bag is rolled up, it provides protection similar to that of a semi-hard case. This is an original bag that can be folded in half or rolled up.

※Please note that specifications of rod bag might be changed without notice.

BlueCurrent Wizzy 2WAY STYLE BAG

When folded in half, you can store small items and carry it around with the handle.
 *Please note that if you tilt the handle side down, the rod may pop out.

By rolling up the bag, the handle will be stored on the inside and can be placed in suitcases or backpacks for your travels.

BlueCurrent Wizzy BENDING CURVES

The illustration shows the comparison of different models in the BlueCurrent Wizzy multi piece series with a static load of 250g. The versatile models 610, 710, and 810 are characterized by flexible bendy blanks. 72S and 72B are focused on the high responsiveness for lure operability equipped with a sharp blank design throughout the rod.

- Wizzy610
The stiffness in the tip section has been reduced for easier control of jigs and micro plugs. It features seamless fighting performance typical of BlueCurrent series, allowing you to enjoy the flexibility of the blank once it is loaded with the fish.
- Wizzy710
We have equipped the rod with sufficient stiffness from the tip to the belly section so that anglers can utilize light Carolina rigs, top water/bottom bumping for bream and light rock fish games.
- Wizzy810
This model has been designed with stiffness for anglers to perform long casts targeting light to middle class species. The tip section has been built with flexibility to reduce miss-bites and anglers can utilize floating rigs and light sinking pencils
- Wizzy72S&72B
These models are built up with the same blank and can be characterized by their easy handling and outstanding operability of lures for use off boats or land-based fishing. It is designed to have a stronger overall stiffness compared to the Wizzy710.

BlueCurrent III

Light Game Model /13 Lineup *BlueCurrent III*
Strike for a New Era

For the BlueCurrent III, we aimed to expand the release point for easier casting, created a seamless bending curve to prevent any hook-offs and improve the response time as if the rod was part of the anglers body.

The lineup comprises of 9 spinning and 4 bait-casting models. User-friendly being the biggest attribute of the series, the rods are a work of art. We hope you can experience the spirit of Yamaga Blanks first handedly.

BlueCurrent
610 Plug
Quickness
TZ/NANO

This is a special plugging model with aggressiveness and sensitiveness that let you strike even a slight contact.

This plugging model was developed to enable anglers to sense the subtle changes in water pressure and currents with outstanding balance to breathe life into your lures through rod action. The tip section is designed to be stiff to give the lure variant action while the whole blank will bend in to reduce hook offs. When simply retrieving minnows and sinking pencils, the super sensitive tip section will immediately transmit the smallest of bites enabling anglers to swiftly hookup with the belly section of the blank.

BlueCurrent III & TZ/NANO BENDING CURVE

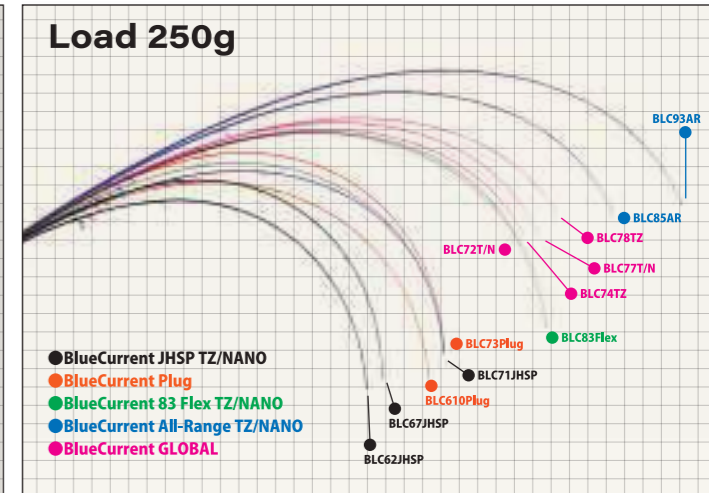

Blue Current Light Game Series has models for various targets with light rigs. We compared all Blue Current III and Blue Current TZ/NANO models in terms of bending curves, matching on game(target/lure) and power. Please use this as a reference to understand characteristics of each model. *Static load comparison does not express all the characteristics of the rod. The rod's instantaneous force of recovery and feeling of use are not expressed. Please refer to this as a comparison of the power and condition of the rod.

BlueCurrent III

● BlueCurrent 78 and 78/B which specialize in bottom strategy, with the main focus being black sea bream games, making it a series that allows you to enjoy a wider range of inshore games. The BlueCurrent III is a series that anglers who go beyond the framework of light games should use, as it has the basic power to support detailed styles and freestyle with no choice of target.
● For anglers who want to heighten the sensitivity, the bait casting model is ideal as the winding and sinking of your rig will directly transmit to your hands. Furthermore, it is also suited for the bait-finesse game targeting trout in streams.

BlueCurrent TZ/NANO

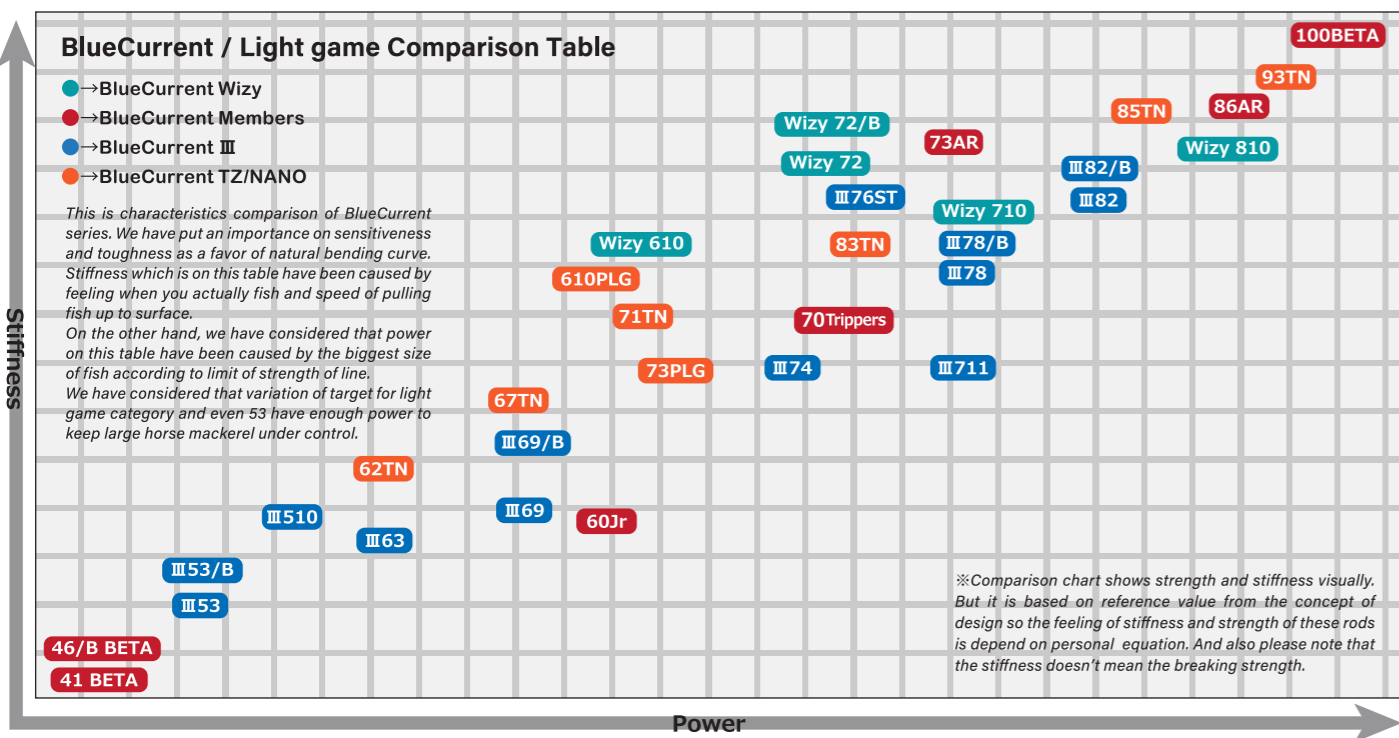

● The majority of the lineup are JH specials which are designed for use with jighead rigs, while the others are more versatile and can be utilized to target varying species depending on your area utilizing various rigs and lures.
● The 610Plug and 73Plug are both designed with TZ/NANO and have a totally different concept to other models. They are specifically designed for use with hard bodied lures to target Japanese Horse Mackerel and Japanese rock fish, and the usage of jighead rigs can be considered as an alternative secondary option.

Advantage given by bending

Easy long distance castability

With the flexible blank characteristics, anglers will easily be able to cast out light weight lures great distances. In addition, the forgiving blank has a wide release point, reducing the risk of miscasting.

Sensitivity to collect vital information

By keeping the angle between the line and tip at about 90 degrees during tension fall of jig head rigs, the tip section will slightly bend and allow the blank to transmit the slightest of changes in the current or fish in pursuit through to your hands.

Reduction of hook-offs

The flexibility of the tip will allow even the weariest of horse mackerel to successfully inhale the soft-plastic, increasing the probability of hooking up the fish. Once the fish is hooked, the entire blank bends seamlessly so you can enjoy the fight while the flexibility of the blank reduces hook-offs.

For the unexpected monster.

With the resilient blank settings, the powerful recovery force of the blank will help anglers successfully land unexpected monstrous fish by tightening the drag and actually stopping the fish. Anglers will be able to take initiative of the fight from the get go by controlling the direction of the fish and "enjoy bending and catching".

2025 NEW MODEL

Calista

72L / TF

Calista 72L/TF

The Calista series, which was released in 2023, has high basic performance to meet the demands of the modern eging scene with each model having a clear concept. In 2025, the "72L/TF" will be added as an additional model to the Calista series.

The concept for the added model is to "induce the bite".

The 72L/TF is by no means a light egi model nor a model that seeks to reduce the rod weight. The TF adopted in the naming stands for "Tactical Finesse" and is a model that takes into account the "tactical use of size 3 egi" to catch large squid. With the increasing pressure from anglers, the eging scene has become more and more difficult and anglers are resorting to use smaller size 3 egi to target the large size spring squids. It is a technical and reasonable strategy, but when changing the size from 3.5 to 3, many anglers will feel uncomfortable when maneuvering the egi.

There will also be technical situations where anglers will need to tightly control their egi through seaweed and other structures, feel for the different flow of the current at different depths and lively animate their egi to approach visible squids. The sensitivity required for these technical situations is in another level. In addition to the operability of the size 3 egi, the ultra sensitive blank will transmit the slightest of changes in the flow of current and bottom texture through the blank to your hands. Although it is classified as a L Class power, it will easily bend in once loaded while the highly repulsive blank characteristics of the Calista series creates a sharp feel to it. Thanks to this repulsion and resilience of the blank, this versatile rod can be utilized all season round as it can also handle size 3.5 egi. If 82ML/AR is one of the mainstream rods of the Calista series, 72L/TF is Yamaga Blanks answer to the ever changing and diversifying eging scene.

Calista

Eging Model / 6 Lineup

Calista has not only used the latest carbon materials, but also been developed with our latest design and technology to refine the blank performance. The 72L/TF, which will be added in 2025, is a rod conceptualized to "bite". Thanks to the highly repulsive blank characteristics unique to the Calista series, even the delicate L (light) class model has a crisp feeling when in use. With the release of the 72L/TF, anglers will have an even more fun time choosing from the Calista series. We hope you can select a model that suits you best as every model has its own individual identity.

Tactical Finesse

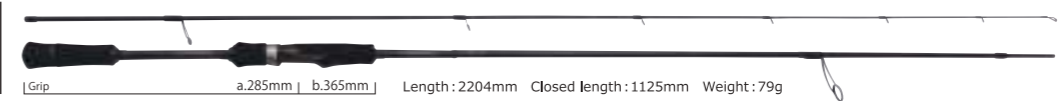

The trump card of the Calista series that takes advantage of the series' most sensitiveness features to capture selective situations.

A tactical fineness model developed for anglers to tactically use size 3 egi. While utilizing the size 3.5 as the main weapon, anglers can maneuver the size 3 egi without any stress with its lightness. The synergistic effect of the sharp and short length 7.2 ft blank dramatically improves the ability to transmit information through the blank. Thanks to the strong butt power common to the series, anglers will easily be able to target the monstrous spring squid.

Long length model that can perform sensitive actions without losing high sensitivity performance even in the current

This is a highly sensitive and flexible long length model able to feel for the squid jig in the current. We have fused together the light tip section to a medium class strength butt section to realize its outstanding casting ability. Although the rod is a long length model, the exceptional balance will allow anglers to easily and lightly control the rod to induce the bite of the squid while the highly sensitive blank will transmit the slightest touch from the squid and feel for the current during the curve fall of the egi.

Calista
76
ML/TJ
Technical Jerk

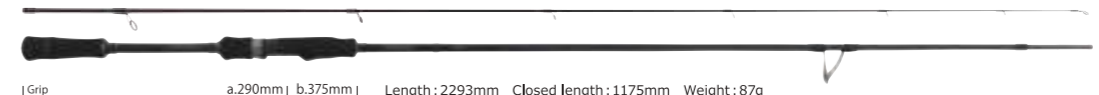

This is a technical model that utilized a short length of light handling and plenty of variations of jerking to lure squid.

The technical short length model was designed to enable anglers to utilize their various jerking techniques. The flexible yet short length blank will be a tactical weapon for anglers to precisely maneuver the squid jig for the final leg of the pursuit of the squid. It will be most suited for fishing around structures and drop off or technically controlling the lure when sight fishing. Furthermore, the responsiveness of the short length blank will also assist anglers to speedily search a vast area. This short length versatile blank will also be great for off shore boat eging.

Calista
86
M/PF
Power & Finesse

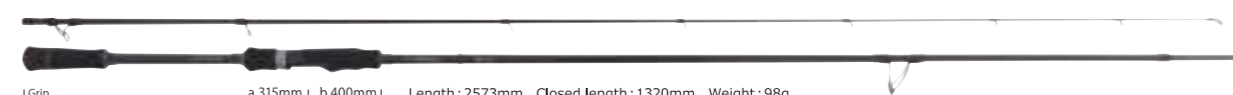

This item achieves sensitive operability that overturns common sense for power models.

Like the 82ML/AR, it is an all rounder model suitable for year round fishing with lightness and responsiveness as its distinct qualities. The blank was back to the drawing board and rebuilt from the ground up to break all stereotypes of the standard 86M specifications for eging. Even if you own a rod with similar specs to 86M, we would like you to take hold of this rod to first handedly experience the highly responsive controllability of the egi and outstanding casting distance the blank produces.

79
MMH/AG
Aggressive

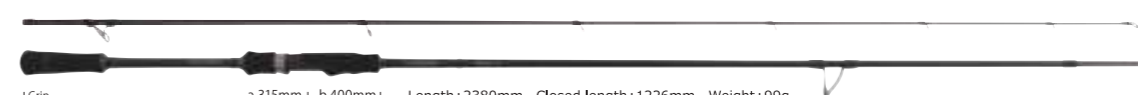

A special concept model dedicated to more aggressive game both from shore and boat.

There are no specific rule books for eging, and there are as many styles and game plans as there are anglers. The 79MMH/AG is a super highly responsive model for those anglers who aggressively allure the squid by technical approaches. It is designed with a medium class tip section and a medium heavy class butt section to easily and sharply maneuver the # 3.5 egi. We have also reduced the stress on the anglers side by giving the rod contradicting characteristics of flexibility and power.

Mebius

Eging Model / 6 Lineup

Mebius

We hope that fishing rod from YAMAGA Blanks is going to be used by much more number of anglers. That is ambition what we put into Mebius series. It is quite difficult to keep low budget while pursuing performances and quality. But we have succeeded to achieve those elements as making extensive use of our techniques of design and quality of factory. That is how we build fishing rods and once you fish with Mebius series you will definitely know as much about our policy and performance of blanks. We offer you 6 different type of character for Mebius series as such as short length, light weight model or medium heavy class to cover various situation that you are going to face. Of course you can take one as main rod, you can also take one as a substitution for specific circumstances.

For more details of category
YB Official Web site

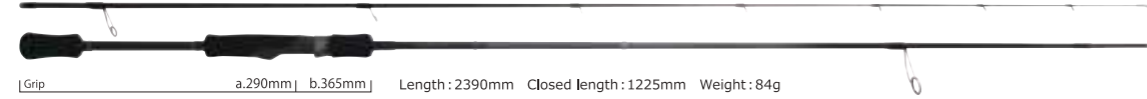

Mebius 710 L This lures the target out that can be realized only because it is light and short in length, and it captures various situations.

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. When squid is less activity than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

Calista RADAR CHART COMPARISON

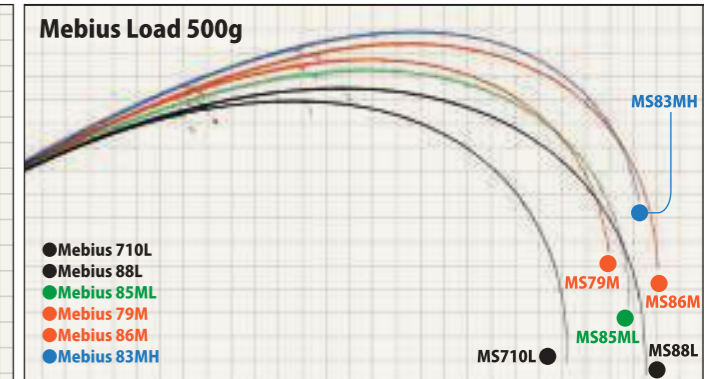

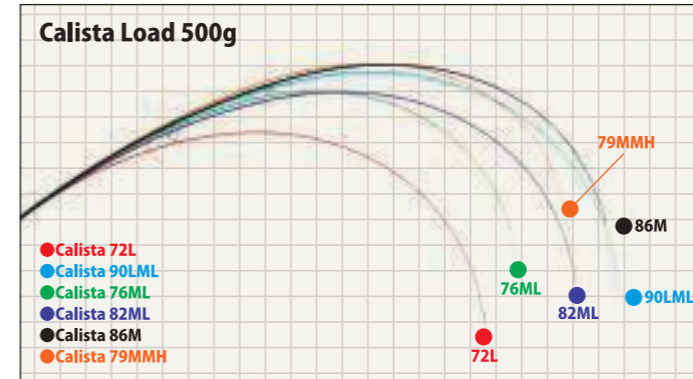

Description of chart items

- Long Cast Performance** - Evaluation of casting ease and power within the blank.
- Finesse Action** - Evaluation of Slack Jerks and twitching actions that are important with sight fishing.
- Aggressive Action** - Evaluation of Aggressive Jerks which include general jerks, winding jerks, and combination jerks.
- Stiffness of tip** - Advantages of a stiffer tip include easier operation in deeper waters, waters with strong currents, and larger resistance Egi. The advantages of a softer tip include an increase in sensitivity to feel changes in the water and is less physically demanding.
- Comfortability** - A model with stiffness may increase the physical burden, so please refer to this item and choose it if you tend to hurt your wrist.

The radar chart visualizes characteristics that are difficult to quantify, but these five items do not represent everything about the rod. Depending on the length or else, the way the angler feels about using it will change. Please use this as a guide only.

Calista & Mebius BENDING CURVES

● The additional model 72L/TF in 2025 is an L (light) class model with the most finesse characteristics in the Calista series. The tip and belly bends flexibly, but the butt section remains so firmly comparable to the other models. Thanks to this butt power, anglers will easily and efficiently be able to surface the supersize spring squid. It cannot be expressed in the diagram but the highly repulsive blank characteristics unique to the Calista series can be experienced with the sharp and speedy feel of the blank.

● These are comparison images of Mebius series which are loaded 500g weight on tip. Mebius series have been loaded more flexibility than calista series to get more versatility and usability. We have focused on cast feeling of Mebius series. Wide range of release point and power of recovery will provide you excellent feeling and distance of cast. Comfortability of casting and toughness as eging rod are directly linked to versatility for aiming at various target. Enough versatility that to be used for horse mackerel, rockfish, black sea bream, seabass or light jigging game is hidden in those blanks.

※ These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

BattleWhip IM/OR/TR BENDING CURVES

BattleWhip IM

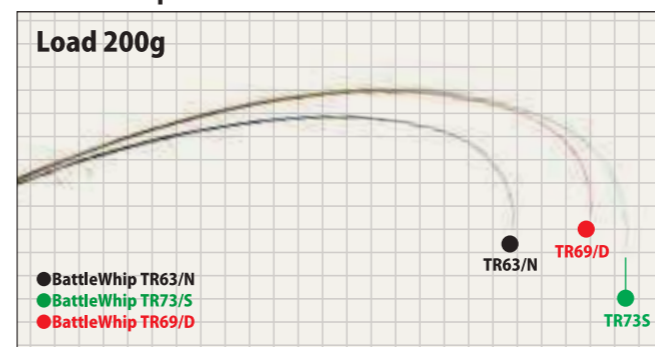

● This is a comparison of 4 models of BattleWhip IM models with the angle of the rod almost horizontal with a static load of 150g. Due to the flexibility and bending of the tip section of the IM69S&B model, the slightest touches from squid will transmit to large movements of the tip for anglers to visually recognize the bite. The 511S&B is a model specialized to aggressively hookup the squid with its highly responsive operability. By reducing the bending of the blank, anglers can directly feel for the bites while improving the operability of the egi. It is a model that will expedite the reaction speed of anglers making it way more fun to fish with.

BattleWhip OR

● This is a comparison of the two models of BattleWhip OR with the angle of the rod almost horizontal with astatic load of 150g. The OR60B/C is designed for use with 190~225g usage vertically but can also easily cast and control 150g with the powerful butt section. Although the stiffness of the tip has been reduced for anglers to visually recognize the bites, the highly sensitive tubular blank transmits the slightest changes under the surface directly to your hands. The OR72/C is designed with a bendy tip section for anglers to easily recognize the slightest touches from the squid even when the rod is loaded with the weight of the sinker or jig. Anglers will easily be able to cast and control the 150g rigs in the depth thanks to the sharp belly to butt section of the rod.

BattleWhip TR

● TR63/N have high sensitivity and ability of manipulation. You will feel moderate stiffness on blanks. Even you are fishing on tough situations, it will tell you vital information visually and transmit you slightly touch of squid sensuously.
● The longest carbon solid section is loaded and it will tell you vital information even you are fishing on wavy condition. And also, mildest model in this series.
● Although TR69/D is for deep area and rapid current, you can handle it comfortably. Of course, you can use it with heavy weight of egi to get faster speed of fall as you have imagined.

Precaution for carbon solid tip model

Carbon solid tip is loaded to TR series and IM series. Tubular tip is loaded to OR model

Thread color of tip is orange to increase visibility.

● As we have mentioned, TR&IM series have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel seat: DPS16 (Fuji) -Up lock
● Suitable reel size: D:LT2500C~3000C / S:C2500~C3000
● Recommended Target: Trophy sized trout
● Recommended Lure: Long lip minnow · Heavy sinking minnow

Lupus for Area
61RM
TYPE
RETRIEVE / MULTIPURPOSE

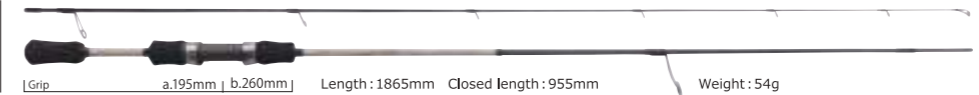

Ideal for all types of retrieval with shallow running minnows and regular "stop and go" with bottom type cranking baits.

It is the most versatile model of the series, able to cast various types and weight of lures with a regular taper blank. The sensitive tip section will capture the subtle bite of the fish and moderately stiff belly section will not only help a swift hookup but also reduce miss bites. We can confidently recommend this rod for those anglers who want to use 1 rod for all types of approaches and different trout ponds as well as beginner trout fishermen.

PRICE :
LURE : **0.6~6g**
LINE : **1.5~4lb**
PE **0.15~0.5**

Spinning Model / 2pcs (Put over Ferrule)
Guide: SiC-S Stainless frame K Guide (Fuji)
Reel seat: DPS16 (Fuji) -Up lock
● Suitable reel size: D:LT1000~2000 / S:1000~C2000
● Recommended Lure: Spoon · Crank-baits

Lupus for Area
511RF
TYPE
RETRIEVE / FINESSE

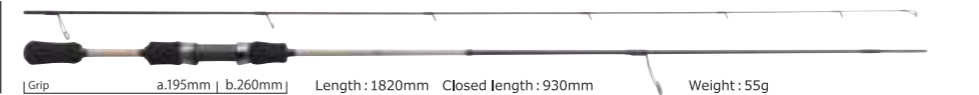

This is the finesse model for use with ultra thin line and super light lures (micro spoons and small crank-baits).

This is the finesse model of the 61RM for down-sizing your main lures. The rod possess a sensitive and flexible tip to belly section, capable of hooking up the subtlest bites of ultra light lures with a slow retrieval. The flexible blank will absorb the load and prevent the ultra thin line from bust off and stretching of the super fine hooks. Although it is a finesse model, the butt section has ample power for the unexpected big trout. It is most ideal for small~middle size ponds for close range fishing for numbers and those anglers who prefer a softer rod as their main rod.

● Recommended Lure: Micro spoon · Micro crank-baits

Lupus for Area
66RS
TYPE
RETRIEVE / SHARPNESS

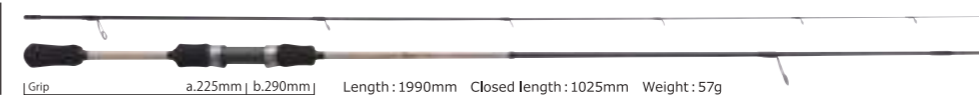

This is the sharpest model to swiftly hook up high drag lures like crank-baits and spoons that have been cast out long distances.

The tip section has been designed with plenty of flexibility for a more loose action of the lure during retrieval and will allow anglers to successfully hook up the slightest of bites. In contrast, the belly section is stiffer to effectively hookup those cranking baits that tend to have more drag and are more difficult to transmit the hooking towards the fish. The 6.6ft length will also allow anglers easier line mending if required and possesses the most powerful butt section in the retrieval type rods.

MOTION / BOTTOM BOUNCING

This is a highly responsive model ideal to maneuver your bottom type lures and metal vibrations type lures with the bottom bouncing technique.

Since the blank has been engineered to be stiffer with a bouncy tip section, anglers will be able to rhythmically utilize the "lift and fall" technique with metal vibrations. This stiffness will also allow for a swift hookup while the angler is maneuvering the lure. Furthermore, this will also help the initial action of the lure when utilizing the "stop and go" method. This model is not only great for deeper ranges, but also ideal for maneuvering top water lures.

Lupus for Area
60MTR
TYPE
MOTION / TWITCH & RETRIEVE

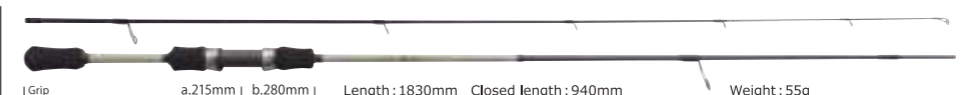

This is a model to actively hookup through twitching and simple retrieval. A model for those anglers chasing large mountain and brown trout.

This model has been designed with stiffness required to actively twitch the rod to animate the lure in the water. Anglers can continuously twitch the rod to dramatically bring life into the lure. The sensitivity and stiffness of the blank will also help anglers successfully set hook in the hard mouth of the various species of trout. Furthermore, the "stop and go" technique with buoyant minnows will allow for a vertical approach which is highly productive for rainbow trout.

Lupus

for Native Trout Game

Lupus / for Native trout / 6 Lineup

The Lupus series are designed to cover the river systems from headwaters to the main-stream and possess the controllability required to maneuver the minnows to induce the bites in the intricate river currents. The sharp castability and the seamless bending curve will assist anglers to adequately twitch the lures in the strong currents, while the powerful butt section will smoothly pump the fish towards you. Yamaga Blanks believe that these are necessary qualities required in the river game. The Mountain-Stream models are for smaller streams running in the mountains and the Main-Stream models are for your larger rivers to target salmon and trout.

- Recommended Field: Main stream - Backwater - Sea

Lupus 86M Monster Cherry Main Stream

This model combines power for targeting large cherry trout, light operation performance and casting performance. 86 Monster Cherry will suit to the monster hunter who is aiming at trophy fish over 70cm. Compared to other 3 models, this 86 Monster Cherry have been loaded huge power on it. It have gotten more than enough butt power to fight against monster fish without losing sharpness to cast rhythmically, sensitivity to manipulate lure gently. We can proudly say that this would be flagship model of Lupus series. We have built this up with the knowledge and experiences that have been cultivated from fishing for big one in saltwater so that this is more than enough to be called Monster Cherry for sure.

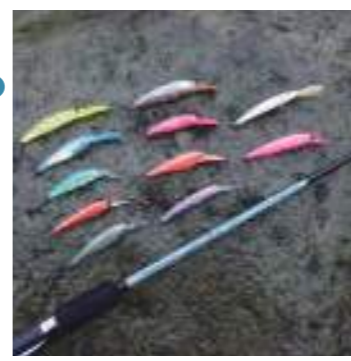

Lupus Recommended Lures by 6 models

for Area Trout

Lupus 61STT

TYPE : SPECIAL TASK
TROPHY

The 61STT is a model developed with the concept of "targeting the trophy sized fish lurking in the area by manipulating a minnow skillfully on the sight fishing," and seeking more ways to enjoy. We pursue performance that allows you to easily manipulate the largest size minnow that can be used in area trout games and long lip minnows with strong resistance of water, strengthen the stiffness of the entire rod so that you can adjust the strength, and enable you to give the action to lures at your will.

Lupus 61RM

TYPE : RETRIEVE
MULTIPURPOSE

This multi purpose rod is capable of handling various types of lures with this single rod. It is most ideal for simple retrieval of 1~4g spoons and crank baits, but also able to handle micro spoons and crank baits with fairly strong drag. This is the most standard Area fishing model produced by Yamaga Blanks and will also allow for vertical appeal of the minnows by jerking the rod or the "stop and go" method for your bottom type lures.

Lupus 511RF

TYPE : RETRIEVE
FINESSE

This model is especially designed for use with ultra light micro spoons and micro crank-baits. With the use of ultra fine line and lures under 1g, anglers can induce a bite with a super slow retrieval. Although it is a super light sensitive rod, the underlying butt power will allow anglers to efficiently land large numbers of trout with larger 3g class spoons when the fish are on the bite. Once you take hold of this rod, we are confident that you will be able to feel the Yamaga Blanks spirit within.

Lupus 66RS

TYPE : RETRIEVE
SHARPNESS

It is also capable of handling heavier spoons (above 3g) and crank-baits lures which have more drag compared to other lures. The flexible tip section will give freedom to the variant crank-baits and will maximize the potential of their action. The sharp belly section will help reduce the heavy drag even with bigger lipped deep cranking baits. With its great castability, this model will be of great advantage in large areas which require long distance casting.

Lupus 62MB

TYPE : MOTION
BOTTOM BOUNCING

This model is ideal for bottom type lures like metal vibrations. Anglers can swiftly hookup fish while utilizing the lift and fall technique. The stiff and sensitive rod tip will allow anglers to easily control the "bottom bump" with spoons and "bottom knock" with deep cranking lures. It is also ideal for use with top water lures.

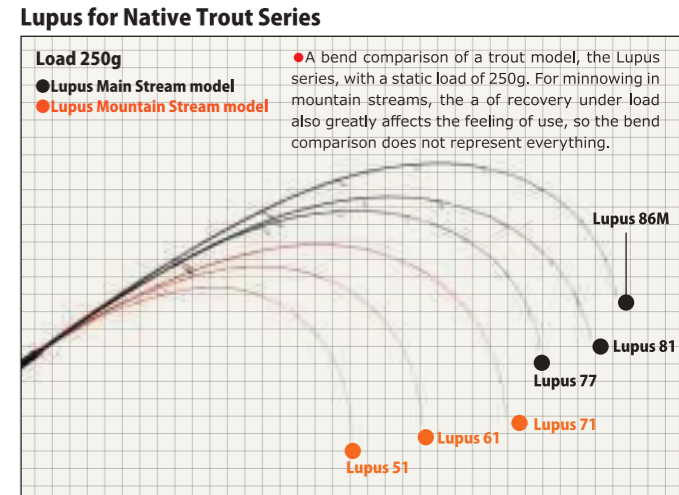

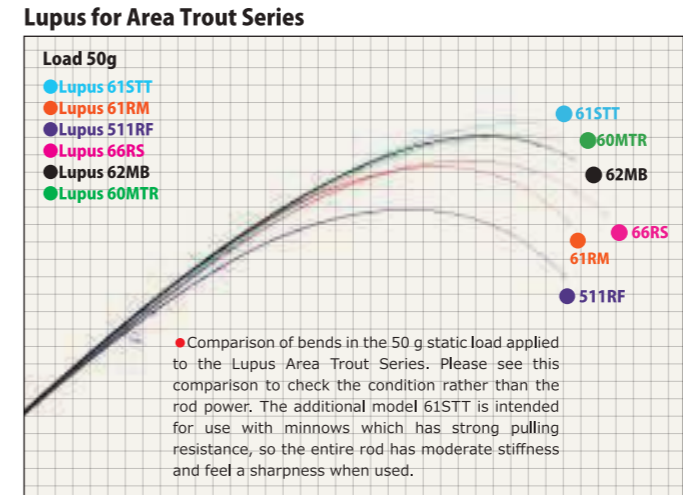

Lupus 60MTR

TYPE : MOTION
TWITCH & RETRIEVE

The rod is designed for anglers to actively twitch the rod to animate the minnows. The stiffer action of the rod is ideal for using minnows that do long side to side darting action or highly buoyant minnows which naturally rise after animating the lure by twitching. Anglers will be able to successfully transmit the action they wish through the responsive blank whether it be short shaking or large maneuvering twitching of the lures.

FLX

This is a series with a concept unique to Yamaga Blanks, which is to "bend" the rod. By bending the rod, there are various advantages which support the anglers. It features a bendy tip to belly section which enables anglers to naturally swim diving pencils for a more natural approach to your target. The flexible yet firm restoring power of the blank positively enhances the casting distance and fighting of the fish. When casting, the rods recovery force will assist anglers to cast long distances with little effort. As anglers will be able to get sufficient casting distances without effort, it will help you concentrate on your fishing for those long days out in the bay. Once hooked up, the bendy characteristics of the rod will absorb and apply pressure towards the fish, reducing unnecessary thrashing of the fish and the risk of your target busting you off on the rocks. This will dramatically improve your catch rate in the shallow areas. It is a series typical of Yamaga Blanks that embodies the meaning and advantages of "bending" as a casting rod.

RGD

The Rigid series has expanded lure options for anglers to take advantage of the few opportunities available. This is a series that helps you capture all kinds of targets and further enjoy the fishing by not making the casting game monotonous. The highly force of recovery and stiff blank is equipped with a super sharp casting feel and will enable anglers to lightly handle their lures. The firm belly section will allow use with a wide range of lures, including top water plugs such as poppers, and the highly sensitive blank is suitable for underwater lures such as minnows, swim-baits, and metal jigs, transmitting the vital information subsurface which is not visible to the naked eye.

TRQ

The highly tenacious and resilient blank was designed for large monstrous targets, allowing anglers to not only dominate the fight but even give enjoyment to the anglers. The beautiful bending curve of the blank will assist anglers by ensuring the most comfortable position during the fight, which is to lift the rod upright. The BlueSniper 81/10 TRQ is developed for anglers who are dedicated to go head to head with the monstrous fish they are after.

BlueSniper Boat-Casting

The new Blue Sniper boat series is divided into 3 types and 7 models that can accommodate a wide variety of lures and fighting styles. By giving each one its own characteristics, you can conquer the casting game more comfortably and at a higher level. We have built the lineup so that you can enjoy the game even more deeply by increasing the range of rod options.

BlueSniper Boat Casting BENDING CURVES

When comparing the bending curve of the "83/2FLX" and the "74/3RGD" of the PE2-3 line class light casting models, the stronger "74/3RGD" seems to look more flexible, however this is due to the different concepts of each model.

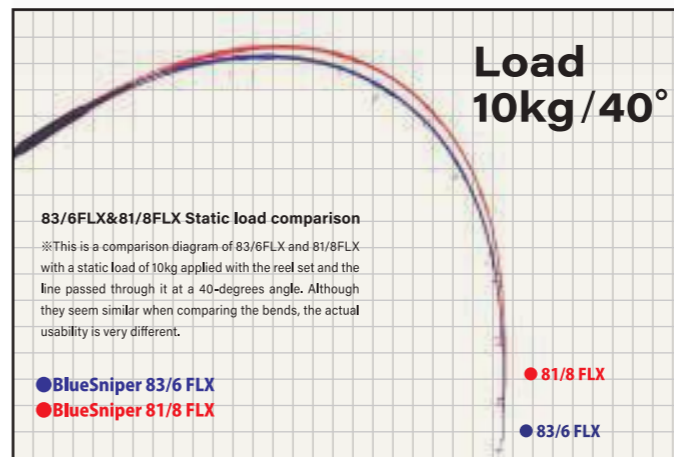

● **83/2FLX**
This model specializes in long-distance casting and controlling the diving pencils naturally. The blank design allows the rod to bend smoothly from the tip to the belly section and continuing on to bend even deeper towards the butt section. Although the butt power is comparable to that of the PE3 line class, you will notice that the light controllability of the rod is of the PE2 line class.

● **74/3RGD**
Although it has a large bending curve similar to the "83/2FLX", the short length of the rod has given it a highly responsive and sharp qualities. The bending point is set closer towards the anglers allowing for easier control of lures.

● **76/4RGD · 79/5RGD**
Thanks to the compact handling of the rod, this model is highly versatile and is outstanding with its lure operability. Although both models are designed with increased stiffness, the butt section of the 76/4RGD tenaciously bends in once the weight of the fish is loaded during the fight, reducing the physical strain on the angler. Even smaller anglers with less physical strength will comfortably be able to utilize this rod.

*These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

83/6 FLX & 81/8 FLX BENDING CURVES

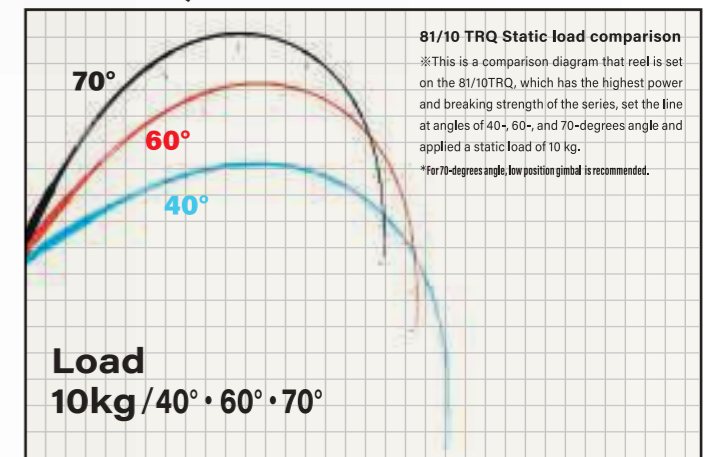

83/6FLX&81/8FLX Static load comparison
※This is a comparison diagram of 83/6FLX and 81/8FLX with a static load of 10kg applied with the reel set and the line passed through it at a 40-degree angle. Although they seem similar when comparing the bends, the actual usability is very different.

● **83/6FLX**
bends deeper as more load is applied to the blank, demonstrating high followability and tenacity. At the same time, the bending point moves closer to the hand, making it possible to reliably apply pressure to the fish while reducing physical strain.

● **81/8FLX**
While the entire rod bends over for the 81/8FLX, we have beefed it up for anglers to be able to target large species in the difficult shallow areas. In order to maximize the power of the PE8 power class, the butt section has a solid core where the bending stops at the butt guide, clearly differentiating from the 83/6FLX.

81/10 TRQ BENDING CURVES

81/10 TRQ Static load comparison
※This is a comparison diagram that reel is set on the 81/10TRQ, which has the highest power and breaking strength of the series, set the line at angles of 40°, 60°, and 70-degree angle and applied a static load of 10 kg.
*For 70-degree angle, low position gimbal is recommended.

● The rod will demonstrate maximum butt power at 40° and 60° angle of the rod. By maintaining this angle, you will be able to apply maximum pressure on your target, allowing for a smooth, efficient fight and easily lifting the fish even when the fish is directly beneath the boat. This rod will provide anglers the "power position" ideal for short fights targeting those large Kingfish and GT that like to head straight to the rocks to bust you off.

● At 70 degree angle, by high sticking the rod, the underlying power will be brought out with its outstanding restoring power and high breakage strength at the butt section. The acute angle of the rod is the position that makes the most of the torque-filled characteristics of this model, consistently applying pressure on your target while reducing the physical strain on the angler. This will give anglers great advantage when fighting large Tuna for long durations.

SeaWalk Tairubber

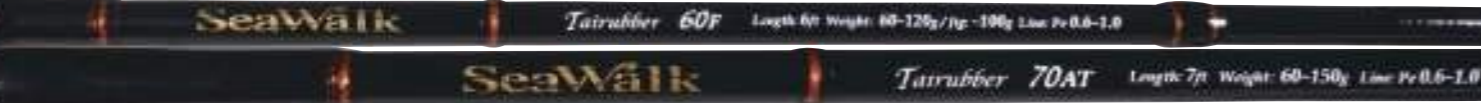

Tairubber Model / 4 Lineup

SeaWalk Tairubber series, we have differentiated the categories for the 4 rods depending on style and conditions rather than rod power to set them apart from one another. Equipped with not only the lightness of a light game rod, but also the sensitivity and strength, these blanks will be the extension to your arm enabling anglers to go head to head with monstrous snapper exceeding 80cm in length. We hope you can experience our exquisite blanks that will shine a new light into your snapper game.

SeaWalk
Tairubber

For more details of category
YB Official Web site

SeaWalk
Tairubber
70AT
TYPE: AUTOMATIC

An all rounder Tairubber model that sharpens the blanks that you bring to the hook up smoothly.

This is a specialized model to automatically hook up snapper by simply continuing to reeling in your rig following the small nibbles which frequently occur prior to the main bite. The automatic yet smooth hooking of the fish is brought on by the flexible yet powerful blank. This model is the backbone of the series and can be recommended for use in various field conditions.

PRICE:
LURE: **60~150g** (Tairubber)
LINE: **PE 0.6~1**

Over head Model / 2pcs (Grip Joint)
Guide: SIC-S Stainless frame K Guide (Fuji)
Reel Seat: PULS17 (Fuji) Down lock nut
● Suitable reel size: D:100~200 / S:100~300

SeaWalk
Tairubber
611D
TYPE: DEEP

A special model that condenses the ability to capture the deep area game of Tairubber in a light and responsive.

Anglers will have to utilize heavy weight Tairubber jigs when fishing in 100m of water. This model is specifically designed to enable anglers to easily handle these heavy rigs. The blank was shaped to reduce the heavy load on the angler during the reeling of the heavy rig from the deep waters in intricate current conditions. We were able to create this rod with attention to the smallest detail in components for anglers to enjoy the Tairubber game in the deep waters.

PRICE:
LURE: **100~250g** (Tairubber)

SeaWalk
Tairubber
72S
TYPE: SENSITIVE

Supersensitive model that focuses on sensitivity and lightness and can hook up even the smallest bite.

This is the sensitive Tairubber model packed with our expertise and knowledge from producing light game rods. It has the most flexible tip section of the series and its outstanding sensitivity will allow anglers to successfully hook up the slightest of bites. The sensitive tip will transmit the vital information of the current and the slightest nibbles from the fish through the sensitive blank and successfully lead to a hookup. This model will become your biggest asset in situations where the fish are reluctant to take a proper bite and the flow of the current is super weak.

PRICE:
LURE: **30~100g** (Tairubber)

● Lure: Tairubber

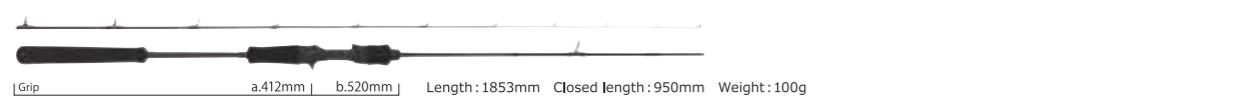

SeaWalk
Tairubber
60F
TYPE: FAST

High response tai rubber model realizing aggressive game development with high power of recovery in blanks.

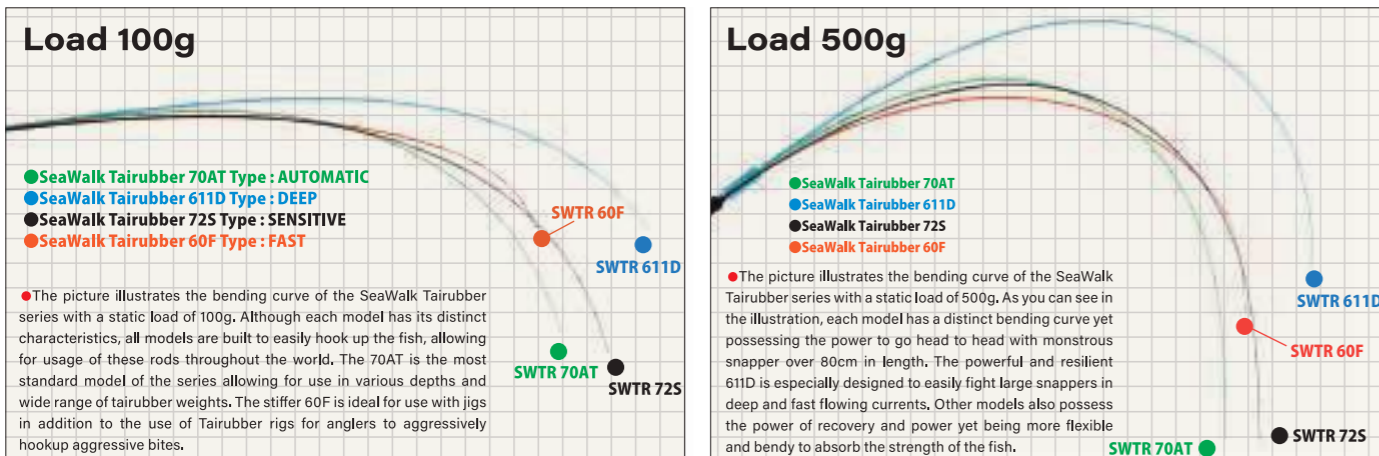

More specifically, the rod is built up of a carbon solid tip to feel for the minute changes in currents and bites and the highly responsive belly section allows anglers to swiftly and aggressively hook up the fish. Although it is short in length with a stiffer blank, the smooth blank taper will reduce the instability when reeling in your rig, enabling anglers to maintain their concentration. We highly recommend this model for those anglers who like to use both Tairubber rigs and snapper jigs depending on the fishing conditions.

PRICE:
LURE: **60~120g** (Tairubber) / **~100g** (Jig)

SeaWalk Tairubber BENDING CURVES

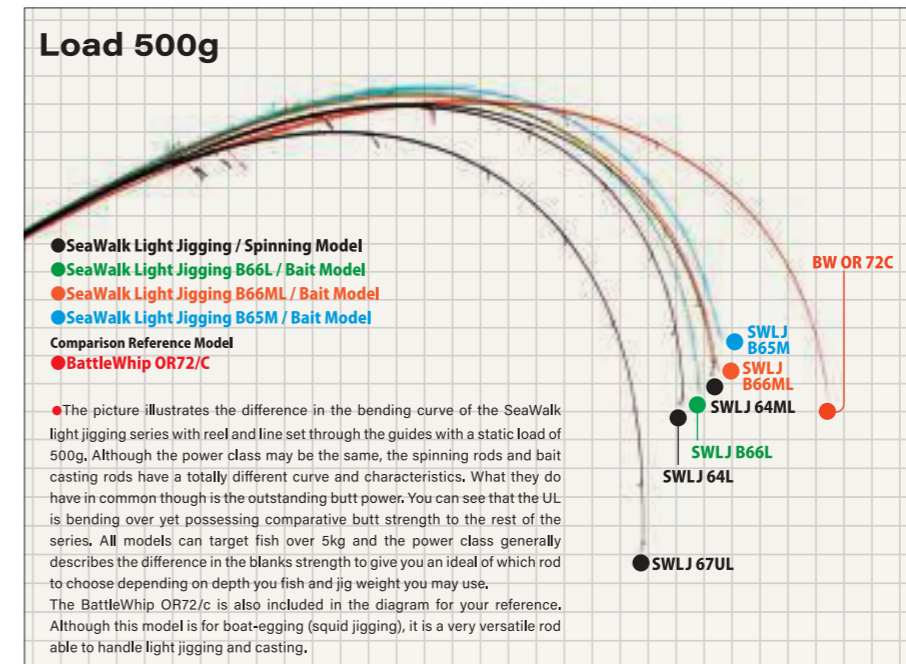

※ These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

SeaWalk Cast Jigging BENDING CURVES

SeaWalk Light Jigging BENDING CURVES

The picture illustrates the difference in the bending curve of the SeaWalk light jigging series with reel and line set through the guides with a static load of 500g. Although the power class may be the same, the spinning rods and bait casting rods have a totally different curve and characteristics. What they do have in common though is the outstanding butt power. You can see that the UL is bending over yet possessing comparative butt strength to the rest of the series. All models can target fish over 5kg and the power class generally describes the difference in the blanks strength to give you an ideal of which rod to choose depending on depth you fish and jig weight you may use. The BattleWhip OR72/c is also included in the diagram for your reference. Although this model is for boat-egging (squid jigging), it is a very versatile rod able to handle light jigging and casting.

Galahad 電

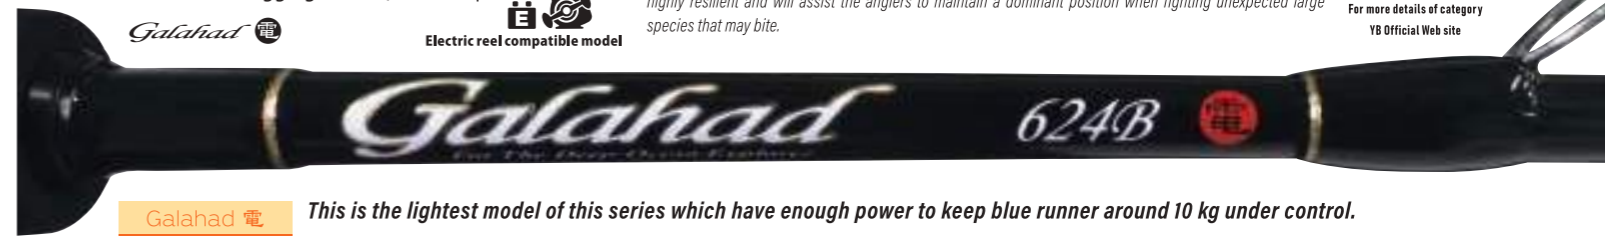

Electric Reel Jigging Model / 3 Lineup

Galahad 電 Electric reel compatible model

The Galahad "電" are series especially designed for jigging with electric reels. These electric reels create a unique jig action which is difficult to replicate with ordinary reels that sometimes create unnecessary pauses. The heavy load placed on the blank by the mechanical winding of the reel is absorbed by the tip and the highly resilient belly section will allow anglers to rhythmically maneuver the jig through their rod-work. All 3 models are highly resilient and will assist the anglers to maintain a dominant position when fighting unexpected large species that may bite.

For more details of category
YB Official Web site

Galahad 電 633B for Electric reel

This is the lightest model of this series which have enough power to keep blue runner around 10 kg under control.

If you are going to aim at small sized Blue Runner with PE 3, this 633 would be a perfect choice. Even though automatic reeling at constant speed, flexibility of tip and belly section will help you to jerk jig comfortably and set hook on with less failure. It will bend very much when fish is on, but you can fight with fun without any worry. You will be surprised that potential which is hidden inside blank of 633 for sure.

PRICE :
LURE : **Jig Max 150g**

Galahad 634S

Galahad 622B

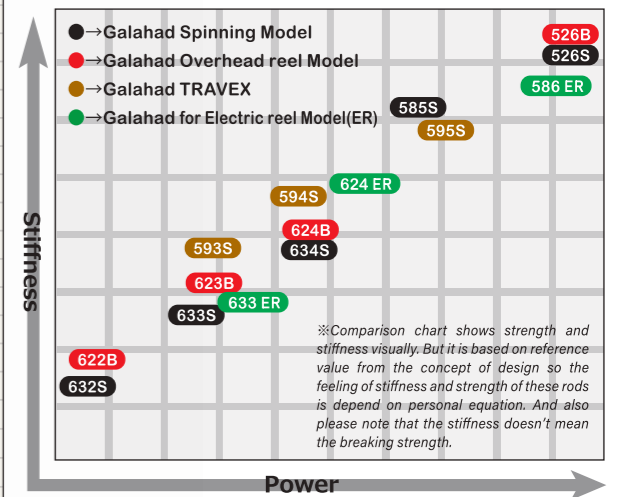

Galahad Series BENDING CURVES

Galahad Spinning & Overhead reel model

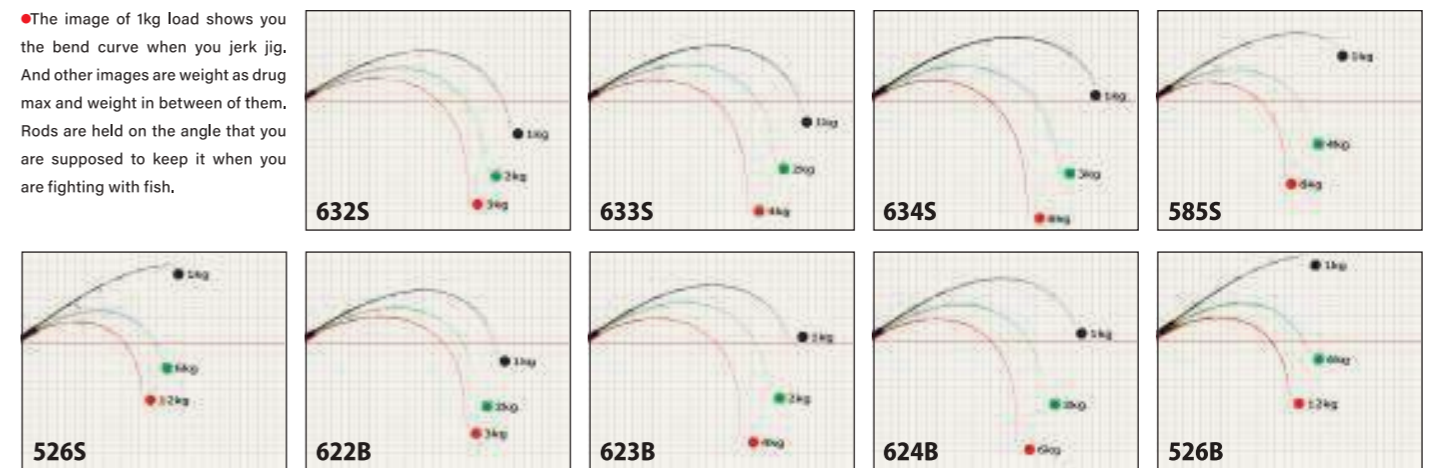

● The 632S, 633S and 634S have been designed to reduce unnecessary jumping and sliding of the jig and naturally swim the lure when jiggng on a diagonal angle. In addition, this flexible blank design helps reduce the direct impact on the anglers wrist when jerking. In contrast, the 585S and 526S are built stiffer and will respond well when vertically jiggng in deeper and faster flowing currents.
● 622B, 623B and 624B have flexible tip to let your jig swim naturally and you can adjust the way of approach if you are required thanks to belly and butt section that have been loaded moderate stiffness and force of recovery. 526B is little stiffer than others to fish as you planned at deep area or rapid water.

Jiggng Model Comparison Table

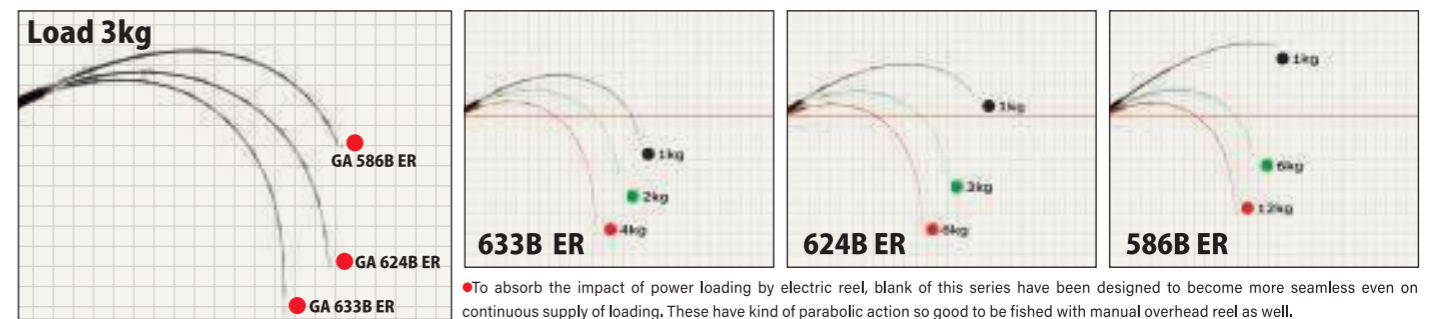

● The above table shows the distribution of hardness, tension and strength of all models of the Galahad series. The Galahad series is designed to have high strength when bent so that it can withstand the high load of high-speed winding when using an electric reel.

● The image of 1kg load shows you the bend curve when you jerk jig. And other images are weight as drug max and weight in between of them. Rods are held on the angle that you are supposed to keep it when you are fighting with fish.

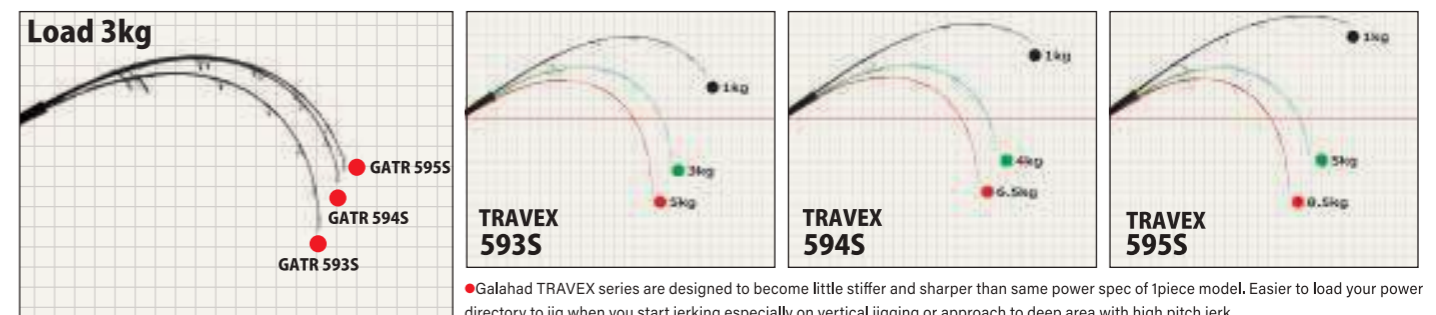

Galahad ER for Electric reel models

● To absorb the impact of power loading by electric reel, blank of this series have been designed to become more seamless even on continuous supply of loading. These have kind of parabolic action so good to be fished with manual overhead reel as well.

Galahad TRAVEX

● Galahad TRAVEX series are designed to become little stiffer and sharper than same power spec of 1piece model. Easier to load your power directory to jig when you start jerking especially on vertical jiggng or approach to deep area with high pitch jerk.

*These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

YAMAGA Blanks FACTORY LIMITED MODEL NEW DAWN 2025

YAMAGA Blanks MEMBERS NEW DAWN 2025

In 2025, Yamaga Blanks Members will release new models that were developed to purely enjoy fishing and casting the rods under the theme of "The Pursuit-of-Enjoyment". The new models for 2025 are "41 BETA" and "46/B BETA" from Yamaga Blanks' representative "BlueCurrent" series. The 4ft class short rod is a rare length even in our long history of Yamaga Blanks, though it is packed with extremely high basic performance as a fishing rod. After 3 years since the initial development, we have finally created two models that are unique, playful, and satisfying. Although there are many advantages brought on by the 4ft length, there are at times when you feel inconvenienced by this shortness as well. Still, when fishing with these two models, the direct control and sensitivity, the thrill of hooking and landing a fish are simply pure fun will take you back to those days you first started fishing. While enjoying both the pros and cons of the "41 BETA" and "46/B BETA", anglers can grow and improve their skills. We hope you will enjoy the absolute satisfaction through this rod.

YAMAGA Blanks FACTORY LIMITED MODEL 5 CATEGORIES

FLAWLESS EDITION "ELITE"

This is a model with honed performance and can be considered the elite model of our Yamaga Blanks brand. It may not suit everyone's needs but compared to the standard models, it is not only a high quality model but a model for those hardcore anglers seeking a little something different.

ADVANCED EDITION "BETA"

With Yamaga Blanks state of the art blank manufacturing technology, this category is revolutionary and a challenge to the world and towards ourselves. Although it is called "BETA" this does not mean it is incomplete, but rather catering for the ever bias needs of the market in a category of its own.

ORIGINAL CONCEPT EDITION "PILLAR"

Although the models are distinctive, we have sought after the user-friendly characteristics often seen in Yamaga Blanks rods. The "PILLAR" refers to the series strong foundations in YB. We are scheduled to release the following two models in addition to the standard models.

OVERSEAS' ORIGINAL EDITION "GLOBAL"

The Global Series is not sold in Japan, overseas only. The lineup consists of models developed to much to overseas needs. We plan to continue releasing models for various countries, fields, and targets.

LIMITED COLOR & DESIGN EDITION "VIVID"

Get ready to jump on the limited color and design editions of our high quality paint-job. These will be one-off productions and will be surprise releases from our usual lineups.

2025 NEW MODEL BlueCurrent 41·46/B BETA

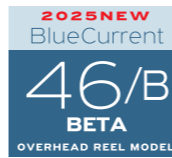

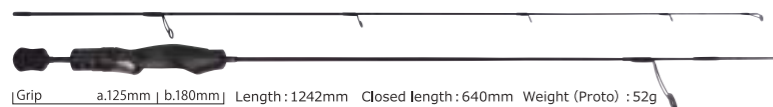

At Yamaga Blanks, we not only pursue basic performance in product development, but also always value the enjoyment of fishing itself. The newly released Blue Current series, "41 BETA" and "46/B BETA," are the result of viewing the "enjoyment" from a different perspective. Packed with plenty of basic performance and playfulness, this rod is capable of targeting a variety of fish species that can be targeted with a light line, including trout in mountain streams, as well as horse mackerel and bream in saltwater. The excellent maneuverability and direct usability that only an ultra-short length rod can offer has the potential to revolutionize traditional fishing. Not only you can enjoy the process of pinpoint short casting and delicate lure control, but also fully enjoy the fighting and direct feeling of being connected with the fish. How you enjoy this rod is completely up to you. We hope you can first handedly experience the world of fishing that can only be felt with "41 BETA" and "46/B BETA".

FWP 90H GLOBAL

This is a model that manipulate large lures well and has strong butt power that is not inferior to fighting against large fish.

This versatile model is specially designed for big freshwater predators like pike, hucho, catfish etc. Powerful, light and precise. During testing in the European area, we focused on the guide diameter that it could be used without stress even in extremely cold areas where the guide would be frozen. Also, it has enough power to cast big lures up to 100g, but on the other way sensitive enough to fish with small and light lures around 20g. When you require to cast long distance with big lures, especially on wide rivers targeting big hucho, with this rod it is not a problem anymore.

Grip | a.445mm | b.585mm | Length: 2670mm Closed length: 1415mm Weight: 208g

BlueCurrent 74TZ GLOBAL

A model that uses aggressive and strategic techniques that can be called "sharpness special".

It features the sharpest blank in the BlueCurrent series. Because it is stiff all the way to the tip, it has excellent bottom sensing ability, and the lure can be operated with sharp action. Recommended for those who want to easily adjust the strength of their lures for purposeful fishing. *Please refer to page 25 for the rod bending curves.

*BlueCurrent 74TZ and 78TZ are two models that are particularly focused on sensitivity, operability, and cast feel. The stiffness and strength of the butt are different from the NANO series. The NANO series uses the force of the blank to momentarily bend and restore itself to control the fish, while the 74TZ and 78TZ are models that retain hardness in the butt to achieve high casting accuracy and control the fish.

Bottom lures · Jigs · Twitching and jerking of minnows
Detailed actions of pencil lures

Grip | a.280mm | b.345mm | Length: 2240mm Closed length: 1150mm Weight: 74g

BlueCurrent 78TZ GLOBAL

Sharpness & Strength, a model that hones these two features and emphasizes long cast performance.

It has a moderate amount of stiffness all the way to the tip, while also being able to bend smoothly under load. Even when casting, it has a high recovery force even though it bends as a whole, so the casting feel is also good. Since the blank bends smoothly up to the belly, it is also suitable for retrieving action. A rod that can be used not only from the bottom to the top range but also with slow and fast action in the current, making it easy to turn on fish. *Please refer to page 25 for the rod bending curves.

Galahad Slow 621 GLOBAL

lightest and most delicate in the series, yet allows you to freely give the natural fall action without unwanted wobbles.

A sensitive model for attacking with sensitive tackle settings using light lines. The flexible tip without wobbles the initial speed of the jig when input, automatically making a natural fall action. This model is necessary for targets with low activity or for situations where a sensitive strategy is required, such as when hooking a nibble that seems to play around with a jig, and where targets often loose or hook out.

Galahad Slow 622 GLOBAL

This is the standard, well-balanced rod that covers slow jigging targets and methods in the mid-deep sea.

A basic model for comfortably manipulating jig weights which are mainly used, from the shallow waters of nearshore waters and in the middle and deep waters. It is equipped with delicate and high sensitivity and light operability that allows the jig to slide and make a natural fall action with light force. In addition, you can deeply enjoy the steps from jig manipulation to hooking, which is the best part of slow jigging, and you can cover an various target of sea bream, Blue runner, and rock fish from shallow to deep areas.

Grip | a.450mm | b.587mm | Length: 1900mm Weight: 137g

Galahad Slow 623 GLOBAL

An all rounder that plays the core of the Galahad Slow series and accurately conveys the angler's intentions to the jig.

A PE2 class model that can comfortably handle 200~300g jigs. The main feature of the Galahad Slow series is its all-rounder performance, which has a lot of latitude in action to manipulate the jigs that suit a variety of targets. It covers a wide range of uses, from a quick action approach to blue runner with high swimming ability to a natural fall action for sea bream and rock fish.

Grip | a.450mm | b.587mm | Length: 1900mm Weight: 141g

Galahad Slow 584 GLOBAL

The most powerful model in the series that has the enough strength to support anglers in tough situations with comfortable operability.

To comfortably manipulate 300 to 500g jigs under special conditions such as deep waters, tidal currents, and complex double tides, the blank has strong tension and torque, even in high water pressure. It is possible to transmit the action to the jig with less burden on the body. The response of the combination, from the quick action to targets with high swimming ability such as amberjack, to the fall action, is the best in the series. This model is also recommended for targeting large rock fish in deep waters.

2025 NEW PRODUCTS

2025 NEW

YB ZOOM SHAFT 150

Price:

The YB Zoom Shaft 150 is a lightweight, compact, and rigid telescopic landing shaft made of carbon from Yamaga Blanks. With a total length of 1500mm and a closed length is 450mm, it is compact and easy to handle, making it ideal for trout fishing in fishing ponds and black porgy and sea bass fishing in low-footstep. The crisp shaft body will not bend under water pressure, allowing for smooth landings. The simple structure allows for easy disassembly by removing the top and end cap parts, making maintenance after fishing easy. (This product is manufactured in our own factory in Japan.)

SPEC

- telescopic type / 4pcs ●Weight: 147g
- Deployment length: 1500mm ●Closed size: 450mm

●Easy to disassemble and maintain

●Comes with a original box

It can be deployed quickly, so you can land fish smoothly.

2025 NEW

YB DUAL GAME POUCH

Price:

※Please note that product specifications may change without notice.

Detachable

Front

The YB Dual Game Pouch, which will be released in 2025, has two removable pouches. The front pouch is ideal to store smartphones. It uses a special film that allows you to directly operate the touch panel on your smartphone, so you can not only take photos while fishing, but also make calls and reply to emails. The magnetic releasers on the top and bottom of the pouch allow it to be easily removed from the main body. It is also equipped with a hook keeper that is convenient when changing lures. The base has depth for easy opening/closing and taking out your content. By attaching a carabiner to the belt on the side, you can frequently used tools outside the pouch.

SPEC

- Size (mm) : Length 180 · Width 90 · Thickness 25 (Front) / 40 (Main) ●Material: PVC (Inside: Nylon)

REGULAR PRODUCTS

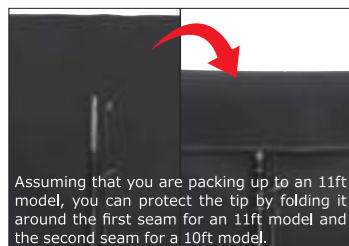

YB Protection Roll Bag

Price:

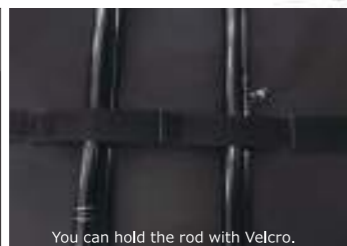

YB Protection Roll Bag is Yamaga Blanks' original packing gear that allows you to transport multiple rods safely and smartly without damaging them. You can carry the rods compactly and safely when you go on an expedition by ferry, fishing on the shore or offshore. Intended for use on rocky shores, it is made of neoprene fabric with excellent durability and water resistance, so it can be used as a rug while taking a break or as a tool holder.

SPEC

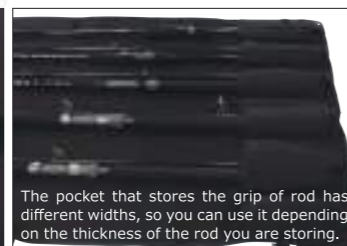

- Packing quantity: 1~5 ●Storage dimensions: 1150~1800mm
- Size: 1840x540mm ●Weight: approx. 710g ●Material: Neoprene, Velcro, D ring

Assuming that you are packing up to an 11ft model, you can protect the tip by folding it around the first seam for an 11ft model and the second seam for a 10ft model.

You can hold the rod with Velcro.

The pocket that stores the grip of rod has different widths, so you can use it depending on the thickness of the rod you are storing.

You can wear it on your shoulder by attaching the YB shoulder belt (sold separately) to the two D-rings.

YB Shoulder Belt Price:

The YB shoulder belt is an item that makes it easier to carry the rod while fishing. It is possible to pack 2 to 3 middle class rods such as eging and sea bass together using the elastic neoprene belt. By carrying the bundled rods on your back, you can free your hands and move around the field more easily.

SPEC

- Belt total length: 670mm~1130mm Pad part total length: 200mm
- Rod belt(x2): Belt total length: 320mm

●Rod installation image
※Tip cover sold separately

Packing

- Shore Casting Rod x4
- Seabass Rod x5
- Eging Rod x5

YB Zoom Shaft Price:

It is a telescopic type landing shaft that originated YAMAGA Blanks. Although it is compact in size, moderate stiffness and strength, and can be used widely from light games to sea bass.

SPEC

- Telescopic type / 8pcs ●Weight: 310g ●Deployment length: 2900mm ●Closed size: 455mm

Target

Horse mackerel, Rockfish, Black sea bream
Sea bass, BlueRunner (up to 5 kg), Squid, Blackfin sea bass, etc...

YB Landing Handle Price:

It is a carbon handle ideal as for the landing net of seabass wading games. Also, if you set a gaff, you can use it as a hand gaff in situations such as rocky shore and boats. The main shaft part, grip, joint part metal fittings, all design, processing and assembly are done in our own factory in Kumamoto, JAPAN.

SPEC

- Body: Made of carbon Surface: Rubber processing
- Screw standard: W 1/2 ●Length: 275mm ●Weight: 144g

By combining it with the landing handle, (sold separately) portability is improved.

Perfect for sea bass wading games if it combined with a landing net.

YB Landing Handle Stay Price:

The YB Landing Handle Stay can be attached to the YB Landing Handle (sold separately) to improve portability during wading. (This product does not come with a net handle) By using stainless steel "SUS316L", which has excellent rust and corrosion resistance and is also used in the aerospace field, it has a shape that supports smooth landing even in hard use.

SPEC

- Material: Stainless(SUS316L) ●Size: W20mmxH44mmxD165mm ●Weight: 58g

*Although it can be equipped on other companies' products, there are some products that do not fit.
*Not compatible with draw-out type shafts.

YB TipCover Size S/M Price:

This is Neoprene Tip-Cover. Neoprene tip cover for protecting and fixing delicate rod tips.

- Length: S-360mm / M-450mm ●Material: Neoprene & Piece of Velcro

S size for BlueCurrent, and using LiteGame-Rods.

M size for BlueSinper, Galahad, and using Offshore-Rods.

*Product photos may differ from the actual color tone.

Rod Belt Series Price:

Precautions for use and repair

Precautions for use

- Do not cast with a tangled line or line trouble in the reel. This may cause the rod to break. Furthermore, if you miss or forget to put the line through a guide, this may result in damage or breakage of your rod.
- If you continue to reel in your rig (lure, popper, rig etc) after it has reached the top guide, this will cause the rod to break.
- If you force the Joint section of the rod when joining together, this will cause cracking or splitting of the joints.
- If you use the rod while the joint section is still loose, this may cause breakage.
- If the Joint section is stuck together, use a rubber sheet for added grip while twisting away from each other.
- Beware of power cables, overhead power lines, or phone lines. The material (carbon) will easily pass through electricity causing serious injury or death.
- If you hear or see lightning approaching while in use, pack the rod away or stay away from the rod. Lightning may strike causing serious injury or death.

About the contents on this catalog

- Specifications might be changed without previous notice.
- Some of images on this catalog are proto type so it might be different from actual products.
- Images on this catalog might be different from actual products depending on the condition of printing.

Maintenance and storage

- Wash the rod with running water to rid of any filth and salt. Then wipe off any excess water. If you store your rod without wiping off excess water, this may cause blisters on the blank. Storage in well ventilated areas with no high temperature.
- Please do not leave the rod in your vehicle for long durations in summer. This will cause blisters and warping of the blank.

Contents in this catalog

- Include accurate specifications of rods, written in accordance with the regulations set by the Japanese National Fishing Rod Fair Trade Conference.
- Specifications listed on this catalog may be altered without notice.
- The colors presented in the pictures may differ from the actual color. Furthermore, some products are prototype rods in the developmental stage and may differ when it reaches the final product.

Repair and support

- Please take products which is required repairing to sales outlet. At that moment, please send a whole rod (not only the section of the breakage)
- Please be aware that any rod that was personally modified will not be covered by warranty (even if it is under warranty) Any repair that we have judged as changed/tampered with the specification or made to order is unacceptable.
