BEYOND THE FRAME

"BORN TO CROSS EVERY BOUNDARY"

"Think outside the box"

We continue to explore new possibilities with free and flexible thinking. Development may be easier if working from a pre-determined mold. And if one simply copies a shape, one can create a likeness, but one cannot actually create anything new. We stay away from the "easy path" and continue to extend the limits of our imaginations to create fishing rods that no one has ever seen before. This is symbolized by the words "think outside the box" engraved on every model of Yamaga Blanks' signature light game series "Blue Current" .

Slip out of the boredom days

In the dawn of Aji fishing- a time when the genre of aji rods hadn't yet been established – this rod was born as a "versatile light game rod" that could be used for both horse mackerel and rockfish. This was a time before social media, when the only way to gain knowledge was by being there. The Blue Current was born from an idea not bound by conventional thinking, without expectations of what it "had" to be. More than ten years later, this same spirit is still to be found at Yamaga Blanks as the series evolves and new excellent models are constantly being produced.

What we consider to be "Yamaga Blanks-ness" is "unadorned," "genuine," and "strong-core." It is not just about flashiness, but also about pursuing the essential value that is required of a fishing rod. We continue to hone the true value of our fishing rods, unswayed by the times nor trends.

While there are many fishing rods on the market, we have built our own unique characteristics by thoroughly refining the essential qualities of "lightness" , "great castability" and "strength" in our fishing rods. Even when our rods are specialized for a particular species or method of fishing, we design them to be versatile and enjoyable in a variety of ways thanks to their high basic performance. As a result, we create rods that can be used for a long time, even after the trends and fads have passed. It is our mission and our true desire at Yamaga Blanks to create rods that you can continue to pick up, unchanged, even 10 or 20 years from now.

The development of new rods is always based on this "uniqueness" , while incorporating current needs and new ideas.

In the process of searching for something "more interesting and unique" , it is not uncommon for rod specifications to change 180 degrees during its initial developmental stages. This is only made possible because we have our own factory and a system where design, development, and manufacturing can work closely together. Never satisfied with the status quo, we continue to refine our products in pursuit of something better. This accumulation of efforts has resulted in the creation of rods that combine the seemingly contradictory characteristics of "bending to catch" and a "powerful bend" .

In 2026, Yamaga Blanks will be introducing new, unconventional products. The SeaWalk Game Blender is a new challenge that brings more than just 2-in-1 fun. The SeaWalk Vertical Contact was developed through the knowledge cultivated in light game rods. The long-awaited Lupus Native series will be renewed. Members-only models include models that utilize cutting-edge technology, models specialized for specific situations, and additional models tailored to the needs of anglers.

We will continue to evolve as manufacturing professionals who delve into the essence of fishing, in pursuit of rods that are "unique to Yamaga Blanks" .

2026 NEW SERIES

SeaWalk Vertical Contact

Bachikon Ajing is a fascinating game that allows you to directly access areas that cannot be reached from land-based fishing to target large horse mackerel in the depths. Anglers are required to find the productive depth where the fish are on the bite, and aggressively set the hook on them. This "aggressive element" of the technical style of fishing is the biggest reason why people are so addicted to this game.

The fact that even the slightest difference in technique can make a big difference in your catch is one of the reasons why anglers' curiosity is stimulated and get so hooked in this game.

The new series "SeaWalk Vertical Contact" to be released in 2026 is a specialized series of rods which have been thoroughly refined to provide the exquisite basic performance required for Bachikon Ajing.

66S

PRICE :
LURE : Max 60g
LINE : PE 0.3~0.6

- Length : 1975mm (Closed length: 1010mm)
- Weight: 68g
- Guide: SiC-S stainless frame K guide + LDB guide (Fuji)
- Reel seat: VSS16 (Fuji) / Down lock
- Suitable reel size: D: LT2000~3000C / S: 2000~C3000
- Target: Horse mackerel・Grunt
- Lure: Vertical Contact

“Search widely and hook sharply.”
Instant blank feedback delivers solid upper-jaw hook-ups with zero-tension and curve-fall.

This is a revolutionary new spinning Bachikon rod that maximizes the benefits of spinning tackle: “quick fall” and “ease of use” . You can cast to search a vast area, successfully sense the subtle bites during curve-fall and zero-tension approaches and swiftly initiate hooking to capture the hard upper jaw. Furthermore, the reeling sensitivity has been refined to convey every change in conditions under the water during the retrieval to your hands. This rod will allow you to enjoy the Bachikon game as if you were simply utilizing the single vertical jig-head rig.

66B

PRICE :
LURE : Max 60g
LINE : PE 0.3~0.6

- Length : 1975mm (Closed length: 1010mm)
- Weight: 90g
- Guide: SiC-S stainless frame K guide + LDB guide (Fuji)
- Reel seat: PMTS17 (Fuji) / Down lock
- Suitable reel size: D・S: ~200
- Target: Horse mackerel・Grunt
- Lure: Vertical Contact

The versatile rod which is the series' core model.
It pins the productive depth and won't miss the bite—ready for any situation.

Its high sensitivity allows anglers to clearly detect bites even from the smallest horse mackerel, and it offers the flexibility to aggressively hook up or let the fish take the bait depending on how active the fish are. It is also ideal for shallow waters with the use of lighter rigs. Its light operability makes it suitable for a variety of actions and methods, such as shaking to induce bites and zero-tension techniques. When combined with a reel with a depth counter, it is a rod that can be used in a wide range of situations.

70S

PRICE :
LURE : Max 95g
LINE : PE 0.3~0.8

- Length : 2126mm (Closed length: 1085mm)
- Weight: 73g
- Guide: SiC-S stainless frame K guide + LDB guide (Fuji)
- Reel seat: VSS16 (Fuji) / Down lock
- Suitable reel size: D: LT2000~4000 / S: 2000~4000
- Target: Horse mackerel・Grunt
- Lure: Vertical Contact

This technical model delivers uncompromising sensitivity and fast response—even with heavy rigs. It broadens your options when fishing deep.

This rod offers consistent sensitivity and control even at depths of 100 meters. Even in deep areas or areas with strong currents, it will accurately detect subtle bites and lead to ideal hook-ups. With the perfect combination of “deep-sea” and “spinning reel” , anglers will be able to efficiently search the depths. The 7ft length allows for a variety of approaches, including long strokes to lure the fish and casting out to edge of where the light can reach. This is a technical spinning model that shows its true potential once the angler masters its traits.

70B

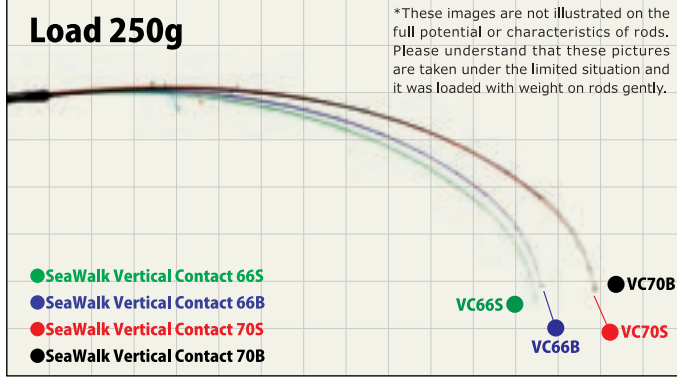

PRICE :
LURE : Max 95g
LINE : PE 0.3~0.8

- Length : 2126mm (Closed length: 1085mm)
- Weight: 94g
- Guide: SiC-S stainless frame K guide + LDB guide (Fuji)
- Reel seat: PMTS17 (Fuji) / Down lock
- Suitable reel size: D・S: ~200
- Target: Horse mackerel・Grunt
- Lure: Vertical Contact

Anglers can dial in the productive depth and replicate the bite pattern.
With efficient deep-water feedback, this rod becomes your go-to weapon.

The highly sensitive blank will directly transmit the information from the depths allowing anglers to clearly grasp the landscape of the bottom and slight changes in the tides. It accurately detects subtle bites, leading to precise hook-ups. Anglers will be able to achieve precise range control in areas where frequent depth adjustments are required. It will allow anglers to minimize time loss due to snags and you won't miss that instant opportunity. It is also suitable to for use with 200 class electric reels when you are fishing in deep waters.

Vertical Contact BENDING CURVES

● This is a static load comparison conducted with the rod held at an angle that simulates actual fishing conditions. The base series 66S/B, is characterized by a versatile blank that bends flexibly. In contrast, the 70S/B, which can cover depths of up to 100m, has sufficient butt power to operate heavyweight sinkers in the depths. Although the picture does not fully represent the rods characteristics, you will be able to see that the rod flexibly bends in once the rod is loaded with the weight of the fish.

Precaution for carbon solid tip model

Carbon solid tip is loaded to SeaWalk Vertical Contact series.

Thread color of tip is orange to increase visibility.

● As we have mentioned, SeaWalk Vertical Contact series, have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

"Let's start something new!"

The first obstacle when you want to start a new genre of fishing is probably the need for specialized tackle. However, it is difficult to purchase expensive tackle for a type of fishing that you may not even continue pursuing, let alone those seasonal species that you only go after only a few times a year. The new "SeaWalk GAME BLENDER" to be released in 2026, was born to lower those barriers. The modern fishing scene is becoming increasingly segmented, and tackle and methods are evolving every day. Of course, there is a need for specialized rods that are tailored to specific species and styles of fishing in different areas. This is an essential element in pursuing fishing as a sport and as a hobby, and ultimately lure fishing.

This time however, Yamaga Blanks has focused on a rod equipped with the "performance that will allow anglers to enjoy fishing in a wider variety of ways." In other words, the freedom to try out different styles and fish species simply by changing the reel. Not only does this open up new possibilities, but we hope it also awakens the childhood memories you had when you first started fishing. That is the new standard that Yamaga Blanks sought for the Game Blender, and it is what we are trying to achieve.

The SeaWalk GAME BLENDER will be available in three models, starting with the GAME BLENDER 510L/510ML, which allows anglers to enjoy both the swordfish (hair-tail) game and light slow jigging with one rod. Each model blends different genres and methods of fishing, allowing anglers to enjoy multiple types of fishing with a single rod.

Yamaga Blanks has combined the know-how it has cultivated through the design of hundreds of blanks to create a new series that transcends boundaries and blends different styles of fishing to expand the "possibilities of fishing". This is the "SeaWalk GAME BLENDER."

MULTI GAME MODEL

510L

Sabeling×Light Slow

PRICE :

LURE : *cw 60~150g (Sabeling) / cw 80~250g (Light Slow)

LINE : PE 0.6~1.2 (Sabeling) / PE 0.8~2 (Light Slow)

●Length: 1800mm (Closed length: 1310mm)

●Weight: 123g

●Suitable reel size: D・S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Target: Hairtail・Rockfish・Bluerunner

●Reel Seat: PULS17 (Fuji) / Down lock

●Lure: Metal jig

Grip

a.435mm

b.560mm

Excellent jig control thanks to excellent operability and capable of targeting a wide range of inshore fish, such as swordfish, rockfish and blue-runner.

A highly versatile model built to execute a wide range of jig actions with ease, smoothly transitioning from high-pitch to the pause-and-sink that naturally keeps the metal jig horizontal. Taking advantage of the tubular blank, it delivers crisp, precise input and outstanding operability, while high sensitivity clearly transmits even subtle, teasing bites on the fall. A multi-game rod that lets anglers enjoy true jig control with less fatigue, enabling confident, thorough coverage of a wide range of inshore targets.

*CW (Comfort Weight): Indicates the load range that can be used most comfortably. This is not the maximum limit, and slight variations above or below this range are acceptable.

510ML

Sabeling×Light Slow

PRICE :

LURE : *cw 80~180g (Sabeling) / cw 120~300g (Light Slow)

LINE : PE 0.6~1.2 (Sabeling) / PE 0.8~2.5 (Light Slow)

●Length: 1800mm (Closed length: 1310mm)

●Weight: 123g

●Suitable reel size: D・S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Target: Hairtail・Rockfish・Bluerunner

●Reel Seat: PULS17 (Fuji) / Down lock

●Lure: Metal jig

Grip

a.435mm

b.560mm

Slender yet muscular. Features a high-power tubular blank. A reinforced model for swordfish and slow-jigging that can easily handle heavy weight jigs.

This slender, lightweight yet powerful blank excels at interpreting tide changes and underwater anomalies. It can be used in a wide range of areas, from shallow waters to complex two-layer tides and fast currents, and even deep waters (up to 150m). Engineered with the signature sensitivity and recovery unique to a tubular blank, this rod detects the subtlest cues during the fall, delivers precise hook-ups with instantaneous response, and confidently bends under pressure to effortlessly lift the target. A masterful fusion of power and finesse, designed for anglers who demand uncompromising performance.

*CW (Comfort Weight): Indicates the load range that can be used most comfortably. This is not the maximum limit, and slight variations above or below this range are acceptable.

75M

Live-baiting×Electric jigging

PRICE :

LURE : Max 400g (Jig 200~400g / Sinker : 150~375g)

LINE : EJ PE 2.5~4 / Live-baiting PE 3~4

●Length: 2267mm (Closed length: 1575mm)

●Weight: 237g(P)

●Suitable reel size: D・S: 200~300 (Sebeling)

●Guide: SIC-S Stainless frame K Guide (Fuji)

D: ~15 / S: ~2000 (Light Slow)

●Target: Hairtail・Rockfish・Bluerunner

●Reel Seat: DPS18 (Fuji) / Down lock

●Lure: Metal jig / Live-bait drop rig (otoshikomi)

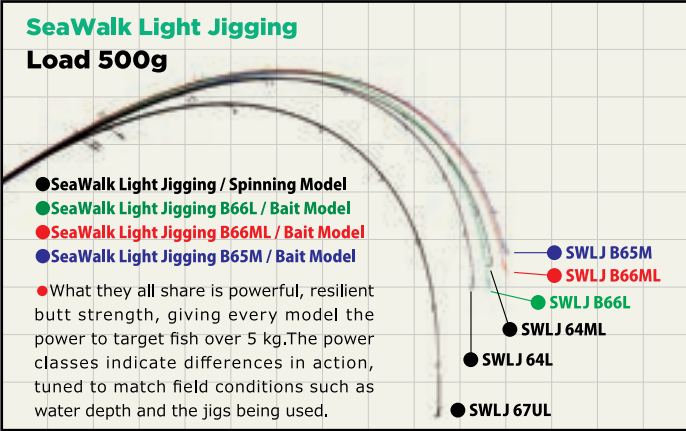

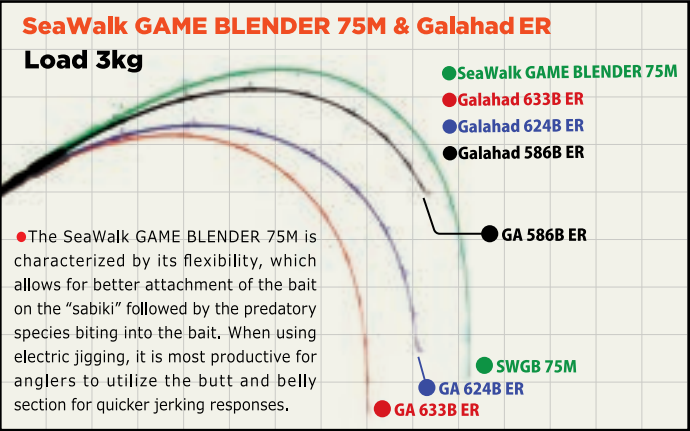

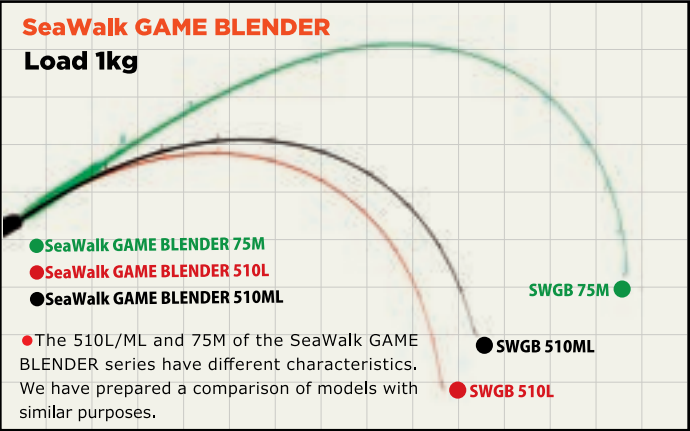

Grip

a.470mm

b.760mm

You can switch freely between live-baiting (otoshikomi) and electric-reel jigging as conditions change. One high-performance rod that excels at both, delivering true versatility and confidence.

This special composite model allows you to freely switch between two games, live-baiting (otoshikomi fishing) and electric jigging, depending on the season and the situation. Its highly flexible blank supports the entire process from allowing the bait to attach itself to the Sabiki until the decisive strike of your target. Its exceptional characteristics carry over to electric jigging as well, accommodating a wide range of retrieval speeds and effortlessly enabling a variety of jigging techniques. The long length of 7 feet 5 inches allows for flexible jig control, including changing the stroke width of the jerk action, which is not possible with a regular jigging rod.

LIGHT JIGGING MODEL

67UL

PRICE :

LURE : Jig 15~40g / Cast Max 25g

LINE : PE 0.4~0.8

●Length: 2015mm (Closed length: 1570mm)

●Weight: 102g

●Suitable reel size: D: LT2000~2500 / S: 2000~C3000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner・Rockfish・Grunt・Horse mackerel

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (Up to 80g is available if you just reeling)

Grip

a.370mm

b.505mm

Sensitive and powerful, this model targets aji, big red sea bream, and pelagics in SLJ.

This is the ultra-light class of light-jigging series to aim Grunt, Horse mackerel or else on shallow water with light weight jigs (around 20g). Combination of super fine PE line and Tungsten-jig make super light jigging possible to aim school of Grunt with falling action or Horse mackerel on the very bottom of the sea. And you will be able to cast jigs up to 25g or let jig up to 40g swim naturally in the 40m depth of water without any stress so you can aim variety of target depend on depth of water systematically.

64L

PRICE :

LURE : Jig 30~80g / Cast Max 35g

LINE : PE 0.6~1

●Length: 1935mm (Closed length: 1475mm)

●Weight: 114g

●Suitable reel size: D: LT2500~4000C / S: C3000~4000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner・Rockfish・Grunt・Horse mackerel

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (Up to 120g is available if you just reeling)

Grip

a.390mm

b.525mm

A basic model that can handle a variety of methods such as SLJ to Tai-rubber and cover waters from shallow to deep.

This is the standard model for light-jigging with Tungsten-jig on inshore. If you wish to cast jig up to 35g compactly or if you wish to cast Tungsten jig or Tai rubber jig to search target widely around 30-60m depth of the sea, belly and butt section which have been loaded moderate stiffness and strength make it possible. Thanks to performance of well-balanced tip and belly section, you can manipulate jig up to 80g on 80m depth of the water and you can keep jig swimming naturally without too much kickback.

64ML

PRICE :

LURE : Jig 60~120g / Cast Max 50g

LINE : PE 0.6~1.2

●Length: 1935mm (Closed length: 1475mm)

●Weight: 115g

●Suitable reel size: D: LT2500~4000C / S: C3000~4000

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner・Rockfish・Hairtail・Bream

●Reel Seat: VSS16 (Fuji) / Up lock nut

●Lure: Metal jig (High pitch jerking is available)

Grip

a.400mm

b.525mm

Captures deep areas and strong currents with ease, handling everything from swimming methods to high-pitch actions.

This is heaviest model of spinning model in this series. It will suit to deep area such as 50m-100m depth or field that current running rapidly. You can cast jig up to 50g. At the situation of vertical and horizontal fishing, you can handle jig up to 120g without any stress. You will notice that strength of butt section of 64ML once bigger fish than you expected is on. Taking advantage of cast ability and falling speed as spinning model, this 64ML will be the huge advantage if you fish on the sea very deep or current running rapidly.

B66L

PRICE :

LURE : Jig 40~80g

LINE : PE 0.6~1

●Length: 1985mm (Closed length: 1525mm)

●Weight: 131g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Bluerunner・Rockfish・Hairtail・Bream・Seabass

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Lure: Metal jig・Tairubber

Grip

a.405mm

b.530mm

This highly versatile overhead-reel model can handle SLJ, Tai-rubber, and even hairtail jigging.

This 66L have employed high versatility to fish with Tungsten-Jig on 20m-50m depth of the sea. It will good to be used for Tairubber game thanks to its flexible tip section and belly section which have moderate stiffness with high sensitivity to let you notice vital information or slightly changes of current. If you wish to aim Hair tail or Sea bass on bay area and try not to let jig move too much, this 66L will make it easier than other models for sure.

B66ML

PRICE :

LURE : Jig 40~120g

LINE : PE 0.8~1.2

●Length: 1985mm (Closed length: 1525mm)

●Weight: 131g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner・Rockfish・Hairtail・Bream・Seabass

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Lure: Metal jig・Tairubber

Grip

a.405mm

b.530mm

High-response blanks with sensitiveness and toughness make this model suitable for various situations.

66ML have characteristic to cover wide range of depth of the sea (30m-80m) thanks to its well-balanced sensitiveness and powerfulness. Even you fish with Tungsten-jig, you will never lose response speed of jerk taking advantage of high sensitivity and manipulate ability thanks to characteristics of overhead model. It is also good to be used for Tairubber game in deep area (80m-100m) or current running rapidly.

B65M

PRICE :

LURE : Jig 60~150g

LINE : PE 0.8~1.5

●Length: 1960mm (Closed length: 1490mm)

●Weight: 128g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SIC-S Stainless frame K Guide (Fuji)

●Target: Blue runner・Rockfish・Hairtail・Bream

●Reel Seat: PULS17 (Fuji) / Down lock nut

●Lure: Metal jig (Up to 250g is available if you fish with slow pitch jerking)

Grip

a.415mm

b.540mm

This model excels in waters with frequent bluerunner contact and is also ideal for deep-water fishing.

This 65M is the most powerful model of light-jigging series which is good to be fished in high population of blue runner. Compared to other models of light-jigging series, it have been loaded a little stiffer blank than other and you can enjoy manipulating jig manually with this 65M at your will. You can handle 80g-150g of Tungsten-jig comfortably with it. If you are going to fish in 100m depth of water or rapid area with fine line, we recommend you to take this 65M.

SeaWalk TAI RUBBER

TAIRUBBER MODEL

SeaWalk Tairubber series, we have differentiated the categories for the 4 rods depending on style and conditions rather than rod power to set them apart from one another. Equipped with not only the lightness of a light game rod, but also the sensitivity and strength, these blanks will be the extension to your arm enabling anglers to go head to head with monstrous snapper exceeding 80cm in length. We hope you can experience our exquisite blanks that will shine a new light into your snapper game.

For more details of category
YB Official Web site

70AT

PRICE :
LURE : 60~150g (Tairubber)
LINE : PE 0.6~1

●Length: 2143mm (Closed length: 1624mm)

●Weight: 134g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: PULS17 (Fuji) Down lock nut

●Target: Red Sea Bream

●Lure: Tairubber

An all-round Tairubber model with a refined blank for smooth hook-ups.

This is a specialized model to automatically hook up snapper by simply continuing to reeling in your rig following the small nibbles which frequently occur prior to the main bite. The automatic yet smooth hooking of the fish is brought on by the flexible yet powerful blank. This model is the backbone for the series and can be recommended for use in various field conditions.

611D

PRICE :
LURE : 100~250g (Tairubber)
LINE : PE 0.8~1.2

●Length: 2125mm (Closed length: 1550mm)

●Weight: 179g

●Suitable reel size: D: 200~300 Electric reel: 200 S: 200~300 Electric reel: 600

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: PLS18 (Fuji) Down lock nut

●Target: Red Sea Bream

●Lure: Tairubber

A special tai rubber model that packs deep-water performance into a light, responsive blank.

Anglers will have to utilize heavy weight Tairubber jigs when fishing in 100m of water. This model is specifically designed to enable anglers to easily handle these heavy rigs. The blank was shaped to reduce the heavy load on the angler during the reeling of the heavy rig from the deep waters in intricate current conditions. We were able to create this rod with attention to the smallest detail in components for anglers to enjoy the Tairubber game in the deep waters.

72S

PRICE :
LURE : 30~100g (Tairubber)
LINE : PE 0.4~0.8

●Length: 2185mm (Closed length: 1118mm)

●Weight: 100g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: PMS17 (Fuji) Down lock nut

●Target: Red Sea Bream

●Lure: Tairubber

An ultra-sensitive model that combines lightness and feel to hook even the slightest bite.

This is the sensitive Tairubber model packed with our expertise and knowledge from producing light game rods. It has the most flexible tip section of the series and its outstanding sensitivity will allow anglers to successfully hook up the slightest of bites. The sensitive tip will transmit the vital information of the current and the slightest nibbles from the fish through the sensitive blank and successfully lead to a hookup. This model will become your biggest asset in situations where the fish are reluctant to take a proper bite and the flow of the current is super weak.

60F

PRICE :
LURE : 60~120g (Tairubber) / ~100g (Jig)
LINE : PE 0.6~1

●Length: 1853mm (Closed length: 950mm)

●Weight: 100g

●Suitable reel size: D: 100~200 / S: 100~300

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: PULS17 (Fuji) Down lock nut

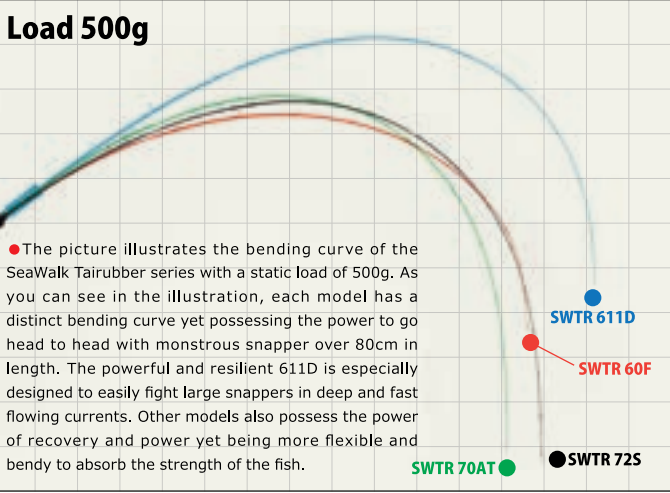

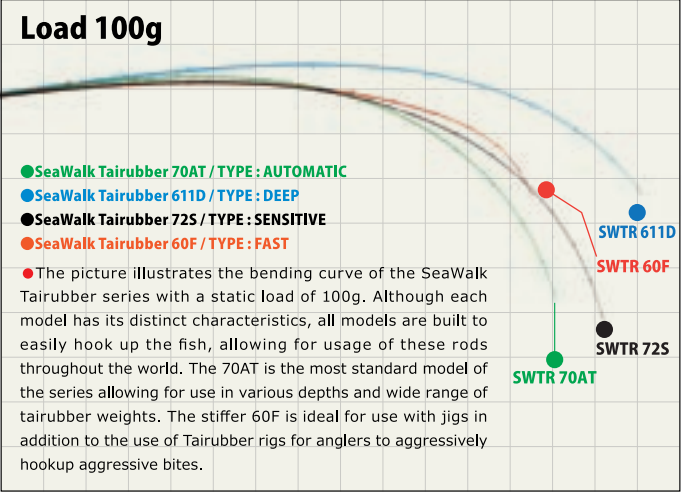

●Target: Red Sea Bream

●Lure: Tairubber - Metal jig

A high-response tai rubber model with fast-recovering blanks for aggressive, high-tempo tactics.

More specifically, the rod is built up of a carbon solid tip to feel for the minute changes in currents and bites and the highly responsive belly section allows anglers to swiftly and aggressively hookup the fish. Although it is short in length with a stiffer blank, the smooth blank taper will reduce the instability when reeling in your rig, enabling anglers to maintain their concentration. We highly recommend this model for those anglers who like to use both Tairubber rigs and snapper jigs depending on the fishing conditions.

SeaWalk Tairubber BENDING CURVES

※These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

SeaWalk CAST JIGGING

CAST JIGGING MODEL

Seawalk Cast Jigging 'Swim & Skip' is the one of the light jigging series "Seawalk" for inshore boat games. It is a series that pursues performance to efficiently explore a wide range by casting metal jigs, plugs, jig heads, etc., and two models which is different power classes, 71ML and 73M are lined up. It is a series aiming at multiple targets by capturing a wide range and all layers of waters by letting lure "swim" (just winding) and the letting lure "skip" (lift and fall, wind, etc.) on the bottom of the sea. The main concept is to enjoy a fishing from the boat simply and easily.

For more details of category
YB Official Web site

71ML

PRICE :
CAST WEIGHT : Max 40g / Under Cast Max 60g

LINE : Max PE 1.5

●Length: 2170mm (Closed length: 1118mm)

●Weight: 116g

●Suitable reel size: D: 4000~6000 (SW4000~SW6000) S: 4000~C5000 (SW4000~SW6000)

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: DPS17 - BACK STOP Double Nut (Fuji) / Up lock nut

●Target: Small sized Blue-runner (Bonito - Spanish mackerel - Dolphinfish) - Various rock fish - Red sea bream - Flatfish - Seabass

●Lure: Metal Jig - Blade Jig - Vibration plug - Jighead+Soft plastic

This model is the core of cast jigging, with a sensitive tip and belly for long-cast performance and stable retrieves.

With its flexible tip and belly section, it is a model that has improved the basic performance of cast jigging that suppresses blurring and flapping of jig even during high speed reeling, realizing stable reeling comfort and smooth hooking. It is easy to cast over and under hand, and even though it is ML power class, the butt section keeps unexpectedly big fish under control. From shallow area to depths around 20m, while capturing multiple fish species with blade jigs, metal vibrations, and Inchiku, in sandy areas, 71ML work effectively to aim Flounder or Flathead with jig heads + worms by taking advantage of the high sensitivity.

73M

PRICE :
CAST WEIGHT : Max 60g / Under Cast Max 80g

●Length: 2228mm (Closed length: 1147mm)

●Weight: 118g

●Suitable reel size: D: 4000~6000 (SW4000~SW6000) S: 4000~C5000 (SW4000~SW6000)

●Guide: SiC-S Stainless frame K Guide (Fuji)

●Reel Seat: DPS17 - BACK STOP Double Nut (Fuji) / Up lock nut

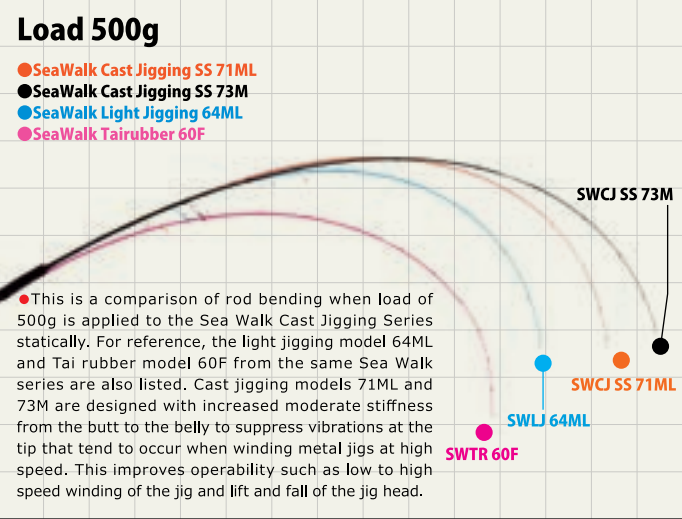

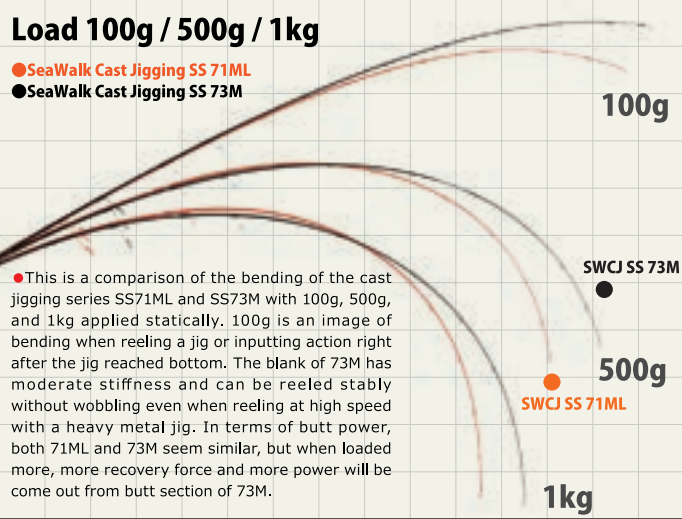

●Target: Small sized Blue-runner (Bonito - Spanish mackerel - Dolphinfish) - Various rock fish - Red sea bream - Flatfish - Seabass

●Lure: Metal Jig - Blade Jig - Vibration plug - Jighead+Soft plastic

This is a model that masters various lures with high-response operability to capture a wide range and deep waters.

73M has a more moderate stiffness than 71ML, and is designed to capture a wide range and deeper areas while using metal jigs up to 80g. It allows you to cast heavy lures farther than expected with light effort, even underhand, and is well suited not only to metal jigs but also to heavy minnows, sinking pencils, and jerkbaits that emphasize lure action. It is also recommended for targeting migratory fish feeding near the surface, rockfish using the wind method with a heavy jighead + worm, or the lift-and-fall method over rocky reefs. This is an almighty model that covers a variety of styles with just the 73M.

SeaWalk Cast Jigging BENDING CURVES

SeaWalk Tairubber 611D

SeaWalk Cast Jigging SS 71ML

For more details of category YB Official Web site

The BattleWhip TR series is an aggressive tip-run lineup that lets anglers manipulate squid jigs with the ease of light game fishing, using delicate, high-sensitivity performance to actively detect and hook even the slightest bites. Newly added for 2026, the TR510/N is another “no-look tip-run model” that inherits the lineage of the TR63/N. By blending High tactile sensitivity, operability, and tracking performance at a high level, it excels with small jigs and in shallow areas, as well as in diverse situations such as night tip-run fishing.

REEL BALANCE POSITION

150g **200g**

Reel Balance Indicator

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

A new no-look model built to excel in technical applications. Its light, crisp jerking feel makes it a true trump card for drawing strikes.

This is a short-length, “no-look” model that enhances sensitivity for no-look tip-run fishing. Anglers will be able to sense the slight touches through the sensitive blank without the need to visually check for contact from the squid. The slightly longer carbon solid tip has an increased sensitivity even when using lightweight squid jigs. It feels very light to use, yet it is capable of handling weights up to 50g in tough conditions. Anglers will be able to experience its true potential in tough situations, shallow areas and night tip-run fishing. (Carbon solid tip model)

510N

PRICE:
EGI: 14~50g **LINE: PE 0.4~0.8**
DEPTH: 10~40m

- Length: 1801mm (Closed length: 925mm)
- Weight: 69g
- Suitable reel size: D: LT2000~3000C / S: 2000~C3000
- Guide: SIC-S stainless frame K guide + LDB guide (Fuji)
- Target: Squid
- Lure: Egi
- Reel seat: VSS16 (Fuji) / Down lock

63N

PRICE:
EGI: 30~60g **LINE: PE 0.4~0.8**
DEPTH: 20~50m

- Length: 1920mm (Closed length: 975mm)
- Weight: 75g
- Suitable reel size: D: LT2500C~3000C / S: 2500~C3000
- Guide: SIC-S stainless frame K guide + LDB guide (Fuji)
- Target: Squid
- Lure: Egi
- Reel seat: VSS16 (Fuji) / Down lock

High sensitivity for reliable hook-ups is thoroughly pursued. Signals are transmitted not only visually, but also directly through the hand.

Making use of advantage of high sensitivity accumulated from light game scene, blanks transmit slightly touch of squid. This characteristic of TR63/N makes you to distinguish activity of squid and to stay focused even you faced touch condition. This is for the angler who does not want to lose opportunity of catching squid. You do not have to look at tip to get indication of vital information. Blanks definitely transmits signal to your hand. All you have to do is just feel it! TR63/N will make differences for sure. (Carbon Solid Tip model)

73S

PRICE:
EGI: 20~40g **LINE: PE 0.4~0.8**
DEPTH: ~30m

- Length: 2225mm (Closed length: 1145mm)
- Weight: 83g
- Suitable reel size: D: LT2500C~3000C / S: 2500~C3000
- Guide: SIC-S stainless frame K guide + LDB guide (Fuji)
- Target: Squid
- Lure: Egi
- Reel seat: VSS16 (Fuji) / Down lock

A multi-purpose model offering versatility across a wide range of styles. Enjoy everything from shallow-water tip-run eging to boat eging.

This is specialized model with high sensitivity and operability to cover from shallow to 30m depth of water. 7.3ft length of blanks will help you to stay your Egi still even you fish from mid-large boat or in situation that you are struggled in welter of the sea surface. You can fish with S-Fall techniques while taking advantage of its length. Of course, casting game is available with this versatile model. We believe that you will be able to enjoy the variety of situation and method of squid games with this TR 73/S. (Carbon Solid Tip model)

69D

PRICE:
EGI: 50~80g **LINE: PE 0.6~1**
DEPTH: 40~90m

- Length: 2755mm Closed length: 1060mm
- Weight: 80g
- Suitable reel size: D: LT2000~4000C / S: 2000~4000
- Guide: SIC-S stainless frame K guide + LDB guide (Fuji)
- Target: Squid
- Lure: Egi
- Reel seat: VSS16 (Fuji) / Down lock

A power model built to dominate deep water. Handles heavy-weight egi with ease for quick, decisive presentations.

This is the most powerful model in this series to cover area such as deep and rapid water. If you aim huge squid in tough area such as current runs rapidly or deep water around 40m or more, TR69/D is the best choice. It will be bent very smoothly while accumulating huge power of recovery inside of blanks themselves to lift even squid much bigger than you have thought. This is for anglers who wish to explore untouched area for aiming massive squids. (Carbon Solid Tip model)

BattleWhip TR Series BENDING CURVES

*These images are not illustrated on the full potential or characteristics of rods. Please understand that these pictures are taken under the limited situation and it was loaded with weight on rods gently.

Load 250g

- BattleWhip TR510/N
- BattleWhip TR63/N
- BattleWhip TR73/S
- BattleWhip TR69/D

TR510/N ● TR63/N ● TR69/D ● TR73/S

● The TR73/S is the longest model in the series, with a longer solid tip. This makes it less susceptible to waves when detecting bites, and allows for longer strokes to lure the fish.

● TR69/D is a power model designed for deep water and strong currents, yet it never feels heavy in hand. It excels not only in deep water but also in situations that call for heavier-than-standard egi and fast-fall, high-speed approaches.

Load 30g

- BattleWhip TR510/N
- BattleWhip TR63/N

TR510/N ● TR63/N

Load 50g

- BattleWhip TR510/N
- BattleWhip TR63/N

TR510/N ● TR63/N

● TR63/N excels in sensitivity and response, with a design focused on precise egi control. The firm blank suppresses unwanted tip noise, maintaining clear sensitivity even when the boat is rocking in short, choppy conditions.

● TR510/N features a redesigned blank with an extended carbon solid tip. This improves the handling of lightweight egi and significantly enhances the feel and smoothness of the jerking action.

Precaution for carbon solid tip model

Carbon solid tip is loaded to TR series and IM series. Tubular tip is loaded to OR model

Thread color of tip is orange to increase visibility.

● As we have mentioned, TR&IM series have been loaded carbon solid tip. The material of carbon solid tip is extremely delicate and fragile. So please careful with shock of impact and handle gentry when you fish and shored them with care. Although you can fish in properly use with them, it might be cause of breakage of carbon solid tip if you retrieve your lure too much or wind up knot into top guide.

Two IKA Metal Model paintball markers are shown. The top marker is the Model 698, and the bottom marker is the Model 511S. Both are black with red and white text. The Model 698 has 'IKA 698' and 'IKA Metal Model' printed on it. The Model 511S has 'IKA 511S' and 'IKA Metal Model' printed on it. Both markers have 'Barrel Whop' and 'IKA' logos on the barrel. The Model 698 has a red trigger guard and a red magazine. The Model 511S has a black trigger guard and a black magazine.

Carbon solid tip lets you know vital information visibly and transmits a lot of information to your finger through blanks. Although it has flexibility and sensitivity, once you have sensed a touch of squid you can strike aggressively without any delay thanks to moderate stiffness and power of recovery which also help anglers to lift huge squid up from the bottom of the sea. Taking advantage of IM69/B overhead model, we hope that you hunt squid as many as you have wished. (Carbon Solid Tip model)

• This is a comparison of 4 models of BattleWhip IM models with the angle of the rod almost horizontal with a static load of 150g. Due to the flexibility and bending of the tip section of the IM69S&B model, the slightest touches from squid will transmit to large movements of the tip for anglers to visually recognize the bite. The 511S&B is a model specialized to aggressively hookup the squid with its highly responsive operability. By reducing the bending of the blank, anglers can directly feel for the bites while improving the operability of the egl. It is a model that will expedite the reaction speed of anglers making it way more fun to fish with.

Two OMORIG Model 72C and 608C cables are shown. The 72C cable is black with orange and white text, and the 608C cable is black with white text. Both cables have a braided shield and a braided drain wire. The 72C cable has a length of 100 feet (30.5 meters) and a diameter of 0.125 inches (3.18 mm). The 608C cable has a length of 100 feet (30.5 meters) and a diameter of 0.125 inches (3.18 mm).

OMORIG MODEL

This mark shows the balance point when a reel is equipped. It does not represent a recommended reel weight, so please use it only as a reference for overall tackle balance.

Why bait tackle? Simply there are many advantages. Just to mention a few, anglers can easily cast heavy rigs, capture the range easily with the counter on the reel, easily determine a bite and the powerful winding ability of bait casting reels. The 60B/C is a model dedicated to Bait Omorig to make the most of its advantages in the squidging game. In situations where Omorig out fishes any other technique, we are confident that this rod will produce your results. (Tubular tip model)

Load 150g

● BattleWhip OR 60B/C

● BattleWhip OR 72/C

OR60B/C

OR72/C

● This is a comparison of the two models of BattleWhip OR with the angle of the rod almost horizontal with astatic load of 150g. The OR60B/C is designed for use with 190~225g usage vertically but can also easily cast and control 150g with the powerful butt section. Although the stiffness of the tip has been reduced for anglers to visually recognize the bites, the highly sensitive tubular blank transmits the slightest changes under the surface directly to your hands. The OR72/C is designed with a bendy tip section for anglers to easily recognize the slightest touches from the squid even when the rod is loaded with the weight of the sinker or jig. Anglers will easily be able to cast and control the 150g rigs in the depth thanks to the sharp belly to butt section of the rod.

74/3 RGD ●

81/10 TRQ

83/6 FLX

81/8 FLX

79/5 RGD

76/4 RGD

83/2 FLX

When comparing the bending curve of the “83/2FLX” and the “74/3RGD” of the PE2~3 line class light casting models, the stronger “74/3RGD” seems to look more flexible, however this is due to the different concepts of each model.

●83/2FLX

This model specializes in long-distance casting and controlling the diving pencils naturally. The blank design allows the rod to bend smoothly from the tip to the belly section and continuing on to bend even deeper towards the butt section. Although the butt power is comparable to that of the PE3 line class, you will notice that the light controllability of the rod is of the PE2 line class.

●74/3RGD

Although it has a large bending curve similar to the “83/2FLX”, the short length of the rod has given it a highly responsive and sharp qualities. The bending point is set closer towards the anglers allowing for easier control of lures.

●76/4RGD · 79/5RGD

Thanks to the compact handling of the rod, this model is highly versatile and is outstanding with its lure operability. Although both models are designed with increased stiffness, the butt section of the 76/4RGD tenaciously bends in once the weight of the fish is loaded during the fight, reducing the physical strain on the angler. Even smaller anglers with less physical strength will comfortable be able to utilize this rod.

JIGGING MODEL

YAMAGA Blanks jigging rods combine power and precise control with a true 1-piece construction for consistent bend and fast recovery. Spinning models 632S, 633S and 634S offer smooth, stable jerks even during doterra drifting, while the 585S delivers sharp response for high-pitch and one-pitch vertical jigging. The three baitcasting models maximize the strengths of bait reels in winding and fall control, with strong yet forgiving recovery for precise, subtle to aggressive jig action.

For more details of category
YB Official Web site

632S

PRICE :
LURE : Jig Max 140g LINE : Max PE 2
DRAG : Max 3kg/45°

- Length : 1915mm ●Weight : 169g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS18 (Fuji) / Up lock nut
- Suitable reel size : D · S : 5000~6000
- Target : Blue runner
- Field : Depth to about 60m

This model delivers a highly sensitive feel.
Its blank features moderate stiffness and a crisp, responsive recovery.

This is the lightest model of spinning which have high flexibility on tip and belly section. Although it has flexibility and high sensitivity to sense slightly changes of current and reducing the chance of breaking line or hook, once loaded heavily tough butt section keep unexpected huge fish under control. If you focus to input the load on belly section, jig will swim very smoothly without unnatural movement.

633S

PRICE :
LURE : Jig Max 180g LINE : Max PE 3
DRAG : Max 4kg/45°

- Length : 1915mm ●Weight : 178g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS18 (Fuji) / Up lock nut
- Suitable reel size : D · S : 5000~6000
- Target : Blue runner
- Field : Depth to about 80m

An all-round model offering precise control and high sensitivity,
capable of handling a wide range of challenging waters and situations.

You can call this 633S all rounder of inshore jigging model. Sometimes you have to do one pitch jerk on horizontally, combination jerk on vertically with just one stick. 633S work well on various kind of jigging situation as an all rounder. You can sense even a small vital information so if the target would not take your jig then you can switch the rhythm of jerking to let them bite. If you fish with jig around 150g please take 633S or if you use around 120g mainly, 632S is the best choice.

634S

PRICE :
LURE : Jig Max 220g LINE : Max PE 4
DRAG : Max 6kg/45°

- Length : 1915mm ●Weight : 196g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS18 (Fuji) / Up lock nut
- Suitable reel size : D · S : 6000~8000
- Target : Blue runner · Tuna
- Field : Depth to about 100m

Combines strong power with agile handling in a well-balanced blank,
making it versatile enough to tackle everything from shallow to deep water.

If you face the situation that you are required to move long jig naturally, to input load effectively on deep or rapid area, even on horizontally jigging in windy condition, 634S will cover all of these without any anxious. You will realise that 634S have massive power to fight with kingfish at shallow or rough reef. The versatility of 634S enable you to jerk in one pitch or combinational jerk if you necessary to approach with different method.

585S

PRICE :
LURE : Jig Max 280g LINE : Max PE 5
DRAG : Max 8kg/45°

- Length : 1745mm ●Weight : 212g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : DPS18 (Fuji) / Up lock nut
- Suitable reel size : D · S : 8000~10000
- Target : Huge Blue runner · Tuna
- Field : Depth to about 120m

Designed for working deep water effectively,
delivering seamless jerks with its powerful and responsive recovery.

585S have been designed to control the game of kingfish or amberjack without losing initiative. Short and fine blank of 585S enable you to jerk jig aggressively does not matter the shape of Jig to approach the target. Of course, butt section has enough power to keep giving pressure on fish with PES. If you wish to fall jig vertically and jerk aggressively to aim huge one at fish bed or rough reef, 585S is the perfect choice for sure.

622B

PRICE :

- Target : Blue runner
- Field : Depth to about 100m

The lightest model in the series,
yet powerful enough to control blue runners around 10 kg.

If you are going to aim at small sized Blue Runner with PE 3, this 633 would be a perfect choice. Even though automatic reeling at constant speed, flexibility of tip and belly section will help you to jerk jig comfortably and set hook on with less failure. It will bend very much when fish is on, but you can fight with fun without any worry. You will be surprised that potential which is hidden inside blank of 633 for sure.

624B

PRICE :
LURE : Jig Max 250g LINE : ~PE 5
DRAG : Max 6.5kg/45°

- Length : 1905mm ●Weight : 199g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : TCS18 (Fuji) / Down lock nut
- Suitable reel size : D · S : 1000~2000
- Target : Blue runner · Tuna
- Field : Depth to about 150m

This is the standard electric-reel-compatible model
that allows easy jig action from shallow to deep waters.

This is standard jigging rod for ER to aim bluerunner around 5kg. You can be reeling with any speed thanks to nice and flexible tip section, then you can give the action to jig at your own will. If you hooked bluerunner more than 10kg, you do not have to worry about anything! It will enable you to keep it under control without being anxious. We believe that it may be allowed to call almighty jigging rod for ER and we want anglers all over the world to fish with it.

586B

PRICE :
LURE : Jig Max 350g LINE : ~PE 6
DRAG : Max 10kg/45°

- Length : 1740mm ●Weight : 269g
- Guide : SIC-S Stainless frame K Guide (Fuji)
- Reel Seat : TCS18 (Fuji) / Down lock nut
- Suitable reel size : D · S : 2000~3000
- Target : Huge Blue runner · Tuna
- Field : Depth to about 200m

A power model with strong recovery performance
that supports anglers and enables battles with huge targets in deep water.

If you are going to aim king fish or yellow tail over 10kg we recommend you to choose this monster hunter. You can give action to jig around 300g in 100m depth of the sea effectively. It is going to help you to jerk heavy jig without any burden or stress and to fight with big fish with huge advantage thanks to its flexibility, toughness, and versatility. Fulcrum point is going to move to butt section when you fight It is not just stiff rod, you can use it feel like your arm for sure.

594S

PRICE :
LURE : Jig Max 240g **LINE : Max PE 4**
DRAW : Max 6.5kg/45°

- Length : 1775mm (Closed Length : 1135mm)
- Weight : 221g
- Suitable reel size : D・S : 6000~8000
- Guide : SIC-S+SIC stainless frame K guide (Fuji)
- Target : Huge Blue runner
- Field : Depth to about 150m
- Reel Seat : DPS18 (Fuji) / Up lock nut

A model with strong butt power that combines lightness and strength to fully exploit the advantages of a 2-piece design.

If you aim kingfish or amberjack at near shore on expedition with around PE4, this 594S is the best choice. Lightness feeling of manipulation that is loaded as common characteristics of TRAVEX series enable you to handle long jig naturally at horizontally or to jerk jig aggressively at vertically. When you fish at fish bed with rough bottom or shallow area to aim tough target, you do not have to afraid to let it stop forcefully and aggressively without losing your initiative.

595S

PRICE :
LURE : Jig Max 320g **LINE : Max PE 5**
DRAW : Max 8.5kg/45°

- Length : 1780mm (Closed Length : 1130mm)
- Weight : 279g
- Suitable reel size : D・S : 8000~10000
- Guide : Super Ocean guide (Fuji)
- Target : Huge Blue runner-Tuna
- Field : Depth to about 200m
- Reel Seat : DPS20 (Fuji) / Up lock nut

This model offers the power, flexibility, and high operability needed for landing big fish with vertical jerking techniques.

If you have plan to go to southern island of Japan or deep sea of overseas to aim large amberjack, dogtooth tuna or yellowfin tuna, please take 595S without hesitations. Tip section have been adjusted to become little flexible for increasing ability of manipulation and reducing burden of anglers when they jerk aggressively. Once huge fish is on, you will notice that it bends very smoothly and you might forget that it is 2pics grip jointed.

Galahad Series BENDING CURVES

● This is a comparison of the bend in the Gallahad jigging models under a static 3 kg load. The 632S, 633S, and 634S are highly versatile models with a supple action from tip to belly that also suits doterra drift jigging. Their one-piece construction allows the entire rod to bend with strong resilience during the fight. The 585S is designed for vertical jigging, featuring a firmer action throughout the blank, while the bait models have a reinforced butt section to deliver a crisp and responsive handling feel.

Galahad 632S

● This is a comparison of the bend in the Gallahad Travex 2-piece models under a static 3 kg load. All three models feature strong, firm blanks with ample stiffness in the butt section. By setting the bending fulcrum closer to the tip, they deliver sharp, highly responsive actions across a wide range of jigging styles. These rods enable a different approach from the Gallahad jigging models, allowing anglers to apply strategic jigging methods tailored to specific targets and conditions.

Galahad TRAVEX 593S

● This is a comparison of the bend in the Gallahad electric-jigging models under a static 3 kg load. To accommodate electric reeling jerks, the blanks are designed with suppleness from the tip through the belly. The bending fulcrum is set closer to the angler to reduce fatigue during operation and fighting. Within the series, the 624B Electric offers the widest versatility, the 633B Electric is best suited for nearshore use, and the 586B Electric is positioned as the optimal model for expeditions and remote islands.
