BEYOND THE FRAME

"BORN TO CROSS EVERY BOUNDARY"

"Think outside the box"

We continue to explore new possibilities with free and flexible thinking. Development may be easier if working from a pre-determined mold. And if one simply copies a shape, one can create a likeness, but one cannot actually create anything new. We stay away from the "easy path" and continue to extend the limits of our imaginations to create fishing rods that no one has ever seen before. This is symbolized by the words "think outside the box" engraved on every model of Yamaga Blanks' signature light game series "Blue Current" .

Slip out of the boredom days

In the dawn of Aji fishing- a time when the genre of aji rods hadn't yet been established – this rod was born as a "versatile light game rod" that could be used for both horse mackerel and rockfish. This was a time before social media, when the only way to gain knowledge was by being there. The Blue Current was born from an idea not bound by conventional thinking, without expectations of what it "had" to be. More than ten years later, this same spirit is still to be found at Yamaga Blanks as the series evolves and new excellent models are constantly being produced.

What we consider to be "Yamaga Blanks-ness" is "unadorned," "genuine," and "strong-core." It is not just about flashiness, but also about pursuing the essential value that is required of a fishing rod. We continue to hone the true value of our fishing rods, unswayed by the times nor trends.

While there are many fishing rods on the market, we have built our own unique characteristics by thoroughly refining the essential qualities of "lightness" , "great castability" and "strength" in our fishing rods. Even when our rods are specialized for a particular species or method of fishing, we design them to be versatile and enjoyable in a variety of ways thanks to their high basic performance. As a result, we create rods that can be used for a long time, even after the trends and fads have passed. It is our mission and our true desire at Yamaga Blanks to create rods that you can continue to pick up, unchanged, even 10 or 20 years from now.

The development of new rods is always based on this "uniqueness" , while incorporating current needs and new ideas.

In the process of searching for something "more interesting and unique" , it is not uncommon for rod specifications to change 180 degrees during its initial developmental stages. This is only made possible because we have our own factory and a system where design, development, and manufacturing can work closely together. Never satisfied with the status quo, we continue to refine our products in pursuit of something better. This accumulation of efforts has resulted in the creation of rods that combine the seemingly contradictory characteristics of "bending to catch" and a "powerful bend" .

In 2026, Yamaga Blanks will be introducing new, unconventional products. The SeaWalk Game Blender is a new challenge that brings more than just 2-in-1 fun. The SeaWalk Vertical Contact was developed through the knowledge cultivated in light game rods. The long-awaited Lupus Native series will be renewed. Members-only models include models that utilize cutting-edge technology, models specialized for specific situations, and additional models tailored to the needs of anglers.

We will continue to evolve as manufacturing professionals who delve into the essence of fishing, in pursuit of rods that are "unique to Yamaga Blanks" .

2026 NEW SERIES SeaWalk Vertical Contact

Bachikon Ajing is a fascinating game that allows you to directly access areas that cannot be reached from land-based fishing to target large horse mackerel in the depths. Anglers are required to find the productive depth where the fish are on the bite, and aggressively set the hook on them. This "aggressive element" of the technical style of fishing is the biggest reason why people are so addicted to this game.

The fact that even the slightest difference in technique can make a big difference in your catch is one of the reasons why anglers' curiosity is stimulated and get so hooked in this game.

The new series "SeaWalk Vertical Contact" to be released in 2026 is a specialized series of rods which have been thoroughly refined to provide the exquisite basic performance required for Bachikon Ajing.

VERTICAL CONTACT MODEL

66S

PRICE :
LURE : Max 60g
LINE : PE 0.3~0.6

●Length : 1975mm (Closed length: 1010mm) ●Weight: 68g ●Suitable reel size: D: LT2000~3000C / S: 2000~C3000

●Guide : SiC-S stainless frame K guide + LDB guide (Fuji) ●Target : Horse mackerel・Grunt

●Reel seat : VSS16 (Fuji) / Down lock ●Lure : Vertical Contact

"Search widely and hook sharply."
Instant blank feedback delivers solid upper-jaw hook-ups with zero-tension and curve-fall.

This is a revolutionary new spinning Bachikon rod that maximizes the benefits of spinning tackle: "quick fall" and "ease of use". You can cast to search a vast area, successfully sense the subtle bites during curve-fall and zero-tension approaches and swiftly initiate hooking to capture the hard upper jaw. Furthermore, the reeling sensitivity has been refined to convey every change in conditions under the water during the retrieval to your hands. This rod will allow you to enjoy the Bachikon game as if you were simply utilizing the single vertical jig-head rig.

66B

PRICE :
LURE : Max 60g
LINE : PE 0.3~0.6

●Length : 1975mm (Closed length: 1010mm) ●Weight: 90g ●Suitable reel size: D・S: ~200

●Guide : SiC-S stainless frame K guide + LDB guide (Fuji) ●Target : Horse mackerel・Grunt

●Reel seat : PMTS17 (Fuji) / Down lock ●Lure : Vertical Contact

The versatile rod which is the series' core model.
It pins the productive depth and won't miss the bite—ready for any situation.

Its high sensitivity allows anglers to clearly detect bites even from the smallest horse mackerel, and it offers the flexibility to aggressively hook up or let the fish take the bait depending on how active the fish are. It is also ideal for shallow waters with the use of lighter rigs. Its light operability makes it suitable for a variety of actions and methods, such as shaking to induce bites and zero-tension techniques. When combined with a reel with a depth counter, it is a rod that can be used in a wide range of situations.

70S

PRICE :
LURE : Max 95g
LINE : PE 0.3~0.8

●Length : 2126mm (Closed length: 1085mm) ●Weight: 73g ●Suitable reel size: D: LT2000~4000 / S: 2000~4000

●Guide : SiC-S stainless frame K guide + LDB guide (Fuji) ●Target : Horse mackerel・Grunt

●Reel seat : VSS16 (Fuji) / Down lock ●Lure : Vertical Contact

This technical model delivers uncompromising sensitivity and fast response—even with heavy rigs.
It broadens your options when fishing deep.

This rod offers consistent sensitivity and control even at depths of 100 meters. Even in deep areas or areas with strong currents, it will accurately detect subtle bites and lead to ideal hook-ups. With the perfect combination of "deep-sea" and "spinning reel", anglers will be able to efficiently search the depths. The 7ft length allows for a variety of approaches, including long strokes to lure the fish and casting out to edge of where the light can reach. This is a technical spinning model that shows its true potential once the angler masters its traits.

70B

PRICE :
LURE : Max 95g
LINE : PE 0.3~0.8

●Length : 2126mm (Closed length: 1085mm) ●Weight: 94g ●Suitable reel size: D・S: ~200

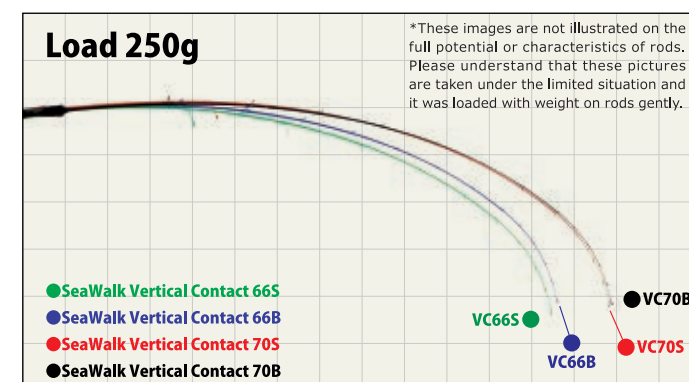

●Guide : SiC-S stainless frame K guide + LDB guide (Fuji) ●Target : Horse mackerel・Grunt

●Reel seat : PMTS17 (Fuji) / Down lock ●Lure : Vertical Contact

Anglers can dial in the productive depth and replicate the bite pattern.
With efficient deep-water feedback, this rod becomes your go-to weapon.

The highly sensitive blank will directly transmit the information from the depths allowing anglers to clearly grasp the landscape of the bottom and slight changes in the tides. It accurately detects subtle bites, leading to precise hook-ups. Anglers will be able to achieve precise range control in areas where frequent depth adjustments are required. It will allow anglers to minimize time loss due to snags and you won't miss that instant opportunity. It is also suitable to for use with 200 class electric reels when you are fishing in deep waters.

Vertical Contact BENDING CURVES

●This is a static load comparison conducted with the rod held at an angle that simulates actual fishing conditions. The base series 66S/B, is characterized by a versatile blank that bends flexibly. In contrast, the 70S/B, which can cover depths of up to 100m, has sufficient butt power to operate heavyweight sinkers in the depths. Although the picture does not fully represent the rods characteristics, you will be able to see that the rod flexibly bends in once the rod is loaded with the weight of the fish.

Precaution for carbon solid tip model

Carbon solid tip is loaded to
SeaWalk Vertical Contact series.

Thread color of tip is orange to increase visibility.

●As we have mentioned, SeaWalk Vertical Contact series, have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

"Let's start something new!"

The first obstacle when you want to start a new genre of fishing is probably the need for specialized tackle. However, it is difficult to purchase expensive tackle for a type of fishing that you may not even continue pursuing, let alone those seasonal species that you only go after only a few times a year. The new "SeaWalk GAME BLENDER" to be released in 2026, was born to lower those barriers. The modern fishing scene is becoming increasingly segmented, and tackle and methods are evolving every day. Of course, there is a need for specialized rods that are tailored to specific species and styles of fishing in different areas. This is an essential element in pursuing fishing as a sport and as a hobby, and ultimately lure fishing.

This time however, Yamaga Blanks has focused on a rod equipped with the "performance that will allow anglers to enjoy fishing in a wider variety of ways." In other words, the freedom to try out different styles and fish species simply by changing the reel. Not only does this open up new possibilities, but we hope it also awakens the childhood memories you had when you first started fishing. That is the new standard that Yamaga Blanks sought for the Game Blender, and it is what we are trying to achieve.

The SeaWalk GAME BLENDER will be available in three models, starting with the GAME BLENDER 510L/510ML, which allows anglers to enjoy both the swordfish (hair-tail) game and light slow jigging with one rod. Each model blends different genres and methods of fishing, allowing anglers to enjoy multiple types of fishing with a single rod.

Yamaga Blanks has combined the know-how it has cultivated through the design of hundreds of blanks to create a new series that transcends boundaries and blends different styles of fishing to expand the "possibilities of fishing". This is the "SeaWalk GAME BLENDER."

MULTI GAME MODEL

510L

Sabeling×Light Slow

PRICE :

LURE : *cw 60~150g (Sabeling) / cw 80~250g (Light Slow)

LINE : PE 0.6~1.2 (Sabeling) / PE 0.8~2 (Light Slow)

●Length: 1800mm (Closed length: 1310mm)

●Weight: 123g

●Suitable reel size: D: S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Reel Seat: PULS17 (Fuji) / Down lock

●Target: Hairtail·Rockfish·Bluerunner

●Lure: Metal jig

Excellent jig control thanks to excellent operability and capable of targeting a wide range of inshore fish, such as swordfish, rockfish and blue-runner.

A highly versatile model built to execute a wide range of jig actions with ease, smoothly transitioning from high-pitch to the pause-and-sink that naturally keeps the metal jig horizontal. Taking advantage of the tubular blank, it delivers crisp, precise input and outstanding operability, while high sensitivity clearly transmits even subtle, teasing bites on the fall. A multi-game rod that lets anglers enjoy true jig control with less fatigue, enabling confident, thorough coverage of a wide range of inshore targets.

*CW (Comfort Weight): Indicates the load range that can be used most comfortably. This is not the maximum limit, and slight variations above or below this range are acceptable.

510ML

Sabeling×Light Slow

PRICE :

LURE : *cw 80~180g (Sabeling) / cw 120~300g (Light Slow)

LINE : PE 0.6~1.2 (Sabeling) / PE 0.8~2.5 (Light Slow)

●Length: 1800mm (Closed length: 1310mm)

●Weight: 123g

●Suitable reel size: D: S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Reel Seat: PULS17 (Fuji) / Down lock

●Target: Hairtail·Rockfish·Bluerunner

●Lure: Metal jig

Slender yet muscular. Features a high-power tubular blank. A reinforced model for swordfish and slow-jigging that can easily handle heavy weight jigs.

This slender, lightweight yet powerful blank excels at interpreting tide changes and underwater anomalies. It can be used in a wide range of areas, from shallow waters to complex two-layer tides and fast currents, and even deep waters (up to 150m). Engineered with the signature sensitivity and recovery unique to a tubular blank, this rod detects the subtlest cues during the fall, delivers precise hook-ups with instantaneous response, and confidently bends under pressure to effortlessly lift the target. A masterful fusion of power and finesse, designed for anglers who demand uncompromising performance.

*CW (Comfort Weight): Indicates the load range that can be used most comfortably. This is not the maximum limit, and slight variations above or below this range are acceptable.

75M

Live-baiting×Electric jigging

PRICE :

LURE : Max 400g (Jig 200~400g / Sinker : 150~375g)

LINE : EJ PE 2.5~4 / Live-baiting PE 3~4

●Length: 2267mm (Closed length: 1575mm)

●Weight: 237g(P)

●Suitable reel size: D: S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Reel Seat: DPS18 (Fuji) / Down lock

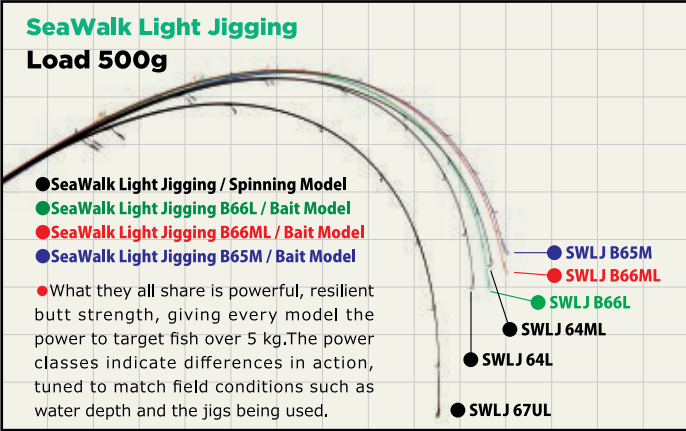

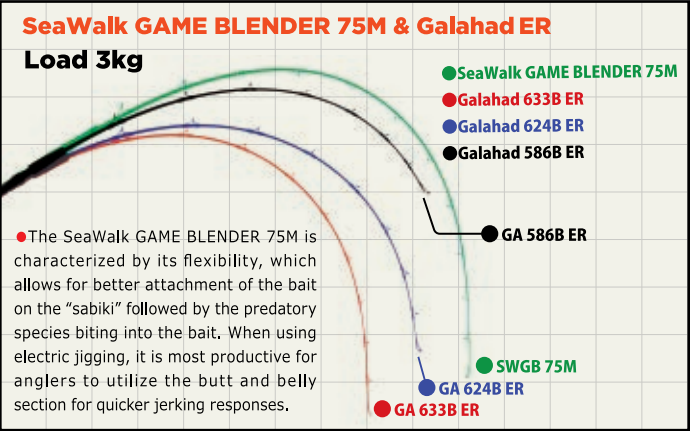

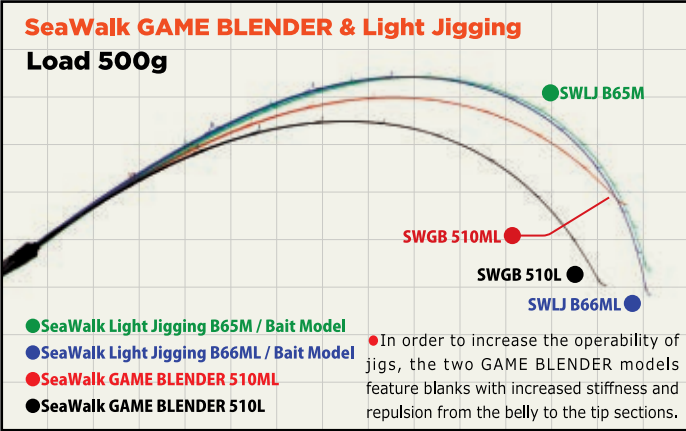

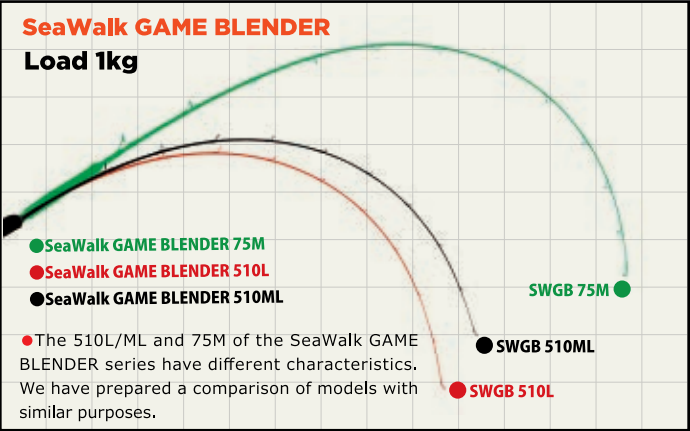

●Target: Bluerunner·Rockfish

●Lure: Metal jig / Live-bait drop rig (otoshikomi)

You can switch freely between live-baiting (otoshikomi) and electric-reel jigging as conditions change. One high-performance rod that excels at both, delivering true versatility and confidence.

This special composite model allows you to freely switch between two games, live-baiting (otoshikomi fishing) and electric jigging, depending on the season and the situation. Its highly flexible blank supports the entire process from allowing the bait to attach itself to the Sabiki until the decisive strike of your target. Its exceptional characteristics carry over to electric jigging as well, accommodating a wide range of retrieval speeds and effortlessly enabling a variety of jigging techniques. The long length of 7 feet 5 inches allows for flexible jig control, including changing the stroke width of the jerk action, which is not possible with a regular jigging rod.

LIGHT JIGGING MODEL

67UL

PRICE :

LURE : Jig 15~40g / Cast Max 25g

LINE : PE 0.4~0.8

●Length: 2015mm (Closed length: 1570mm)

●Weight: 102g

●Suitable reel size: D: LT2000~2500 / S: 2000~C3000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner·Rockfish·Grunt·Horse mackerel

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (Up to 80g is available if you just reeling)

Sensitive and powerful, this model targets aji, big red sea bream, and pelagics in SLJ.

This is the ultra-light class of light-jigging series to aim Grunt, Horse mackerel or else on shallow water with light weight jigs (around 20g). Combination of super fine PE line and Tungsten-jig make super light jigging possible to aim school of Grunt with falling action or Horse mackerel on the very bottom of the sea. And you will be able to cast jigs up to 25g or let jig up to 40g swim naturally in the 40m depth of water without any stress so you can aim variety of target depend on depth of water systematically.

64L

PRICE :

LURE : Jig 30~80g / Cast Max 35g

LINE : PE 0.6~1

●Length: 1935mm (Closed length: 1475mm)

●Weight: 114g

●Suitable reel size: D: LT2500~4000C / S: C3000~4000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner·Rockfish·Grunt·Horse mackerel

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (Up to 120g is available if you just reeling)

A basic model that can handle a variety of methods such as SLJ to Tai-rubber and cover waters from shallow to deep.

This is the standard model for light-jigging with Tungsten-jig on inshore. If you wish to cast jig up to 35g compactly or if you wish to cast Tungsten jig or Tai rubber jig to search target widely around 30-60m depth of the sea, belly and butt section which have been loaded moderate stiffness and strength make it possible. Thanks to performance of well-balanced tip and belly section, you can manipulate jig up to 80g on 80m depth of the water and you can keep jig swimming naturally without too much kickback.

64ML

PRICE :

LURE : Jig 60~120g / Cast Max 50g

LINE : PE 0.6~1.2

●Length: 1935mm (Closed length: 1475mm)

●Weight: 115g

●Suitable reel size: D: LT2500~4000C / S: C3000~4000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner·Rockfish·Hairtail·Bream

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (High pitch jerking is available)

Captures deep areas and strong currents with ease, handling everything from swimming methods to high-pitch actions.

This is heaviest model of spinning model in this series. It will suit to deep area such as 50m-100m depth or field that current running rapidly. You can cast jig up to 50g. At the situation of vertical and horizontal fishing, you can handle jig up to 120g without any stress. You will notice that strength of butt section of 64ML once bigger fish than you expected is on. Taking advantage of cast ability and falling speed as spinning model, this 64ML will be the huge advantage if you fish on the sea very deep or current running rapidly.

B66L

PRICE :

LURE : Jig 40~80g

LINE : PE 0.6~1

●Length: 1985mm (Closed length: 1525mm)

●Weight: 131g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner·Rockfish·Hairtail·Bream·Seabass

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Lure: Metal jig·Tairubber

This highly versatile overhead-reel model can handle SLJ, Tai-rubber, and even hairtail jigging.

This 66L have employed high versatility to fish with Tungsten-Jig on 20m-50m depth of the sea. It will good to be used for Tairubber game thanks to its flexible tip section and belly section which have moderate stiffness with high sensitivity to let you notice vital information or slightly changes of current. If you wish to aim Hair tail or Sea bass on bay area and try not to let jig move too much, this 66L will make it easier than other models for sure.

B66ML

PRICE :

LURE : Jig 40~120g

LINE : PE 0.8~1.2

●Length: 1985mm (Closed length: 1525mm)

●Weight: 131g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner·Rockfish·Hairtail·Bream·Seabass

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Metal jig·Tairubber

High-response blanks with sensitiveness and toughness make this model suitable for various situations.

66ML have characteristic to cover wide range of depth of the sea (30m-80m) thanks to its well-balanced sensitiveness and powerfulness. Even you fish with Tungsten-jig, you will never lose response speed of jerk taking advantage of high sensitivity and manipulate ability thanks to characteristics of overhead model. It is also good to be used for Tairubber game in deep area (80m-100m) or current running rapidly.

B65M

PRICE :

LURE : Jig 60~150g

LINE : PE 0.8~1.5

●Length: 1960mm (Closed length: 1490mm)

●Weight: 128g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner·Rockfish·Hairtail·Bream

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Metal jig (Up to 250g is available if you fish with slow pitch jerking)

This model excels in waters with frequent bluerunner contact and is also ideal for deep-water fishing.

This 65M is the most powerful model of light-jigging series which is good to be fished in high population of blue runner. Compared to other models of light-jigging series, it have been loaded a little stiffer blank than other and you can enjoy manipulating jig manually with this 65M at your will. You can handle 80g-150g of Tungsten-jig comfortably with it. If you are going to fish in 100m depth of water or rapid area with fine line, we recommend you to take this 65M.

SeaWalk TAI RUBBER

TAIRUBBER MODEL

SeaWalk Tairubber series, we have differentiated the categories for the 4 rods depending on style and conditions rather than rod power to set them apart from one another. Equipped with not only the lightness of a light game rod, but also the sensitivity and strength, these blanks will be the extension to your arm enabling anglers to go head to head with monstrous snapper exceeding 80cm in length. We hope you can experience our exquisite blanks that will shine a new light into your snapper game.

For more details of category
YB Official Web site

70AT

PRICE :
LURE : 60~150g (Tairubber)
LINE : PE 0.6~1

- Length : 2143mm (Closed length : 1624mm)
- Weight : 134g
- Suitable reel size : D: 100~200 / S: 100~300
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : PULS17 (Fuji) Down lock nut
- Target : Red Sea Bream
- Lure : Tairubber

An all-round Tairubber model with a refined blank for smooth hook-ups.

This is a specialized model to automatically hook up snapper by simply continuing to reeling in your rig following the small nibbles which frequently occur prior to the main bite. The automatic yet smooth hooking of the fish is brought on by the flexible yet powerful blank. This model is the backbone for the series and can be recommended for use in various field conditions.

611D

PRICE :
LURE : 100~250g (Tairubber)
LINE : PE 0.8~1.2

- Length : 2125mm (Closed length : 1550mm)
- Weight : 179g
- Suitable reel size : D: 200~300 / S: 200~300 Electric reel: 200
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : PLS18 (Fuji) Down lock nut
- Target : Red Sea Bream
- Lure : Tairubber

Electric reel compatible model

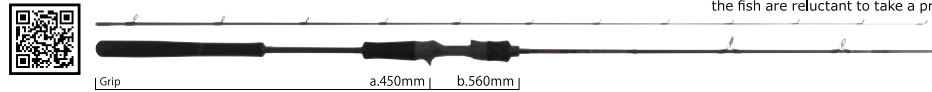

A special tai rubber model that packs deep-water performance into a light, responsive blank.

Anglers will have to utilize heavy weight Tairubber jigs when fishing in 100m of water. This model is specifically designed to enable anglers to easily handle these heavy rigs. The blank was shaped to reduce the heavy load on the angler during the reeling of the heavy rig from the deep waters in intricate current conditions. We were able to create this rod with attention to the smallest detail in components for anglers to enjoy the Tairubber game in the deep waters.

72S

PRICE :
LURE : 30~100g (Tairubber)
LINE : PE 0.4~0.8

- Length : 2185mm (Closed length : 1118mm)
- Weight : 100g
- Suitable reel size : D: 100~200 / S: 100~200
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : PMS17 (Fuji) Down lock nut
- Target : Red Sea Bream
- Lure : Tairubber

An ultra-sensitive model that combines lightness and feel to hook even the slightest bite.

This is the sensitive Tairubber model packed with our expertise and knowledge from producing light game rods. It has the most flexible tip section of the series and its outstanding sensitivity will allow anglers to successfully hook up the slightest of bites. The sensitive tip will transmit the vital information of the current and the slightest nibbles from the fish through the sensitive blank and successfully lead to a hookup. This model will become your biggest asset in situations where the fish are reluctant to take a proper bite and the flow of the current is super weak.

60F

PRICE :
LURE : 60~120g (Tairubber) / ~100g (Jig)
LINE : PE 0.6~1

- Length : 1853mm (Closed length : 950mm)
- Weight : 100g
- Suitable reel size : D: 100~200 / S: 100~300
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : PULS17 (Fuji) Down lock nut
- Target : Red Sea Bream
- Lure : Tairubber - Metal jig

A high-response tai rubber model with fast-recovering blanks for aggressive, high-tempo tactics.

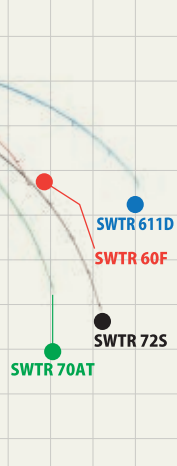

More specifically, the rod is built up of a carbon solid tip to feel for the minute changes in currents and bites and the highly responsive belly section allows anglers to swiftly and aggressively hookup the fish. Although it is short in length with a stiffer blank, the smooth blank taper will reduce the instability when reeling in your rig, enabling anglers to maintain their concentration. We highly recommend this model for those anglers who like to use both Tairubber rigs and snapper jigs depending on the fishing conditions.

SeaWalk Tairubber BENDING CURVES

Load 100g

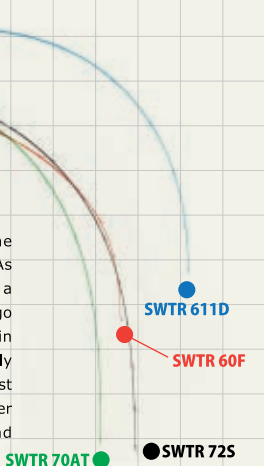

- SeaWalk Tairubber 70AT / TYPE : AUTOMATIC
- SeaWalk Tairubber 611D / TYPE : DEEP
- SeaWalk Tairubber 72S / TYPE : SENSITIVE
- SeaWalk Tairubber 60F / TYPE : FAST

● The picture illustrates the bending curve of the SeaWalk Tairubber series with a static load of 100g. Although each model has its distinct characteristics, all models are built to easily hook up the fish, allowing for usage of these rods throughout the world. The 70AT is the most standard model of the series allowing for use in various depths and wide range of tairubber weights. The stiffer 60F is ideal for use with jigs in addition to the use of Tairubber rigs for anglers to aggressively hookup aggressive bites.

Load 500g

● The picture illustrates the bending curve of the SeaWalk Tairubber series with a static load of 500g. As you can see in the illustration, each model has a distinct bending curve yet possessing the power to go head to head with monstrous snapper over 80cm in length. The powerful and resilient 611D is especially designed to easily fight large snappers in deep and fast flowing currents. Other models also possess the power of recovery and power yet being more flexible and bendy to absorb the strength of the fish.

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

SeaWalk CAST JIGGING

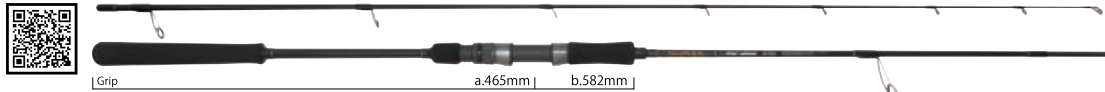

CAST JIGGING MODEL

71ML

PRICE :
CAST WEIGHT : Max 40g / Under Cast Max 60g

- Length : 2170mm (Closed length : 1118mm)
- Weight : 116g
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS17 - BACK STOP Double Nut (Fuji) / Up lock nut
- Suitable reel size : D: 4000~6000 (SW4000~SW6000) S: 4000~C5000 (SW4000~SW6000)
- Target : Small sized Blue-runner (Bonito - Spanish mackerel - Dolphinfish) - Various rock fish - Red sea bream - Flatfish - Seabass
- Lure : Metal Jig - Blade Jig - Vibration plug - Jighead + Soft plastic

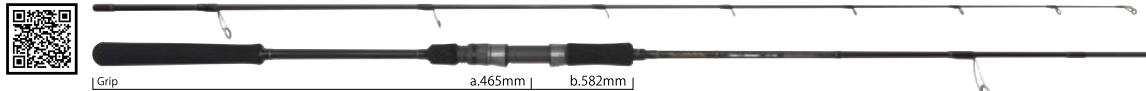

This model is the core of cast jigging, with a sensitive tip and belly for long-cast performance and stable retrieves.

With its flexible tip and belly section, it is a model that has improved the basic performance of cast jigging that suppresses blurring and flapping of jig even during high speed reeling, realizing stable reeling comfort and smooth hooking. It is easy to cast over and under hand, and even though it is ML power class, the butt section keeps unexpectedly big fish under control. From shallow area to depths around 20m, while capturing multiple fish species with blade jigs, metal vibrations, and Inchiku, in sandy areas, 71ML work effectively to aim Flounder or Flathead with jig heads + worms by taking advantage of the high sensitivity.

73M

PRICE :
CAST WEIGHT : Max 60g / Under Cast Max 80g

- Length : 2228mm (Closed length : 1147mm)
- Weight : 118g
- Guide : SiC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS17 - BACK STOP Double Nut (Fuji) / Up lock nut
- Suitable reel size : D: 4000~6000 (SW4000~SW6000) S: 4000~C5000 (SW4000~SW6000)
- Target : Small sized Blue-runner (Bonito - Spanish mackerel - Dolphinfish) - Various rock fish - Red sea bream - Flatfish - Seabass
- Lure : Metal Jig - Blade Jig - Vibration plug - Jighead + Soft plastic

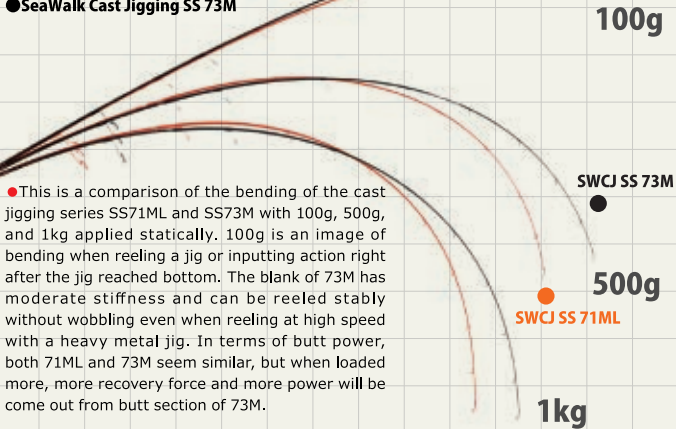

This is a model that masters various lures with high-response operability to capture a wide range and deep waters.

73M has a more moderate stiffness than 71ML, and is designed to capture a wide range and deeper areas while using metal jigs up to 80g. It allows you to cast heavy lures farther than expected with light effort, even underhand, and is well suited not only to metal jigs but also to heavy minnows, sinking pencils, and jerkbaits that emphasize lure action. It is also recommended for targeting migratory fish feeding near the surface, rockfish using the wind method with a heavy jighead + worm, or the lift-and-fall method over rocky reefs. This is an almighty model that covers a variety of styles with just the 73M.

REEL BALANCE POSITION

150g

200g

Reel Balance Indicator

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

The BattleWhip TR series is an aggressive tip-run lineup that lets anglers manipulate squid jigs with the ease of light game fishing, using delicate, high-sensitivity performance to actively detect and hook even the slightest bites. Newly added for 2026, the TR510/N is another “no-look tip-run model” that inherits the lineage of the TR63/N. By blending High tactile sensitivity, operability, and tracking performance at a high level, it excels with small jigs and in shallow areas, as well as in diverse situations such as night tip-run fishing.

A new no-look model built to excel in technical applications. Its light, crisp jerking feel makes it a true trump card for drawing strikes.

This is a short-length, “no-look” model that enhances sensitivity for no-look tip-run fishing. Anglers will be able to sense the slight touches through the sensitive blank without the need to visually check for contact from the squid. The slightly longer carbon solid tip has an increased sensitivity even when using lightweight squid jigs. It feels very light to use, yet it is capable of handling weights up to 50g in tough conditions. Anglers will be able to experience its true potential in tough situations, shallow areas and night tip-run fishing. (Carbon solid tip model)

63N

PRICE:
EGI: 30~60g LINE: PE 0.4~0.8

●Length: 1920mm (Closed length: 975mm) ●Weight: 75g ●Suitable reel size: D: LT2500C~3000C / S: 2500~C3000

●Guide: SIC-S stainless frame K guide + LDB guide (Fuji) ●Target: Squid

●Reel seat: VSS16 (Fuji) / Down lock ●Lure: Egi

High sensitivity for reliable hook-ups is thoroughly pursued. Signals are transmitted not only visually, but also directly through the hand.

Making use of advantage of high sensitivity accumulated from light game scene, blanks transmit slightly touch of squid. This characteristic of TR63/N makes you to distinguish activity of squid and to stay focused even you faced touch condition. This is for the angler who does not want to lose opportunity of catching squid. You do not have to look at tip to get indication of vital information. Blanks definitely transmits signal to your hand. All you have to do is just feel it! TR63/N will make differences for sure. (Carbon Solid Tip model)

●Reel seat: VSS16 (Fuji) / Down lock ●Lure: Egi

A multi-purpose model offering versatility across a wide range of styles. Enjoy everything from shallow-water tip-run eging to boat eging.

This is specialized model with high sensitivity and operability to cover from shallow to 30m depth of water. 7.3ft length of blanks will help you to stay your Egi still even you fish from mid-large boat or in situation that you are struggled in welter of the sea surface. You can fish with S-Fall techniques while taking advantage of its length. Of course, casting game is available with this versatile model. We believe that you will be able to enjoy the variety of situation and method of squid games with this TR 73/S. (Carbon Solid Tip model)

69D

PRICE:
EGI: 50~80g LINE: PE 0.6~1
DEPTH: 40~90m

●Length: 2755mm Closed length: 1060mm) ●Weight: 80g ●Suitable reel size: D: LT2000~4000C / S: 2000~4000

●Guide: SIC-S stainless frame K guide + LDB guide (Fuji) ●Target: Squid

●Reel seat: VSS16 (Fuji) / Down lock ●Lure: Egi

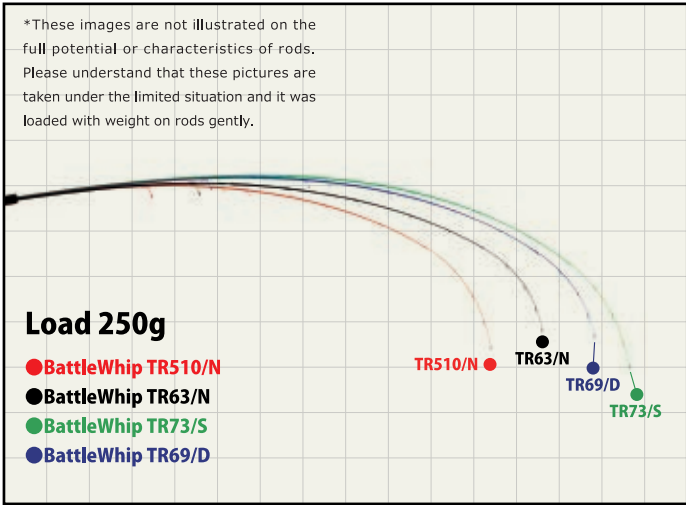

A power model built to dominate deep water. Handles heavy-weight egi with ease for quick, decisive presentations.

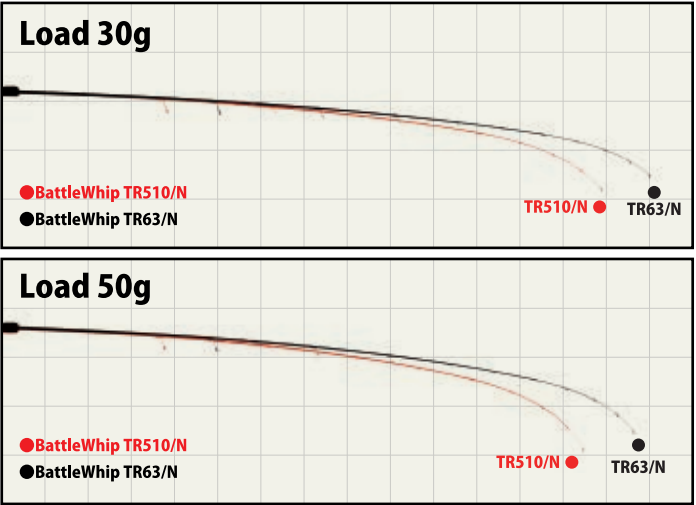

This is the most powerful model in this series to cover area such as deep and rapid water. If you aim huge squid in tough area such as current runs rapidly or deep water around 40m or more, TR69/D is the best choice. It will be bent very smoothly while accumulating huge power of recovery inside of blanks themselves to lift even squid much bigger than you have thought. This is for anglers who wish to explore untouched area for aiming massive squids. (Carbon Solid Tip model)

BattleWhip TR Series BENDING CURVES

- The TR73/S is the longest model in the series, with a longer solid tip. This makes it less susceptible to waves when detecting bites, and allows for longer strokes to lure the fish.
- TR69/D is a power model designed for deep water and strong currents, yet it never feels heavy in hand. It excels not only in deep water but also in situations that call for heavier-than-standard egi and fast-fall, high-speed approaches.

- TR63/N excels in sensitivity and response, with a design focused on precise egi control. The firm blank suppresses unwanted tip noise, maintaining clear sensitivity even when the boat is rocking in short, choppy conditions.
- TR510/N features a redesigned blank with an extended carbon solid tip. This improves the handling of lightweight egi and significantly enhances the feel and smoothness of the jerking action.

Precaution for carbon solid tip model

Carbon solid tip is loaded to TR series and IM series. Tubular tip is loaded to OR model

Thread color of tip is orange to increase visibility.

- As we have mentioned, TR&IM series have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

IKAMETAL MODEL

The "BattleWhip IM" series is designed to adapt to ever-changing conditions and turn even slow periods into part of the fun. Combining high sensitivity, light weight, and slim yet powerful high-response blanks, the four-model lineup—IM511S/B for sharp lifts and a variety of jiggling actions, and IM69S/B for highly versatile subtle control—brings out the depth and enjoyment of the Ikametel game.

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

It is an aggressive model specialized in sensitivity and power. The super sensitive blank will assist anglers by instantaneously transmitting the slightest of touches from the squid for you to swiftly set the hook. Although it is a slender and lightweight rod, it has the operability to handle up to 150g and the power to easily lift multiple hookups of large size squid. (Model equipped with carbon solid tip)

Grip

a.455mm | b.525mm

Grip

a. 440mm | b. 5

This model will allow anglers to efficiently find the range where the squid are most productive in the deep or fast flowing currents. The butt power hidden in the slender blank does not lose its controllability and high sensitivity even when anglers have to utilize heavy squid-jigs up to 190g. This is a No look IM model for those who want to keep their concentration or for those who want to standout from other anglers around you. (Model equipped with carbon solid tip)

Grip

Thanks to sensitivity and visibility of **blanks** are increased for achieving the **excellent** results. The **lightness** of it let you handle this stick as your extended arm, **flexibility** and power of recovery provide you comfortability and toughness of butt section enable you to lift unexpected monster up to surface without anxious and burden of physical. This IM69/S will cover various situation, method and size of target with fun for sure. (Carbon Solid Tip model)

Grip

Carbon solid tip lets you know vital information visibly and transmits a lot of information to your finger through blanks. Although it has flexibility and sensitivity, once you have sensed a touch of squid you can strike aggressively without any delay thanks to moderate stiffness and power of recovery which also help anglers to lift huge squid up from the bottom of the sea. Taking advantage of IM69/B overhead model, we hope that you hunt squid as many as you have wished. (Carbon Solid Tip model)

Load 150g

● BattleWhip IM511S
 ● BattleWhip IM511B
 ● BattleWhip IM69S
 ● BattleWhip IM69B

• This is a comparison of 4 models of BattleWhip IM models with the angle of the rod almost horizontal with a static load of 150g. Due to the flexibility and bending of the tip section of the IM69S&B model, the slightest touches from squid will transmit to larger movements of the tip for anglers to visually recognize the bite. The 511S&B is a model specialized to aggressively hookup the squid with its highly responsive operability. By reducing the bending of the blank, anglers can directly feel for the bites while improving the operability of the egi. It is a model that will expedite the reaction speed of anglers making it way more fun to fish with.

OMORC MODEL

details of category
 18 Official Web site

The BattleWhip OR series offers two models dedicated to the Omo-rig game. The spinning OR72/C combines long-distance castability and crisp control for efficiently searching wide areas, while the bait OR60B/C is built to tackle strong currents and double-layered tides, maximizing the tactical advantages of bait tackle to boost results.

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

This OR72/C have been designed to manipulate a sinker weight 90g ~ 150g comfortably. Also powerful enough butt and belly section to cast sinker up to 150 safety and comfortably. Thanks to moderate stiffness of tip section vital information of squid will be transmitted very clearly. You can search as wide as you have wished and you can sense what is going on inside of water very clearly. You will definitely enjoy this squid game as you are having jiggig game with it. (Tubler Tip model)

Grip

a.460mm | b.525mm

Grip

a. 430mm | b. 5

Why bait tackle? Simply, there are many advantages. Just to mention a few, anglers can easily cast heavy rigs, capture the range easily with the counter on the reel, easily determine a bite and the powerful winding ability of bait casting reels. The 60B/C is a model dedicated to Bait Omrigor to make the most of its advantages in the squidding game. In situations where Omrigor out fishes any other technique, we are confident that this rod will produce you results. (Tubular tip model).

Load 150g

● BattleWhip OR 60B/C

● BattleWhip OR 72/C

OR60B/C

OR72/C

• This is a comparison of the two models of BattleWhip OR with the angle of the rod almost horizontal with astatic load of 150g. The OR60B/C is designed for use with 190~225g usage vertically but can also easily cast and control 150g with the powerful butt section. Although the stiffness of the tip has been reduced for anglers to visually recognize the bites, the highly sensitive tubular blank transmits the slightest changes under the surface directly to your hands. The OR72/C is designed with a bendy tip section for anglers to easily recognize the slightest touches from the squid even when the rod is loaded with the weight of the sinker or jig. Anglers will easily be able to cast and control the 150g rigs in the depth thanks to the sharp belly to butt section of the rod.

[Grip a.495mm | b.795mm]

A flexible yet high-powered model with outstanding operability of medium to large lures for big kingfish and tuna.

In order to control the large kingfish lurking in the rapids + shallows + around rough reefs and the harsh yellowtail tuna game in the summer, we have created a powerful blank that combines outstanding castability and comfortable operability of large lures and small mouthed poppers. Depending on the target and anglers style, this model will adapt to your needs when fighting the fish, stopping the fish, and lifting the fish off the bottom or rocks to successfully land your trophy.

81/10
TQR-Mode

PRICE :
LURE : 40~150g LINE : Max PE 10
DRAG : Max 17kg/45°

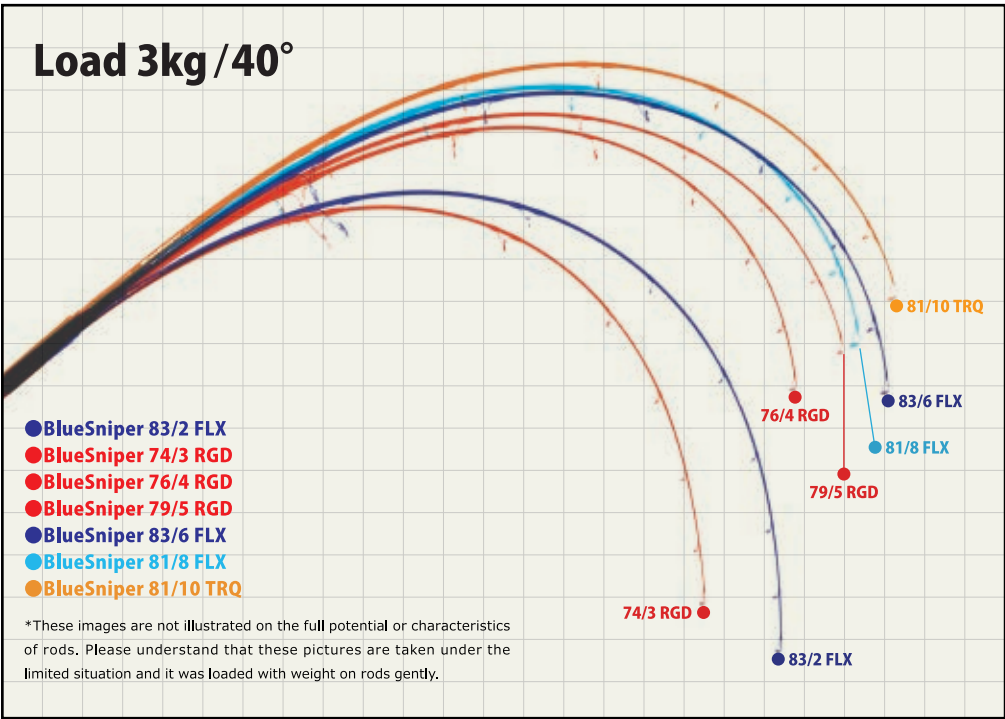

- Length : 2485mm (Closed length : 1775mm)
- Guide : Super Ocean guide (Fuji)
- Reel seat : DPS20 (Fuji) / Down lock nut
- Weight : 400g
- Suitable reel size : D · S : SW18000~20000
- Target : Tuna Species over 100 kg
- Lure : Topwater Plug

A highly powerful, torque-filled model equipped with overwhelming lifting power and strong tenacity for supersize tuna.

This rod is a high-powered model for use with PE10 to go against large yellowfin tuna and bluefin tuna. It combines accurate casting performance and outstanding operability of pencils and small mouthed poppers, which is hard to imagine from powerful blank. The torque-filled butt power will gently bend in for anglers to be able to consistently apply pressure towards the monstrous tuna in the deep while reducing the load on the angler.

BlueSniper Boat Casting BENDING CURVES

When comparing the bending curve of the “83/2FLX” and the “74/3RGD” of the PE2~3 line class light casting models, the stronger “74/3RGD” seems to look more flexible, however this is due to the different concepts of each model.

●83/2FLX
This model specializes in long-distance casting and controlling the diving pencils naturally. The blank design allows the rod to bend smoothly from the tip to the belly section and continuing on to bend even deeper towards the butt section. Although the butt power is comparable to that of the PE3 line class, you will notice that the light controllability of the rod is of the PE2 line class.

●74/3RGD
Although it has a large bending curve similar to the “83/2FLX”, the short length of the rod has given it a highly responsive and sharp qualities. The bending point is set closer towards the anglers allowing for easier control of lures.

●76/4RGD · 79/5RGD
Thanks to the compact handling of the rod, this model is highly versatile and is outstanding with its lure operability. Although both models are designed with increased stiffness, the butt section of the 76/4RGD tenaciously bends in once the weight of the fish is loaded during the fight, reducing the physical strain on the angler. Even smaller anglers with less physical strength will comfortable be able to utilize this rod.

JIGGING MODEL

YAMAGA Blanks jigging rods combine power and precise control with a true 1-piece construction for consistent bend and fast recovery. Spinning models 632S, 633S and 634S offer smooth, stable jerks even during doterra drifting, while the 585S delivers sharp response for high-pitch and one-pitch vertical jigging. The three baitcasting models maximize the strengths of bait reels in winding and fall control, with strong yet forgiving recovery for precise, subtle to aggressive jig action.

For more details of category
YB Official Web site

632S

PRICE :
LURE : Jig Max 140g LINE : Max PE 2
DRAG : Max 3kg/45°

- Length: 1915mm ●Weight: 169g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: DPS18 (Fuji) / Up lock nut
- Suitable reel size: D-S: 5000~6000
- Target: Blue runner
- Field: Depth to about 60m

This model delivers a highly sensitive feel.
Its blank features moderate stiffness and a crisp, responsive recovery.

This is the lightest model of spinning which have high flexibility on tip and belly section. Although it has flexibility and high sensitivity to sense slightly changes of current and reducing the chance of breaking line or hook, once loaded heavily tough butt section keep unexpected huge fish under control. If you focus to input the load on belly section, jig will swim very smoothly without unnatural movement.

633S

PRICE :
LURE : Jig Max 180g LINE : Max PE 3
DRAG : Max 4kg/45°

- Length: 1915mm ●Weight: 178g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: DPS18 (Fuji) / Up lock nut
- Suitable reel size: D-S: 5000~6000
- Target: Blue runner
- Field: Depth to about 80m

An all-round model offering precise control and high sensitivity,
capable of handling a wide range of challenging waters and situations.

You can call this 633S all rounder of inshore jigging model. Sometimes you have to do one pitch jerk on horizontally, combination jerk on vertically with just one stick. 633S work well on various kind of jigging situation as an all rounder. You can sense even a small vital information so if the target would not take your jig then you can switch the rhythm of jerking to let them bite. If you fish with jig around 150g please take 633S or if you use around 120g mainly, 632S is the best choice.

634S

PRICE :
LURE : Jig Max 220g LINE : Max PE 4
DRAG : Max 6kg/45°

- Length: 1915mm ●Weight: 196g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: DPS18 (Fuji) / Up lock nut
- Suitable reel size: D-S: 6000~8000
- Target: Blue runner-Tuna
- Field: Depth to about 100m

Combines strong power with agile handling in a well-balanced blank,
making it versatile enough to tackle everything from shallow to deep water.

If you face the situation that you are required to move long jig naturally, to input load effectively on deep or rapid area, even on horizontally jigging in windy condition, 634S will cover all of these without any anxious. You will realise that 634S have massive power to fight with kingfish at shallow or rough reef. The versatility of 634S enable you to jerk in one pitch or combinational jerk if you necessary to approach with different method.

585S

PRICE :
LURE : Jig Max 280g LINE : Max PE 5
DRAG : Max 8kg/45°

- Length: 1745mm ●Weight: 212g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: DPS18 (Fuji) / Up lock nut
- Suitable reel size: D-S: 8000~10000
- Target: Huge Blue runner-Tuna
- Field: Depth to about 120m

Designed for working deep water effectively,
delivering seamless jerks with its powerful and responsive recovery.

585S have been designed to control the game of kingfish or amberjack without losing initiative. Short and fine blank of 585S enable you to jerk jig aggressively does not matter the shape of Jig to approach the target. Of course, butt section has enough power to keep giving pressure on fish with PES. If you wish to fall jig vertically and jerk aggressively to aim huge one at fish bed or rough reef, 585S is the perfect choice for sure.

622B

PRICE :
LURE : Jig Max 150g LINE : Max PE 2
DRAG : Max 3kg/45°

- Length: 1890mm ●Weight: 187g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: PLS18 (Fuji) / Down lock nut
- Suitable reel size: D-S: 1000~1500
- Target: Blue runner
- Field: Depth to about 80m

A technical model designed to pair with light lines,
offering a sensitive feel and enabling a wide range of jig actions.

This is the lightest model for overhead reel to be used on near shore with PE line up to 2. You can approach the target with various action as such as natural swimming action focused on tip section, high speed short pitch jerking concentrate on belly and butt section or long fall action to cover various situation thanks to sensitivity and lightness of blank itself. If you wish to aim yellowtail or kingfish delicately with fine line, 622B is the one.

623B

PRICE :
LURE : Jig Max 200g LINE : Max PE 3
DRAG : Max 4kg/45°

ELECTRIC JIGGING MODEL

633B

PRICE :
LURE : Jig Max 150g LINE : ~PE 3
DRAG : Max 4kg/45°

- Length: 1925mm ●Weight: 200g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: TCS18 (Fuji) / Down lock nut
- Suitable reel size: D-S: 1000~2000
- Target: Blue runner
- Field: Depth to about 100m

The lightest model in the series,
yet powerful enough to control blue runners around 10 kg.

If you are going to aim at small sized Blue Runner with PE 3, this 633 would be a perfect choice. Even though automatic reeling at constant speed, flexibility of tip and belly section will help you to jerk jig comfortably and set hook on with less failure. It will bend very much when fish is on, but you can fight with fun without any worry. You will be surprised that potential which is hidden inside blank of 633 for sure.

624B

PRICE :
LURE : Jig Max 250g LINE : ~PE 5
DRAG : Max 6.5kg/45°

- Length: 1905mm ●Weight: 199g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: TCS18 (Fuji) / Down lock nut
- Suitable reel size: D-S: 1000~2000
- Target: Blue runner-Tuna
- Field: Depth to about 150m

This is the standard electric-reel-compatible model
that allows easy jig action from shallow to deep waters.

This is standard jigging rod for ER to aim bluerunner around 5kg. You can be reeling with any speed thanks to nice and flexible tip section, then you can give the action to jig at your own will. If you hooked bluerunner more than 10kg, you do not have to worry about anything! It will enable you to keep it under control without being anxious. We believe that it may be allowed to call almighty jigging rod for ER and we want anglers all over the world to fish with it.

586B

PRICE :
LURE : Jig Max 350g LINE : ~PE 6
DRAG : Max 10kg/45°

- Length: 1740mm ●Weight: 269g
- Guide: SIC-S Stainless frame K Guide (Fuji)
- Reel Seat: TCS18 (Fuji) / Down lock nut
- Suitable reel size: D-S: 2000~3000
- Target: Huge Blue runner-Tuna
- Field: Depth to about 200m

A power model with strong recovery performance
that supports anglers and enables battles with huge targets in deep water.

If you are going to aim king fish or yellow tail over 10kg we recommend you to choose this monster hunter. You can give action to jig around 300g in 100m depth of the sea effectively. It is going to help you to jerk heavy jig without any burden or stress and to fight with big fish with huge advantage thanks to its flexibility, toughness, and versatility. Fulcrum point is going to move to butt section when you fight It is not just stiff rod, you can use it feel like your arm for sure.

Galahad 624B Bait Model

Galahad TRAVEX

MULTI PIECE JIGGING MODEL

593S

PRICE :
LURE : Jig Max 180g **LINE : Max PE 3**
DRAW : Max 5kg/45°

- Length : 1775mm (Closed Length : 1135mm)
- Weight : 206g
- Suitable reel size : D-S : 5000~6000
- Guide : SIC-S+SIC stainless frame K guide (Fuji)
- Target : Blue runner
- Field : Depth to about 100m
- Reel Seat : DPS18 (Fuji) / Up lock nut

This is a 2-piece model that offers sharpness and lightness while maintaining strong recovery force.

This is a versatile stick to cover various methods of jigging such as horizontally or vertically with around PE3. Thanks to the sharpness and lightness of this blank, you can enjoy manipulating your jig as you wish. If you aim for yellowtail or kingfish with metal jig up to 180g on 30 ~ 80m depth of water, the potential of 593S will be shown definitely. Although the blanks of 593S seem slim and delicate, fish will be stopped and lifted by the butt section which has been loaded with massive power.

594S

PRICE :
LURE : Jig Max 240g **LINE : Max PE 4**
DRAW : Max 6.5kg/45°

- Length : 1775mm (Closed Length : 1135mm)
- Weight : 221g
- Suitable reel size : D-S : 6000~8000
- Guide : SIC-S+SIC stainless frame K guide (Fuji)
- Target : Huge Blue runner
- Field : Depth to about 150m
- Reel Seat : DPS18 (Fuji) / Up lock nut

A model with strong butt power that combines lightness and strength to fully exploit the advantages of a 2-piece design.

If you aim kingfish or amberjack at near shore on expedition with around PE4, this 594S is the best choice. Lightness feeling of manipulation that is loaded as common characteristics of TRAVEX series enable you to handle long jig naturally at horizontally or to jerk jig aggressively at vertically. When you fish at fish bed with rough bottom or shallow area to aim tough target, you do not have to afraid to let it stop forcefully and aggressively without losing your initiative.

595S

PRICE :
LURE : Jig Max 320g **LINE : Max PE 5**
DRAW : Max 8.5kg/45°

- Length : 1780mm (Closed Length : 1130mm)
- Weight : 279g
- Suitable reel size : D-S : 8000~10000
- Guide : Super Ocean guide (Fuji)
- Target : Huge Blue runner-Tuna
- Field : Depth to about 200m
- Reel Seat : DPS20 (Fuji) / Up lock nut

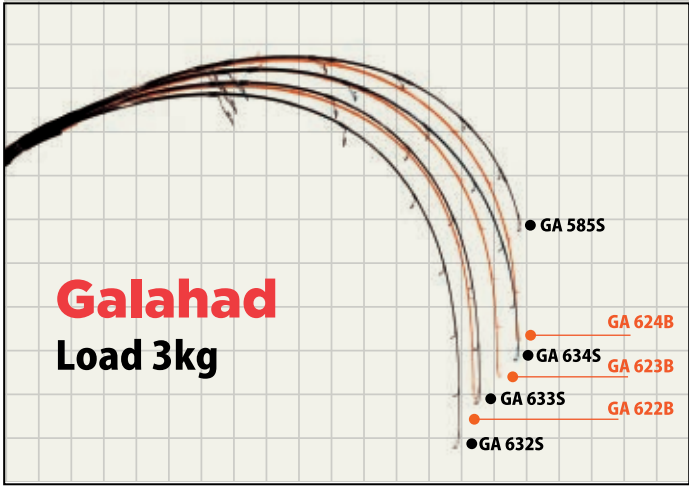

This model offers the power, flexibility, and high operability needed for landing big fish with vertical jerking techniques.

If you have plan to go to southern island of Japan or deep sea of overseas to aim large amberjack, dogtooth tuna or yellowfin tuna, please take 595S without hesitations. Tip section have been adjusted to become little flexible for increasing ability of manipulation and reducing burden of anglers when they jerk aggressively. Once huge fish is on, you will notice that it bends very smoothly and you might forget that it is 2pics grip jointed.

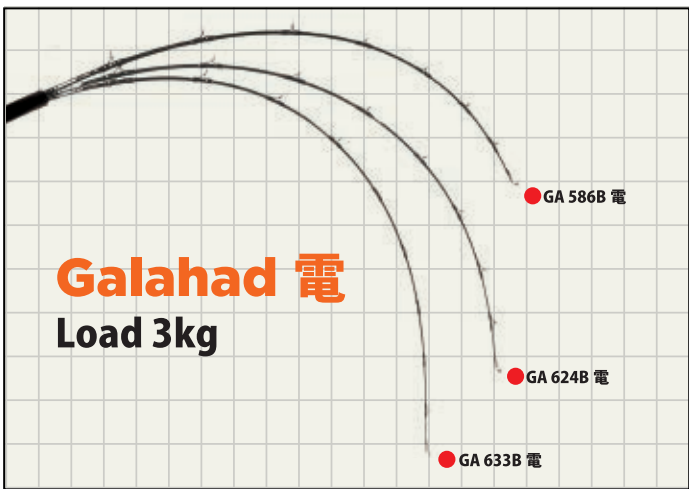

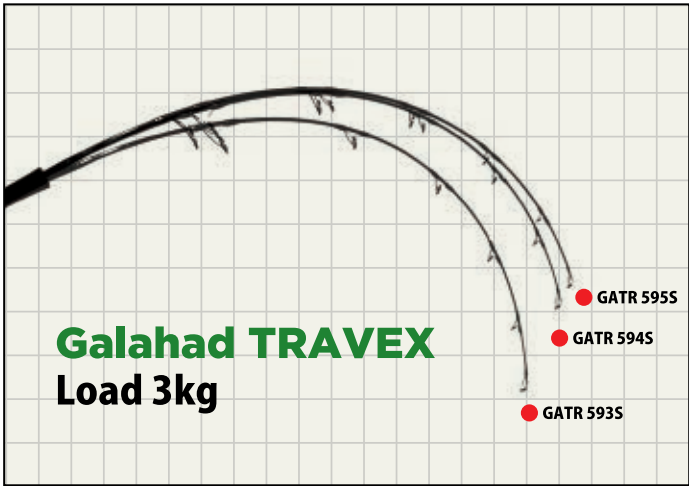

Galahad Series BENDING CURVES

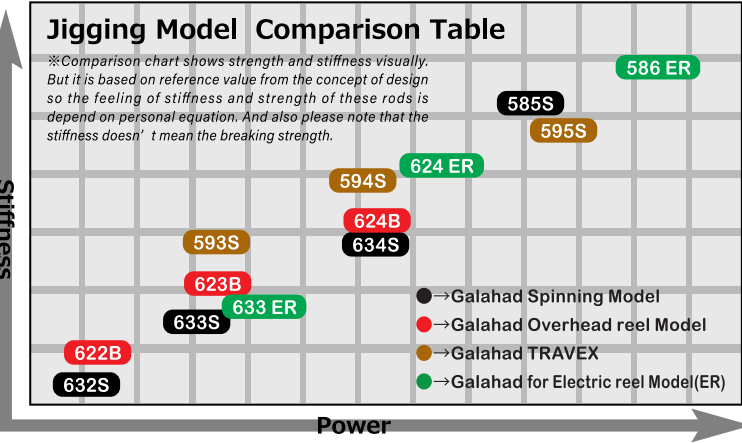

● This is a comparison of the bend in the Gallahad jigging models under a static 3 kg load. The 632S, 633S, and 634S are highly versatile models with a supple action from tip to belly that also suits doterra drift jigging. Their one-piece construction allows the entire rod to bend with strong resilience during the fight. The 585S is designed for vertical jigging, featuring a firmer action throughout the blank, while the bait models have a reinforced butt section to deliver a crisp and responsive handling feel.

● This is a comparison of the bend in the Gallahad Travex 2-piece models under a static 3 kg load. All three models feature strong, firm blanks with ample stiffness in the butt section. By setting the bending fulcrum closer to the tip, they deliver sharp, highly responsive actions across a wide range of jigging styles. These rods enable a different approach from the Gallahad jigging models, allowing anglers to apply strategic jigging methods tailored to specific targets and conditions.

● This is a comparison of the bend in the Gallahad electric-jigging models under a static 3 kg load. To accommodate electric reeling jerks, the blanks are designed with suppleness from the tip through the belly. The bending fulcrum is set closer to the angler to reduce fatigue during operation and fighting. Within the series, the 624B Electric offers the widest versatility, the 633B Electric is best suited for nearshore use, and the 586B Electric is positioned as the optimal model for expeditions and remote islands.

*These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

2026 NEW MODEL *BLUESNIPER* 96L

When you hear “L-class” BlueSniper, you might picture a soft rod. It does bend during the fight, but the true nature of that bend is defined by the high recovery force and reassuring strength that are unmistakably BlueSniper.

Rather than simply pursuing lightness, the rod flexes smoothly and, once load is applied, responds with decisive resilience to firmly absorb the fish’s power. That strength and recovery stand as proof of the “reliable power” the BlueSniper series has upheld for many years.

Different from stiffer seabass or surf rods, it feels lighter and easier to handle, yet remains confidently dependable.

At its core lies the BlueSniper lineage itself—the essence of a rod you can trust to load deeply and fight with confidence.

BlueSniper RADAR CHART COMPARISON

PENCIL • Movability of diving pencils with emphasis on water

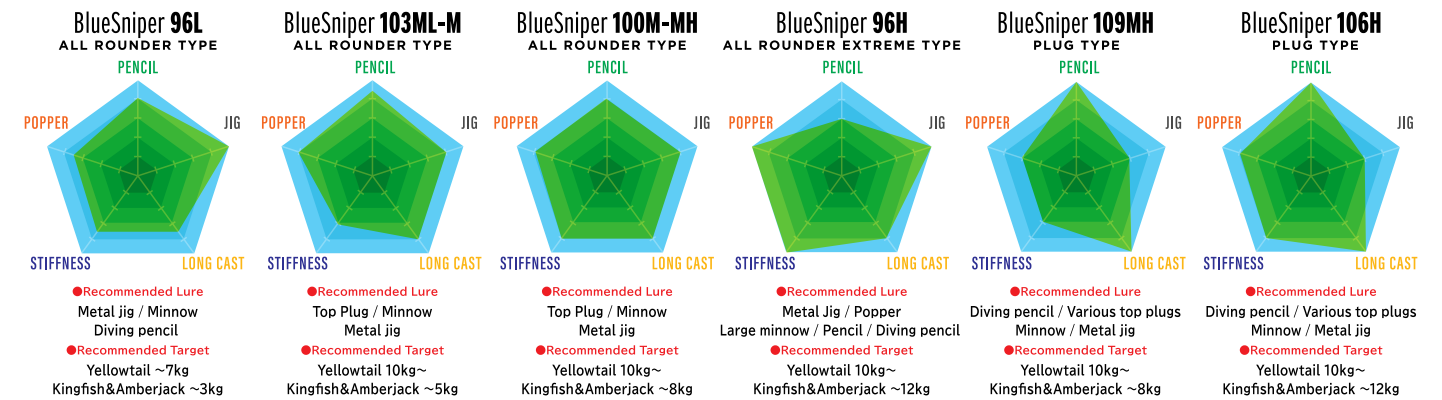

JIG • Easy to manipulate quick and continuous action of metal jig

POPPER • Ease of splashing and bubbling popper type lure

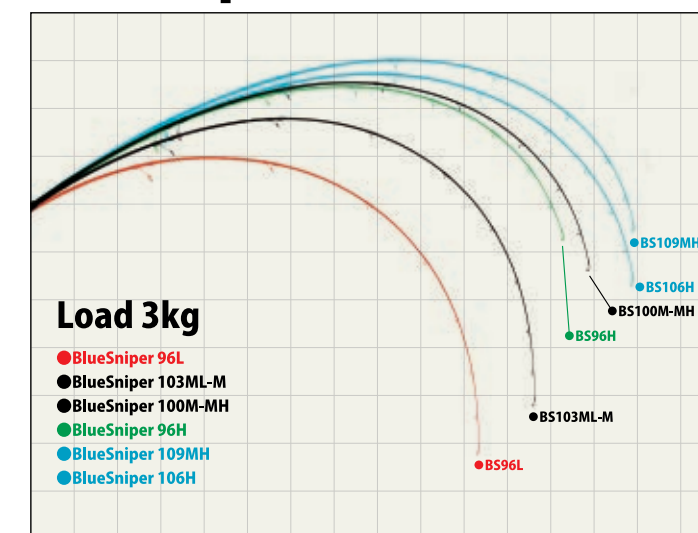

STIFFNESS • Tips that bends but is sharpness with high power of recovery

LONG CAST • All models have distance cast performance, but total distance cast performance including large plugs totally

These six items do not represent all of the rods. Depending on the length, etc., the feeling of the angler used will change. Please use this as a guide.

BlueSniper BENDING CURVES

● This is a bending comparison of six models from the BlueSniper shore bluefish series under a static load of 3 kg.

Because blank strength is expressed through rebound power rather than simple stiffness, please note that the bending appearance under static load does not always match the actual feel during use.

● The new 96L appears to bend deeply in the static load comparison, but this does not indicate a lack of power.

It loads smoothly even with smaller bluefish, allowing stable and enjoyable fights, while during casting the entire rod works to push the lure forward, delivering a light, fatigue-free casting feel. In fights, the butt section provides reliable resilience and recovery, making this light-class model fully worthy of the BlueSniper name.

● The 103ML-M is a comprehensive rod with L+ML+M class powered combined. The whole rod is designed to bend over for a more sensitive skillful fight compared to a head-to-head fight.

● The butt power in the 96H looks similar to the 100M-MH with the static load, but be rest assured, the force of recovery of the blank when fighting the fish is an H class power, as the short length blank was designed to lightly control the lure with ease.

BlueSniper SHORE CASTING

SHORE CASTING MODEL

For more details of category Y8 Official Web site

YAMAGA Blanks' shore rod series for bluerunner, BlueSniper was developed to inspire anglers in the harshest fields, with an uncompromising focus on castability and ease of use. While bluerunner games often emphasize raw power, the true essence lies in casting performance. Light and fatigue-free to swing all day, it delivers stable long-distance casting and outstanding versatility across a wide range of lures—fundamental performance that supports success in demanding conditions.

Diagram of rod with dimensions: a.485mm, b.635mm

A lightweight, nimble, highly responsive 9ft-class light model. Built to cover everything from local bays to blue-runner fishing across the open surf.

This L-class shore casting model focuses on maneuverability and is ideal for targeting blue-runners in the bay areas and surf areas, utilizing metal jigs. Despite its short length of just 9 feet, it delivers casting distances that rival those 10-foot models, handling 20-40g jigs and heavy minnows with ease. It's also compatible with small bait patterns using 9-12cm plugs. It has the power to handle even yellowtail and has the potential to seize the moment.

103ML-M

Diagram of rod with dimensions: a.485mm, b.635mm

A highly versatile model with finesse-oriented performance. Covers a wide range of situations in your local waters.

Anglers can run light PE1.5~2 to handle high-pressure fields and small-bait patterns with precision. The supple ML-class tip easily casts 20~40 g jigs and smaller seabass plugs for a finesse approach, while the M-class butt delivers the torque needed for fast, decisive fights—supporting up to PE3 when muscling fish in tight, rugged terrain. This rare balance of power and lightness reduces fatigue and keeps anglers focused and effective throughout long sessions on the rocks.

100M-MH

QR code

Diagram of rod with dimensions: a.495mm, b.705mm

The new high-power, highly responsive H-class blank. Lets you work a wide range of lures with ease and freedom.

While delivering true H-class power, this 9ft-class blank is engineered to be thin, light, and fast-recovering with a powerful snap for easy swing and control. Anglers will be pleasantly surprised by how effortlessly it casts heavy jigs and how lightly it works them with rod action. It's not simply a stiff model: it responds crisply to manual control of various hard lures, and the blank's bending curve helps lift fish efficiently to the surface. A next-generation H-class rod that enables anglers to create new styles of fishing.

Type : PL (Plug)

Plug Type: A model that emphasizes smooth, well-mixed action when using a diving pencil

QR code

Diagram of rod with dimensions: a.515mm, b.730mm

This technical plugging model blends the precise action of diving pencils with powerful casting performance for long, controlled casts.

While the 11ft length delivers outstanding casting distance, the well-balanced blank lets anglers control hard lures with ease. The flexible tip smoothly works diving pencils, while the powerful butt shuts out a fish's violent runs. These traits shine in tough situations when big targets are reluctant to bite and demand sustained focus. An ideal model for hardcore anglers who want to draw strikes with surface and sub-surface lures.

QR code

Diagram of rod with dimensions: a.515mm, b.730mm

This high-power plugging model is built to throw medium to large plugs for big blue runners. Even in a power game, it won't give up the initiative.

We set out to create a high-power model designed to cast large hardbaits around 100 g lightly and smoothly. Its original blank design and materials let anglers throw big lures all day with ease and consistently reach long distances. The powerful, resilient blank loads deep and, once under pressure, withstands the violent thrashing of enormous fish. An ideal rod for the harshest rockshore and shallow-water situations, as well as remote-island expeditions for truly monstrous targets.

BlueSniper 96L

BlueSniper 100M-MH

2026 NEW MODEL Ballistick 100ML

What we pursued was even more refined sensitivity and the operability to trace a chosen line with precision. Ballistick evolves further—deeper than ever.

In surf fishing, there are results that distance alone can't deliver.

The position of the current, subtle seams in the flow, the movement of drifting bait—reading those “changes” and controlling the lure with precision to run the exact line or spot you intend.

The Ballistick 100ML, built with exceptional sensitivity and control, was created to seize those fleeting opportunities without fail.

Surf game fishing now enters a new stage of evolution.

Ballistick

Ballistick Series BENDING CURVES

Load 1kg

- Ballistick 90ML-M
- Ballistick 710ML-MH
- Ballistick 95MH
- Ballistick 76M-XH/B
- Ballistick 100ML
- Ballistick 106M-MH
- Ballistick 1010MH

The picture illustrates the bending curve of the Ballistick series with a static load of 1kg applied. This series is not simply categorized by power; each model has its own individuality and specialized performance. Therefore, the degree of bending of the rod clearly represents the characteristics of each model.

*These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

● Surf Models

With their robust butt power, all three surf models offer excellent control when landing fish in heavy surfs and for catching unexpectedly monstrous mullet or large blue-runners. The newly introduced 100ML, available in 2026, stands out with a blank design that flexes smoothly while efficiently recovering to its original shape. The rods action helps prevent line breakage from miss casts utilizing thin line or hook offs due to softer smaller hooks, resulting in a truly “line-friendly” rod.

● Seabass Models

As the power description “ML-MH” indicates, the characteristics of this model can clearly be seen in the bending curve. The butt section has the same stiffness as 95MH, and it will not give in to lunker class seabass. On the other hand, when the rod is loaded, the tip to belly section flexibly bends, demonstrating the ability to easily cast lightweight lures, like the 90ML-M.

ROCKFISH MODEL

86MH

PRICE :
LURE : 7~40g
LINE : PE 1~2

- Length: 2590mm (Closed length: 1325mm)
- Weight: 123g
- Suitable reel size: D: LT3000~4000C / S: C3000~4000
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Target: Rockfish - Seabass - Hairtail
- Reel Seat: VSS16 (Fuji) / Up lock nut
- Lure: Jighead - Texas rig - Minnow - Vibrations

high-response model for efficiently searching rocky areas, with a length designed for superior handling.

The blank for this model is exceptionally well balanced for both casting and maneuvering while also possessing tremendous sensitivity. Anglers will not only be able to utilize swimming actions of jig-head rigs but also utilize Texas rigs and feel for bottom structures and material. The adequately stiff belly section will transmit your bite and rip the fish off the bottom and structures right away. This sharp blank is also suitable for use in the "wind game" targeting hair-tails and "jerking methods" productive for seabass.

104H

PRICE :
LURE : 15~60g
LINE : PE 1~3

- Length: 3160mm (Closed length: 1615mm)
- Weight: 205g
- Suitable reel size: Up to PE2 D: LT4000C~6000 / S: 4000~C5000
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Target: Rockfish - Seabass - Hairtail
- Reel Seat: VSS16 (Fuji) / Up lock nut
- Lure: Jighead - Texas rig - Plugs - Metal Jig

Excellent in power, castability, and sensitivity, this model pairs stiffness with flexibility and strong recovery force.

This long length high powered model was designed for casting distance and sensitivity. The "soft" aspect of the blank can be attributed to the line settings (PE#1), while the "hard" can be felt in its ability to take the load of heavy weight rigs and max drag settings. Anglers will be able to reach those grounds where others have yet to reach. You will be able to utilize various rigs ranging from soft plastics, swim baits, metal jigs and even minnows above 14cm to go head to head with monstrous rock fish and other blue-runners that you may randomly encounter.

93MH/B

PRICE :
LURE : 10~50g
LINE : PE 1.2~2.5 / FC 12~20lb

- Length: 2815mm (Closed length: 1445mm)
- Weight: 149g
- Suitable reel size: D: S: 150~200
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Target: Rockfish - Seabass
- Reel Seat: ACS17 (Fuji) / Down lock nut
- Lure: Jighead - Texas rig - Plugs - Metal Jig

Focused on retrieval sensitivity and torque—the strengths of an overhead reel—it excels at delicate lure presentation.

The 93MH/B has a sensitive yet flexible tip~belly section for anglers to hover or roll their Texas-rigs near the bottom or for a more pinpoint approach with the "bottom shaking" technique. It enables anglers for a more careful approach on the bottom to induce and capitalize on a bite from those inactive fish. Once hooked, the winding power of the overhead reel and the powerful butt section will assist you to lift the fish away from the structures.

About YB88 CHAIN variable taper action

The YB88 CHAIN uses a wide range of lures and, of course, targets. To enjoy all of them without stress, the blank design has what can be described as a "variable taper action" in which the bend and power change gears depending on the load. As a versatile model, the 2nd powered gear (the apex of the bend) plays an active role in handling various lure sizes and types. When casting a small lure or casting with a small form, it will enter the 1st powered gear and push the lure smoothly. Next, when casting a jig or plug such as heavyweight with a pendulum, bend from the second-stage powered gear and push out the lure with even stronger force.

The same applies to fights. In the case of small targets such as black porgy, the 1st powered gear is effective, and the flexibility of blanks that bend smoothly enables you to set the hook in the target's mouth surely while reducing the risk of letting it off the hook.Furthermore, in the case of a large target exceeding 3 kg, the 2nd powered gear on the butt section is activated. A huge power is activated from the butt section while bending smoothly, and it transforms into a rod that stands out for its excellent performance that allows you to control it as you wish without losing the initiative to the target. This variable taper action is the main feature of the YB88 CHAIN, and it's what sets it apart from the usual versatile models.

This rod does not belong to any existing lineup; it is a special model that stands alone as its own series.Named “YAMAGA Blanks 88 CHAIN” , it embodies our concept of linking past and future, and connecting different fishing fields like a chain.While your main rod is for chasing your primary target, the 88 CHAIN is there to let you fully enjoy everything the field offers that day.It was developed in pursuit of that level of all-round performance.

REEL BALANCE POSITION

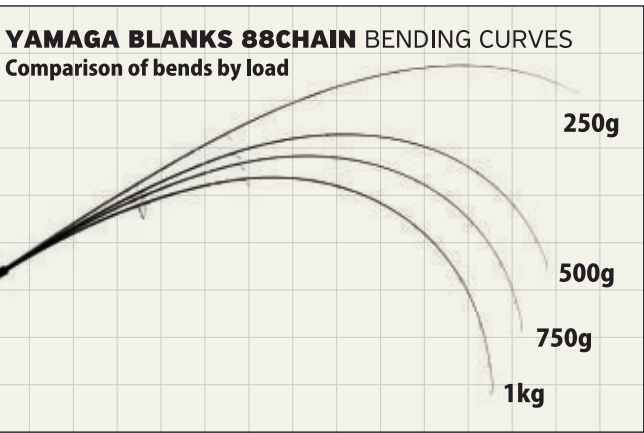

▲ 200g ▼ 270g

Reel Balance Indicator

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

This is the creation of a new style— let's connect the many different fishing fields.

This special model was designed to enable anglers to utilize various lures up to 40g to target various species. Even with the light specifications, anglers will easily be able to go head to head with smaller Blue-runners around 3kg. In addition to its lightness, the exquisite 8.8ft length will bring about great advantage to the anglers to find new targets in your local waters. You can go after Blue-runners, snappers, rock-fish, squid, black-fin seabass from the rocks, migratory species, flat-fish and seabass from the surf and monstrous seabass in the river mouths. This one rod will enable you to go after many different species in your local waters.

Comparison of bending of YB88 CHAIN with 4 levels of load in 250 g increments. The bending changes significantly from low load to higher load. As mentioned in the variable double taper design in the text, the moment the bending increases, a large power of recovery is created. The larger the bending of the static load, the greater the power of recovery.

Lure : Jighead・Plug・Rig・Metal Jig・EgiMetal Jig

L Grip a.325mm | b.385mm

A long-range model combining power, castability, finesse, and high sensitivity.

This is a model to tackle long-distance areas with its delicate and high-powered characteristics. It will help anglers in all situations that require long distance casting, from ports to surf, rivers, and lakes. In particular, it ensures sufficient casting distance even in ultra far casting games using sinkers and carolina rigs. In addition, this model is suitable for targets utilizing small bodied lures in the suburban areas. The unique finesse pattern where seabass feed on small sandworms or firefly squid would be ideal with this rod.

72/4pcs

PRICE :
LURE : 2~21g
LINE : PE 0.4~0.8

Length : 2185mm (Closed length : 576mm)

Weight : 73g

Suitable reel size : D・S: 2000~2500

Lure : Plug・Metal Jig・Jighead・Rig

L Grip a.295mm | b.355mm

A highly responsive model that brings your lures to life through precise rod work.

An aggressive multi-piece model that is built with an outstandingly sharp cast feel and light operational performance. This is an action-oriented fishing rod that targets a variety of species ranging from seabass, bream to even flat fish from the boat or land based fishing. This is a lightweight, highly repulsive, highly responsive multi piece model that can cover everything from plugging games targeting migratory species, to micro jigs, jig head rigs and winding games techniques for various other species.

72B/4pcs

PRICE :
LURE : 2~21g
LINE : PE 0.4~1

Length : 2185mm (Closed length : 576mm)

Weight : 87g

Suitable reel size : D・S: Overhead Reel For Ultra Fine Line

Guide : SiC-S titanium frame K guide (Fuji)

Target : Seabass・Bream・Rockfish・Flatfish・Migratory fish

Reel Seat : PMTS17 (Fuji) / Down lock nut

Lure : Plug・Metal Jig・Jighead・Rig

L Grip a.310mm | b.370mm

A technical pack rod that offers a direct connection to the fish and outstanding casting accuracy.

The highly-responsive blank that capitalizes the benefits of bait tackle, supports the angler with high casting accuracy and long-distance casting while reducing backlash through the efficient blank recovery when casting.It covers all situations and a wide range of methods, from tight casting around canals, small rivers, and harbour structures where casting accuracy is essential, in addition to estuaries and lakes that require long casting. Anglers will be able to enjoy this multi piece bait model from both boats and land-based fishing with a “direct” connection with your target.

BlueCurrent Wizy ROD BAG DETAIL

The BlueCurrent Wizy comes with a dedicated nylon rod bag, available in three sizes to match each rod length.It features a 2-way design that balances portability and storage, with individual compartments for each rod section and an integrated resin protection plate on the rod-storage side. When rolled, the bag provides protection similar to a semi-hard case.It also includes two pockets for storing small tackle essentials and can be carried either folded in half or rolled up—an original rod bag designed specifically for the Wizy series.

The pockets inside the bag can hold small items such as accessories and lure cases.

When small items are stored in the inner pockets,the bag can be carried in a folded style using the handle.Please note that tilting the bag with the handle side facing downward may cause the rod to slip out.

BlueCurrent Wizy BENDING CURVES

The illustration shows the comparison of different models in the BlueCurrent Wizy multi piece series with a static load of 250g. The versatile models 610, 710, and 810 are characterized by flexible bendy blanks. 72S and 72B are focused on the high responsiveness for lure operability equipped with a sharp blank design throughout the rod.

Load 250g

BlueCurrent Wizy 610

BlueCurrent Wizy 710

BlueCurrent Wizy 810

BlueCurrent Wizy 72

BlueCurrent Wizy 72B

●Wizy 610

The softened tip makes it easier to control jigs and micro plugs, while the blank bends smoothly under load for that seamless BlueCurrent-style fighting performance.

●Wizy 710

Equipped with enough stiffness from tip to belly for light Carolina rigs, topwater and bottom-bumping for bream, and light rockfish games.

●Wizy 810

A stiffer design for long casts targeting light to mid-size species, with a flexible tip that reduces missed bites and works well with floating rigs and light sinking pencils.

●Wizy72S&72B

Built on the same blank, these models offer easy handling and excellent lure control from both boat and shore, with a stronger overall stiffness than the Wizy 710.

- Reel Seat: PMTS17 (Fuji) / Down lock nut

- Weight: 67g
- Suitable reel size: Overhead Reel For Ultra Fine Line
- Target: Horse Mackerel・Rock fish・trout
- Lure: Jighead・Small Sized Plug・Small Sized Metal Jig

Grip a.200mm | b.305mm

A short-range finesse model for overhead reels that can handle lightweight jig heads with ease.

This is 2 pcs overhead model to aim selective and spooky target at close range. Even if you have to use jig head under 1g, you can feel the weight of it when you cast and manipulate and also you can get enough distance to reach targets comfortably. As taking advantage of overhead tackle, you can keep tension of line while letting jig head fall into the range where the target must be there.

III69/B

PRICE :
LURE : Max 7g (JH 0.8~7g/Plug 1.6~5g/Rig 1~7g)
LINE : PE 0.3~0.6 / NY・FC 3~6lb

- Length: 2070mm (Closed length: 1065mm)
- Guide: SiC-S Stainless frame K guide + RV Guide (Fuji)
- Reel Seat: PMTS17 (Fuji) / Down lock nut

- Weight: 77g
- Suitable reel size: Overhead Reel For Ultra Fine Line
- Target: Horse Mackerel・Rock fish・Migratory fish
- Lure: Jighead・Small Sized Plug・Small Sized Metal Jig

Grip a.255mm | b.360mm

A technical overhead-reel model that allows comfortable, precise jig-head and plug manipulation through reeling.

This is the standard model of overhead series that let you cast and manipulate jig head and plug as exactly as you wished. Tip section which have been loaded flexibility and sensitivity will transmits vital information clearly and belly section that have moderate stiffness make light wind action comfortably. Especially when you fish with plug, the potential of 69 overhead model will be pulled out.You will notice that you can give the action to plug as exactly as you have planned.

III78/B

PRICE :
LURE : Max 15g (Plug 2~15g/Float 3.3~15g/Rig 2~15g)
LINE : PE 0.4~0.8

- Length: 2350mm (Closed length: 1200mm)
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Reel Seat: PMTS17 (Fuji) / Down lock nut

- Weight: 92g
- Suitable reel size: Overhead Reel For Ultra Fine Line
- Target: Black sea bream・Seabass・Rockfish・Flatfish
- Lure: Rig・Metal Jig・Plug

Grip a.310mm | b.415mm

This is the model that explores the possibilities of bottom-water games through the smooth, controlled reeling performance of an overhead reel.

This super sensitive bait-caster model is ideal for use with free-rigs and Texas-rigs in the vast surf, estuaries, break-waters and pebble-beach situations to go after the bream, flat-heads and other bottom fish. The flexible tip will allow for a smooth bite and successful hook up while the sensitivity will help transmit the texture of the seabed through the blank. The power of recovery in the belly section will help anglers get out of snags and allow for thorough sweep of the bottom area. Anglers will be able to enjoy this rod in their local fields in any given situation.

III82/B

PRICE :
LURE : Max 20g (JH 2~20g/Float 3.3~20g/Jig 2~20g/Rig 2~20g/Plug 2~15g)
LINE : PE 0.4~0.8 / NY・FC 4~10lb

- Length: 2495mm (Closed length: 1280mm)
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Reel Seat: PMTS17 (Fuji) / Down lock nut

- Weight: 93g
- Suitable reel size: Overhead Reel For Ultra Fine Line
- Target: Rock fish・Seabass・Bream・Horse Mackerel
- Lure: Jighead・Rig・Plug・Metal Jig

Grip a.320mm | b.425mm

A long-length overhead-reel model with outstanding casting feel, capable of delivering lures across an impressive distance.

Although this is over 8ft long, you can handle like it is 7.6ft long thanks to sharpness and lightness of blanks themselves. Tip section which have flexibility to manipulate lure gently link to butt section which is strong enough to stop the powerful run of large target. This deserved to be called all mighty overhead rod to cover various situations and target such as surface game for seabass or black sea bream, rock fish game and mackerel of course.

Suitable reel size : D: LT2000~2500 / S: 2000~2500

Guide : TORZITE Titanium frame K Guide (Fuji)

Target : Anything

Reel Seat : VSS16 (Fuji) / Down lock nut

Lure : Anything

Grip a.310mm b.375mm

Pursued ultra-high all-around performance, achieving a model suited to a wide range of methods and waters.

If you want to do everything in light game category, we think that BlueCurrent 85TZ Nano will make your dream come true. Every range of water will be covered with light line by BlueCurrent 85TZ Nano which have been gotten sensitiveness and toughness. You will never lose initiative even if you hook big one up accidentally. You will be able to aim Rock Fish, Black Sea Bream, Seabass (aim from top water to deep water), Horse Mackerel or even squid.

610 Plug Quickness TZ/NANO

PRICE :
LURE : Plug 1.5g~6g / JH 0.5~5g
LINE : PE 0.1~0.4

Length : 2100mm (Closed length : 1075mm)

Weight : 64g

Suitable reel size : D: LT1000~2000 / S: 1000~C2000

Guide : TORZITE Titanium frame K Guide (Fuji)

Target : Horse Mackerel・Rock fish・Migratory fish

Reel Seat : VSS16 (Fuji) / Down lock nut

Lure : Small Sized Plug・Jighead

Grip a.270mm b.335mm

This is a special plugging model with both aggressiveness and sensitivity that lets you strike decisively even at the slightest contact.

This plugging model was developed to enable anglers to sense the subtle changes in water pressure and currents with outstanding balance to breathe life into your lures through rod action. The tip section is designed to be stiff to give the lure variant action while the whole blank will bend in to reduce hook offs. When simply retrieving minnows and sinking pencils, the super sensitive tip section will immediately transmit the smallest of bites enabling anglers to swiftly hookup with the belly section of the blank.

93 All Range TZ/NANO

PRICE :
LURE : 3~21g
LINE : PE 0.4~1

Length : 2825mm (Closed length : 1440mm)

Weight : 90g

Suitable reel size : D: LT2500~2500 / S: 2500~C3000

Guide : TORZITE Titanium frame K Guide (Fuji)

Target : Anything

Reel Seat : VSS16 (Fuji) / Down lock nut

Lure : Anything

Grip a.335mm b.400mm

A long-length model designed to explore wider areas while keeping the 85 All-Range concept.

Actually, it is all depends on your imagination to pull out the infinite potential of this 93TZ Nano All-Range. We have extended length and enhanced power of 85TZ Nano All-Range to cover farther range and tougher target.Of course, you can use it for Horse Mackerel or rockfish, it works for black sea bream, seabass or even for squid. As we mentioned, potential of 93TZ Nano All-Range become unlimited depending on your skill and imagination.

73 Plug Seamless TZ/NANO

PRICE :
LURE : Plug 1.5g~6g / JH 0.5~5g
LINE : PE 0.1~0.4

Length : 2220mm (Closed length : 1135mm)

Weight : 67g

Suitable reel size : D: LT1000~2000 / S: 1000~C2000

Guide : TORZITE Titanium frame K Guide (Fuji)

Target : Horse Mackerel・Rock fish・Migratory fish

Reel Seat : VSS16 (Fuji) / Down lock nut

Lure : Small Sized Plug・Jighead

Grip a.275mm b.340mm

This plugging model emphasizes the retrieving method with high sensitivity and natural lure appeal.

The blank is designed to have contradicting characteristics of sharpness and flexibility in order to successfully hookup the subtle “sucking” and “nibbling” bites. The rod will smoothly respond to your hooking followed by the fight. Anglers will be able to pick up those minute bites when the targets are feeding on micro baits by slowing drifting your lures in the current.

83 Flex TZ/NANO

PRICE :
LURE : JH 0.8~5g / Rig 1.8~10.5g / Plug 1.5~8g
LINE : PE 0.2~0.6

BlueCurrent 78 and 78/B which specialize in bottom strategy, with the main focus being black sea bream games, making it a series that allows you to enjoy a wider range of inshore games. The BlueCurrent III is a series that anglers who go beyond the framework of light games should use, as it has the basic power to support detailed styles and freestyle with no choice of target.

For anglers who want to heighten the sensitivity, the bait casting model is ideal as the winding and sinking of your rig will directly transmit to your hands. Furthermore, it is also suited for the bait-finesse game targeting trout in streams.

The 610Plug and 73Plug are both designed with TZ/NANO and have a totally different concept to other models. They are specifically designed for use with hard bodied lures to target Japanese Horse Mackerel and Japanese rock fish, and the usage of jighead rigs can be considered as an alternative secondary option.

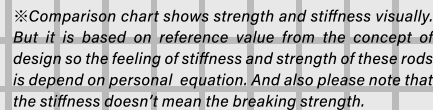

Among the two All-Range models refined as true “do-everything” rods, the 85AR serves as the core of the series, while the 93AR is positioned as the power- and distance-oriented model.

- Guide : TORZITE Titanium frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

The trump card of the Calista series, maximizing its highest sensitivity to conquer selective situations.

A tactical fineness model developed for anglers to tactically use size 3 egi. While utilizing the size 3.5 as the main weapon, anglers can maneuver the size 3 egi without any stress with its lightness. The synergistic effect of the sharp and short length 7.2 ft blank dramatically improves the ability to transmit information through the blank. Thanks to the strong butt power common to the series, anglers will easily be able to target the monstrous spring squid.

90LML/S

STREAM

PRICE :
LURE : EGI #2.5~3.5
LINE : PE 0.4~0.8

- Length : 2744mm (Closed length : 1404mm)
- Weight : 96g
- Suitable reel size : D: LT2500 / S: 2500
- Guide : TORZITE Titanium frame K Guide + SIC Titanium frame RV Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

A long-length model that delivers delicate lure action without sacrificing high sensitivity, even in strong current.

This is a highly sensitive and flexible long length model able to feel for the squid jig in the current. We have fused together the light tip section to a medium class strength butt section to realize its outstanding casting ability. Although the rod is a long length model, the exceptional balance will allow anglers to easily and lightly control the rod to induce the bite of the squid while the highly sensitive blank will transmit the slightest touch from the squid and feel for the current during the curve fall of the egi.

76ML/TJ

TECHNICAL JERK

PRICE :
LURE : EGI #2.5~3.5
LINE : PE 0.4~1

- Length : 2293mm (Closed length : 1175mm)
- Weight : 87g
- Suitable reel size : D: LT2500 / S: 2500
- Guide : TORZITE Titanium frame K Guide + SIC Titanium frame RV Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

A technical model that uses its short length for light handling and a wide variety of jerking techniques to lure squid.

The technical short length model was designed to enable anglers to utilize their various jerking techniques. The flexible yet short length blank will be a tactical weapon for anglers to precisely maneuver the squid jig for the final leg of the pursuit of the squid. It will be most suited for fishing around structures and drop off or technically controlling the lure when sight fishing. Furthermore, the responsiveness of the short length blank will also assist anglers to speedily search a vast area. This short length versatile blank will also be great for off shore boat eging.

82ML/AR

ALL-ROUNDER

PRICE :
LURE : EGI #2.5~3.5
LINE : PE 0.4~1

- Length : 2496mm (Closed length : 1282mm)
- Weight : 92g
- Suitable reel size : D: LT2500 / S: 2500
- Guide : TORZITE Titanium frame K Guide + SIC Titanium frame RV Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

This all-around model expands the possibilities of various techniques, embodying the new technology of the latest Calista series.

This is the new all rounder model of the renewed Calista series where anglers will be able to first handedly experience our developmental concept. The blank is fused together with castability, controllability, sensitivity and power for anglers to bring out its true colors all year round at any given situation. The sharpness hidden beneath the user-friendly characteristics will breathe life into the egi controlled by the angler through long distance casting, jerking and line control.

86M/PF

POWER & FINESSE

PRICE :
LURE : EGI #2.5~4.0
LINE : PE 0.4~1

- Length : 2573mm (Closed length : 1320mm)
- Weight : 98g
- Suitable reel size : D: LT2500 / S: 2500
- Guide : TORZITE Titanium frame K Guide + SIC Titanium frame RV Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

This model achieves a level of sensitive operability that overturns the common perception of power rods.

Like the 82ML/AR, it is an all rounder model suitable for year round fishing with lightness and responsiveness as its distinct qualities. The blank was back to the drawing board and rebuilt from the ground up to break all stereotypes of the standard 86M specifications for eging. Even if you own a rod with similar specs to 86M, we would like you to take hold of this rod to first handedly experience the highly responsive controllability of the egi and outstanding casting distance the blank produces.

79MMH/AG

AGGRESSIVE

PRICE :
LURE : EGI #3.0~4.5
LINE : PE 0.6~1

- Length : 2380mm (Closed length : 1226mm)
- Weight : 99g
- Suitable reel size : D: LT2500 / S: 2500
- Guide : TORZITE Titanium frame K Guide + SIC Titanium frame RV Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Up lock nut

A special concept model dedicated to more aggressive game from both shore and boat.

There are no specific rule books for eging, and there are as many styles and game plans as there are anglers. The 79MMH/AG is a super highly responsive model for those anglers who aggressively allure the squid by technical approaches. It is designed with a medium class tip section and a medium heavy class butt section to easily and sharply maneuver the # 3.5 egi. We have also reduced the stress on the anglers side by giving the rod contradicting characteristics of flexibility and power.

EGING GAME MODEL

710L

PRICE :
LURE : EGI #1.8~3.5 (~21g)
LINE : PE 0.3~0.6

- Length : 2390mm (Closed length : 1225mm)
- Weight : 84g
- Suitable reel size : D: LT2500 / S: 2500~C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

This model lures targets out with lightness and short length, allowing it to handle a wide range of situations.

If you wish to use super fine PE line to sense slightly changes of pressure of current and lure out carefully, this sensitive short length model is the one. When squid is less active than usual then you are required to feel slightly changes of current and need to manipulate and lure out delicately, sensitiveness which is loaded to 710 enable you to cast light weight of Egi, sense tiny contact of squid and keep squid over 2kg under control. Of course you can take 710 for fishing from boat.

88L

PRICE :
LURE : EGI #2.5~3.5 (~21g)
LINE : PE 0.4~0.8

- Length : 2645mm (Closed length : 1325mm)
- Weight : 93g
- Suitable reel size : D: LT2500~3000C / S: 2500~C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

A light class that makes use of its flexibility for easy and quick action.

This is the light class model which is good for short pitch jerk and jerk making use of line slack. You can cast even light weight of Egi with a comfortable feeling thanks to the flexibility and moderate power of recovery. So this is good to be used on sight fishing technically. Yet it has enough power to keep huge squid under control, you can manipulate Egi with less power than others. Once you fish with it you will recognize that it has gotten high potential to be used in all seasons.

85ML

PRICE :
LURE : EGI #2.5~3.5 (~24g)
LINE : PE 0.5~0.8

- Length : 2555mm (Closed length : 1305mm)
- Weight : 93g
- Suitable reel size : D: LT2500~3000C / S: 2500~C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

To improve the efficiency of search in a high pressure field by specializing in performance of light manipulating feel.

It have been designed to be more flexible than 86M and finished to become technical rod which is enable anglers to manipulate various weight of Egi at your will. You will be able to take advantage of versatility of 85ML as such as luring out delicately on sight fishing, jerk making use of line slack and short pitch jerking. We recommend 85ML for any level of anglers as an all rounder

79M

PRICE :
LURE : EGI #2.5~4.0 (~28g)
LINE : PE 0.5~1

- Length : 2365mm (Closed length : 1210mm)
- Weight : 89g
- Suitable reel size : D: LT2500~3000C / S: 2500~C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

A short, powerful model designed to improve Egi response. Perfect for boat eging as well.

Blanks of 79M have been brushed up to be taking advantage of length. You will feel the high response speed of blanks and high usability as characteristics of short length models while pursuing long casting performance. Yet it has enough power to cast and manipulate even size 4 Egi (about 25g). It has been loaded with moderate power of recovery, flexibility, and lightness on blanks. If you are required to lure a speedy or take time to lure a spooky one out, 79M will be your huge advantage for sure.

86M

PRICE :
LURE : EGI #2.5~4 (~30g)
LINE : PE 0.5~1

- Length : 2595mm (Closed length : 1325mm)
- Weight : 98g
- Suitable reel size : D: LT2500~3000C / S: 2500~C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

It has both lightness and power, and is intended to aim large squid.

It is standard model of Mebius series. Although it is medium class rod, it have gotten sensitive, flexible tip and belly section to be adjusted modern eging scene technically. It have been designed to be well balanced to cast and manipulate Egi with less input by angler reducing burden of angler's wrist. This 86M is the most versatile model of this series. You can cast long distance and manipulate at your will even size 4 Egi (about 30g) without any anxious.

83MH

PRICE :
LURE : EGI #3.0~4.5 (~35g)
LINE : PE 0.6~1.2

- Length : 2515mm (Closed length : 1285mm)
- Weight : 98g
- Suitable reel size : D: LT3000C / S: C3000
- Guide : SIC-S stainless frame K Guide (Fuji)
- Target : Squid
- Reel seat : VSS16 (Fuji) / Down lock nut

This is a medium heavy class that allows you to easily operate large egi. This model specializes in targeting large squid.

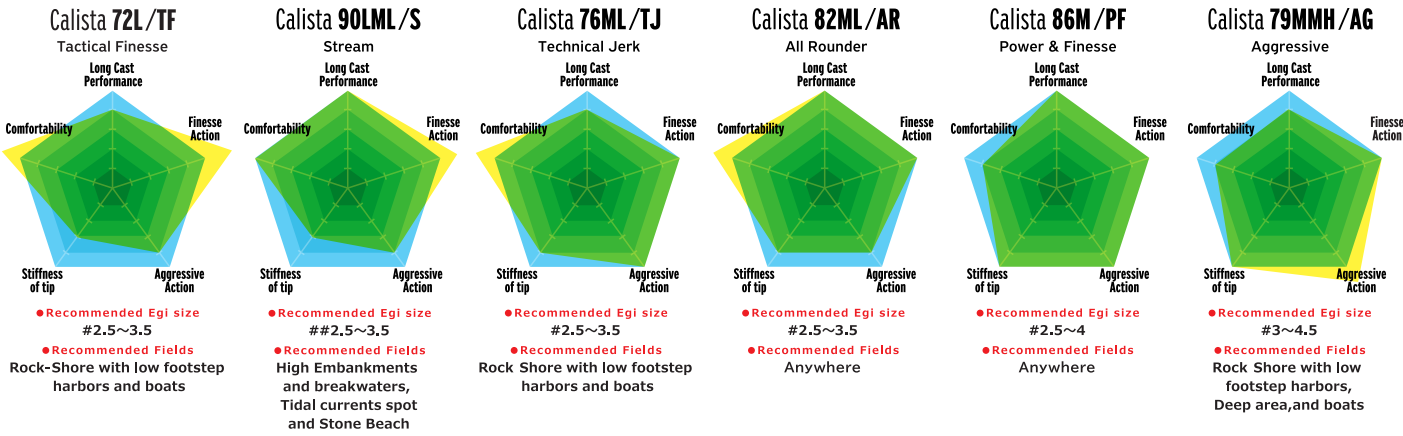

Although this is the medium heavy model which have been loaded massive power on butt section, blanks of 83MH have lightness and flexibility. It is good for size 3.5~4 of Egi mainly, you can of course use heavy type of size 4.5 of Egi. This 83MH have been designed to be loaded enough power to set hook on huge squid even heavier than 2kg and lightness and flexibility of blanks will reduce unwanted kickback when you jerk.

Calista RADAR CHART COMPARISON

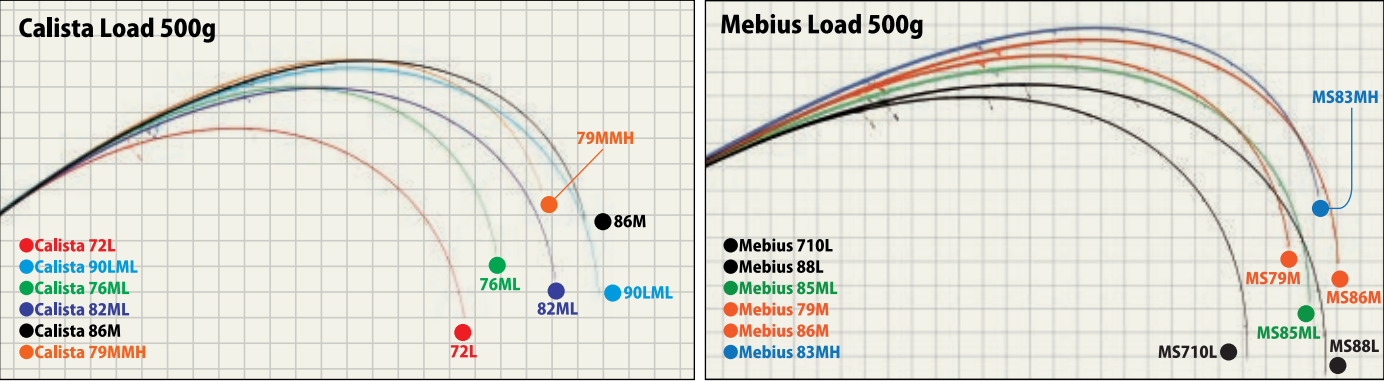

Description of chart items

Long Cast Performance · Evaluation of casting ease and power within the blank.
Finesse Action · Evaluation of Slack Jerks and twitching actions that are important with sight fishing.
Aggressive Action · Evaluation of Aggressive Jerks which include general jerks, winding jerks, and combination jerks.
Stiffness of tip · Advantages of a stiffer tip include easier operation in deeper waters, waters with strong currents, and larger resistance Egi. The advantages of a softer tip include an increase in sensitivity to feel changes in the water and is less physically demanding.
Comfortability · A model with stiffness may increase the physical burden, so please refer to this item and choose it if you tend to hurt your wrist.

The radar chart visualizes characteristics that are difficult to quantify, but these five items do not represent everything about the rod. Depending on the length or else, the way the angler feels about using it will change. Please use this as a guide only.

Calista & Mebius BENDING CURVES

● The 72L/TF is the most delicate L-class model in the Calista series. From the tip through the belly, the blank bends smoothly and progressively, while the butt section retains strength on par with other models in the lineup. This solid butt power allows even large spring squid to be lifted quickly and with control. Although static-load tests cannot fully convey it, the Calista series' signature high-rebound blank delivers fast recovery with no wobble or sluggishness, maintaining crisp response while flexing smoothly.

※ These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

2026 NEW SERIES
Lupus
for Native Trout Game Series
51S / 51B / 61S / 73S

The real thrill of trout fishing in small to medium size streams is to search for the “answers” scattered throughout the river. Anglers seek for changes in the flow, hiding places behind rocks, and the transitions between rapids and deep pools to accurately place their lures in the feeding zone. Whether it's a small pocket behind a rock or a change in the current, when you can cast to the exact spot, trace the desired line, and finally hook up that fish you were after, this process is what makes trout fishing so attractive.

To truly enjoy this style of fishing, you need a rod that bends when and where you need it to, to gently follow through as you imagine. The new Lupus series inherits the supple bending and tracking ability that allows it to follow the fast run of a trout. This was a feature of the original Lupus series, but has evolved into a blank that is typical of Yamaga Blanks in recent years, with a sharp yet flexible bending curve. The lineup of four rods, which cover everything from headwaters to the middle basin of rivers, will enable anglers to pinpoint accurately and cast into the right spots from the get go, giving you a sense of security which will compel you to venture up stream with the rod.

Lupus
Lupus for Native Trout Game
All four models

Lupus

for Native Trout Game

NATIVE TROUT GAME MODEL

The new Lupus lineup covers everything from headwaters to midstream sections. To match today's evolving trout scene, the blank design was completely reworked from the ground up—preserving the distinctive “Lupus feel” while pursuing the firmness and precision demanded by modern native trout fishing. The 51S/3pcs and 51B/3pcs deliver outstanding casting accuracy and maneuverability, and mark the first time the series adopts a multi-piece construction. The lineup is further rounded out by the 61S, designed to link upstream and midstream water while covering ground efficiently, and the 73S, built with large, open water in mind. Reborn as a series that deepens every moment of the native trout game.

51S/3pcs

Spinning model

PRICE :

LURE : 2~7g

LINE : PE 0.3~0.6

- Length: 1570mm (Closed length: 545mm)
- Weight: 75g(P)
- Suitable reel size: D: LT1000~2000 / S: 1000~2000
- Guide: SiC-S Titanium frame K Guide (Fuji)
- Recommended Target: Trout
- Reel Seat: Original wood seat / Down lock

This rod represents the new generation of Lupus.
Built for high-precision casting to trace your intended line with accuracy.

This minnowing model is built for upstream fishing in headwaters and small mountain streams. Despite its short length, the specialized blank delivers firm stiffness and strong repulsion for low-trajectory, pinpoint casts into tight spots with minimal effort. Tuned for heavy sinking minnows, it traces your intended line accurately while relaying subtle current changes, and it snaps through sharp twitch actions with ease. The portable three-piece design is ideal for trekking through dense forests and long walks—made for anglers chasing a memorable trout.

51B/3pcs

Overhead Reel Model

PRICE :

LURE : 2~7g

LINE : PE 0.4~0.8

- Length: 1570mm (Closed length: 545mm)
- Weight: 76g(P)
- Suitable reel size: Overhead Reel For Ultra Fine Line
- Guide: SiC-S Titanium frame K Guide (Fuji)
- Recommended Target: Trout
- Reel Seat: Original wood seat / Down lock

A multi-piece baitcasting model that responds precisely to the angler's intent.
Accurately pins the target.

This three-piece baitcasting model is ideal for small-minnow fishing in headwaters and tight mountain streams. With a supple bend and ample repulsion, the blank loads smoothly even with compact wrist-flick casts, delivering low-trajectory, pinpoint casts that place the lure naturally on your intended line. In difficult situations—limited footing, tight casting angles, or overgrown summer creeks—the advantages of baitcasting tackle and the blank's performance work in harmony to accurately hit tight spots. A rod that delivers the pure pleasure of casting while adding value to every fish you target and land.

61S/3pcs

Spinning model

PRICE :

LURE : 2~10g

LINE : PE 0.4~0.8

- Length: 1854mm (Closed length: 945mm)
- Weight: 82g(P)
- Suitable reel size: D: LT2000 / S: 2000
- Guide: SiC-S Titanium frame K Guide (Fuji)
- Recommended Target: Trout
- Reel Seat: Original wood seat / Down lock

This rod embodies the Lupus series' heritage and evolution.
A newly tuned balance of firmness and follow-through.

This all-rounder covers a wide range of situations from headwaters to broader midstream runs. While inheriting the original Lupus series' supple follow-through, it adds just the right firmness in key areas of the blank. From downstream drifts with floating minnows to upstream approaches with heavy-sinking minnows, it adapts to the conditions with ease. A flexible tip absorbs bites for smooth hook-ups, and the blank bends fully to gently control trout through the fight—an ideal rod for those rare, high-quality fish in upper to midstream waters.

73S/3pcs

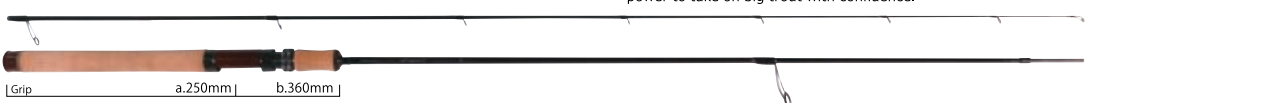

Spinning model

PRICE :

LURE : 3~14g

LINE : PE 0.6~1

- Length: 2217mm (Closed length: 1132mm)
- Weight: 93g(P)
- Suitable reel size: D: LT2000~2500 / S: 2000~2500
- Guide: SiC-S Titanium frame K Guide (Fuji)
- Recommended Target: Trout
- Reel Seat: Original wood seat / Down lock

A long-length model designed for wide coverage.
Light and effective in rivers and lakes.

The Lupus 73S is a long-length model built for large trout in big rivers and lakes. When fishing downstream, its responsive tip and belly resist the current, keeping the minnow tracking smoothly and consistently even in strong flow. It also excels at long-distance casting, making it ideal for working spoons on lakes. The blank flexes naturally to convert those precious bites into near-automatic hook-ups as the fish turns, and despite its light, nimble feel, it carries ample butt power to take on big trout with confidence.

Lupus BENDING CURVES

Lupus for Native Trout Series

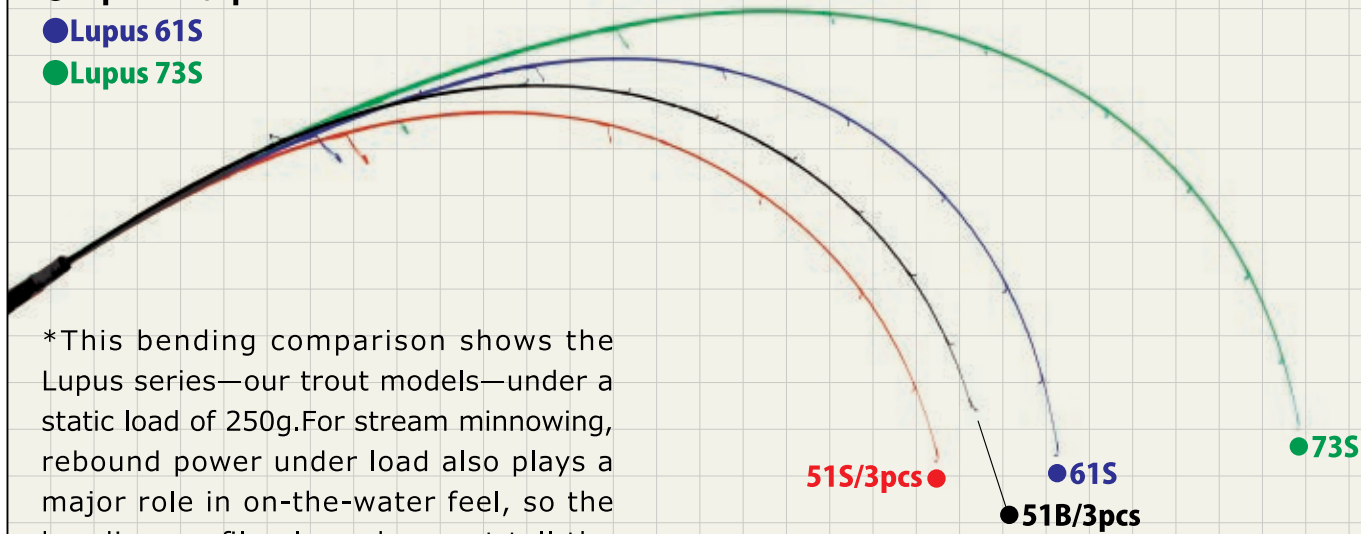

Load 250g

●Lupus 51S/3pcs

●Lupus 51B/3pcs

●Lupus 61S

●Lupus 73S

*This bending comparison shows the Lupus series—our trout models—under a static load of 250g. For stream minnowing, rebound power under load also plays a major role in on-the-water feel, so the bending profile alone does not tell the whole story.

51S/3pcs & 51B/3pcs Dedicated rod bag

A dedicated rod bag is included with the 51S/3pcs and 51B/3pcs. It helps prevent damage and scratches during stream entry and exit or transport, while also securely protecting the guides and blank when stored inside a bag.

*The rod bag shown above is exclusively for the 51S/3pcs and 51B/3pcs models.
*The rod bag pictured is a prototype; design and specifications are subject to change without notice.

Lupus for Area Trout Game

The Lupus Area Trout series is a comprehensive lineup designed to cover area trout fishing from every angle. The six-model lineup includes three Retrieve Type models for reeling-focused approaches, two Motion Type models for actively working lures, and one Special Task Type model that explores unique strategies beyond conventional methods. All models offer greater depth and precision in area trout fishing.

Reel Balance Indicator

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

AREA TROUT GAME MODEL

61 RM
TYPE: RETRIEVE
MULTIPURPOSE

PRICE :
LURE : 0.6~6g
LINE : 1.5~4lb / PE 0.15~0.5

- Length: 1865mm (Closed length: 955mm)
- Weight: 54g
- Suitable reel size: D: LT1000~2000 / S: 1000~C2000
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Spoon · Crank-baits
- Reel Seat: DPS16 (Fuji) / Up lock nut

Ideal for all types of retrieval with shallow-running minnows, and regular “stop and go” techniques using bottom-type cranking baits.

It is the most versatile model of the series, able to cast various types and weight of lures with a regular taper blank. The sensitive tip section will capture the subtle bite of the fish and moderately stiff belly section will not only help a swift hookup but also reduce miss bites. We can confidently recommend this rod for those anglers who want to use 1 rod for all types of approaches and different trout ponds as well as beginner trout fishermen.

511 RF
TYPE: RETRIEVE
FINESSE

PRICE :
LURE : ~4g
LINE : ~3lb / PE ~0.4

- Length: 1820mm (Closed length: 930mm)
- Weight: 55g
- Suitable reel size: D: LT1000~2000 / S: 1000~C2000
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Micro spoon · Micro crank-baits
- Reel Seat: DPS16 (Fuji) / Up lock nut

This is a finesse model designed for ultra-thin lines and super-light lures such as micro spoons and small crankbaits.

This is the finesse model of the 61RM for down-sizing your main lures. The rod possess a sensitive and flexible tip to belly section, capable of hooking up the subtlest bites of ultra light lures with a slow retrieval. The flexible blank will absorb the load and prevent the ultra thin line from bust offs and stretching of the super fine hooks. Although it is a finesse model, the butt section has ample power for the unexpected big trout. It is most ideal for small-middle size ponds for dose range fishing for numbers and those anglers who prefer a softer rod as their main rod.

66 RS
TYPE: RETRIEVE
SHARPNESS

PRICE :
LURE : 0.8~6g
LINE : 1.5~5lb / PE 0.15~0.5

- Length: 1990mm (Closed length: 1025mm)
- Weight: 57g
- Suitable reel size: D: LT1000~2500C / S: 1000~C2500
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Crank-baits · Spoon (Large size available)
- Reel Seat: DPS16 (Fuji) / Up lock nut

The sharpest model for quick hook-ups with high-drag lures cast long distances.

The tip section has been designed with plenty of flexibility for a more loose action of the lure during retrieval and will allow anglers to successfully hook up the slightest of bites. In contrast, the belly section is stiffer to effectively hookup those cranking baits that tend to have more drag and are more difficult to transmit the hooking towards the fish. The 6.6ft length will also allow anglers easier line mending if required and possesses the most powerful butt section in the retrieval type rods.

62 MB
TYPE: MOTION
BOTTOM BOUNCING

PRICE :
LURE : 1~6g
LINE : 2~6lb / PE 0.15~0.6

- Length: 1895mm (Closed length: 970mm)
- Weight: 61g
- Suitable reel size: D: LT1000~2500C / S: 1000~C2500
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Vibration · Lures for bottom
- Reel Seat: DPS16 (Fuji) / Up lock nut

A highly responsive model ideal for maneuvering bottom-type lures and metal vibrations using bottom-bouncing techniques.

Since the blank has been engineered to be stiffer with a bouncy tip section, anglers will be able to rhythmically utilize the “lift and fall” technique with metal vibrations. This stiffness will also allow for a swift hookup while the angler is maneuvering the lure. Furthermore, this will also help the initial action of the lure when utilizing the “stop and go” method. This model is not only great for deeper ranges, but also ideal for maneuvering top water lures.

60 MTR
TYPE: MOTION
TWITCH & RETRIEVE

PRICE :
LURE : 1~10g
LINE : 2.5~8lb / PE 0.2~0.6

- Length: 1830mm (Closed length: 940mm)
- Weight: 55g
- Suitable reel size: D: LT1000~2500C / S: 1000~C2500
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Minnows
- Reel Seat: DPS16 (Fuji) / Up lock nut

This is a model to actively hookup through twitching and simple retrieval. A model for those anglers chasing large mountain and brown trout.

This model has been designed with stiffness required to actively twitch the rod to animate the lure in the water. Anglers can continuously twitch the rod to dramatically bring life into the lure. The sensitivity and stiffness of the blank will also help anglers successfully set hook in the hard mouth of the various species of trout. Furthermore, the “stop and go” technique with buoyant minnows will allow for a vertical approach which is highly productive for rainbow trout.

61 STT
TYPE: SPECIAL TASK
TROPHY

PRICE :
LURE : 3~12g
LINE : 4~10lb / PE 0.4~1

- Length: 1864mm (Closed length: 957mm)
- Weight: 71g
- Suitable reel size: D: LT2500C~3000C / S: C2500~C3000
- Guide: SiC-S Stainless frame K Guide (Fuji)
- Recommended Lure: Long lip minnow · Heavy sinking minnow
- Reel Seat: DPS16 (Fuji) / Up lock nut

A final weapon for targeting trophy-size, inactive trout through both static and dynamic lure actions.

It is a special concept model that focuses on site fishing for large trout lurking in the fishing ponds and to manually induce bites from these spooked fish. Anglers will lightly be able to control minnows with heavy drag and maximize the potential of these types of lures with the stop and go technique. By attempting various approaches and different trace courses, anglers will easily be able to make that spooked fish bite your lure thought technical rod work of this powerful, yet light rod.

The recommended targets and method for Lupus for Area Trout Game Series

◎ = Highly recommended ○ = Recommended

Lupus Area Series All models	TYPE Retrieve			TYPE Motion		TYPE Special Task
	61 RM	511 RF	66 RS	62 MB	60 MTR	61 STT
MICRO SPOON ~1g	○	◎	○	○	○	○
SPOON 1~3g	○	○	○	○	○	○
LONG CAST SPOON 3g~	○	○	◎	○	○	○
MICRO CRANKBAIT	○	◎	○	○	○	○

A close-range model for ~1 g spoons, capable of handling pressured trout.

A classic area-trout model for 1~3 g spoons.

A heavyweight-spoon model that excels when targeting fish offshore or fishing in strong winds.

Supple action that tames lure movement and a delicate tip for sensing subtle changes—essential for targeting pressured fish.

Supple action and a delicate tip essential for pressured fish.

A model that combines sensitivity to read bottom contours with butt power to control high-resistance lures.

A firm, fast-recovering model for precise control of both “static” and “dynamic” actions.

A model with a supple tip for twitching and high rebound for crisp, high-tempo control.

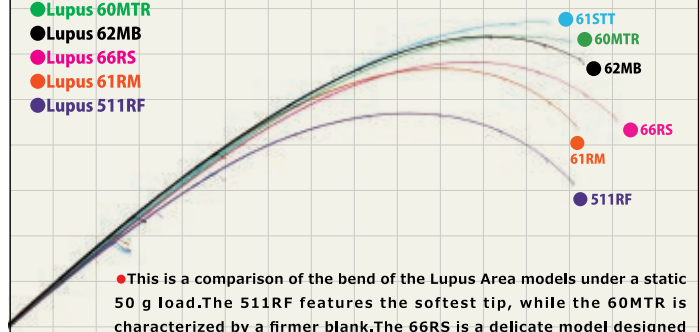

A must-have lure for targeting big fish, demanding rods with both power and firm backbone.

Lupus Area Trout BENDING CURVES

Load 50g

- Lupus 61STT
- Lupus 60MTR
- Lupus 62MB
- Lupus 66RS
- Lupus 61RM
- Lupus 511RF

● This is a comparison of the bend of the Lupus Area models under a static 50 g load. The 511RF features the softest tip, while the 60MTR is characterized by a firmer blank. The 66RS is a delicate model designed mainly for steady retrieves, but with added sharpness to resist lip drag when hooking crankbaits. The 61STT is designed for high-resistance minnow use, resulting in a sharper, more tensioned feel throughout the blank.

Lupus for Area Trout RADER CHART

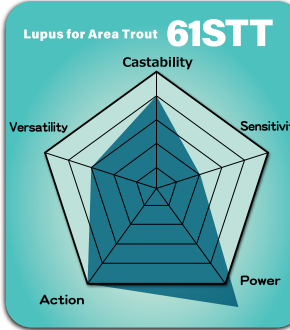

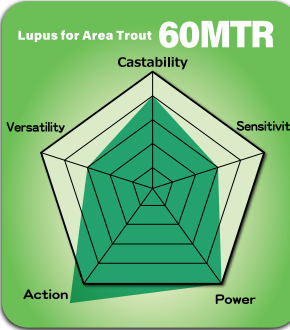

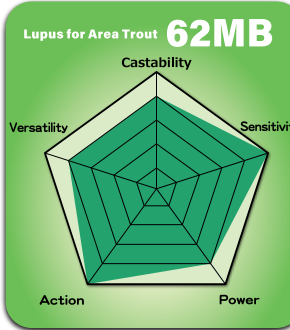

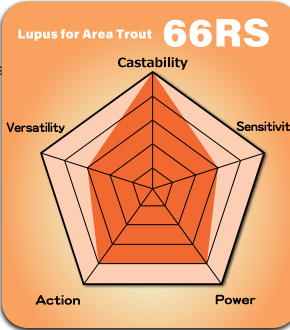

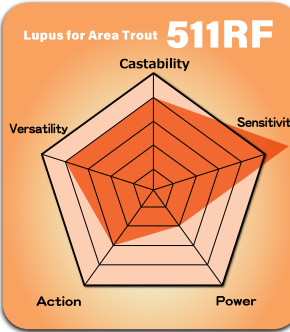

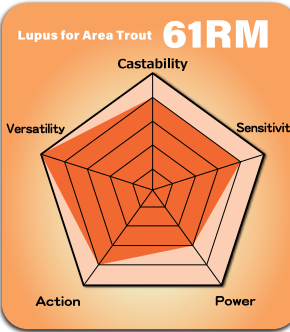

Castability · Casting performance when using the lures each model is best suited for.

Sensitivity · Small-lure control (e.g., micro spoons) and sensitivity to read underwater feedback.

Power · Firm backbone for crisp control and the power to handle monster-class fish.

Action · Operability from subtle inputs to dynamic actions like twitching.

Versatility · Higher versatility allows one rod to handle a wider range of lures and methods.

Radar charts are used to visualize characteristics that are difficult to quantify, but these five categories do not represent everything about a rod. Perception may vary from angler to angler, so please use this chart only as a general reference.

YAMAGA Blanks MEMBERS LIMITED

NEW DAWN 2026

In 2026, four additional models are scheduled for release. Three will join the “ELITE” series, featuring unmatched, highly specialized performance, while one new model will enter the “BETA” series, built around a bold and unconventional concept. In addition, a special-color model packed with playful creativity—“VIVID”—is currently in development. From the ELITE series, BlueCurrent 610 and BlueCurrent 73 have been refined to the limits of their respective strengths. The 610 is dedicated to aggressive techniques such as topwater and jerking for seabass and black sea bream. Its length is suited for both shore and boat use, making it a rod aimed squarely at plugging enthusiasts nationwide. The 73, meanwhile, inherits the versatility of previous models while delivering smoother handling and enhanced core performance. Reborn through the full application of YAMAGA Blanks’ technology, it stands as an aggressive, do-everything rod. Calista 82 is currently under intensive development as a rod for eging experts. Building on the existing model, it has been sharpened further to improve precision and crispness while maintaining its light, agile feel. From the BETA series, the upcoming EARLY 120 / 3pcs represents a new challenge for YAMAGA Blanks—combining unprecedented ultra-long-range performance with true portability. In 2026, we will continue to stand at the forefront as dedicated craftsmen. We invite you to experience firsthand the innovative rods born from all the technology we have accumulated, driven by passion and an unending spirit of exploration.

Under development

This razor-sharp blank delivers a razor-sharp response. “Super Sharp Custom” transmits even the subtlest information through the blank. While maintaining the series concept of “lightweight, long casting distance, and the enjoyment of light, comfortable squid jigging,” this Super Sharp Custom is further refined by stripping away the unnecessary and focusing purely on performance. Cutting-edge prepreg and the latest design maximize the advantages of a tubular blank, producing ultra-high elasticity and razor-sharp recovery. With exceptional sensitivity, it relays even the faintest information to the angler and slices cleanly through the air on the cast. It’s not an easy rod for everyone, but in skilled hands it reveals its true value—an expert model for dedicated squid anglers.

Aim for that "one step further" that you just couldn't reach. A multi-piece surf rod that combines ultra-long casting ability with portability. This special rod combines an unprecedented 12ft long length with a 3-piece design. Developed primarily to target salmon in Hokkaido with the use of a “float-rig”. It not only has great casting ability, but also demonstrates unparalleled strength to outcast any other angler in the field. In addition to salmon, this powerful surf rod is equipped with the strength to handle long-distance float lures for blue-runner fishing in the vast surf.

Members LIMITED

Launched in 2024, “YAMAGA Blanks – NEW DAWN” marks a new chapter for the brand. Using the online shop YAMAGA Blanks Members as a platform for fresh challenges, we have been developing and releasing more innovative models. While large-scale production is difficult and releases are limited in quantity, this lineup is filled with a sense of fun and challenge that cannot be found in our regular models.

●Suitable reel size: D: ~LT2000 / S: ~2000

●Target: Common fields

●Lure: Common lures up to 5g

With a direct feel like an extension of your hand, this ultra-short spinning model is built purely for the pursuit of fun. Despite its ultra-short length, this spinning model fully exploits the advantages of spinning tackle, delivering an impressive level of long-cast performance with small lures and crisp, responsive lure control. It excels in delicate aji and mebaru games where finesse is key, while its tenacious backbone also makes thrilling fights with seabass juveniles and black sea bream possible. Just imagining what kind of fish you might hook next is enough to make this rod exciting to fish with.

●Suitable reel size: D: LT2500~4000C / S: 2500 · C3000 · 4000

●Target: Horse Mackerel · Rock fish · etc

●Lure: Metal jig · Rig

A light-game rod built with concentrated performance to gain extra distance when searching targets across vast waters. BlueCurrent 100 BETA Tuned for SURF is a specialized light game model for casting in the vast surf. Although it is 10ft in length, we have not forgotten that it is a light game model. It is equipped with the sensitivity, lightness and finesse characteristics of a light game rod, yet able to cast long distances with jigs and “floats” and “sinker” rigs. This model will be the next standard for the light game, long distance search model in the BlueCurrent series.

●Suitable reel size: D: LT3000C~4000 / S: C3000~4000

●Target: Pike・Hucho

●Lure: Jig head・Minnow・Plug

A balanced blend of sensitivity and toughness.

An M-power Predator Hunter built to cover a wide range of games, from shore to offshore.

This is a multi purpose model specially designed for catching freshwater predatory fish such as perch, pike, pikeperch, catfish, etc. Both from the shore and from the boat. It has enough power to work quietly with minnow wobblers up to 130mm and jighead lures up to 30g. In addition to power, the fishing rod has good sensitivity and excellent casting performance when fishing with light lures.

●Reel Seat: DPS18 (Fuji) / UP lock nut

●Suitable reel size: D: LT4000C~5000 / S: 4000~5000

●Target: Pike・Hucho・Catfish

●Lure: Big jig heads・Minnows・Plug

A model designed to control large lures with precision.

Its strong butt power holds its own in battles with trophy-class fish.

This versatile model is specially designed for big freshwater predators like pike, hucho, catfish etc. Powerful, light and precise. During testing in the European area, we focused on the guide diameter that it could be used without stress even in extremely cold areas where the guide would be frozen. Also, it has enough power to cast big lures up to 100g, but on the other way sensitive enough to fish with small and light lures around 20g. When you require to cast long distance with big lures, especially on wide rivers targeting big hucho, with this rod it is not a problem anymore.

●Reel Seat: VSS16 (Fuji) / Down lock nut

●Suitable reel size: D: LT2500C~C3000 / S: 2500~C3000

●Recommended lures and actions

Operation in areas with flow・Followability to bite

Lures that be able to action・Lures that be able to retrieve

Sharpness and strength—refined to the core.

Built to deliver long-cast performance with confidence.

It has a moderate amount of stiffness all the way to the tip, while also being able to bend smoothly under load. Even when casting, it has a high recovery force even though it bends as a whole, so the casting feel is also good. Since the blank bends smoothly up to the belly, it is also suitable for retrieving action. A rod that can be used not only from the bottom to the top range but also with slow and fast action in the current, making it easy to turn on fish.

Quick action: 100~250g/Depth: 70~120m

Fall action: 300~350g / Depth: 100~250m

Best weight: Around 300g / Depth: 100~150m

An all-rounder that forms the core of the Galahad Slow series.

Accurately transmits the angler's intentions directly to the jig.

A PE2 class model that can comfortably handle 200~300g jigs. The main feature of the Galahad Slow series is its all-rounder performance, which has a lot of latitude in action to manipulate the jigs that suit a variety of targets. It covers a wide range of uses, from a quick action approach to blue runner with high swimming ability to a natural fall action for sea bream and rock fish.

Galahad Slow

584

GLOBAL

PRICE:

LURE: Around 400 Class / Comfort Jig Weight 300~500g

LINE: PE 3 Class

●Length: 1727mm

●Weight: 144g

●Guide: SiC-S Titanium frame K + RV Guide (Fuji)

●Reel Seat: PLS18 (Fuji) / Down lock nut

●Suitable reel size: D: 30~50 / S: 1500~3000

●Recommended water depth and jig weight guide

Quick action: 200~350g/Depth: 100~150m

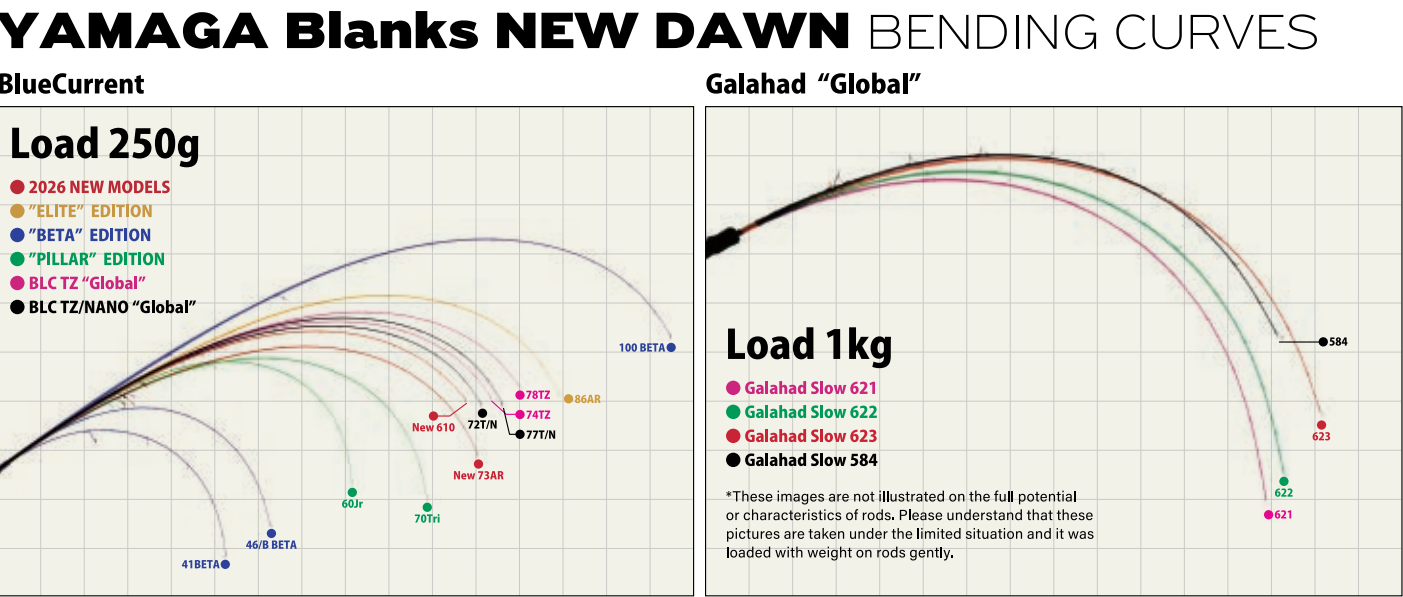

Fall action: 300~500g / Depth: 150~300m

Best weight: Around 400g / Depth: 250m

The most powerful model in the series.

Strong enough for tough situations, yet comfortable to operate.

To comfortably manipulate 300 to 500g jigs under special conditions such as deep waters, tidal currents, and complex double tides, the blank has strong tension and torque, even in high water pressure. It is possible to transmit the action to the jig with less burden on the body. The response of the combination, from the quick action to targets with high swimming ability such as amberjack, to the fall action, is the best in the series. This model is also recommended for targeting large rock fish in deep waters.

● We have prepared a bending comparison focusing exclusively on the BlueCurrent models from the YAMAGA Blanks NEW DAWN lineup.

● As shown in the diagram, the new 2026 BlueCurrent 610 "ELITE" features strong firmness throughout the entire blank. This makes it especially well suited for lure-focused games that require active rod work, such as jerking techniques.

● The 70Trippers, a four-piece model, is a versatile rod capable of handling a wide range of lures, including jig heads and plugs.

● The 60Jr is designed with a focus on durability, allowing it to be used confidently with live bait, soft plastics, and other rigs. When fishing with jig heads, weights of 1 g or heavier are recommended.

● We have prepared a bending comparison featuring only the Galahad Global models from the YAMAGA Blanks NEW DAWN lineup.

● The standard models 621 and 622 combine supple flex with strong recovery. While each is optimized for a different lure-weight range, both excel at slow-style actions. With only light input from the rod, jigs can be worked smoothly and effortlessly.

● The 623 and 584 feature a firmer blank and are adept not only at slow actions but also at quicker, more responsive operations. They are highly recommended for anglers who like to mix high-pitch actions with slow-style approaches.

The standard rod belt is available in 3 sizes, and the PG rod belt, which has anti-slip rubber sewn on to improve frictional resistance, is available in 2 sizes. The PG rod belt has an amazing frictional resistance and can remove fixation on ferule that cannot be removed with bare hands.

- Color: Black ●Material: Neoprene & Piece of Velcro

2026 YAMAGA Blanks ORIGINAL APPAREL&GOODS

2026 NEW YB Circle Logo T-Shirt Price:

A cotton T-shirt made with 5.6 oz fabric for a comfortable fit that holds its shape. Featuring the YB logo and a fresh, clean color scheme.

2026 NEW YB Zip Hoodie Price:

A zip hoodie that's perfect for chilly days when you want a light layer, and just as useful in midwinter under a jacket. The full-zip design makes it easy to put on and take off, allowing quick temperature control when conditions change. It won't restrict your movement on the water, keeping you comfortable and stress-free throughout the day.

2026 NEW COLOR YB Silky touch long sleeve T-shirt Price:

The UV-cut, dry silky-touch fabric quickly absorbs, disperses, and dries sweat to keep the inside of the garment dry and comfortable. Ideal not only for humid conditions but also for cooler days. A new Olive Drab color will be added for 2026.

YB BUG BARRIER INNER Price:

A wearable insect repellent that is developed with a smell that insects dislike. Made with 360 degree stretch fabric that absorbs sweat and dries quickly. It has a smooth texture that makes you feel cool and also has UV protection, so you can wear it comfortably even on extremely hot days. The "arm cover" can easily be put on or taken off, and the upper section has a silicone anti-slip layer sewn into it to prevent it from sliding down when casting. The "Under tights" can be used comfortably as an inner layer under your shorts, both for onshore and offshore fishing. The YB BUG BARRIER INNER series is not only useful for fishing, but also for all outdoor activities during seasons where insects are common.

●Size: M/L/LL ●Color: Balck / Navy ●Material: Polyester 77% Polyurethane 23%

Black Arm Cover Navy

Black Under Tights Navy

- Smell function which is insects hate※
- Sweat absorption & Quick drying
- Cool touch performance
- Stretch material
- UV Cut
- Made in Japan

※Insect repellent means that the body is physically protected by fabric that is impregnated with an odor that insects dislike, and is not a product intended to repel flies, fleas, and other similar creatures.

CAP

2026 NEW YB Mesh Cap Price:

A mesh cap made with NanoWing twill cotton, offering water repellency, durability, and quick-drying performance. Its breathable design keeps airflow high and comfort consistent.

●Size: Free ●Color: Charcoal Gray / Black ●Material: Cotton 100%

YB Flat Visor Cap Price:

Renew a design of classic YB flat visor cap. Featuring a voluminous YB logo and an embroidered YBRC logo on the side. The cap comes with an original sticker that you can enjoy placing on your cap, tackle box, or any other preferred spot.

●Size: One-size-fits-all ●Color: Black/Navy ●Materials: Acrylic 80%, Wool 20%

YB Flat Visor Mesh Cap Price:

Mesh caps are highly breathable and do not get stuffy, so they are recommended on hot days. An original sticker is also included.

●Size: One-size-fits-all ●Color: Black/Beige
●Materials: Main Body: 100% Cotton
Mesh Part (Black): 100% Polyester Mesh Part (Beige): 100% Nylon

GOODS

YB Embroidery Emblem Price:

The design of the Yamaga Blanks original Embroidery Emblem has been redesigned. Easy to iron on life jackets and bags.

●Materials: Polyester 100% ●Embroidery: rayon 100%

Precautions for use and repair

Precautions for use

- Do not cast with a tangled line or line trouble In the reel. This may cause the rod to break. Furthermore, if you miss or forget to put the line through a guide, this may result in damage or breakage of your rod.
- If you continue to reel in your rig (lure, popper, rig etc) after it has reached the top guide, this will cause the rod to break.
- If you force the Joint section of the rod when joining together, this will cause cracking or splitting of the joints.
- If you use the rod while the joint section is still loose, this may cause breakage.
- If the Joint section is stuck together, use a rubber sheet for added grip while twisting away from each other.
- Beware of power cables, overhead power lines, or phone lines. The material (carbon) will easily pass through electricity causing serious injury or death.
- If you hear or see lightning approaching while in use, pack the rod away or stay away from the rod. Lightning may strike causing serious injury or death.

About the contents on this catalog

- Specifications might be changed without previous notice.
- Some of images on this catalog are proto type so it might be different from actual products.
- Images on this catalog might be different from actual products depending on the condition of printing.

Maintenance and storage

- Wash the rod with running water to rid of any filth and salt. Then wipe off any excess water.
If you store your rod without wiping off excess water, this may cause blisters on the blank. Storage in well ventilated areas with no high temperature.
- Please do not leave the rod in your vehicle for long durations in summer. This will cause blisters and warping of the blank.

Contents in this catalog

- Include accurate specifications of rods, written in accordance with the regulations set by the Japanese National Fishing Rod Fair Trade Conference.
- Specifications listed on this catalog may be altered without notice.
- The colors presented in the pictures may differ from the actual color. Furthermore, some products are prototype rods in the developmental stage and may differ when it reaches the final product.

Repair and support

- Please take products which is required repairing to sales outlet. At that moment, please send a whole rod (not only the section of the breakage)
- Please be aware that any rod that was personally modified will not be covered by warranty (even if it is under warranty) Any repair that we have judged as changed/tampered with the specification or made to order is unacceptable.
